E. Cushman, 4.9 ac. in Jackson County; Quitclaim deed conveying to Jonas C. Rowan 0.08 acre in Curry County.

Portland, Oregon, July 28, 1937

The State Highway Commission met in special session at 9:30 o'clock p. m. in the Rose Room of the Benson Hotel for consideration and disposal of accumulated routine matters. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

A delegation from Roseburg consisting of County Judge George K. Quine, A. C. Marsters, Senator C. W. Clark, and W. C. Harding, Secretary of the Roseburg Chamber of Commerce, was present in the interests of the North Umpqua road. They renewed their request for the designation of this road as a federal aid secondary state highway and reiterated arguments previously submitted in support thereof. They were informed that the Commission cannot do what they ask without deviating from its established policy in regard to such matters and without destroying the rights of the other counties and districts of the state to their just share of the state highway revenues; however, the Commission is willing to consider designating a portion of this road, from Roseburg to Glide, as a federal aid secondary highway when the selection of roads for such system is discussed later in the year.

Mr. Marsters then brought up for discussion the matter of the state obtaining a lease of the Murphy gravel pit which is owned by the county and which the state needs for a surfacing contract between Wilson Ranch and Paradise Creek on the Umpqua Highway in Douglas County, the contract for which has already been awarded. He said that the County Court is two to one against deeding or leasing this property to the state and, if the state has to have it, he would recommend that it be acquired by condemnation. Judge Quine concurred in the recommendation. The Commission's Attorney advised that the Commission has legal authority to condemn the property if it cares to. The Engineer advised that the gravel bar is badly needed for highway purposes and the right of way between the highway and the bar is also needed. Chairman Cabell expressed his reluctance to condemn county-owned property which, to him, would be working against the county court rather than in harmony with it. After discussion, the Commission deferred a decision in the matter until later.

The Commission discussed, with the following employees of the State Highway Department, matters pertaining to the derailment of the O.W.R. & N. Company's train near Multnomah Falls on the 21st day of February, 1936: J. N. Bishop, Maintenance Engineer; K. D. Lytle, Division Engineer; William E. Chandler, Division Engineer; W. S. Hodge, District Maintenance Superintendent; W. M. Strohmeyer, District Maintenance Superintendent; and C. Z. Carns, Foreman in charge of snow removal operations. Each of these employees was questioned in order to secure his version of the cause of the wreck and to place the responsibility for the same, with a view in mind of obtaining information with which to refute the claim of the O.W.R. & N. Company for damages,

JUL 28 1937

et cetera, which it alleges it suffered by reason of the said wreck, it being the contention of the railroad company that the wreck resulted from snow being thrown on its tracks by Highway Department forces in connection with snow removal operations on the Columbia River Highway nearby. The company submitted a claim in the amount of \$5,176.04 and advised that such claim would be supplemented by others as soon as they have been determined.

It was the consensus of opinion of the above employees that the State Highway Department is in no way responsible for the derailment of the train although some snow was thrown from the highway onto the railroad tracks, but that the wreck was caused by a faulty rail and negligence on the part of the railroad company's watchmen.

It was brought out in the discussion that the railroad company wishes to arbitrate this matter if the Commission is not disposed to settle. The Commission took the attitude that the Highway Department and the railroad company are both partially to blame, therefore, both should assume the payment of a portion of the expense involved. Chairman Cabell was authorized by the Commission to discuss the matter with Mr. A. C. Spencer, Counsel for the Union Pacific System, and to suggest settlement on the following basis in view of the contention of the Commission that both parties are more or less to blame for the accident: the state to reimburse the company for the cost of removing snow that was placed on the railroad company's tracks by Highway Department forces, the balance of the expense to be assumed by the railroad company and the state equally. In the event the railroad company will not settle on such basis, then the Commission will agree to submit the matter to arbitration if it has to but would prefer settlement otherwise.

The Commission adjourned at 10:45 o'clock p. m. to reconvene at 9:00 o'clock the following morning in the same room.

Portland, Oregon, July 29, 1937

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Rose Room of the Benson Hotel with all members, the State Highway Engineer, the Attorney and the Secretary present.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

JUL 28 1937

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney presented an option secured from James C. Hamill for the purchase, for the sum of \$1,000, of seven lots adjoining Silver Creek Falls State Park in Marion County. He explained that this is a 20-day option and must be completed within the next few days, otherwise it will lapse. The Commission preferred to discuss this matter with the Parks Superintendent before making its decision. Accordingly, the matter was referred to Chairman Cabell with power to act after securing the Parks Superintendent's ideas.

In this connection the Attorney advised that it is quite likely condemnation proceedings will have to be resorted to in order to acquire additional lots that are needed to fill out this park area, especially property owned by a Mr. Fred Volz. He requested authority to institute such proceedings if further negotiations reveal that to be necessary. The Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, by the terms and provisions of Chapter 201, General Laws of Oregon, 1925, and other laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance, and operation of parks, parking places, automobile camps, camp sites, public squares, recreation grounds or resorts and land for the preservation of trees or timber growing thereon; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience of and is for the best interest of the general public that there be acquired for public purposes, to wit: for the purpose of developing and maintaining a park, parking place, automobile camp, recreation ground and/or resort, and for the purpose of making it possible for the Highway Commission to preserve the timber growing thereon, the following described parcels of land, to wit:

Fred Volz, Kittie Volz and Ruth Volz property:

Blocks 12, 13, 14, 15, 16, 17, 18, 19 and 20; Lots 1, 2, 3, 4, 5, 12, 13, 14, 15, and 16 of Block 21; all of Blocks 22 and 23; Lots 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15 of Block 24; all of Blocks 25, 26, 27, 28, 29, 30, 31, 32, and 33; and fractional Blocks 34, 35, 36, 37, 38, and the north 70 feet of Blocks 39, 40, 41, 42, 43 and 44 of Silver Falls City, located in Section 14, Township 8 South, Range 1 East, W. M., Marion County, Oregon.

A. E. Crosby property:

Lot 2, Block 26 of Silver Falls City, located in Section 14, Township 8 South, Range 1 East, W. M., Marion County, Oregon.

and

WHEREAS, in the opinion and judgment of the State Highway Commission it is necessary that title to the said parcels of land be procured for the purposes herein stated;

NOW, THEREFORE, BE IT RESOLVED that the said parcels or tracts of land be and the same hereby are declared by this resolution to be necessary for the purposes herein stated; and

BE IT FURTHER RESOLVED that title to the said parcels or tracts of land be acquired by the State of Oregon for the purposes herein stated.

BE IT FURTHER RESOLVED that the best interests and convenience of the general public require that title to the said tracts of land be acquired for the purpose of developing and maintaining the same for park, parking place, automobile camp, recreation grounds and resort purposes, and for the purpose of preserving the timber growing thereon and making the said parcels or tracts of land generally available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that an effort be made to agree with the owner or owners of the said parcels or tracts of land upon the compensation to be paid for the taking of the same and the damage, if any there be, and in the event that no satisfactory agreement can be reached it is further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission be and they are hereby requested to negotiate with the said owners for the purchase and acquisition of the said parcels or tracts of land, and in the event that they are unable to reach a satisfactory agreement with the owners of said parcels of land they are hereby requested and instructed to commence and prosecute to a final determination such actions, suits, or proceedings as may be necessary and appropriate to acquire title in and to the said parcels or tracts of land and all rights therein for the purposes herein stated.

The Attorney reported the results of negotiations with Mr. J. B. Laber for right of way needed for the Eagle Creek-Cascade Locks Section of the Columbia River Highway. He advised that Mr. Laber demands a lump sum of \$350 for 1.53 acres required which, in his estimation, is exorbitant. He recommended condemnation in the event that Mr. Laber will not reduce the price. The Commission approved the recommendation by unanimous vote.

JUL 29 1937

The Attorney requested authority to institute condemnation proceedings to acquire right of way needed for the Short Sand Beach Creek Section of the Oregon Coast Highway across property owned by The Preston Company, a Michigan corporation, negotiations with the company having proved unavailing. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOT, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to-wit:

Short Sand Beach Creek Section of the Oregon Coast Highway
land and property owned by or in possession of the following parties and/or persons, to-wit:

The Preston Company, a Michigan corporation

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

- - - - -

The Commission had under consideration the matter of securing title insurance in connection with real property purchases and decided to continue the present practice in regard thereto.

Reconsideration was given by the Commission to the use of the Pacific Highway right of way, a short distance north of Drain, by the Earl Harris Lumber Company for the conduct of its lumber business. The Engineer advised that the company was ordered to discontinue its operations on the highway right of way but refused to do so. The Commission thereupon instructed the Attorney to take the necessary legal steps to force the company to discontinue its operations on this road.

The Attorney requested instructions in regard to the acquisition of right of way for the proposed rerouting of the Pacific Highway East through the town of Albany. The Commission authorized him to take options for such right of way at once and to ask the Linn County Court and the Albany City Council to refrain from disposing of any of their property across which the new highway is routed until it has been determined definitely whether or not the State needs it.

The Attorney reported receipt of a letter from Mr. A. K. McMahan, Attorney for the Mountain States Power Company, Albany, Oregon, with respect to the power company's franchise to occupy certain streets in Albany with its water mains. It appears that the power company has had a franchise for many years granting it the privilege of constructing and maintaining water pipes on city streets in Albany and that the company has a large main that will be affected by the proposed rerouting of the Pacific Highway through this town; further, that it will cost a considerable sum to reconstruct this pipe line to fit the highway improvement and that the company is of the belief that the state should assume this expense in view of its franchise but is willing to cooperate with the state in the reconstruction of its facilities. The Attorney suggested that, inasmuch as the company's right to maintain its pipe lines on the Albany city streets is of long standing, it would probably be advisable to enter into some sort of agreement with the company and the City of Albany with respect to the readjustment of the pipe line facilities. The Commission deferred action on this matter pending investigation and report by the Engineer.

The Commission considered and signed an application directed to the Secretary of the Interior with respect to the acquisition of government-owned land that is needed for right of way for the Robinette-Homestead Secondary Highway No. 412 in Baker County.

The Commission had under discussion the claim of Mr. Jack Robertson for damages to his property that he alleges resulted from the construction of the Barron Creek-Siskiyou Summit Section of the Pacific Highway in Jackson County. It appears that a deep cut was made through Mr. Robertson's property and, since the construction of the same, a slide has developed which endangers his house located at the top of the cut, in fact, conditions are such that it is no longer safe for Mr. Robertson to occupy the house and he is seeking damages from the state by reason thereof. The Attorney confirmed Mr. Robertson's statement that Division Engineer Lytle, who was present, stated that there is no question but that the highway improvement caused the slide and the unsafe condition of the house. He recommended that the Highway Commission buy Mr. Robertson's house and pay him a certain amount as damages. After discussion, the Commission by unanimous vote authorized the Attorney to negotiate a settlement with Mr. Robertson on the theory that the state is liable for the damage that has occurred.

The Commission also had under consideration the claim of Mr. Al Campbell for extra compensation for removing what is known as the Frances Gray building from the newly acquired right of way for the Pacific Highway at Halsey. It appears that Mr. Campbell offered to remove this house for the sum of \$310 and that the next low bid received was in the sum of \$420. Also, that it actually cost Mr. Campbell \$607.20 to move the building, and he will lose \$297.20 by reason of fulfilling his contract with the Commission unless the Commission will assume this extra expense. Mr. Campbell alleged that he did not know at the time that he submitted his offer the condition of the foundation of the building and that the sills of the same were in a bad condition of decay; further, that it was necessary for him to revise his plans for the removing of the building because of the fact that adjacent property,

across which he contemplated moving the building, was later rendered unavailable for his use. After considerable discussion of this matter and in view of the fact that there was an apparent error in the judgment of both Mr. Campbell and the representative of the State Highway Department, the Commission indicated that it would pay Mr. Campbell at least a portion of this extra expense provided it would not establish a precedent that would act to the State's detriment in disposing of similar claims that might arise in the future. The Commission thereupon referred the matter to the Engineer and the Attorney for further investigation and to work out a solution.

The Commission had under consideration a supplemental report from Division Engineer W. C. Williams in regard to the acquisition of right of way for the John Day-Burns Highway in the town of Canyon City. His original report was to the effect that additional right of way is not absolutely required but, since submitting the same, he has been in further consultation with the city officials who now desire to deed to the state for right of way purposes an additional ten-foot strip on the west side of the highway, which would provide for a 40-foot width on that side of the center line, if the State in return will fill in the area to a level with the highway. The city alleges that, if the State cannot cooperate in this matter, it cannot control encroachments beyond a distance of 30 feet from the highway center line. The Engineer estimated that the cost to fill the area in question, which is about two blocks long, would be approximately \$400. He also estimated the value of the right of way at \$350. He recommended acceptance of the city's offer. The Commission approved the Engineer's recommendation by unanimous vote and referred the matter to him and the Attorney to work out the details.

The Attorney reported that the people of Cottage Grove are extremely anxious for the Commission to proceed with the acquisition of right of way for the proposed revision of the Pacific Highway through that town so that contemplated improvements may go forward. The Commission authorized him to negotiate for such right of way and to take options for the same, at least to make a start. In the discussion of this matter it developed that the location survey has not yet been made for this proposed improvement. The Commission by unanimous vote authorized and instructed the Engineer to make such location survey at once and to furnish the Attorney with descriptions of the property that are needed for right of way.

The Commission had under discussion a letter from the Attorney suggesting, in view of the large amounts that the Commission is spending for right of way for highway improvements, that more study should be made of the cost of right of way in the adoption of highway locations. This matter was discussed at considerable length and, while no definite action was taken thereon, the Commission indicated that it was not in favor of sacrificing proper highway locations for right of way costs.

The Attorney submitted a supplemental report regarding the Olive M. Lee property, a portion of which is required for right of way for a proposed revision of the Oregon Coast Highway between Rocky Creek and Otter Crest in Lincoln County. He said that he originally estimated the value of this property at \$100 per acre but is convinced now, after further study, that the

right of way and the area between the old and new highway locations is worth about \$4,500 or \$5,000. He also said that such estimate is based on conferences that he held with former County Judge Ira Wade of Toledo and Mr. Paul Baird, real estate dealer of Depoe Bay, both of whom estimated the value of the property between \$4,500 and \$5,000. He also quoted from a letter received from Mr. Ed Miller, Manager of the Oregon Coast Highway Association who estimates the value of the right of way at \$6,000 and the value of the entire holdings of Mrs. Lee, aggregating some 50 acres, at \$15,000. The Commission deferred a decision in this matter pending the recommendation of the State Parks Superintendent on August 12. The Attorney was instructed to render a full and complete report on the subject at that time.

The Attorney reported results of negotiations with the Oregon American Lumber Corporation for the acquisition of right of way for the Wolf Creek Highway through the company's holdings. He said that the company accepts the offer of the State to pay \$12,724 for timber taken by the State, which is at the rate of \$3.50 per thousand feet, and accepts the offer of \$800 to cover added costs of logging the timber which has been isolated by the highway; also, it accepts the State's offer of \$162.13 as reimbursement for engineering expense paid by the corporation and \$667.10 for land deeded to the State at the rate of \$10 per acre; but the company will not accept the State's offer of \$1,000 to cover added cost for logging the company's timber that has been isolated to the south and west of the highway but demands instead the payment of \$4,500 for such item. He recalled that the Commission agreed at one time to allow the company to log across the highway and also agreed to restore the roadbed when the hauling was completed, which expense the Engineer estimated at the time would amount to about \$3,000. He gave as his thought that considering this feature it would be advisable to settle with the company for the full amount that it has agreed to accept, namely \$18,853.23. After discussion the Commission, by unanimous vote, authorized settlement on such basis.

The Attorney reported on his investigation of the E. J. Rodgers' matter, at Roseburg, as instructed by the Commission at the previous meeting. He said that he is convinced that Mr. Rodgers did not understand, when he donated the right of way for the Pacific Highway revision in front of his camp ground in Roseburg, that the grade of the new highway would be several feet lower than the present road in front of his premises and, in his estimation, the Commission is justified in reopening this case. He further stated that Division Engineer Lytle estimates that it will cost about \$1,079 to regrade Mr. Rodgers' property so that Mr. Rodgers' cabins will occupy the same relative position with respect to the new highway grade that they occupied with reference to the original street grade. He gave as his thought, under the circumstances, that the Commission is fully justified in helping Mr. Rodgers if it wants to so that he will not lose his investment and, accordingly, recommended that the Commission authorize the regrading of Mr. Rodgers' premises so that the buildings will occupy the same relative position that they occupied before with respect to the street. After discussion, in which it appeared to the Commission that Mr. Rodgers had an honest misunderstanding of the Commission's plans, the Commission approved by unanimous vote an expenditure of state funds for the readjustment of Mr. Rodgers' premises in accordance with the recommendations of the Attorney.

The Commission had under discussion a plan for the disposal of the East Court Street matter in Pendleton, which street was ordered closed by the Public Utilities Commissioner by order No. 3304, dated April 9, 1936, upon completion of the construction of an overhead viaduct over the main line tracks of the O. W. R. & N. Railroad Company at this place. The plan provides for the leaving of East Court Street open for traffic and for the closing of Aura Street which now crosses seven tracks of the railroad company near its depot in Pendleton. It appears that this plan originated with Mayor Lieuellen, Pendleton, and has been approved by the city council and likewise meets with the approval of the Union Pacific System officials. The Engineer advised that, if this plan is adopted, it will be necessary to construct an oil surface on four blocks of city streets adjacent to Aura Street which he estimated would cost about \$1,500, but it would eliminate the necessity for constructing a pedestrian grade separation on East Court Street and would make unnecessary the acquisition of right of way for the proposed connecting street through the Vey property between Benefit Street and Turk Street which involves condemnation. He gave as his thought that the plan is a satisfactory solution of the East Court Street problem and recommended adoption of the same. After considerable discussion the Commission approved the recommendation by unanimous vote upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle. The Engineer was authorized and instructed to proceed with the carrying out of the provisions thereof at once.

The Attorney brought up for discussion and instructions the matter of the controversy between the Commission and the Bridal Veil Timber Company relative to the use and ownership of the real property lying between the high- and low-water mark along the Columbia River in the vicinity of Corbett. It appears that the Bridal Veil Timber Company secured a lease from the Corbett Investment Company for the use of certain land that it needed in connection with its logging operations and has also obtained a permit from the United States War Department authorizing, under certain conditions, the construction of a booming ground for a distance of about 2500 feet along the shore of the Columbia River at this location. Also, the company is now driving two rows of piling, 150 feet apart, on the property owned by the State Highway Commission for use in connection with such booming ground regardless of the rights of the State Highway Commission to control such property, and the company wants the State Highway Commission to pay the cost of moving the piling beyond the limits of the proposed new highway when it becomes necessary for the piling to be moved by reason of the construction of this highway.

The Engineer advised that the State Highway Commission holds a permit granted by the War Department, before the company secured its permit, by which permit the Commission is authorized to construct an embankment along the Columbia River at certain points and under which the Commission is authorized to use the same area for embankment slopes. He gave as his thought that the use of this area by the Bridal Veil Timber Company for its booming ground will interfere with highway construction and suggested that the company be not allowed to place its piling in this area.

After considerable discussion, in which the Commission indicated concurrence in the Engineer's suggestion, the Commission instructed the

Attorney to again contact the officials of the Bridal Veil Timber Company, by letter, and advise them that the State of Oregon, by and through its State Highway Commission, is the owner of the real property lying between high and low-water mark along the Columbia River between certain termini which definitely include the area on which the company proposes to construct its tramway, log dump and booming ground and, therefore, any use of or encroachment upon said property by the Bridal Veil Timber Company is unauthorized and done at the peril of the said company; also that any conferences and/or negotiations with respect to any use of or encroachment upon the state's property or with respect to the contemplated construction of tramway and log dump or booming ground at the site proposed must not be construed or in any way deemed consent to, on the part of the State Highway Commission, or approval of the company's contemplated plans and procedure. He was also instructed to suggest to the company officials the advisability of giving study to the placing of its facilities beyond the reach or effect of the proposed highway embankment so as to cause no interference with highway construction work when that is started.

The Commission adjourned at 12:00 o'clock noon to reconvene at 1:30 o'clock p. m. in the same room.

The State Highway Commission reconvened at 1:30 o'clock p. m. in the Rose Room of the Benson Hotel with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

W. H. Lynch, District Engineer, H. D. Farmer, Senior Highway Engineer, and T. M. Davis, Highway Engineer, representing the Bureau of Public Roads, conferred with the Commission in regard to several mutual road problems. Mr. Lynch advised that on July 8 he reported to the Commission accumulated savings totaling about \$80,000 from forest highway projects recently contracted and since that time additional savings in the amount of approximately \$40,000 have accumulated, making a total of about \$120,000. He recalled that the Commission approved the expenditure of the \$80,000 for additional construction work on the Willamette Highway and that the construction program for this road was rearranged inasmuch as it was thought that, by so doing, the completion of this highway could be advanced about one year. He suggested, inasmuch as there are now \$40,000 additional forest highway funds available for programming, that the original program be restored and that the entire savings, amounting to \$120,000, together with \$20,000 of state money, be used by the Forest Service to finance the construction of the Willamette Highway tunnel, the estimated cost of which, exclusive of lining, is \$140,000. After a considerable discussion Mr. Lynch's suggestion was approved by the Commission subject to the condition that the State will not have to pay its \$20,000 before October 1, 1937. The following program for Willamette Highway construction was thereupon approved by the Commission by unanimous vote: The Bureau of Public Roads shall construct the tunnel section, estimated at \$140,000, and the short section immediately east thereof, estimated at \$100,000. The State Highway Commission shall construct, as a federal aid project, the second section east of the tunnel section which is estimated to cost \$130,000.

JUL 29 1937

Mr. Lynch inquired as to what progress is being made for the acquisition of right of way for the Eagle Creek Forest Highway project on the Columbia River Highway in Hood River and Multnomah Counties. He said that he is ready to advertise this project for bids but cannot do so until the right of way matters have been cleared up. He was informed that the right of way department is ready and anxious to complete the negotiations for such right of way but is precluded from doing so by reason of the fact that the plans for the project have not yet been approved by the O. W. R. & N. Company officials; however, it is thought that the approval of such officials will be received shortly.

The matter of the construction of the state's portion of the Weston-Elgin Highway, extending from Elgin northwesterly to the forest boundary in Union County was brought up for discussion by Mr. Lynch. He said the government work on this road is about completed and, in his estimation, the state should do something soon toward the completion of its section in accordance with previous agreement and understanding. He was informed that the Commission at one time included this project in its proposed P.W.A. program and filed an application with the Federal Government for P.W.A. funds to assist in financing the same but the application was not approved by the officials in Washington, D. C., although it passed the local officials. Further, that on account of a recent change in the rules and regulations governing the P.W.A. grant moneys, there is a possibility that this project along with the others in the program can be revised; hence, the Commission hesitates to allocate other funds for such purposes until it is known definitely whether or not it can secure the P.W.A. funds.

The State Highway Engineer gave as his thought that this information should be available shortly in view of the fact that Congress is contemplating adjournment about the middle of August and the matter should have been disposed of before that time. It was his suggestion that a definite decision in the matter of funds for the Weston-Elgin project should be deferred until it is known whether or not the State is going to secure the P.W.A. moneys. Chairman Cabell concurred. After further discussion Mr. Lynch was informed as follows: That it is the plan of the Commission to contract this work either this fall or in the early spring and to finance the same as a P.W.A. project if possible. In the event that P.W.A. funds cannot be secured, then the Commission will construct it, if possible, as a Federal Aid Secondary Highway or as a strictly State project. The Commission ordered that the Elgin Community Club and others who have made inquiry concerning this job be likewise informed of the Commission's decision.

Mr. Lynch brought up for discussion the matter of financing the proposed Albany grade separation project. He pointed out that there is only \$30,000 of federal grade separation funds unallocated and that the contracting of this project would have to be deferred until next year, when the fiscal year 1939 moneys are available, unless the Highway Commission will agree to advance State money to finance the work until the federal moneys are available. He said that, if the State would advance needed funds, the Government would reimburse the State next year. The Commission deferred a decision in this matter until its meeting on August 12.

Mr. Frank L. Shull, Chairman, Board of County Commissioners, Multnomah County, came before the Commission and requested an advance of a portion of Multnomah County's share of the gasoline and motor vehicle tax fund that is payable to the county in December, 1937. He explained that the county has a number of important road projects that it wishes to complete this year but does not have funds available to finance the same and they would appreciate it if the Commission would grant their request so the jobs can go forward to completion. He estimated that the county would need about \$27,000, of which \$10,000 should be turned over to the county during the month of August and the balance later. The Attorney advised that the Commission has legal authority to do this upon a satisfactory showing by the county that it has not sufficient funds with which to pay, when due, bonded indebtedness incurred for highway purposes. After discussion, and in view of the apparent urgency of the demand, the Commission approved the request by unanimous vote. The matter was referred to the Attorney to discuss the legal features with the District Attorney of Multnomah County and to prepare the necessary papers providing for the payment of \$10,000 to the county in the month of August and a sufficient additional amount after October 1 to meet the county's requirements.

The Commission also discussed with Mr. Shull the matter of preserving the vacant lots which are owned by the county and are situated adjacent to the Pacific Highway West (Barbur Boulevard). The Engineer advised that at a previous meeting the Commission authorized the landscaping of these lots, if the county would deed them to the state, so that the aesthetic features of this road may be preserved. Mr. Shull gave as his thought that the county would accept the state's offer but he requested an opportunity to discuss it with the other members of the Board before making a definite reply. Chairman Cabell advised that he believed the State Highway Commission would be willing to pay the county something for these lots, at least the amount that they have cost the county. Mr. Shull agreed to furnish the Commission with a list of the lots in question and to give the Commission a definite answer shortly.

A similar proposition was agreed to in regard to county-owned land lying along the south side of the O.W.R. & N. railroad between Lombard Street and Sandy Boulevard, the route of the proposed secondary state highway. The Commission referred this matter to the Assistant Attorney, J. W. De Souza, to work out the details with Mr. Shull.

The Engineer reported on the matter of rerouting the state highway along Astor Street in the city of Astoria as previously ordered by the Commission. He stated that the right of way for the westerly end of this project has been arranged for, that Block 55 is largely owned by the city or the county, and that the county owns some property along the suggested route between 15th and 16th Streets; further, that recently a filling station was constructed on the proposed route at the intersection of 15th and Commercial Streets which the state would have to purchase, and there is also a small brick building across the street at this intersection which would have to be purchased. He further advised that the city of Astoria has been attempting to secure the right of way by the exchange of municipal and county property and has done so, in so far as possible, but indications are that the city cannot secure all of the right of way by that means, therefore, if the project is to

proceed, the State Highway Commission would have to purchase the balance.

The Attorney advised that, in accordance with instructions from the Commission, he has investigated the cost to remove from this right of way the two buildings which the Commission agreed to move at state expense about a year ago, and he finds that the moving will now cost \$4,289, compared with the original estimate of \$3,600, due to the increased cost of labor. The Columbia River Packers Association, he said, has agreed to accept the sum of \$4,289 to move the warehouse and to construct an approach road at the new location, they to assume the responsibility for the moving and the construction of the approach. He further advised that the Association desires immediate action by the Commission in view of the fact that the building will be needed shortly after the first of August for the storing of canned salmon. After discussion, the Commission accepted the Association's offer by unanimous vote subject to the condition that payment of the agreed amount shall not be made until after the Commission conducts a public hearing in the city of Astoria relative to the rerouting of this highway as is required by law.

The Commission thereupon set 2:00 o'clock p. m., Monday, September 13, 1937, as the date and hour for such public hearing. The Secretary was instructed to send formal notice of such hearing to the governing body of the city as required by statute.

The Commission also set Tuesday, September 14, 1937, as the date for its regular meeting in September and instructed the Secretary to arrange to hold this meeting, as usual, in the Auditorium of the Public Service Building, Portland, if possible.

In the discussion of the matter of rerouting the highway in Astoria the Engineer advised that a definite location survey has not yet been made of the proposed new route. The Commission thereupon authorized him to make such location survey and to prepare an estimate of cost to construct the highway on the same. Full information in regard thereto is to be made available to the Commission for its information before the date of the public hearing.

The Engineer reported on the request of Dr. Charles E. Dodge, Portland, for the construction of an approach roadway from Park Street in Cannon Beach Park, Clatsop County, to the Oregon Coast Highway. He said that Park Street and Hug Point Avenue intersect very close to the highway right of way line at a point nearly opposite the place where a highway cut joins a highway fill so that it should not be difficult to make a connection between these streets and the highway. Also, that these streets are entirely unimproved, as are numerous other streets intersecting the highway in this locality, so it appears to him that the State Highway Department is under no obligation to construct the approach road. He recommended that the request be denied. The Commission approved the recommendation by unanimous vote and instructed the Secretary to so inform Dr. Dodge.

The Engineer reported briefly the results of the traffic survey recently conducted in the City of Klamath Falls. He said that the survey indicates that traffic density is not sufficient to warrant the installation of

control signals in this city except on Main Street at its intersection with Ninth, Eighth, Seventh and Sixth Streets and at the intersection of Klamath and Sixth Streets, with possibly another one at the intersection of Main and Fifth Streets; also, that a flashing beacon should be installed on South Sixth Street at the point where the street crosses over the railroad tracks inasmuch as a traffic hazard now exists at this location by reason of the fact that the bridge is only about half as wide as the street and is offset so that the west rail and felloe-guard are directly in the path of south-bound vehicles. He gave as his thought that the cost of the traffic control lighting should be borne exclusively by the City of Klamath Falls but that the state should pay for the flashing beacon at the railroad crossing which is estimated to cost \$100. After discussion the Commission approved the report and instructed the Engineer to send a copy of the same to the City of Klamath Falls. The Commission also approved the installation of a Red-Head flashing beacon at the railroad crossing on South Sixth Street, at state expense, it being understood that the City of Klamath Falls will furnish the electricity to operate the signal and will pay the cost of the lamp maintenance.

The Engineer reported receipt of a request from the City Council of West Salem for the installation of a traffic signal on the Salem-Dallas Highway at its intersection with the city street near the city hall at the west end of the town. He recommended the installation of a three-way, one-color, flashing signal at this intersection and a similar one at the intersection of the highway with the Salem-Dayton Secondary Highway (Wallace Road), at state expense. He advised that the cost would be about \$175. The Commission approved the recommendation by unanimous vote.

The Attorney reported the results of the conference with the insurance company which wrote the insurance on the equipment belonging to contractor J. C. Compton, which equipment was involved in the collapse of the South Yamhill River Bridge on the Pacific Highway West south of McMinnville. He said that the company is willing to pay the state the sum of \$4,750 as settlement in full which is \$250 less than the total amount of its liability. He recommended settlement on such basis because it would probably cost more than \$250 to try the case in court, and for the further reason that there is a possibility that a jury would return a verdict unfriendly to the state. The Engineer also recommended settlement at \$4,750. After discussion the Commission adopted the recommendation of the Attorney and the Engineer by unanimous vote and decided not to place a claim against Mr. Compton for the difference between such amount and the amount that it cost the state to restore traffic.

The Commission considered and ordered filed a letter from C. C. Hockley, State Director for the Federal Emergency Administration of Public Works, advising that the applications of the Commission for P.W.A. funds with which to finance certain state highway projects have been approved by the legal, financial and engineering divisions of their central office and are now in line for consideration and allotment under the terms of the Public Works Administration Act of 1937.

The Commission discussed reports from the Maintenance Engineer and the Landscape Engineer relative to the selection of a site for section

JUL 29 1937

patrol headquarters and oasis along the Central Oregon Highway between Bend and Burns. A decision in this matter was deferred by the Commission pending further investigation and report by the State Highway Engineer.

The Engineer reported the results of investigations recently conducted to determine the proper location for the I.O.N. Highway (McDermitt-North Secondary Highway) south of Rome in Malheur County, and for the proposed road connecting the I.O.N. Highway with the Central Oregon Highway passing through the place known as Folly Farm, in Harney County. He said that the surveyed route extends southwesterly from Rome a distance of about 12.79 miles to a point of connection with a proposed highway leading to Burns, which has also been surveyed; thence south through what is known as Blue Mountain Pass to a connection with the constructed section north of McDermitt, Nevada; also,, that several alternate routes have been investigated with a view of securing one that would provide the shortest possible distance between common points and would be the most economical to construct. He exhibited a map showing the several routes investigated and presented the following factual data relating to each for use in making comparisons of distances and costs:

	Approximate Length	Estimated Cost to Construct
<u>Rome to Blue Mountain Pass</u>		
Via present surveyed route through "Y" connection, 12.79 miles west of Rome	33.14 miles	\$238,000
Via most direct route	28.00 "	207,000
Via intermediate Route 1	29.43 "	228,000
Via intermediate Route 2	31.78 "	270,000
<u>Rome to Folly Farm</u>		
Via present surveyed route through "Y" connection, 12.79 miles west of Rome	32.92 miles	\$239,000
Via most direct route	26.83 "	261,000
<u>Blue Mountain Pass to Folly Farm</u>		
Via present surveyed route through "Y" connection, 12.79 miles west of Rome	40.48 miles	\$235,000
Via most direct route that passes through Rome	54.83 "	468,000

He pointed out that the shortest and least expensive line to construct between Rome and Blue Mountain Pass is the most direct route, it being 5.14 miles shorter than the surveyed route and about \$31,000 less costly. However, he gave as his thought that the Commission's decision with respect to the selection of a route for the I.O.N. Highway should not be based entirely on this feature because of the advantages that the State of Oregon would gain by having the shortest possible route from Nevada points to Portland. With this thought in mind he pointed out that the most direct route to Portland would be via the present surveyed route from Blue Mountain Pass northerly to the "Y" connection, thence to Folly Farm which route together with the connection from the "Y" to Rome would be about \$113,000 less costly to construct than a road along the most direct route from Blue Mountain Pass to Rome, thence to Folly Farm. Furthermore, the distance from Blue Mountain Pass to Folly Farm via the surveyed route is 14.35 miles shorter than the

shortest route that passes through Rome. After careful consideration of the facts the Commission decided in favor of the present surveyed route with a possible exception of adopting Intermediate Route 2 near the "Y" connection at some future date which would save some three or four miles in distance between Rome and Blue Mountain Pass.

The Commission had under discussion a report from Maintenance Engineer J. N. Bishop in regard to the condition of the Amity-Hopewell Secondary Highway concerning which a delegation from Yamhill County appeared before the Commission on July 8. A decision in this matter was deferred by the Commission pending further investigation and report by the State Highway Engineer.

The Commission considered a report from the Engineer on a request of Mrs. G. L. Case, Salem, for the oiling of a side road that is being used by the State's contractor in connection with the construction of the Pringle Creek Illahe School Section of the Pacific Highway south of Salem. Mrs. Case alleges that the dust created by the contractor's hauling is a nuisance and is very damaging to the crops growing adjacent to the road. The Engineer advised that the contractor uses this road over which to haul concrete aggregate to his job, which operation will not last very long, if it has not already been completed. He gave as his thought that the dust problem is not serious enough to warrant the expense of oiling, particularly since the road is not in condition to receive an oil treatment. He recommended that the request be denied. The Commission approved the recommendation by unanimous vote and instructed the Secretary to so inform Mrs. Case.

The Commission considered the matter of furnishing powder and equipment for use in connection with a W.P.A. clearing project which the Lincoln County Court proposes to undertake on the Siletz River Secondary Highway in Lincoln County, but deferred action thereon pending a report from the Engineer at the next meeting as to how much state money is involved.

The Commission considered and signed an agreement with Lane County providing for the payment of Lane County's indebtedness to the state for road construction purposes. By this agreement the Commission accepts, as payment in full of its account, the sum of \$200,000 payable on or before January 5, 1938. (For details see executed copy of agreement in agreement file - No. 98)

The Commission had under discussion the application of Mr. W. W. Hileman, Cottage Grove, for permission to transport piling, the length of which, including the hauling equipment, is 120 feet, over the Pacific Highway from the steel bridge south of Cottage Grove to Latham, in Lane County. The Engineer advised that there are no curves in the section of the highway over which this hauling is to be done and in his estimation no extreme traffic hazard will be created by such hauling. He recommended the granting of the permit. The Commission approved the recommendation by unanimous vote.

The Engineer requested authority to purchase the following equipment: (1) one stereoconparagraph complete with carrying case, cost \$262.50, for use in connection with drawing of contours on aerial survey maps; (2) one electric

JUL 29 1937.

calculator, cost \$517.50, for use of computers working on plane coordinates of geodetic positions. The Commission approved the purchase of this equipment by unanimous vote.

The Engineer also requested authority to spend about \$1,950 for equipping six trucks, recently purchased, with power hoists. He explained that the trucks in question have been assigned to bridge repair crews and that the power hoists will increase the efficiency of the truck operation greatly. The Commission approved the expenditure by unanimous vote.

The Commission considered and referred to the Engineer to discuss with the Bureau of Public Roads a letter from W. H. Lynch, District Engineer, relative to revising route directions and mileage tabulations of the Oregon Federal Aid Highway System. A report on this matter is to be rendered at the August 12 meeting if possible.

The Commission considered and approved extending the Bertha-Beaverton Highway from its present terminus at the town of Bertha, along the Capitol Highway, Terwilliger Boulevard and Slavin Road to a connection with Southwest Barbur Boulevard (Pacific Highway West) in Portland. The Attorney was instructed to prepare an appropriate resolution covering the matter for adoption by the Commission at its meeting on August 12.

The Commission considered and approved a resolution from the Board of County Commissioners of Multnomah County requesting the selection and designation as the Northeast Portland Secondary Highway No. 123 of the following described county road, route or location: beginning at a point on Northeast Lombard Street near Northeast 10th Avenue; thence in a southeasterly direction to a point on Northeast Sandy Boulevard (Columbia River Highway) at or near Northeast 99th Avenue in Park Rose, being a distance of approximately four miles. The Commission thereupon by unanimous vote adopted the following resolution designating such road or route as a state secondary highway:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Board of County Commissioners of Multnomah County of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways, under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State

JUL 29 1937

Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Multnomah County be and the said market road, county road, highway, location, or route hereby is selected, designated, established, adopted and approved as a secondary state highway, and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Northeast Portland Secondary Highway No. 123:

Beginning at a point on N. E. Lombard Street near N. E. 10th Ave.; thence in a southeasterly direction to a point on N. E. Sandy Blvd. (Columbia River Highway) at or near N. E. 99th Ave. in Park Rose, being a distance of approximately 4.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The Commission also considered the advisability of retaining the Stanfield-Pendleton Section of the Old Oregon Trail (old route) on the state highway system upon completion and opening of the new route between these points. A question arose whether or not the old highway should be retained on the state highway system as a secondary highway or should be abandoned as a state highway and returned to Umatilla County to maintain as a county road. It was the Commission's decision that the road should be designated as a secondary state highway. The Attorney was instructed to prepare an appropriate resolution so designating this road for adoption by the Commission at its meeting on August 12 provided in the meantime the County Court of Umatilla County will by formal action request such designation.

The Commission considered and upon recommendation of the Engineer adopted resolutions as follows: abandoning and retaining portions of the Pacific Highway West near Rex Hill in Washington and Yamhill Counties which sections are no longer used by state highway traffic in view of the fact that the highway has been reconstructed on new alignment at such places:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Pacific Highway West near Rex Hill, Washington County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there have been eliminated from the main traveled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically

defined and described hereinafter in this resolution and are reflected on a print or map, marked "Exhibit 'A'", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached print, are not required for use as a part of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the state highway system a certain portion of the highway eliminated from the main travelled portion of said highway, which section is made unnecessary as a part of the completed highway and is shown in red on the attached print or map;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments or parcels of land which heretofore were within the right of way proper of the Pacific Highway West, but which by reason of a relocation or realignment of said highway are now without the area improved and used by the traveling public, but are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

(Parcels to be retained - shown in yellow on attached print)

All that portion of the present 60 foot right of way on the southerly side of the new right of way between Stations 601+30 and 606+05 and between Stations 637+20 and 641+00, and on the northerly side of the new right of way between Stations 642+40 and 651+00.

2. That the fragment of land confined within the area hereinafter described and designated as the parcel of land to be abandoned,

which fragment was formerly within the limits of the right of way of the Pacific Highway West, be and said fragment of land is abandoned as a part of the right of way of said highway, and said fragment of right of way is, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Washington County. The fragment of land to be abandoned is described as follows:

(Parcel of land to be abandoned - shown in red on attached print)

All that portion of the present 60 foot right of way of the Pacific Highway West, lying north of the reconstructed highway between Stations 606+20 and 635+20.

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a print or map, marked "Exhibit 'A'", which by this reference is made a part thereof, and upon which map there are shown shaded in yellow the parcels of land formerly within the old right of way but which are now by this official act preserved for public purposes, and upon which map there is shown shaded in red the abandoned section of said right of way. Said exhibit or map for identification purposes bears the signatures of E. A. Collier, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bears date of May 20, 1937.*

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

5. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Washington County, together with a

* Map filed in Right of Way Abandonment and Retention File - No. 43

JUL 29 1937

copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned portion of the right of way of said Pacific Highway West be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Washington County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Pacific Highway West near Fox Hill, Yamhill County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main travelled portion of said highway certain sections or fragments of land, which said sections or fragments or land are more specifically defined and described hereinafter in this resolution and are reflected on a print or map, marked "Exhibit 'A'", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached print, are not required for use as a part of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the state highway system a certain portion of the highway eliminated from the main travelled portion of said highway, which section is made unnecessary as a part of the completed highway and is shown in red on the attached print or map;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments or parcels of land which heretofore were within the right of way proper of the Pacific Highway West, but which by reason of a relocation or realignment of said highway are now without the area improved and used by the travelling public, but

are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

(Parcels to be retained - shown in yellow on attached print)

All that portion of the present 60 foot right of way on the southerly side of the new right of way between Stations 668+50 and 678+50, and between Stations 681+00 and 685+10 and on the northerly side of the new right of way between Stations 670+00 and 674+25 and between Stations 705+50 and 715+00.

2. That the fragment of land confined within the area hereinafter described and designated as the parcel of land to be abandoned, which fragment was formerly within the limits of the right of way of the Pacific Highway West, be and said fragment of land is abandoned as a part of the right of way of said highway, and said fragment of right of way is, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Yamhill County. The fragment of land to be abandoned is described as follows:

(Parcel of land to be abandoned - shown in red on attached print)

All that portion of the present 60 foot right of way of the Pacific Highway West and the new county road approach, lying south of the reconstructed highway between Stations 684+80 and 699+30

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a print or map, marked "Exhibit 'A'", which by this reference is made a part hereof, and upon which map there are shown shaded in yellow the parcels of land formerly within the old right of way but which are now by this official act preserved for public purposes, and upon which map there is shown shaded in red the abandoned section of said right of way. Said exhibit or map for identification purposes bears the signatures of E. A. Collier, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bears date of May 20, 1937.*

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining there-

* Map filed in Right of Way Abandonment and Retention File - No. 44

on proper monuments or posts upon which shall be inscribed the words "State Property".

5. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Yamhill County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned portion of the right of way of said Pacific Highway West be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Yamhill County and beyond any responsibility or supervision by the State Highway Commission.

The Commission had under discussion the matter of abandoning as a state highway a portion of the Redmond-Bend Section of The Dalles-California Highway (old route), in Deschutes County, which is no longer used by primary highway traffic in view of the reconstruction of this highway on new alignment. The question arose whether or not this road should be abandoned by the state or should be retained on the state highway system as a secondary state highway. The Commission decided in favor of the abandonment of the same for the time being and by unanimous vote adopted the following resolution in regard thereto with the understanding that the road will be placed on the secondary highway system later in the event that the County Court of Deschutes County requests that be done:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Redmond-Bend Section of The Dalles-California Highway in Deschutes County; and

WHEREAS, by reason of said relocation and the reconstruction of the said section of highway there was eliminated and made unnecessary as parts of the completed highway certain sections, which sections or parts are more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of The Dalles-California Highway, and therefore as parts of the state highway system, the fragments or portions of right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of The Dalles-California Highway as formerly located between the said termini and as heretofore improved and used; and

WHEREAS, in connection with the relocation of said highway there was accomplished a change in the point of entrance of the highway into the City of Redmond from the south and there was likewise accomplished a rerouting of state highway traffic between "I" Street and the city limits of Redmond.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, a majority of members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas hereinafter described, portions of which fragments of land were formerly within the limits of the right of way of The Dalles-California Highway south of the City of Redmond, but which are now without the limits of said right of way as said highway has been relocated and constructed, be and said fragments of land are abandoned as parts of the right of way of said highway, and those parts of said right of way so abandoned and which are outside of the corporate limits of the City of Redmond are left to revert to the adjoining or abutting property owners or to the control or supervision of the County Court of Deschutes County for highway and/or other public purposes, and that portion of the highway between "I" Street and the city limits over which highway traffic was formerly routed before said highway was relocated is hereby abandoned as a route over which state highway traffic is directed by the State Highway Commission to move and said route hereby is relieved of any burden imposed thereon by the State Highway Commission and is left to revert to the exclusive control and jurisdiction of the municipal authorities of the City of Redmond.

2. The fragments of land or right of way hereby abandoned and eliminated from the state highway system and the streets over which state highway traffic formerly was routed are described as follows, to wit:

Beginning at the edge of the right of way fifty feet from the center line of the new location at the south line of "I" Street in the City of Redmond, Highway Engineer's Station 472+65, Mile Post 123.85; thence southwesterly along the old Dalles-California Highway a distance of 13.5 miles to the intersection of the McKenzie-Bend Highway at Highway Engineer's Station 155+59.7, which right of way is 60 feet wide and contains 98.18 acres, more or less.

Also:

Beginning at Highway Engineer's Station 19+50.2, said point being at the edge of and fifty feet distant from the new Dalles-California Highway; thence southeasterly a distance of 0.3 of a mile to intersection with the new Dalles-California Highway at Engineer's Station 4+60, which right of way is 60 feet wide and contains 2.21 acres, more or less.

In addition to the foregoing description of said abandoned right of way there is attached hereto a print or map, marked "Exhibit 'A'", and by this reference made a part hereof, upon which map there is shown shaded in red the abandoned sections of said highway, which exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bears date of June 16, 1937.*

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned sections, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Deschutes County, together with a copy of said exhibit, and a copy of said resolution, together with said exhibit, shall be delivered to the Mayor of the City of Redmond for such action as said County Court may desire to take with respect to said fragments of land and for such action as the City of Redmond may desire to take with respect to said city streets, and should said abandoned portions of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Deschutes County and/or the municipal authorities of the City of Redmond, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

The Engineer requested definite information as to who should represent the state highway department at the annual meeting of the American Association of State Highway Officials in Boston, Massachusetts, on September 27 to 30 inclusive. It was decided that all three members of the Commission,

*Map filed in Right of Way Abandonment and Retention File - No. 45

JUL 29 1937

the State Highway Engineer and the Assistant State Highway Engineer should attend this meeting at state expense provided that meets with the approval of Governor Martin.

The Secretary presented a brief signed by the Hermiston Commercial Club, Umatilla Project Farm Bureau, Grange Cooperative, Eastern Oregon Turkey Growers' Association, Pendleton Chamber of Commerce, Umatilla County Court, Pendleton Chamber of Commerce Roads Committee, Pendleton Chamber of Commerce Regional Committee, Pendleton Chamber of Commerce Business Committee and the Hermiston Community Park requesting and urging that the improvement that the Commission proposes to undertake on the secondary highway between Hermiston and the Wallula Cut-off be extended to include the entire length of this road rather than a portion thereof as is now planned. The Engineer advised that the Commission has now set up in its budget \$15,000 for the oiling of a three-mile section of this road between Hermiston and Columbia School. The Commission indicated a favorable attitude toward this request but deferred a definite decision thereon pending receipt of information from the Bureau of Public Roads as to whether or not the Bureau would consent to such extension. Tom M. Davis, Highway Engineer, Bureau of Public Roads, who was present, agreed to give this matter study and advise the Commission at the earliest opportunity.

A letter was presented from Mrs. Ernest C. Dalton, St. Helens, President of the Oregon Federation of Garden Clubs, calling attention to signs that have been erected along the Oregon Coast Highway advertising "Currier's Village" in northern Coos County, and asking the Commission to take action as may be necessary to rid the highway of such signs. The Engineer advised that investigation reveals that the signs are located on private property beyond the jurisdiction of the Highway Commission, hence apparently meet the legal requirements. The Commission instructed the Engineer to contact Mr. Currier and endeavor to secure his consent to the removal of the signs so that the scenery along the highway may be preserved unblemished. The Secretary was instructed to inform Mrs. Dalton of the action taken and that unless Mr. Currier, the owner of the signs, is willing to cooperate the Commission is without authority to remove the signs.

A letter was presented from Carl E. Green, State Sanitary Engineer, in which the Commission was requested to make an order prohibiting the use of horses on bathing beaches. The Attorney advised that the Commission is without legal authority to prohibit the use of horses on the beach area. The Commission ordered that Mr. Green be so informed.

A letter was presented from Alois Keber, Secretary of the Highway Committee of the Business Men's Club of Mt. Angel, in which the Commission was requested to flatten some of the sharp curves on the Woodburn-Silverton Secondary Highway this year when the proposed nonskid surface is being applied to this road. The Commission denied the request on account of insufficiency of funds to finance the same, the amount budgeted for this highway being only sufficient to provide a nonskid, wearing surface. Mr. Keber also requested the repainting of the yellow stripe down the center line of this road. The Commission approved the repainting of the center line stripe as soon as the stripe painting crew is working in this vicinity.

JUL 29 1937

The Commission considered and referred to the Engineer for investigation and report a request from the Oregon City Territorial Days Committee for permission to erect a monument on the right of way of the Pacific Highway East at the top of the hill south of Oregon City, honoring Peter Skene Ogden who was at one time a chief factor of the Hudson Bay Company and who spent the last years of his life in Oregon City.

The Commission considered and ordered filed a letter from Mr. W. W. Evans, Halfway, Oregon, in regard to the Baker-Homestead Highway in Baker County.

A petition signed by 31 taxpayers of Clackamas County requesting that Hereford Street, Gladstone, be selected as a route for a connecting road between 82nd Street Highway and the East Portland-Oregon City Highway had the attention of the Commission. The Engineer advised that, while the surveys have been completed for a proposed connection between these two highways, he is not yet ready to make a recommendation in regard thereto; however, indications are that the Hereford Street route will not meet the requirements. The Secretary was instructed to so inform the petitioners.

A letter was presented from the Social Assurance Association of Oregon suggesting that the viaduct on Union Avenue, Portland, be named in honor of L. M. Lepper, Portland. The Commission deferred action on this request pending a recommendation from a committee of three public spirited citizens of which Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, is to be asked to act as Chairman. Mr. McArthur is to select the other two members of the committee.

The Commission also had under consideration letters from the North Tillamook County Chamber of Commerce and from Mr. Hamilton F. Corbett, President of the Portland Chamber of Commerce, suggesting that the bridge that is now being constructed over Short Sand Beach Creek on the Oregon Coast Highway in northern Tillamook County be named "Samuel G. Reed" Bridge in honor of Mr. Reed who has spent freely of his time and money to secure the completion of the Neahkahnie Mountain road and who has also given several hundred acres of land to the state for park purposes. The Commission referred this matter also to Mr. McArthur and his committee for recommendation.

The Engineer reported receipt of information from the Oregon State Motor Association to the effect that the Shell Oil Company has a very fine film depicting in sound and film slide the "City of Tomorrow" and that the Shell Company would be glad to show these pictures to the Commission at some convenient time if that meets with the Commission's pleasure. He recommended acceptance of the offer. The Commission approved the recommendation and instructed the Engineer to make the arrangements for this showing.

A letter was presented from W. H. Ferguson, City Recorder of the town of Gold Hill, inquiring as to whether or not it would be possible to secure the Commission's consent to the maintenance of a sign over the state highway in Gold Hill directing tourists over Sams Valley Secondary Highway as a short cut to Crater Lake. The Commission ordered that Mr. Ferguson be

JUL 29 1937

informed that it is the policy of the Commission to prevent so far as possible the erection and maintenance of signs over and across highways, because the Commission believes that such signs create a traffic hazard and the erection of such is an unwise procedure. However, the Commission does not presume to interfere with the rights of cities and towns, and will not interfere with them in the matter of signs unless such signs contain information directing traffic which feature is, the Commission considers, strictly its function in so far as the signs pertain to state highways.

The Commission had under consideration the question of maintenance of a steel bridge over the Nehalem River at Nehalem in Tillamook County and a letter from E. H. Lindsey, County Commissioner of Tillamook County, in regard thereto. It is Mr. Lindsey's contention that the State Highway Commission agreed to maintain this structure and in support thereof refers to an agreement between the county and the Commission, dated November 8, 1935, which provides that the state shall maintain this county road, after construction, for such time as said road may be used under the direction of the Highway Commission for the accommodation of the traffic using the Oregon Coast Highway. The Engineer pointed out that the Commission and the county had a prior agreement, dated January 23, 1934, which provided that the State Highway Commission should repair this bridge at state expense but that the county should maintain it after such repair work had been completed until the road and the bridge were placed on the state highway system. He gave as his thought that the agreement of November 8, 1935, was not intended to relieve the county of the maintenance of this bridge structure and he requested instructions in regard thereto in connection with some repair work that is badly needed at the present time. After discussion the Commission voted unanimously to assume the maintenance of this bridge, in view of the fact that it is now being used as a state highway route, pending construction of the state highway on permanent alignment. The Engineer was thereupon authorized to proceed with the bridge repairs at state expense.

A letter was presented from Honorable Charles H. Huggins, Mayor of the City of Marshfield, requesting the privilege of being present when the Commission has under discussion the matter of adopting a permanent route for the Oregon Coast Highway between the cities of Marshfield and North Bend. The Secretary was instructed to inform Mr. Huggins that the Commission will be pleased to have him present and enter into a discussion of this matter, and that it hopes to be able to consider it at its meeting on August 12 provided the Engineer's report is ready at that time, and will let him know two or three days in advance so he can make his arrangements accordingly.

A letter was presented from Mr. S. M. Calkins, Secretary, Eugene Planning Commission, stating that the Planning Commission is very desirous that the State Highway Commission make a decision soon in the matter of the permanent location of the Pacific Highway through or around Eugene so as to facilitate the settling of business conditions. The Secretary was instructed to inform Mr. Calkins that the Commission is now studying this matter and hopes to make its decision in the near future.

A number of communications were presented from residents of the Town

of Monument, Oregon, in which the Commission was requested to improve the Kimberley-Monument Secondary State Highway, which they allege is narrow, crooked, in very bad condition and is a dangerous highway to travel. The Engineer advised that the riding surface of this road is untreated macadam and it is being maintained in as good condition as is possible under present conditions and with the limited amount of funds available. The Commission ordered that the petitioners be informed that funds available to the Commission for purposes of this kind are very low, hence it would not be possible to do any more to this road than is now being done. However, the maintenance of the road will be continued in the best possible manner permitted by the circumstances and the road will be considered for improvement as a federal aid secondary highway when that matter comes up for discussion later in the year.

A letter was presented from County Judge J. B. Wilkerson, Columbia County, requesting, when the Commission allocates the federal funds for feeder roads in the counties of the state, that Columbia County be given a just share of such funds in 1938. The Secretary was instructed to inform Judge Wilkerson that the Commission intends to give Columbia County just as much consideration in the allocation of these funds as it gives to the other thirty-five counties.

A letter was presented from the American Road Builders' Association requesting the assistance of the State Highway Engineer in securing the affiliation of the State Highway Contractors' Association with the American Road Builders' Association. It was the Engineer's thought that the two associations should be kept separate and he so recommended. The Commission concurred in this viewpoint and instructed the Engineer to so inform Mr. Charles Upham, Engineer-Director of the American Road Builders' Association.

The Commission had under consideration letters from the Clatsop County Court and the Astoria Chamber of Commerce, and a petition signed by 364 residents of Clatsop County requesting the oiling of the Wolf Creek Highway between Elsie and its junction with the Oregon Coast Highway. The Commission ordered that the communications be acknowledged and the petitioners informed that the Commission is now spending on the Wolf Creek Highway as much as it can spare to complete the seventeen-mile gap between Elsie and Sunset Camp and is not financially able to do any oiling work on this road this year; further, that such project will be considered when the program for next year's construction is arranged although no definite commitments or promises can be made at this time.

The Engineer requested authority to purchase a set of traffic scales for installation on the Wilson River Highway east of Tillamook where extensive logging operations are under way. The Commission approved the request by unanimous vote.

The Engineer reported that since the last meeting of the Commission he has ordered a number of location surveys. He submitted a list of the same together with estimates of cost to complete them and asked the Commission to confirm the orders. Motion was made by Commissioner Aldrich that the State Highway Engineer be authorized and instructed to make such location surveys on

various sections of the highways of this state, which said sections of highways, together with their identification survey numbers and the amounts authorized and allocated for survey expenditure, are as follows:

Location #10-2807 - Roseburg-Kelley Corner Section, Pacific Highway. 4th authorization \$700 - Total authorization \$5,200.00.

Location #208-2807- Squaw Creek Section, Bagnalls Ferry County Road in Curry County. 1st authorization \$750.00

Location #10-2817 - Oakland-Roseburg Section of the Pacific Highway in Douglas County. 1st authorization \$10,800.00

Location # 1-2805 - North Powder-Haines Section of the Old Oregon Trail in Baker County. 2nd authorization \$1,000. Total authorization \$2,300.00

Location #210-2815- Roseburg-Rock Creek Section of the North Umpqua Highway. 2nd authorization \$1,000. Total authorization \$13,000.00.

Rt. of Way # 26-2831- Orient Corner, Mt. Hood Highway in Clackamas County. 1st authorization \$100.00

The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Engineer reported that two location surveys had been completed since the last meeting, viz: John Day-Prairie City Section of the John Day Highway, in Grant County, and the Siletz-Newport Section of the Oregon Coast Highway, in Lincoln County. He submitted maps showing the proposed routing of these highways and explained the same in detail. He asked the Commission to approve the locations as shown thereon. After due consideration and discussion the following resolution approving such surveys was adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on sections or portions of the highways of the State of Oregon as follows, to-wit:

John Day-Prairie City Section of the John Day Highway, in Grant County;

Siletz River-Newport Section of the Oregon Coast Highway, in Lincoln County;

and

WHEREAS, pursuant to said authorization the State Highway Engineer

JUL 29 1937

has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the Highway Commission in the Salem office of the Commission, be and they hereby are adopted and approved as the location surveys of the various portions or sections of highway involved:

<u>File No.</u>	<u>Type of Survey</u>	<u>Highway and Section</u>
12-2805	Location	John Day-Prairie City Section of the John Day Highway in Grant County. Map File No. Part 1 of 2 parts - 5B11-10
21-2803	Location	Siletz River-Newport Section of the Oregon Coast Highway in Lincoln County. Map File Nos. 5B8-1, 5B8-2, 5B8-3, and 5B8-4

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said location as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Parker-Schram Company, Contract No. 1854, for the construction of an undercrossing under the Southern Pacific Company's tracks on the Pacific Highway in Oregon City, in Clackamas County, requested an additional extension of time of four days, from June 25 to June 29, 1937, within which to complete this project. The Engineer advised that on July 8 the Commission extended, without penalty, the time limit for the completion of this job to June 25, 1937, but the work was not actually completed until June 29, 1937, so it is necessary to extend the time an additional four days. He recommended that this be done without penalty. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Joplin & Eldon, Contract No. 1874, for the construction of an oil mat surface treatment on the Criterion-Cow Canyon Section of The Dalles-California Highway, in Wasco County, requested an additional

extension of time of 30 days, from July 1 to July 31, 1937, within which to complete this job. They attributed their failure to complete the project by July 1 to necessity for doing certain betterment work on the project that was not contemplated in the original contract which betterment work had to be done before the road was oiled. Also, weather conditions interfered considerably with the oiling operations. The Engineer advised that it was originally contemplated that this job would be completed by November 30, 1936, which is the date of completion specified in the contract, but for various reasons heretofore explained the job overran this time limit and was extended to July 1, 1937, with the understanding that the contractor would be penalized for engineering expense incurred by the state subsequent to December 1, 1936. He further advised that the contractor has been required to do a considerable amount of force account work since that time which has increased the contract price about 18 per cent although the engineering supervision costs have been held below the customary six per cent. The traveling public, he said, has been inconvenienced only very little by the delay so, considering everything, it is now his recommendation that the extension requested at this time be granted by the Commission without penalty, and that the contractor be relieved of the payment of the penalty that was previously imposed. The Commission approved the recommendation by unanimous vote.

McNutt Bros., contract No. 1920, for grading and surfacing the Ochoco Dam-Mill Creek Section of the Ochoco Highway, in Crook County, requested an extension of time, from June 30 to July 30, 1937, within which to complete this job. No reasons were given by the contractors for failure to complete the work within the specified time limit. The Engineer advised that the contractor had plenty of time to complete this project by the specified completion date but they had several contracts under way at the same time and could not arrange to complete this one earlier, which is the main reason of overrun of the time limit. He further advised that the traveling public has not been unduly inconvenienced by the delay, that the highway has been kept in passable condition at all times and that the state has incurred very little extra expense for engineering work because the engineering party has spent only part time on this contract, the balance having been spent on location survey work. He recommended, in view of the fact that the overrun of time limit was strictly due to the contractors' own arrangements, that the extension requested be granted but that the contractor be required to reimburse the state in full for engineering expense incurred subsequent to the date of completion specified in the contract. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Hoffman Construction Company has applied for an extension of time of 30 days in which to complete their contract for the Union Avenue Overcrossing in Portland, contract No. 1881, but the

JUL 29 1937

application is not accompanied by consent of the surety on their bond, as is customary. He explained that the contractor has only about \$50 worth of work left to complete on this job and if the matter of extension of time is taken up with the bonding company the contractor will be required to pay an additional bond premium amounting to over a thousand dollars. He suggested therefore that the Commission waive its requirement for consent of surety in this particular instance so as to relieve the contractor from the payment of this extra premium expense. The Attorney advised that the practice of securing consent of sureties in matters of extensions of time is not a legal requirement but is simply a procedure that has been prescribed by the State Highway Commission, so, if the Commission wants to diverge from the usual practice in this particular instance, it could do so without becoming involved in a legal way. After considerable discussion and in view of the Attorney's advice, the Commission voted unanimously to grant the Hoffman Construction Company the extension of time requested, notwithstanding the fact that the consent of surety has not been secured. However, the Commission wished it strictly understood that its decision should not be considered a precedent and that hereafter the consent of the surety on time extensions shall be secured as in the past.

The Engineer reported that contracts Numbers 1788, 1854, 1905, 1927, 1930, 1956, 1966, and 1976 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1788 with Berke Bros. for grading and construction of an undercrossing under Southern Pacific Company tracks approximately 9 miles south of Ashland (Wall Creek) in Jackson County. Completed July 26, 1937.

Contract No. 1854 with Parker-Schram Company for the construction of the Oregon City Undercrossing (Bridge No. 2206) in Clackamas County. Completed June 29, 1937.

Contract No. 1905 with Newport Construction Company and Kern & Kibbe for regrading and surfacing the Middle Unit, Emigrant Hill Section of the Old Oregon Trail Highway in Umatilla County. Completed July 1, 1937.

Contract No. 1927 with A. Milne for placing rock base and oil mat surface on the Wilcox-Shaniko Section of the Sherman Highway in Sherman and Wasco Counties. Completed July 26, 1937.

Contract No. 1930 with Chas. H. Leonard for regrading, surfacing and oiling the Stewart Bridge-Flat Creek Section of the John Day Highway in Grant County. Completed July 10, 1937.

Contract No. 1956 with Brownell Electric Company for wiring the highway department offices, State Office Building, Salem. Completed June 11, 1937.

Contract No. 1966 with A. S. Wallace for producing crushed rock for maintenance and oiling purposes on the Fort Klamath Section of The Dalles-California and Chiloquin Highways in Klamath County. Completed July 2, 1937.

Contract No. 1976 with Babler Bros. for oiling the Rainrock-Greenleaf Creek Section of the Siuslaw Highway in Lane County. Completed July 8, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera as follows:

Agreement with the Union Pacific Company and the O.W.R. & N. Company covering the matter of construction, maintenance and operation of an electric power transmission line beneath and across the tracks and right of way of the railroad company near Bonneville.

Agreement with Tillamook County providing that the county shall maintain at county expense that portion of the Tillamook-Netarts County road lying between the Tillamook River and the summit between Netarts Bay and Tillamook Bay, 2.89 miles in length, when the same has been constructed by the state as a federal aid secondary highway project, being Project No. FAS 1-A

Agreement with Tillamook County providing for the maintenance by the county of the Nehalem River county road between the town of Nehalem and the North Fork Bridge, which section is to be constructed under state contract as a federal aid secondary highway, being known as Project No. FAS 2-A

Agreement with Tillamook County providing for the construction of portions of the Nehalem River county road and the Tillamook-Netarts county road as federal aid secondary highway projects and for the construction of an oil mat surface on the Nehalem River county road between North Fork-Camp Four Junction Section and the

JUL 29 1937

Pacific City county road between Woods and the Oregon Coast Highway. The county is to pay the total cost of the last two described projects. The first two mentioned projects, less cost of right of way, are to be paid with state and federal funds.

Agreement with Fred H. Peterson and Elsie Peterson, husband and wife, disposing of their claim for damages arising out of construction of the East Portland-Oregon City Highway in front of their premises in East Portland.

Agreement with Yellow Fir Lumber Company providing for the use of a roadway in the state park located in the NW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 7, T. 16 S., R. 6 W., W.M., for the purpose of hauling thereover timber and other forest products which the company owns adjacent to the park.

. Agreement with Safeway Stores, Inc., providing for certain improvements along the Pacific Highway West at its intersection with the Capitol Hill road as restitution for destruction of shrubbery along the highway right of way at this point.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:00 o'clock p. m.

F. L. ...
Commissioner

JUL 29 1937

Portland, Oregon, August 11, 1937

A meeting of the State Highway Commission was held in Room 204, in the Benson Hotel, Portland, Oregon, at the hour of 7:30 o'clock p. m., on the eleventh day of August, 1937, at which meeting there were present:

Henry F. Cabell, Chairman,
E. B. Aldrich, Commissioner,
F. L. Tou Velle, Commissioner,

constituting the entire membership of said Commission, and

R. H. Baldock, State Highway Engineer,
H. B. Glaisyer, Secretary, and
J. M. Devers, Attorney.

The meeting was called for the purpose of transacting the regular business of the Commission and for approving and adopting the necessary proceedings for the issuance and sale of \$1,000,000 par value of Oregon State Highway bonds to make possible a more efficient and adequate promotion of highway construction, and to provide funds with which to match appropriations made by the Federal Government to the State of Oregon for highway purposes.

The meeting was called to order by Henry F. Cabell, Chairman of the Commission, after which Commissioner Aldrich moved the adoption of the following resolution, which motion was seconded by Commissioner Tou Velle and received the unanimous vote of the three commissioners, and was by the Chairman declared carried, to wit:

WHEREAS, \$1,000,000 par value Oregon State Highway bonds of the State of Oregon will mature on October 1, 1937, and the sum of \$476,408.40 in interest upon all of the outstanding Oregon State Highway bonds will likewise be due on said date; and

WHEREAS, there has been made available to the State of Oregon for highway construction during the years 1937 and 1938 the sum of \$5,000,000, which said Federal appropriation must, if obtained by the State of Oregon, be matched by \$3,300,000 of State money; and

WHEREAS, current revenues are and will be inadequate to provide for normal highway construction and maintenance during the period preceding October 1, 1937, and to provide at the same time sufficient funds to pay, when due, the said outstanding \$1,000,000 of highway bonds, together with interest which will mature on October 1, 1937, and provide funds with which to match Federal appropriations for highway construction in Oregon; and

WHEREAS, the issuance and sale of \$1,000,000 par value Oregon State Highway bonds at this time for the purposes herein stated is and will be for the good of the State and will more efficiently and adequately promote highway construction by providing funds with which

AUG 11 1937

to match funds made available by the Federal Government and to carry out the provisions of the laws of the State of Oregon with respect to state highway construction, thereby leaving available current highway funds for the payment of interest and principal maturing on outstanding bonded indebtedness;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission of the State of Oregon, all members being present and affirmatively voting, as follows:

1. That there be issued and sold for the purpose of providing funds with which to match appropriations made available to the State of Oregon by the Federal Government for highway construction and for the purpose of more efficiently and adequately promoting highway construction \$1,000,000 par value Oregon State Highway bonds to be dated October 1, 1937, and to mature April 1, 1938, but to be redeemable in numerical order at the pleasure of the State of Oregon upon payment of the par value of said bonds and accrued interest thereon on January 1, 1938, or at the option of the State of Oregon at any date subsequent thereto and prior to April 1, 1938, by giving thirty days' published notice of intended redemption as provided in Chapter 71, Oregon Laws, 1937; said bonds to be numbered consecutively beginning with the number 14,581 and ending with the number 14,590; to be in denominations of \$100,000 each and to bear interest payable January 1, 1938, and April 1, 1938, or at the date of redemption at a rate to be specified by the purchaser of said bonds, but not to exceed one per centum per annum, payable quarterly or upon the call date thereof if called for redemption before maturity; to be registered in the office of the State Treasurer at Salem, Oregon, by appropriate endorsement thereon signifying the ownership thereof; to be payable both as to principal of and interest upon said bonds to the purchaser thereof at said office of the State Treasurer; to be in typewritten form both as to the bonds and as to the interest coupons annexed thereto.

2. That the bonds hereby authorized and the interest coupons attached thereto shall be in substantially the following form, subject, however, to completion through execution of the bonds and of the coupons appertaining thereto by the Governor of the State of Oregon, the Secretary of State of the State of Oregon and the Treasurer of the State of Oregon by their signing the bonds and coupons in the spaces provided therein for their signatures and through the affixing to the said bonds by the Secretary of State of the seal of the State of Oregon, to wit:

	No. _____	
\$100,000	UNITED STATES OF AMERICA	\$100,000
	OREGON STATE HIGHWAY	
	SERIES THREE	
	____ Per Cent Bond	

AUG 11 1937

KNOW ALL MEN BY THESE PRESENTS: That the State of Oregon acknowledges itself to owe and for value received hereby promises to pay to bearer hereof the principal sum of

----- ONE HUNDRED THOUSAND DOLLARS -----

on the 1st day of April, 1938, together with interest on said sum from the date hereof until paid, at the rate of _____ per centum per annum payable January 1, 1938, and April 1, 1938, as evidenced by and upon the presentation and surrender of the interest coupons hereto attached as the said coupons become due; and both the principal hereof and the interest hereon are hereby made payable at the office of the Treasurer of the State of Oregon at Salem, Oregon, in any coin or currency which at the time of payment is legal tender for public and private debts within the United States. This bond has been registered in the office of the said State Treasurer and the interest on and principal thereof will be payable only to the owner thereof as shown by the record of registration thereof in said office.

The State of Oregon hereby expressly reserves the right to redeem this bond on January 1, 1938, or at a date subsequent thereto, pursuant to notice of intended redemption given at least thirty days prior to the said redemption date by publication of said notice in one issue of a newspaper or financial journal of general circulation printed and published within the city and state of New York and by publication of one such notice in a newspaper of general circulation printed and published in the City of Salem, County of Marion, State of Oregon; and upon the exercise of said option, interest hereon shall cease as of the redemption date specified in said notice.

This bond, together with the remaining bonds of this issue, aggregating \$1,000,000, is issued by the State of Oregon under and by virtue of, and in all respects in full and strict compliance with, the constitution and laws of the State of Oregon, and in particular Article XI, Section 7, of the said constitution and Chapter VIII, Title XLIV, Oregon Code 1930, as amended by Section 44-809, Oregon Code 1935 Supplement, and Chapter 71, Oregon Laws, 1937.

The faith and credit of the State of Oregon hereby are irrevocably pledged for the punctual payment of the interest on and redemption of the principal of this bond as the same become due and payable as aforesaid.

IN TESTIMONY WHEREOF, the State of Oregon has caused this bond to be signed by the Governor, the Secretary of State, and the State Treasurer, and sealed with the seal of the State of Oregon, and the attached interest coupons to be executed by its

AUG 11 1937

said officers all as of the 1st day of October, 1937.

Governor

Secretary of State

State Treasurer

COUPON

No. _____ \$ _____
On the 1st day of _____, 1938, the State of Oregon will pay to the bearer at the office of the Treasurer of the State of Oregon the sum of

in any coin or currency which at the time of payment is legal tender for public and private debts within the United States of America, in payment of three months' interest then due upon Oregon State Highway Bond, Series 3, No. _____, dated October 1, 1937; provided that, if said bond shall have been sooner called or redeemed, this coupon shall be void.

Governor

State Treasurer

Secretary of State

3. That the Secretary of the Commission cause the said bonds to be advertised for sale for a price not less than par value and accrued interest, in one issue of the Capital Journal, a daily newspaper printed and published in the City of Salem, County of Marion, State of Oregon, on the date of August 24, 1937, the said advertisement to provide that the sum of \$25,000 be deposited as a good faith deposit with each bid for said bonds.

4. That the Governor and the Secretary of State and the State Treasurer be and they hereby are authorized and requested to execute the said bonds by signing them under the seal of the State of Oregon and also to execute appropriate coupons attached thereto, and the State Treasurer be and he hereby is authorized and directed to register said bonds in his office and to make certificate to that effect upon the bonds, as provided in Section 44-804, Oregon Code 1930, and to deliver said bonds to the purchaser thereof after the date of sale and execution and sealing thereof upon payment of the principal thereof and the accrued interest thereon, if any.

AUG 11 1937

Mr. G. T. Cochran, Attorney, LaGrande, was present in behalf of the people of the Town of Elgin, Union County, with regard to the completion of the remaining section of the Weston-Elgin Secondary State Highway extending from the town of Elgin northwesterly to the forest boundary. He urged the Commission to award a contract at its September meeting for the grading of this section which involves a number of channel changes in Phillips Creek so that this part of the work can be done this year while there is very little water flowing in this stream; otherwise, he said, it would be necessary to defer such grading work until next year which would delay the completion of the project. He advised that they are very anxious for this job to be completed so traffic can reach and enjoy the rest of the road which is now being oiled by the Federal Government as a forest highway project and will be completed within the next 30 days. He presented a resolution adopted by the City of Elgin, and a petition bearing the names of 320 residents of Union County, urging the Commission to immediately let contracts for the grading, at least of this three-mile section, so that such portion of the work will be completed this fall. Chairman Cabell advised that the Commission is also anxious to complete this section, in fact made provisions for the same in its proposed P.W.A. program, and filed an application for P.W.A. funds to assist in financing the work, which application is now in the hands of the government officials for approval. He pointed out that, if the application is approved, it would be possible to secure government moneys to finance approximately 45 per cent of the cost which would release a like amount of state money for other purposes. He suggested in view of the circumstances that action on this project be deferred a couple of months to ascertain definitely whether or not the Commission is to secure the P.W.A. money. The suggestion was approved by Commissioners Aldrich and Tou Velle and was likewise approved by Mr. Cochran.

Mr. Cochran also brought up for discussion the matter of sidewalk construction along the Wallowa Lake Highway between LaGrande and Island City. He said that under present conditions many school children and other pedestrians are required to walk on the highway pavement which is very dangerous on account of the large volume of vehicular traffic, in fact numerous accidents have occurred along this section some of which have resulted fatally, hence their particular interest in securing a sidewalk so as to relieve this condition. He also said that, if the Highway Commission would designate a location on the highway right of way for a three-foot sidewalk, he would see that the walk is constructed at no cost to the state. The Engineer pointed out that the right of way is quite narrow along this section and there is a question whether or not there is room for a sidewalk. After discussion the Commission instructed the Engineer to investigate conditions and report his findings at the next meeting, including information relative to necessity for footbridges across waterways. He was authorized by the Commission to stake out a three-foot strip for the sidewalk in the event that he finds there is sufficient room on the right of way for the same.

The Commission by unanimous vote approved the minutes of the meetings held on March 24, 25 and 26 and March 30, April 1 and 2, 1937.

The Engineer requested authority to advertise for bids for the construction of a bridge over a small stream, known as Little Quartz Creek, located

on the Wolf Creek Highway about 600 feet east of Quartz Creek Bridge which is now under construction. He estimated that such bridge would cost about \$10,000. In view of the apparent need for the structure the Commission approved the request by unanimous vote and authorized the Engineer to advertise the project for bids to be received at the September meeting.

A letter was presented from Mr. Earl B. Moore, City Attorney, Dayville, advising that the city is now constructing a water system which involves trenching on the state highway right of way, and requesting the state highway department to pay the cost of repairing the highway, which he estimated at about \$400. The Attorney advised that according to the law, if a city opens up a city street that is a state highway route, it must also repair the same at its own cost and expense. The Commission indicated a desire to help the city as much as possible but decided in view of the law that it could not do so; furthermore, if the request in this instance were granted, it would establish a precedent that would be difficult to avoid in the future. After discussion the Commission instructed the Engineer to inform Mr. Moore that the Commission of necessity must deny the request, but, if the city so desires, the Commission will have the repair work done with state forces provided the city will pay the cost of the work.

The Engineer reported on the cost to surface and oil the Baker-Halfway Section of the Baker-Homestead Highway. He said that it would cost about \$1,143,000 to regrade, surface and oil the highway on permanent alignment but only about \$382,000 to resurface and oil the present road. He gave as his thought, in view of the cost of permanent construction, that it would be advisable to improve the present road and suggested as a first project the improvement of the section between Baker and Keating Junction, a distance of about seven miles. The Commission approved the suggestion subject to inspection of the road the next time it is in that vicinity.

The Engineer requested instructions whether or not to permit the Consolidated Highway Company, Inc., to bid on future highway construction projects in view of the trouble that the Commission has experienced with this company in the past. He recommended that the company be not permitted to submit bids until they have completed the projects that they now have under way. The Commission concurred in the Engineer's views and instructed him to so inform the company officers informally.

The State Parks Superintendent was present and reported on the following matters:

Sanitary conditions in Bradley Park: The Parks Superintendent advised that the present contract with Mr. Lindeman, who acts as caretaker and operates a concession in this park, expires in October of this year. He requested instructions whether or not to renew this contract in view of the criticism that has been received regarding the uncleanness of the rest rooms. He gave as his thought that such criticism is not to the state's best interests and suggested that it might be advisable for the state to hire a special man during the summer months to take care of the rest rooms and to see that the grounds, generally, are kept in good condition. After discussion the

AUG 11 1937

Commission indicated that it would approve the renewal of Mr. Lindeman's concession because the service rendered is a public convenience, provided he will perform his duties as caretaker satisfactorily. The entire matter was referred by the Commission to the State Parks Superintendent with authority to do whatever is necessary to maintain the park in first class condition at all times, it being understood that the Commission will back him up in anything that he may do in this regard.

Request of Reverend L. H. Vichers, LaGrande, for camping privileges in Emigrant Park: The Parks Superintendent advised that Rev. Vichers, who represents the American Sunday School Union, has asked that about 75 young people be allowed to camp in Emigrant Park for about a week. He pointed out that it is contrary to the policy of the Commission to permit overnight camping in state parks and recommended that the request be denied. The Commission approved the recommendation unanimously.

Request of National Parks Service that the Highway Commission sponsor a W.P.A. project for the securing of data relating to population, educational trends, recreational habits, et cetera: The Parks Superintendent advised that when this matter first came to his attention he was of the belief that most of the information could be obtained through the state-wide planning survey, but it now develops that only a small percentage of the information can be obtained from such source and, if the Commission still wants to assist in assembling the information, it will have to pay out a considerable sum of state highway money to help finance the work. He recommended that the request be denied. The Commission approved the recommendation by unanimous vote.

Wayside strip adjacent to Fremont Highway about fourteen miles north of Lakeview, in Lake County: The Parks Superintendent advised that a former Highway Commission, about twelve years ago, accepted as a gift from a Mr. S. B. Chandler, Lakeview, a park area adjacent to the present highway, and agreed at that time to fence the area at an estimated cost of \$700. He gave as his understanding that the present Commission has plans to straighten the highway at this location which requires right of way across Mr. Chandler's land only a short distance from the old route, and that Mr. Chandler will not agree to give up any of his land for the new highway unless the state will fence it and will also construct the fence that was provided for in the original agreement of twelve years ago. He said that recently he made an inspection of the park area and ascertained that it did not contain any timber that would be of value from the park standpoint; in fact, in his estimation the land is useless for park purposes in view of the contemplated revision of the highway. He gave as his thought that the cost of fence construction along the old route would be a waste of funds and suggested that the park be given back to Mr. Chandler. The Attorney advised that he has investigated thoroughly the conditions of the park donation and finds that the State Highway Commission is obligated to fence the property. After discussion and in view of the reports the Commission instructed the Parks Superintendent to discuss the matter further with Mr. Chandler and to inform him that the Commission recognizes its obligation to construct a fence along the present highway right of way in front of the park but considers it a waste of funds to do so in view of the fact that the old and the new highway locations are so close together, and to

AUG 11 1937

ask him to relieve the Commission from building more than one of the fences.

Wayside timber strip along the Klamath Falls-Lakeview Highway near Drews Valley: The Parks Superintendent advised that this strip contains a most beautiful stand of timber which, in his estimation, is well worth the sum of \$5.00 per thousand that the owners are asking for it. He recommended the purchase of the property at such rate which would total about \$5,340 according to cruise. The State Highway Engineer concurred in such recommendation. The Commission approved the recommendation by unanimous vote.

Park site adjacent to North Santiam Highway about three miles east of Mehama, in Marion County: The Parks Superintendent advised that Marion County owns 50 acres of fine timber land through which the highway will pass when constructed and wishes to present it to the state for park purposes if the state wants it. He said that the tract is admirably situated with relation to the North Santiam River commanding a fine view of the same, contains a fine stand of timber and will make an excellent addition to the state park system. He recommended acceptance of the offer. The Commission approved the recommendation by unanimous vote and ordered that an appropriate letter of thanks be directed to Marion County Court.

Request of B. L. Bradley, Salem, to operate a portable telescope on the ocean beach area. The Parks Superintendent stated that he has no particular objection to Mr. Bradley setting his telescope up on the beach area, even if he made a charge for the same, unless it would establish a precedent that might be difficult to avoid in passing on similar requests in the future. The Attorney advised that the Highway Commission does not have legal authority to prevent Mr. Bradley from operating his telescope on the beach. The Commission took no definite action on this matter but indicated that it would offer no objections to Mr. Bradley using the beach for the purpose desired.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be

AUG 11 1937

declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Newport-Siletz Bay Section, Oregon Coast Highway</u>

The Engineer reported that the State Planning Commission has completed its plans for rebuilding the City of Bandon which was destroyed by forest fire in the fall of 1936, and has advised that it is ready for the State Highway Commission to relocate the highway through this town and to acquire right of way for the same. He exhibited sketches showing the proposed relocation of the highway and advised that the only change seems to be a divided route in front of the commercial center as shown on the sketches. After some discussion the Commission approved the proposed layout and authorized the Engineer to make a definite location survey of the same. The Attorney was authorized to proceed with the taking of options for the right of way along the adopted location upon receipt of descriptions which are to be furnished by the Engineer when the survey is completed.

The Commission had under consideration a letter from Eugene R. Walsh, President of Brown and Brown, Inc., Forest Engineers, Portland, inquiring whether or not the Commission desires to sell any of the timber located on property that the Commission acquired from the Detroit Trust Company in connection with the acquisition of right of way for the Wolf Creek Highway in Sections 2 and 11, T. 3 N., R. 6 W., W.M. The Engineer suggested that this matter be given very careful study by the Parks and Landscape Engineers before any of the timber is disposed of, as he recalled the timber is quite scattered on certain sections and there is only enough to give a pleasing appearance to the highway. The question arose whether or not Mr. Walsh has in mind to purchase the green timber or the dead timber that was killed by the forest fire of 1933. After discussion the Commission decided not to sell the green timber but indicated it would sell the dead timber if that is what Mr. Walsh wants. The Commission ordered that Mr. Walsh be so informed.

The Attorney requested instructions whether or not to institute legal proceedings to secure the removal of the "Zeller" buildings from the Oregon Coast Highway right of way just north of Tillamook. He advised that the owners of the buildings have indicated that they will not move the buildings unless they are forced to do so by law. He was instructed by the Commission to bring suit to enjoin the people from maintaining the buildings on the highway right of way.

The Attorney reported difficulties in securing deeds from the Clerk of the State Land Board for property that the Highway Commission has purchased

AUG 11 1937

from the Land Board before delivery of the purchase price has been made. He advised that in making purchases from private parties past practice has been to defer payment for land until deeds have been obtained. He requested instructions whether he should follow the procedure in dealing with the State Land Board or pay for the property before receiving a deed which would involve the issuance of checks on the revolving fund. The Commission decided to defer making an issue of this matter until the amount involved is a considerable sum.

Reconsideration was given by the Commission to the purchase of the Olive M. Lee property along the new location of the Oregon Coast Highway between Rocky Creek and Otter Crest in Lincoln County. The Attorney advised that apparently the owners of this property will not recede from their present demands of \$15,000 for the entire acreage which includes 20 acres that are needed for right of way and about 30 acres that could be used for park purposes, so it will be necessary to condemn the property. The Parks Superintendent advised that the 30 acres outside of the right of way would make a very fine addition to the state park at this location but he did not think the Commission would be justified in spending \$10,000 for the same in view of the limited amount of funds that are available for purchase of state parks and the fact that the state now owns a beautiful park at this point. He suggested that the money could be spent to better advantage in the purchase of desirable park areas in other locations. After discussion the Commission decided to limit its purchase to right of way only and thereupon authorized the Attorney to institute condemnation proceedings to acquire the same.

Commissioners Aldrich and Tou Velle confirmed Chairman Cabell's approval of the purchase of the Hamill property adjacent to Silver Creek Falls State Park in Marion County at \$1,000 for the seven lots involved, this matter having been referred to the Chairman at the meeting of the Commission on July 29, with full power to act.

The Commission had under consideration the selection of a type of traffic separation structure to be constructed on the Pacific Highway at the intersection of Denver Avenue and Union Avenue in Portland. The Engineer exhibited several models for such structure involving both circle and cloverleaf types of construction. These were discussed by the Commission but action thereon was deferred pending a full report by the Engineer as to the cost to construct each type. Such report is to be rendered by the Engineer at the next meeting of the Commission and each member of the Commission is to be supplied with full information prior to the meeting so they may be fully conversant with the facts when the matter comes up for discussion.

In this connection the Engineer advised that the management of the Peninsula Golf Club is anxious to know definitely the plans of the Commission in regard to this proposed improvement because they contemplate the construction of a building on their property soon and want to be certain that the building will be located in a place that will be entirely off the highway right of way. He was instructed by the Commission to show the golf club people a right of way line that will fit any of the proposed types of grade separation structures and to ask them to locate their building back of this line.

The Engineer reported the results of a reconnaissance survey to reconstruct the Silets Secondary Highway between the towns of Toledo and Silets in Lincoln County. (See report of J. F. Waller, Locating Engineer, dated July 1937.) He estimated that it would cost about \$350,000 to reconstruct this 7½ mile section to permanent standard. Due to the high cost of the work, the Commission decided not to undertake it at this time but to limit its expenditure to an amount sufficient to take care of necessary repairs, especially across a certain swampy section about 2½ miles north of Toledo, which section is practically impassable for traffic during the winter season. The Engineer was instructed to render an additional report at the next meeting of the Commission based on improving the present road so that travel can use it throughout the winter months without difficulty, such report to include information relative to available sources of surfacing materials.

The Engineer rendered a report on the condition of the county road that connects with the Coos River Secondary Highway in Coos County at a point five miles northeast of the town of Allegany, a three-mile section of which road the County Court of Coos County desires designated as a secondary state highway. He said that this road is only from six to twelve feet in width and is in a bad state of repair, that there are numerous buildings located adjacent to the travelled roadway which would have to be moved if the state assumed jurisdiction of the road, and that the road is used extensively by logging traffic and will be for the next thirty years. He estimated that it would cost at least \$20,000 to grade only this three-mile section and to surface the same would cost several thousand dollars additional. He advised that the county court has on hand \$2,500 which it is willing to contribute toward the improvement if the Commission will take the road over as a secondary highway, but recommended against such procedure because the county money is not sufficient even to make a good start and the state is not able to finance it because of prior obligations. After discussion the Commission decided unanimously to deny the request and to so inform Judge McLain when he appears before the Commission on the following day.

The Landscape Engineer reported the results of his investigation for the selection of a site for a marker stone which the "Territorial Days, Inc." of Oregon City wants to erect on the Pacific Highway right of way in Oregon City to point out the site of the home of Peter Skene Ogden, a pioneer who ended his days in this city. It appears that the actual site of Mr. Ogden's home is now occupied by the Oregon City Foundry Works so it would not be possible to erect a monument there, hence a site about 400 feet from the old Ogden home on the parking area overlooking Willamette Falls was selected. The Landscape Engineer recommended approval of this site which, he said, is satisfactory to the officers of the "Territorial Days, Inc." The Commission by unanimous vote approved the site recommended and ordered that the sponsors of the project be so informed.

The Landscape Engineer also reported on the cost to construct a retaining wall on the right of way of the Columbia River Highway near Corbett, Multnomah County, to prevent materials sliding onto the highway from the site upon which Columbia Grange No. 267 of East Multnomah County proposes to construct a monument honoring the pioneers of this state. He presented a plan

AUG 11 1937

for the project and estimated the cost thereof, including labor furnished by W.P.A. and materials and equipment furnished by the state highway department, at \$2,000, of which amount the state's share would be about \$350. In this connection there was brought to the Commission's attention a resolution from the Grange stating that the Grange would make no other requests of the Commission if it approved this one. After discussion the Commission approved the report and the plan and by unanimous vote authorized the Engineer to build the retaining wall at state expense.

The Engineer requested authority to purchase a 2.5 cubic foot air compressor for use in the division office garage at Roseburg in connection with the repairing of tires and the servicing of state-owned cars. He estimated that such compressor would cost about \$150. The Commission approved the purchase by unanimous vote.

The Engineer requested authority to construct an addition to the maintenance building at Redmond in which to house a snogo and a large truck equipped with V type snow plow attachment which are to be used in the Central Oregon Division this winter. He estimated that an addition 24 feet by 32 feet in dimension could be built for \$1,200 and recommended approval at once so as to insure completion of the building before winter. The Commission approved the request by unanimous vote.

The Engineer also requested authority to purchase five additional truck scales at an estimated total cost of \$6,500. He explained that these scales are needed at Newport and Toledo in Lincoln County, at Bly in Klamath County and at the junction of the Santiam and McKenzie Highways near Sisters in Deschutes County where concentrated logging operations are under way. The Commission approved the purchase by unanimous vote.

The Commission adjourned at 10:30 o'clock p. m. to reconvene the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, August 12, 1937

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building with all members of the Commission present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

Bids as follows for highway construction projects and for the sale of residence property located in the town of Enterprise were opened and read in conformance with previously published notice:

T. R. Maxwell	\$ 1,800.00
Portia S. Thomas	1,000.00

Chairman Cabell announced that the award of contracts and the sale of property would be made at 3:00 o'clock p. m. in the same room. He also announced that hereafter bids that are received by the Commission after the hour stated in the Commission's "Notice to Contractors" will not be considered by the State

AUG 12 1937

Highway Commission so it behooves the contractors in the submitting of proposals for highway construction work to see that such proposals are presented to the Highway Commission before the designated hour.

Senator W. H. Steiwer, Fossil, Oregon, was present and asked the Commission to oil an additional section of the John Day Highway north of Spray rather than to construct the bridge over the North Fork of the John Day River near Kimberly which is now included in the Commission's construction program. He was informed by Chairman Cabell that the bridge is in bad condition and must be replaced so it would not be possible to make this transfer of projects; also that the Commission does not have funds available to undertake both projects now. Mr. Steiwer also asked for additional surfacing on this highway south of Fossil.

Mr. Tom Tongue, Attorney, Hillsboro, was present and requested, in behalf of the people of Tigard, the widening of the Pacific Highway West for four lanes of traffic from the point where the present four-lane highway ends, near Rock Creek Dairy, in Washington County, to a point near the Tualatin River crossing. He said that the present four-lane highway narrows down to a two-lane highway on a curve in a cut near the point where the new highway intersects the old highway, which still carries a lot of traffic, causing a condition that is extremely dangerous; in fact, numerous accidents have already occurred at this point. He gave as his thought that the widening of the pavement up to the Tualatin River Bridge, where the alignment of the highway is straight for a considerable distance, would correct the situation, and he urged that that be done. Mr. Tongue advised that property owners for the most part will donate needed right of way and that others will sell to the state at reasonable cost. In support of his oral arguments he filed with the Commission a petition signed by 80 residents and freeholders of Washington County requesting the improvement.

Chairman Cabell advised that the Commission realizes conditions at this point, and plans, as its next project on this road, to continue the four-lane pavement into Tigard, but definite plans in regard to the improvement have not yet been formulated, due to the fact that the project involves the crossing of the Southern Pacific railroad and a change in alignment in the highway through the town of Tigard. He also advised that it would be impossible to undertake the work this year even if the plans were ready, because the Commission does not have funds available to finance the work. The Commission has this project in mind, he said, and intends to give it due consideration in the formulation of its 1938 program, but is not in position to give more definite information at this time.

The Engineer reported the need for a storage building at the Portland maintenance headquarters to house snow-removal equipment that is to be stored at this location this winter, as well as equipment of one of the sign crews, of one of the patching crews, and of a bridge crew. He said that it is quite important that suitable storage facilities be provided for this equipment, and recommended immediate construction of a building 32 feet wide by 120 feet long, with 10 bays, which he estimated would cost about \$6,000.

AUG 12 1937

In view of the apparent necessity for this building, the Commission by unanimous vote approved the construction of the same at once, provided it will not affect or jeopardize the Commission's application for P.W.A. funds with which to finance its proposed office building at this location. The Engineer was instructed to contact Mr. C. C. Hockley, State Engineer, Public Works Administration, relative thereto.

The Attorney requested instructions whether or not to prosecute a man by the name of McCutcheon who recently installed a service station adjacent to the Pacific Highway at Woodburn and in connection therewith felled trees that were growing on the highway right of way. He said that apparently there is a difference of opinion among highway department employees as to whether or not the trees constituted a hazard, one of the engineers having stated to him that it was his judgment that the trees were a hazard and ultimately would be cut down. The Commission deferred action on this matter pending reports from Division Engineer Eason, Landscape Engineer Otten, and District Maintenance Superintendent DeFrance, which are to be rendered at the next meeting.

Reconsideration was given by the Commission to the matter of extending the Bertha-Beaverton Highway from its present terminus at Bertha, Multnomah County, to a connection with the Pacific Highway West (Barbur Boulevard) in Portland via Terwilliger Boulevard and Slavin Road. The Commission confirmed the action taken at the previous meeting approving such extension and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the Commission is by law authorized and empowered to designate, define and adopt as state highways such road or roads as the Commission may deem of sufficient public importance and may improve, better, pave and maintain the same; and

WHEREAS, a highway known and designated as the Bertha-Beaverton Highway is now a state highway, the easterly terminus of which is at or near Bertha; and

WHEREAS, the Pacific Highway West connecting with and incorporating a part of Barbur Boulevard is a duly designated and adopted state highway; and

WHEREAS, the highway extending from the Bertha-Beaverton Highway at Bertha easterly to Slavin Road, thence over Slavin Road to a connection with the Pacific Highway West and Barbur Boulevard has not yet been designated as a state highway, but in the judgment and opinion of the Highway Commission should be constructed and maintained as a state highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and affirmatively voting, as follows:

1. That the route defined and described as follows, to wit:

AUG 12 1937

From the eastern terminus of the present Bertha-Beaverton Highway, which terminus is at the intersection of said highway with S. W. Capital Highway (formerly a part of the West Side Pacific Highway), which intersection is near the village of Bertha in Multnomah County; thence easterly to a point on S. W. Barbur Boulevard (Pacific Highway West) at or near the intersection of that boulevard with S. W. Slavin Road in the City of Portland; the distance from said eastern terminus of the present Bertha-Beaverton Highway to said point on S. W. Barbur Boulevard being 0.86 mile more or less,

be and the same hereby is designated, defined and adopted as the route of a state highway which shall be and become a part of the Bertha-Beaverton Highway.

2. That the survey, field notes, maps and other engineering data relative to the location and survey of said proposed highway be and the same hereby are approved and adopted and are ordered filed in the records and files of the Commission at Salem, Oregon, and said survey, route and location, subject to such modifications and changes as may be deemed necessary by the Highway Commission, shall be and are the survey, route and location of said road.

3. That said route hereby is qualified for the construction thereover of a state highway with state highway funds to the same extent and in the same manner as are other state highways.

4. Be it further resolved that the Secretary of the Commission be instructed to enter this resolution in the minutes of the Commission and transmit a certified copy thereof to the County Clerk of Multnomah County.

The Engineer reported the necessity to raise the salaries of six gate tenders on the Interstate Bridge from \$90 per month to \$100 per month to meet the wage requirements of the State of Washington, which is paying half of this expense. He pointed out that the 1937 legislature in the State of Washington set a minimum of \$100 per month for state employees, in view of which it would apparently be necessary to raise the pay of the bridge tenders on account of the joint nature of the project. He recommended the increase in wages. The Commission approved the recommendation by unanimous vote.

The Commission considered a resolution from the City Council of Vale, Oregon, and a letter from the Vale Chamber of Commerce, in which the Commission was requested to improve, and promptly undertake the reconstruction and betterment of the oiled surface on the Central Oregon Highway, curb to curb, within the corporate limits of the city of Vale. The Commission denied the request because of insufficiency of funds with which to finance the improvement at the present time.

AUG 12 1937

The Secretary presented a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, in response to his request for recommendations regarding the naming of Short Sand Beach Creek bridge in Tillamook County and the Union Avenue viaduct in Portland in honor of certain individuals. Mr. McArthur gave as his opinion that it is unsatisfactory to name bridges for people, because, in his estimation, the general public will not refer to them by the names of the individuals for whom they are named but instead will refer to them by the names of the bodies of water which they span. He pointed out that there is considerable difference between naming a bridge for an individual and dedicating a bridge to that individual and gave as his thought that in the present instances it would be more satisfactory to dedicate the two structures to the two men who are to be honored than to name the structures for them, and suggested that the matter be disposed of in that manner. The Commission concurred in the viewpoint of Mr. McArthur but took no definite action thereon.

In the discussion that followed, the suggestion was made that Mr. Samuel G. Reed of Nehalem, for whom it is proposed to name the Short Sand Beach Creek bridge, would feel more pleased if the park that he donated to the state were named for him rather than the bridge, the park being located in this same vicinity. The Commission indicated a favorable attitude toward the suggestion but postponed a decision for future consideration.

A letter was presented from the County Court of Wheeler County requesting that the state take over and maintain the county road that extends from the John Day Highway near Fossil to the town of Kinsua, in Wheeler County. The Secretary was instructed to inform the County Court that the Commission cannot do what it requests now but will consider this project along with others in the formulation of the Federal Aid Secondary Highway program.

The Commission considered and ordered filed two letters from County Judge J. B. Wilkerson, Columbia County, both dated July 6, 1937, relative to the allocation of future federal funds to Columbia County.

The Commission also considered and ordered filed a letter from Wm. H. McNeal, Secretary of the Roads Committee of the Wasco County Granges, in regard to the oiling of the old Dalles-Dufur Road.

The Secretary presented a letter from Honorable Robert W. Sawyer, Bend, advising that there is every reason to believe that within the near future arrangements will be completed between the North Unit Irrigation District in Jefferson County and the United States Bureau of Reclamation, for the construction of irrigation works to serve 50,000 acres of the north unit, and giving as his thought that the State Highway Commission should take action as may be necessary, at once, to protect the state's interests in the matter of securing right of way for the proposed revision of The Dalles-California Highway at this location, in view of the fact that the lands to be served by the proposed irrigation system lie adjacent to the present highway and the proposed new highway location. The Commission instructed the Engineer to thank Mr. Sawyer for his timely suggestion, and to proceed immediately with the making of the location survey for the revision of the highway where it will be affected by the irrigation project.

A letter was presented from Estella Carter-Boyer, County School Superintendent, Grant County, urging improvements to the Kimberly-Monument Secondary highway in Grant County, to facilitate the transportation of school children and the consolidation of three small rural school districts. The Secretary was instructed to reply that the Commission does not have available sufficient funds to do any more for this road than it is now doing by way of maintenance but the project will be kept in mind for consideration when the program for the Federal Aid Secondary Highway funds is arranged.

Resolutions were presented from Natal Grange No. 302, Mist, Oregon, Winema Grange No. 652, Birkenfeld, Oregon, and Vernonia Grange No. 305, Vernonia, Oregon, urging relocation, regrading and repairing of the Nehalem Secondary Highway between Mist and Jewell, in order to expedite the oiling of this section. It was the Commission's decision that this project must wait its turn along with others in the same class. The Secretary was instructed to so inform the several granges.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Harold Blake, contract No. 1789, for the construction of an overcrossing over the Southern Pacific Company's tracks on the Junction City-Eugene Secondary Highway, in Lane County, requested an additional extension of time of 16 days, from June 15 to July 1, 1937, within which to complete this project. He attributed his failure to complete the project by June 15 to heavy rains which interfered with the painting of the guard rail fence. The Engineer advised that the statement of the contractor that wet weather conditions delayed completion of the project is correct. He recommended, in view of the circumstances, that the extension requested be granted without penalty. He submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Colonial Construction Co., contract No. 1865, for construction of an overcrossing over the O.W.R. & N. Company tracks on the Old Oregon Trail, in Pendleton, Umatilla County, requested an additional extension of time of 14 days, from July 1 to July 14, 1937, within which to complete this project. They alleged that failure to complete the project by July 1 was caused by additional work required by the Engineer in connection with stairway construction. The Engineer advised that the contractor's statement as to failure to complete the project by July 1 is correct and recommended the granting of the extension now requested without penalty. He submitted a letter from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

Hoffman Construction Company, contract No. 1881, for construction of the bridge over the Southern Pacific Company's tracks on the East Portland-Oregon City Highway in Portland (Union Avenue

AUG 12 1937

Overcrossing), Multnomah County, requested an extension of time of 51 days, from June 30 to July 31, 1937, within which to complete this project. They gave the following reasons for failure to complete this project within the specified time limit: (1) teamsters union strike during August and September, 1936, which held up delivery of sand and gravel; (2) change in plans, requiring additional work in construction of walls, sidewalks, stairways, et cetera; (3) change in plans for the electric wiring and lighting system, which required additional materials to be shipped from the East; (4) delays in commencement of project, due to right of way difficulties; and (5) adverse weather conditions which prevented pouring of concrete for about a month during the first part of the year. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, due to the fact that the delay was occasioned by circumstances beyond the contractor's control, that the extension requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Schmeer, Williams & Gentemann, contract No. 1939, for furnishing crushed rock in stock piles for the Condon-Fossil Section of the John Day Highway in Gilliam and Wheeler Counties, requested an additional extension of time, from June 30 to July 10, 1937, within which to complete this job. They attributed their failure to complete the project by June 30 to the fact that the material to be crushed came from a talus slide which, during the early spring, was very wet and did not permit proper screening of the materials, and, as a result, crushing operations had to be postponed until warm weather set in. The Engineer advised that the contractor furnished the materials in ample time for this season's work, so the state was not inconvenienced by the delay; also, that no additional expense for engineering supervision was incurred. He recommended that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that on May 22, 1936, the Highway Commission granted to contractors Joplin and Eldon an extension of time up to June 30, 1936, within which to complete their contract for the construction of the Eagle Creek Bridge superstructure on the Upper Columbia River Highway, contract No. 1768, subject to the payment of extra engineering expense incurred by the Commission subsequent to the date of completion specified in the contract; and that the extension on such basis was approved by the local office of the Bureau of Public Roads, which later, by letter dated June 24, 1936, recalled its approval because, in its opinion, the assessment of engineering costs cannot be justified if the per diem penalty is waived. He gave as his thought that the contractors should not be required to pay the per diem penalty and recommended, therefore, that they be relieved of paying any penalty whatsoever, in order to expedite payment of the final estimate, which is long overdue. After discussion and in view of the circumstances, the Commission approved the Engineer's recommendation by unanimous vote.

AUG 12 1937

The Engineer reported that contracts Nos. 1789, 1865, 1908, 1924, 1932, 1939, 1948, 1971, and 1978, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1789, with Harold Blake, for the construction of the Eugene Overcrossing on the Junction City-Eugene Secondary Highway, in Lane County. Completed July 1, 1937;

Contract No. 1865, with Colonial Construction Company, for the construction of the East Pendleton Overcrossing on the Old Oregon Trail, in Umatilla County. Completed July 14, 1937.

Contract No. 1908, with Babler Bros., for surfacing, oiling and rock production on the Redmond-Bend Section of The Dalles-California Highway, in Deschutes County. Completed July 9, 1937.

Contract No. 1924, with Smith & Company, for furnishing crushed rock on the Castle Rock-Umatilla County Line Section of the Columbia River Highway, in Morrow County. Completed July 24, 1937.

Contract No. 1932, with Sig Ash, for construction of two bridges and 1.045 miles grading and surfacing on the Alsea-South Fork Section of the Alsea-Deadwood Highway, in Benton County. Completed August 5, 1937.

Contract No. 1939, with Schmeer, Williams and Gentemann, for furnishing crushed rock on the Condon-Fossil Section of the John Day Highway, in Gilliam and Wheeler Counties. Completed July 10, 1937.

Contract No. 1948, with Babler Bros., for oiling and furnishing crushed rock on the Gales-Line Section of the Old Oregon Trail Highway, in Baker County. Completed August 9, 1937.

Contract No. 1971, with Warren Northwest, Inc., for grade widening and paving on the Forest Grove-Hillsboro

AUG 12 1937

8/12/37

Section of the Tualatin Valley Highway, in Washington County. Completed August 6, 1937.

Contract No. 1978, with J. C. Compton, for oiling the Klaskanine Summit-Jewell Section, Treharne Junction-Burton Section and Davies-Banks Section of the Nehalem Secondary Highway, in Clatsop, Columbia and Washington Counties. Completed July 9, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

W. H. Lynch, District Engineer, Bureau of Public Roads, was present and inquired as to the status of the acquisition of right of way for the Eagle Creek Section of the Upper Columbia River Highway. He said that the Bureau is ready and anxious to advertise this job for bids but cannot do so until the right of way matters have been clarified. The Attorney advised that the right of way has all been acquired except that across the property of the O.W.R. & N. Company, and that the plans for the project have been approved by the local railroad officials but apparently there is some delay in securing approval by the officials of the railroad company in Omaha. He predicted that the matter would be cleared up in about a week. The Engineer recommended that the Commission guarantee the right of way to the Bureau of Public Roads in the event that the railroad company's final approval is not secured within a week. After discussion and in view of the urgency of the matter, in order to expedite the construction of this project, the Commission approved the recommendation by unanimous vote.

The Commission considered and signed the following letter with W. H. Lynch, District Engineer, Bureau of Public Roads, and C. J. Buck, Regional Forester, United States Forest Service, directed to the Chief, Forest Service, and Chief, Bureau of Public Roads, Washington, D. C., which letter is dated August 3, 1937, and provides a program for forest highway fund savings that have developed from low bids recently received, amounting to approximately \$120,000.00:

Chief, Forest Service,
Chief, Bureau of Public Roads,
Washington, D. C.

Gentlemen:

By reason of savings which have developed from low bids recently received, there is now available in the Forest Highway Contingent Fund for the State of Oregon approximately \$120,000 which can be programmed to new work. It is our recommendation that this sum be allocated to the Willamette Forest Highway

AUG 12 1937

Project, together with \$20,000 of state cooperative funds which have been offered by the State of Oregon. The project to be financed is the construction of a tunnel approximately 1,000 feet in length, and a small amount of approach grading. The project will be designated Oregon Forest Highway Project 21-J2, K1.

It is our hope that the project can be let to contract this fall and construction carried on during the winter months, thus permitting the opening of the Willamette route a season earlier than could otherwise be effected if the construction of the tunnel is postponed until next year.

The Commission also considered and signed the following agreements, etc.:

Deed, conveying unto I. B. Lindeman and Minnie Lindeman certain property lying outside of the right of way of the Columbia River Highway in the town of Rainier, same being partial consideration for land acquired from the Lindemans for right of way purposes, and being in conformity with the provisions of an agreement between the Commission and the Lindemans dated March 10, 1937.

Lease agreement with Douglas County providing for the use of county-owned property, known as Murphy Bar, on the Umpqua Highway west of Scottsburg.

Agreement with the Southern Pacific Company relating to the Whiteson Undercrossing Project on the Pacific Highway West, in Yamhill County.

Agreement with the Southern Pacific Company covering the construction of an overhead viaduct in Bunker Hill Addition to the city of Marshfield, in Coos County.

Agreement with Columbia River Packers Association providing for the removal of two buildings from the proposed new location of the Oregon Coast Highway along Astor Street in Astoria.

A delegation from Albany and Corvallis, consisting of County Judge J. J. Barrett and County Commissioners H. A. Renninger and H. W. Cooley of Linn County; County Commissioner Wade Malone of Benton County; Mesdames Caldwell and Telford, and Messrs. Stuart, Bryant, French, and C. C. Cochran, came before the Commission and urged the oiling of the unoiled section of the Corvallis-East Side Secondary Highway No. 210 between Albany and Corvallis, about five miles in length. Judge Barrett of Linn County headed the group. He said that this road carries a large volume of traffic and under present conditions is dangerous to travel because of the dust hazard. Furthermore, the dust is causing serious damage to crops adjacent to the road. He gave as his thought that the alignment of the present road is very good and that the rock surfacing thereon is satisfactory to receive an oil treatment; also, that the small

AUG 12 1937

amount of extra right of way that may be needed will not be expensive. He pointed out that the road is now oiled at both ends, leaving only a five-mile section in between to be completed, and urged the improvement not only from the safety standpoint but also from the standpoint of economy, it being his thought that it would be much cheaper to maintain the oiled surface than the present graveled road. In support of his oral arguments, Judge Barrett presented petitions signed by 700 residents of the State of Oregon residing in and near the community and territory served by this road, urging the oiling of the same at the earliest possible time. He also presented results of a traffic count taken between eight and ten o'clock p. m. on Saturday, August 7, 1937, at the intersection of this road with the road leading to Peoria, which count showed 299 cars passing the intersection during such two-hour period. He also presented letters from the Albany Chamber of Commerce and from the committee representing inhabitants served by this secondary highway urging the improvement. Judge Barrett advised, in answer to an inquiry from Chairman Cabell, that the County Court considers this project to be the most important secondary highway project in Linn County. Mr. C. C. Cochran, Secretary of the Corvallis Chamber of Commerce, and County Commissioner Malone, of Benton County, also spoke in behalf of this project.

Chairman Cabell advised that it would be impossible for the Commission to undertake the oiling of this section this year for the reason that there are no funds available to finance the work and because the oiling equipment is now all engaged on other projects. He said that the Commission appreciates the necessity for the improvement and will give it consideration in next year's program.

The Engineer advised that there are two ways to finance the project, one with state funds and the other with Federal Aid Secondary Highway funds. He suggested the adoption of the second method and to do the work as a contract project, revising the alignment of the highway wherever necessary. He pointed out that a survey of the road would have to be made before the Commission could take any definite action as to construction and on account of the scarcity of funds it would not be possible to make such survey until next year. The Commission by unanimous vote authorized and instructed the Engineer to make a survey of this road when funds are available to finance it.

A delegation from Baker County, headed by Judge Chas. E. Baird and consisting of the following members representing the Baker Chamber of Commerce and residents of Eagle and Pine Valleys, came before the Commission in the interests of the Baker-Homestead Highway: County Commissioners R. M. Phipps and Claude Holman, Senator W. H. Strayer, L. L. Vermillion, Representative Al Grant, Henry McKinney, C. T. Gedwin, Jim Donald, Howard Bergman, Fred Makinson, W. W. Evans, Ed Carlinghouse, M. Cooper, Albert Melhorn, Ala Pearson, and S. Marker. They particularly requested improvements between Baker and Halfway. They also asked for improvements to the Baker-Unity Highway. Judge Baird stated that the people of Baker County are not satisfied with the treatment that they have received at the hands of the Highway Commission; that the Commission has spent considerable amounts in other counties for construction work but Baker County has received only a small amount of the highway revenues and has been going on from year to year with practically no

improvements, other than maintenance, on primary and secondary highways. He urged the Commission to outline at once a program for the improvement of Baker County roads and to start construction of some of the projects this year. He particularly mentioned the Baker-Halfway Section of the Baker-Homestead Highway and the Baker-Unity Highway as being badly in need of improvement. He also asked the Commission to designate as a secondary highway the county road which extends from the town of Robinette northwesterly to a junction with the Baker-Homestead Highway, a distance of about $3\frac{1}{2}$ miles, in order to provide a proper connection between the Baker-Homestead Highway and the Robinette-Homestead Secondary Highway.

Mr. Vermillion, President of the Baker Chamber of Commerce, endorsed Judge Baird's remarks and introduced other speakers as follows: Mr. Donald, who alleged that there are only two counties in the state that have contributed more county funds for state highway construction projects than has Baker County. He gave as his thought that from that standpoint Baker County is entitled to more consideration in the distribution of highway revenues than it has received in the past. He mentioned the Medical Springs and Baker-Unity Highways and declared that these roads have not been properly maintained and are badly in need of oiling. Baker County, he said, does not want to be unfair but feels that it is justified in requesting these improvements because it is not receiving now proper consideration in the distribution of highway funds. He also mentioned the Baker-Homestead Highway, which road, he said, people hate to use because it is in such a deplorable condition. He urged relief from the present conditions at the earliest possible time.

Henry McKinney, Chairman of the Roads Committee, Baker Chamber of Commerce, spoke for the improvement of the Baker-Homestead Highway from the commercial standpoint, particularly in the interests of the dairy industry in Eagle and Pine Valleys, which, he declared, is at the top of the list of all the dairy districts in the state, and in the interests of the mining industry in the Cornucopia district, which, he said, creates a large volume of traffic. He urged the Commission to make a definite commitment of funds now, to the end that the Baker-Homestead Highway will receive proper improvement at the earliest possible time.

Mr. W. W. Evans, Halfway, declared that the Baker-Homestead Highway is the life line of their district; that they have urged the improvement of this road for many years; but the only satisfaction that they have received is a statement that there are no funds available to finance the work but that their request will be taken under consideration. He urged the Commission to give the delegation some assurance to take home with them that the Baker-Homestead Highway will be improved soon.

Representative Al Grant endorsed the remarks of the other speakers and declared that all they want is the oiling of their roads and that the "ungodly" ruts be eliminated. Senator Strayer also spoke in behalf of the projects and particularly urged the oiling of the Baker-Halfway Section. He stated emphatically that they want this road oiled and they want it oiled now. He advised that they would be satisfied with the smoothing up of the present highway rather than reconstruction on new alignment but they want this smoothing work done at the earliest possible time and the road oiled to allay the dust.

Chairman Cabell advised that the Commission has under consideration the oiling of the Baker-Homestead Highway from Baker to Halfway and the oiling of the Baker-Unity Highway through the farming district south of Baker, but cannot make a definite commitment of funds today. He pointed out that it is strictly contrary to the established policy of the Commission to commit funds in advance and gave as his thought that the Commission should not deviate now from this policy, which is of long standing. He also pointed out that the oiling work could not possibly be done this summer even if money were available to finance the work because it is too late in the season to start oiling operations. He advised that the Commission contemplates an inspection trip to Eastern Oregon within the next few weeks and at that time will inspect Baker County roads and will see what can be done about letting a contract this winter for construction next year.

Judge Baird stated that he appreciates that the Commission cannot do the oiling work this year but suggested the early letting of a contract for the production of the rock that will be needed in connection with such operations so that a start will be made. He gave as his understanding that Baker County is entitled to an annual allotment of about \$40,000 of highway funds and, if that is true, and if the Commission will make a start this fall on the improvement of the Baker-Homestead Highway, the County Court will approve the spending of this money on this road. He asked that the contract be awarded not later than November or December.

Commissioner Aldrich suggested that it might be advisable to improve the section from Baker to a junction with the Keating road, a distance of about seven miles. Mr. Evans said that they did not care which section the Commission improved first but they want a start made at once. Judge Baird declared that the Baker-Flagstaff Section would be satisfactory. The Engineer presented estimates of cost to construct various units. After further discussion Chairman Cabell concluded the conference by stating that the Commission can make no definite commitment or promise in regard to this project today except that Baker County highway improvements will be given first consideration when the program for Federal Aid Secondary Highway funds is prepared.

The Commission adjourned at 12:20 o'clock p. m., to reconvene at 1:30 o'clock p. m. in the same room.

The State Highway Commission reconvened at 1:30 o'clock p. m. in the Auditorium of the Public Service Building, with all members, the State Highway Engineer, the Attorney and the Secretary present.

The Commission had under consideration the matter of revising the 1938 railroad grade separation and federal aid programs to provide for the financing of the Albany grade separation project and line revision, the estimated cost of which is considerably more than was originally anticipated. The Engineer suggested the elimination of the Hood River grade separation project from the program in view of the fact that it involves an expenditure of a much larger sum of money than can be spared at this time; also, that the proposed Siskiyou Mountain project on the Pacific Highway in Jackson County be

reduced to \$100,000, and the Albany project, for immediate construction, be reduced to \$150,000, the balance of such project to be financed with 1959 funds. After discussion the Commission tentatively approved the Engineer's suggestion and instructed him to prepare a revised program on such basis for consideration by the Commission at its next meeting.

The Attorney requested instructions in regard to the claim of Ralph J. Robertson, whose property adjacent to the Pacific Highway, in Jackson County, (new route) is endangered by a slide condition resulting from highway construction in front of his place. The Attorney advised that he conferred with Mr. Robertson and ascertained that he would not be satisfied unless the state would pay him \$5,000 in cash and would reconstruct the road leading to his place that was destroyed by the state's contractor and by the slide. The Commission deferred a decision in this matter, pending a personal inspection of the premises by Commissioner Tou Velle, and his recommendation.

County Judge Hugh McLain, Coos County, was present and asked the Commission to designate and improve as a secondary state highway the county road which extends southeasterly from Marshfield to the town of Sumner, a distance of about ten miles. He particularly asked the Commission to construct a bridge on this road replacing an unsafe one that the county had to demolish. He offered county funds in the amount of \$6,750 to help defray the cost of the bridge, plans for which, he said, have already been prepared, and also offered to turn over to the state a county-owned quarry located in this vicinity, which, he said, could be used as a source of supply for surfacing materials. Judge McLain also asked the Commission to extend the Coos River Secondary Highway a distance of about 2½ miles northeasterly from its present terminus near the town of Allegany, and to improve the same so that it can be used by traffic the year around with safety. He explained that the present road is only wide enough for one-way traffic and that it will have to be improved as an accommodation for the many logging trucks that are operating over it, and for the convenience and safety of school children who travel over the road daily during the school season in a school bus but who are confronted with extreme danger every time they travel over the road on account of present conditions. He offered \$2,500 of county funds toward the cost of improving this section if the Commission will designate it as a secondary state highway and undertake a sufficient amount of work thereon to make the road usable with safety through the year.

Miss Kay Greame, Principal of the Allegany School, who was present, also urged the Commission to improve this road in behalf of the school children. She advised that the road is a dangerous one to travel and that at certain times of the year it is impassable; in fact, it is necessary at times to close the school because the pupils are unable to attend on account of road conditions. She further advised that there are 90 children who have to be transported every day to and from school and she alleged that each time they pass over the road they are subjected to extreme hazard, which can be avoided only by reconstruction of the road.

The Engineer advised that it would cost about \$20,000 per mile to grade this section to an adequate standard to care for heavy trucks and other

AUG 12 1937

traffic and that the surfacing work would be extra. After considerable discussion, in which Judge McLain stated that they would be satisfied with the improvement of the Coos River Highway extension alone if the Commission could not see its way clear to undertake the bridge project, Chairman Cabell advised that the Commission would give the matter some thought but it would not be possible to make definite commitment of funds or any promises at this time. The Commission agreed to inform Judge McLain by letter as soon as a definite decision has been made and to send a copy of the same to Miss Greame.

County Commissioner Jay Dunn, Lincoln County, came before the Commission in the interests of the Siletz River Secondary Highway. He inquired as to the Commission's plans for the improvement of this road. He was informed by the Engineer that the Commission has considered making this road a federal aid secondary highway with a view of using federal aid secondary monies to finance its improvement; but the probabilities are that the program for such roads will not be arranged until it is too late to do any construction work this year; so the concern of the Commission at this time is, what can be done in the way of improvements to maintain travel during the winter season so there will not be a repetition of last winter's difficulties. The Engineer further advised that the Commission had this matter under discussion on the previous evening, at which time he was instructed to render a full report on the present condition of the road, the need for improving the same, and the cost involved, such report to include information on the source of supply of road-building materials. He gave as his thought that for an expenditure of approximately \$50,000.00 the road could be fixed up temporarily so that it would be passable the year around, and he recommended that that be done.

Mr. Dunn inquired what plans have been made for the improvement of the swamp section. He was informed by the Engineer that eventually the road will have to be relocated around the swamp, which project the Commission hopes to undertake when federal funds are available to assist in financing the work. In the meantime, he added, it will be necessary to place enough rock on this section to maintain travel through the winter. As a matter of information Mr. Dunn stated that there is a scarcity of good road rock in the Siletz district and that the best rock that could be obtained is located at Agate Beach, although there is a source of supply of gravel in the Siletz River near the town of Siletz which might prove satisfactory for filling-in purposes. After further discussion the Commission decided to proceed with the rocking of this road in conformance with the Engineer's suggestion, and authorized him to advertise the project for bids to be received at the next meeting, in September, the contract to be limited in amount to \$50,000.

Mr. Dunn then asked the Commission to apply an oil treatment to the parking area adjacent to the Oregon Coast Highway at Otter Crest for the benefit of the many sight-seers who stop at this place. The Commission approved the request and instructed the Engineer to see that such oiling work is done when an oiling crew is available.

A delegation from North Bend, headed by Mr. Edgar McDaniel and including Henry G. Kern and W. M. Miller, representing the towns of Empire,

AUG 12 1937

Barview, Charleston and way-points, came before the Commission and asked for improvement on the Cape Arago Secondary State Highway, particularly the oiling of the same in order to alleviate the dust nuisance. They alleged that Coos County does not have funds to pay for such work, so if they are to secure any relief it will have to come from the state. They declared that the road is not a very good advertisement for the state in its present condition, being rough and dusty and a very dangerous road to travel when a condition of combination dust and fog is encountered. Mr. Hiller presented two petitions, signed by 3,127 citizens of Coos County, some of whom reside along this road, the balance in other parts of western Coos County, all of whom are very anxious for the state to undertake this improvement. He also presented letters from the Oregon State Elks Association and the Post Office Department, Marshfield, endorsing the request. In support of his contention that traffic over this road is extremely heavy he presented results of a traffic count taken on Sunday, August 8, 1937, over this road, from 8:00 o'clock a. m. to 6:00 o'clock p. m., which indicated that 707 vehicles passed over the road enroute to beach points, and 670 vehicles returned. Mr. Kern stated that they would be satisfied with the oiling of this road as far as the town of Charleston if the Commission feels that it does not have sufficient funds to extend the work a greater distance. After discussion Chairman Cabell advised that the Commission is aware of the condition of this road and will consider its improvement, but there are many things around Coos Bay that the Commission has to do and there is a question which of the projects should be undertaken first.

County Commissioners E.H. Lindsey and E.G. Anderson of Tillamook County were present regarding the award of the contract for the Tillamook County oiling project on three county roads, for which bids were taken at the morning session. The Engineer advised that the low bid received for this job was that submitted by J.C. Compton, McMinnville, at \$38,316.00, based on the use of tar, and that there were two higher bids received. He estimated that Tillamook County's share of this cost would amount to about \$12,000. Mr. Lindsey stated that the county is ready and willing to pay such amount to the state in warrants if the Commission will agree not to cash the warrants until the project is done. He inquired whether or not the state would pay the engineering and inspection costs in connection with this work and gave as his understanding that the Commission agreed at one time to assume such expense. He was informed that the statements previously made by the Commission in that regard simply referred to engineering expense incurred prior to construction and it was not intended that the state would pay for construction engineering and inspection, because it has no legal authority to do so. The Attorney confirmed such statement. After discussion the Commission agreed to accept the county's warrants in payment of its share of this work and to hold such warrants until the job is completed. The County Commissioners agreed to pay the cost of construction engineering supervision and inspection. The Attorney was instructed to prepare a form of agreement covering the matter and it was mutually agreed that the award of the contract would be withheld pending execution of this agreement and delivery of the county's warrants to the Commission.

Mr. Lindsey brought up for discussion the matter of the State Highway Commission cooperating in the cost of the Dougherty Slough revetment project. He said that this improvement is now nearing completion and that the

AUG 12 1937

drainage district which is doing the work as a U.P.A. project under county sponsorship, and is paying for the same, believes that the state should pay a portion of the cost thereof because the revetment will act as a safeguard to the Oregon Coast Highway which is located nearby. The Attorney advised that about two years ago the Commission agreed to cooperate in this undertaking and instructed him to prepare a form of agreement covering the matter, which he did, but the agreement has not been signed by either party thereto. He read excerpts therefrom for the Commissioners' information. After discussion the Commission referred the matter to the Engineer for investigation and to work out the details in the event it appears that the Commission is obligated to contribute state funds for this improvement.

Chairman Cabell left the meeting at 5:00 o'clock p. m.

Also at 5:00 o'clock p. m. the State Highway Engineer announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Overcrossing structure over the Southern Pacific Company's tracks on the Coos River Secondary Highway, at Bunker Hill, in Coos County, including 0.16 mile grading highway roadbed and 0.39 mile grading railroad roadbed. The low bid was that submitted by Mountain States Construction Company, Eugene, at \$44,768.50. The next low bid was that submitted by Coos Bay Dredging Company, Marshfield, at \$51,869.20. There were two higher bidders. The Commission has awarded this contract to the low bidder, Mountain States Construction Company at its bid price of \$44,768.50.

"Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties. 2.18 miles of highway right of way clearing work. The low bid was that submitted by Berke Bros., Inc., Portland, at \$24,950.00. The next low bid received was that submitted by Roy L. Houck, Salem, at \$29,600.00. The only other bid received was that of Heller & Gillgannon, Scappoose, at \$31,750.00. The Commission has deferred the award of this contract and has referred the bids to the Engineer with power to make the award to the low bidder when certain conditions have been satisfied.

"Lake County Line-Gap Ranch Section of the Central Oregon Highway, in Harney County. 2.12 miles regrading, 7.61 miles surfacing, and furnish 11,500 cubic yards crushed rock in stock piles. The Commission received six bids for this job, the low one being that of Babler Bros., Portland, at \$68,157.00. The second low bid was that of A. Milne, Portland, at \$68,850.00. The Commission has awarded this contract to the low bidder, Babler Bros., at its bid price of \$68,157.00.

"Bloucher Section of the Hood River Secondary Highway, in Hood River County. 1.6 miles surfacing and oiling and furnishing of 4,000 cubic yards crushed rock in stock piles. The low bid was that submitted by Parker-Schram Company, Portland, at \$26,642.50. R. O.

Dail and Warren Bros., Aberdeen, Washington, submitted the next low bid at \$27,365.00. There were two higher bidders. The Commission has rejected all of these bids and has ordered the project readvertised for bids to be received at the next meeting.

"Eagle Point-Baker Gulch Section of the Little Butte Secondary Highway, in Jackson County. 5.2 miles surfacing and furnishing 3,950 cubic yards crushed gravel in stock piles. The low bid was that submitted by Saxton & Looney and J. S. Risley, Portland, at \$17,017.50. The next low bid was that submitted by Clifford A. Dunn, Klamath Falls, at \$17,257.50. There were four higher bidders. The Commission has awarded the contract to the low bidders, Saxton & Looney and J. S. Risley, at their bid price of \$17,017.50.

"Siulaw Junction-Awbrey Section of the Pacific Highway, in Lane County. 4.52 miles grading and topping and construction of a timber pile trestle with concrete superstructure. The low bid was submitted by Edlefsen-Weygandt Company, Portland, at \$65,858.00. The next low bid was submitted by M. L. O'Neil & Son, Eugene, at \$66,068.50. There were nine higher bidders. The Commission has awarded the contract to the low bidder, Edlefsen-Weygandt Company, at its bid price of \$65,858.00.

"Concrete undercrossing structure, retaining walls, and highway roadbed at crossing with Union Pacific railway tracks on the Old Oregon Trail Highway at Ontario, in Malheur County. C. J. Montag & Sons, Portland, submitted the low bid for this project at \$190,187.50. The next low bid was submitted by Warren Northwest, Inc., Portland, at \$191,171.00. There were six higher bidders. The Commission has awarded the contract to the low bidders, C. J. Montag & Sons, at their bid price of \$190,187.50.

"Remodeling and widening Union Avenue Bridge over Sullivan Gulch on the Pacific Highway East, in Portland, Multnomah County. The Commission received two bids for this project, the low one being that of Averill & Corbin, Portland, at \$65,960.00. The other bid was that submitted by Gilpin Construction Company, Portland, at \$75,780.00. The Commission awarded the contract to the low bidders, Averill & Corbin, at their bid price of \$65,960.00.

"Tillamook County Oiling project on three county roads, in Tillamook County. 4.4 miles surfacing and 8.5 miles oiling. The low bid was submitted by J. C. Compton, McMinnville, at \$38,316.00 based on the use of tar. Warren Northwest, Inc., Portland, submitted the next low bid at \$41,917.00 based on the use of tar. The only other bid received was that of Babler Bros., Portland, at \$42,493.00 based on the use of tar. The Commission has deferred the award of this contract and has referred the bids received therefor to the Engineer with power to award the contract to the low bidder when an agreement has been signed with the county covering the matter of furnishing rock.

"Furnishing of structural steel for the undercrossing super-structure at the crossing of the Southern Pacific Company's tracks near Whiteson, on the Pacific Highway West, in Yamhill County. The low bid was submitted by Minneapolis Moline Power Implement Company, Los Angeles, at \$4,696.00. The next low bid was submitted by Poole & McGonigle, Portland, at \$4,980.00. There were two higher bidders. The Commission has awarded the contract to the low bidder, Minneapolis Moline Power Implement Company, at its bid price of \$4,696.00.

"Sale of residence property in the town of Enterprise, Wallowa County. The Commission received two bids for the purchase of this property, the high bid being that of T. R. Maxwell, at \$1,800, and the other being that of Portia S. Thomas at \$1,000. The Commission has accepted the bid of T. R. Maxwell and has sold the property to him at his bid price of \$1,800."

Major A. E. McKennett of the United States War Department was present in regard to the proposed Hood River project involving the rebuilding of the section of the Columbia River Highway and the Interstate Bridge Secondary Highway necessitated by the construction of the Bonneville Dam, and the Government's offer of \$75,000 as settlement in full for the damage resulting therefrom. The State Highway Engineer advised that he could not recommend to the Commission the acceptance of the Government's offer because it involves an expenditure of nearly \$400,000, toward which the Government would contribute only \$75,000, leaving the balance for the state. Furthermore, the acceptance of the offer would obligate the Highway Commission to spend approximately \$200,000 annually on the Hood River-Mosier Section realignment, which expense, he said, is far beyond the ability of the State Highway Commission to pay under present circumstances. Major McKennett made no statements whatsoever in regard to the project but expressed a desire to discuss the matter further with the State Highway Engineer on the following day in Salem, in an endeavor to work out an alternate proposition that would be satisfactory to the Commission. Such conference was thereupon arranged.

Mr. Elmer Bankus headed a delegation from the town of Brookings which asked for improvements to the Oregon Coast Highway through Brookings. Others in the delegation were Ed. W. Miller, Manager of the Oregon Coast Highway Association; Charles T. M. Echols, County Engineer of Curry County; James A. Harris; Tom B. Page; and W. S. Chadwick. Mr. Bankus stated that the people of Brookings are anxious to improve their properties along the highway through this town, which, he said, is the gateway of the State of Oregon and as such should be developed in order to create a good impression on tourists; but they cannot do so because of the proposed highway work which might require changes in their plans in the event the improvements did not fit in with the plans for the highway. He urged the Commission to make definite plans for the highway at this time so the people can proceed with their improvements without fear of alteration at some future date. Mr. Echols stated that for the most part right of way for the proposed improvement will be donated. He presented a resolution signed by 16 property owners who assert their willingness to give to the state free of cost extra right of way, ten feet wide, provided the state will bear the expense of moving and altering

the buildings located thereon, and will commence the widening and improvement of the highway in Brookings within six months. He also presented a resolution from the County Court of Curry County requesting the State Highway Commission to obtain additional right of way for the Oregon Coast Highway through Brookings and to widen said highway through this town, including reconstruction on permanent alignment northerly to the Chetco River bridge. Mr. Bankus presented a brief in support of oral arguments, containing recommendations of the Brookings Chamber of Commerce.

The State Highway Engineer advised that surveys for this proposed improvement have not yet been made, neither have estimates of cost been prepared. He said that he believed he could have a full report on this matter ready for the Commission's consideration about the first of January, 1938.

Mr. Miller stated that about all they are asking for at this time is that the Commission authorize such survey and the preparation of estimates.

Commissioner Aldrich advised that the condition of the Highway Commission's finances will not permit construction work this year, so the only thing the Commission can do now is to refer the matter to the Engineer for report. The Commission thereupon by unanimous vote authorized the Engineer to make such surveys as may be necessary to render a complete report on this project, such survey to be made before January 1, 1938, it being strictly understood that the Commission, by ordering such survey, is making absolutely no commitment as to allocation of funds for construction.

Mr. Otto J. Kraemer, Attorney, Portland, appeared before the Commission in behalf of Frank F. Reiner, who has a claim against the Commission for closing Stephens Street at its intersection with Union Avenue, in East Portland, in connection with the construction of the Union Avenue project. Mr. Kraemer alleged that Mr. Reiner has a just claim because the street was closed at the instance of the State Highway Commission in connection with the construction of the East Portland-Oregon City Highway, and Mr. Reiner's property, which is located at the southeast corner of this intersection, has now no outlet onto Union Avenue from Stephens Street. The Commission referred this matter to Chairman Cabell with power to act. The Commission's Attorney was instructed to arrange a conference between the Chairman and Mr. Kraemer for discussion of the matter.

The County Court of Deschutes County, represented by County Judge C. E. Lyon and County Commissioner Wm. Baer, accompanied by Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, came before the Commission and asked for the following improvements: (1) designation as a state secondary highway of that portion of The Dalles-California Highway between Redmond and Bend that has been abandoned by reason of the reconstruction of the highway on new alignment; (2) designation as a state secondary highway of the county road which extends from Bend to Tumalo Falls.

The Commission agreed to placing the old highway between Redmond and Bend on the state secondary highway system provided the County Court will make formal request for such designation by appropriate resolution. The Attorney was instructed to prepare a form of resolution covering the matter.

Mr. Peoples explained that the Tumalo Falls road extends into the winter recreational area of the Central Oregon district, and that the United States Forest Service has spent upwards of \$50,000 for improving this winter playground, which is used by more than 700 members of their winter sports club. He gave as his understanding that Deschutes County has about \$10,000 credit with the state for secondary highway construction, and suggested that this money be used to finance improvements on this road, so the club members can have the benefit of them this winter. Judge Lyons pointed out that Deschutes County owes the state some \$5,000 for road improvements, and offered, if the Commission would spend this money on the Tumalo Falls road, to pay off the debt by assignment of a portion of Deschutes County's share of the state gasoline tax funds. The State Highway Engineer advised that it is contrary to the established policy of the Commission to add any more roads to the state secondary system until the state-wide planning survey, which is now under way, has been completed and the results thereof carefully studied. He further stated that Deschutes County will not lose its credit of state secondary highway moneys; but, on the other hand, the credit will accumulate and will be applied at the proper time for secondary highway construction work in Deschutes County. He further stated that an estimate of cost to construct and maintain this road has been prepared for the information of the Commission when the secondary highway matters are discussed.

Mr. A. A. Kerry, Manager of the Lincoln County Logging Company, Taft, Oregon, came before the Commission and asked permission to construct and operate a sky-line logging cable over the Siletz Secondary Highway, in Lincoln County, in connection with logging operations. He said that the operations would probably last only about 60 days and that, if the Commission granted him this privilege, he would construct over the highway and under the sky-line, a timber structure for the protection of traffic on the highway in the event that logs should get loose from the sky-line cable. The Engineer stated that he previously discussed this matter quite thoroughly with Mr. Kerry and is of the belief that the method proposed for transporting the logs over the highway and for the protection of traffic is satisfactory. He recommended, therefore, in view of the fact that the operations will last only a short time, the granting of the request subject to the condition that the timber structure shall be constructed to his satisfaction and that the Lincoln County Logging Company will furnish the state public liability insurance in the amount of \$50,000/\$100,000 and property damage in the amount of \$10,000, and will furnish a bond in the amount of \$1,000 for the protection of the highway and to insure the proper cleaning up of the premises when the operations are completed. The Commission indicated approval of the Engineer's recommendation and referred the matter to him with full power to act.

The County Court of Hood River County, represented by County Commissioners J. D. Smullin and R. W. Perry, appeared before the Commission in regard to the surfacing and oiling of the Bloucher Section of the Hood River Secondary Highway, for which bids were opened at this meeting. They were informed that the Commission considered that the bids received for this project were too high, hence rejected them and ordered the project readvertised for new bids. It was also explained that, if the Commission does not receive a

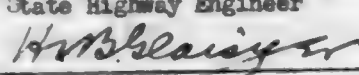

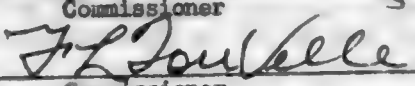

satisfactory bid next time, the work will be done with state forces. However, in no case can the work be done until next year because it is too late to do oiling work this year.

The County Commissioners then asked the Commission to remove a hump in the Mt. Hood Highway near its junction with the whiskey Creek county road. They alleged that this hump creates a very dangerous condition because it so happens that it is on a turn in the highway close to an intersection where the sight distance along the highway is very limited. The Commission referred this matter to the Engineer for investigation and report.

Mr. Samuel A. Lancaster, Civil Engineer, Portland, was present and asked the Commission to authorize a survey for a bridge across the Columbia River just above the site of the Bonneville Dam. He said that he intends to make an attempt to secure federal funds for the construction of a bridge at this point, but needs a certain amount of engineering data, including an estimate of cost, to submit with his application for such funds. It was explained to Mr. Lancaster that the Commission's attention is now being given to the reconstruction of the highway up the Columbia River Gorge; hence the Commission is not particularly interested in a bridge across the river at this time; therefore, it is necessary to deny his request.

Mr. David T. Mason, Portland; Mrs. W. C. Belt, Newport; and a Mrs. Rogers, representing a man by the name of J. D. Abbott, came before the Commission in regard to the proposed reconstruction of the Oregon Coast Highway between Fogarty Creek and Boiler Bay, in Lincoln County. They gave as their understanding that the highway is to be relocated nearer the ocean, and asked the Commission to reconsider its plans and place the highway farther away from the ocean so as to avoid cutting up their beach property and spoiling their beach. The Engineer advised that the Commission has already adopted the permanent alignment along this section. He pointed out that the permanent alignment in front of Mr. Mason's property coincides with the present road, so there will be no change whatsoever at this point except that the right of way will have to be widened. However, an entirely new right of way will have to be acquired across the property belonging to Mrs. Belt and Mr. Abbott in order to eliminate excessive curvature in the present road. Mrs. Belt said that she would rather give a 100-foot right of way across her property farther away from the ocean than sell any of her property for right of way between the present highway and the ocean. Commissioner Aldrich advised that the Commission is endeavoring to relocate highways for permanency and depends on the engineers to decide where the roads shall go, which procedure has been followed in this particular instance; also, that, while the Commission has no definite plans for the immediate reconstruction of the section of the Oregon Coast Highway under discussion, it is proceeding with the acquisition of right of way for the same so that everything will be in readiness to proceed when funds are available to finance construction work. The Commission indicated that it would not approve changing the adopted line for the permanent highway at this place.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 o'clock p. m.

 State Highway Engineer	 Chairman
 Secretary	 Commissioner
	 Commissioner

La Grande, Oregon, August 26, 1937.

The State Highway Commission met in special session at 9:00 o'clock p. m. in the Sacajawea Hotel following an inspection of state highways in Baker County with members of the Baker County Court, Baker Chamber of Commerce, and Mr. W. W. Evans, Halfway. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 R. H. Baldock, State Highway Engineer
 H. B. Glaisyer, Secretary

Commissioner F. L. Tou Velle was absent.

Mr. L. K. Kinzel, representing the Mt. Emily Lumber Company, was present and urged improvements to the Hilgard-Starkey Secondary Highway, in Union County. He said that this road closely parallels the company's railroad leading to Starkey in several places and that highway department forces, in maintaining the highway grade with grading equipment, frequently tear out railroad ties, causing the company unnecessary inconvenience and expense. He asked the Commission to correct this situation, which he thought could be done by constructing a drainage ditch between the highway and the railroad. He estimated that a satisfactory job could be done for \$3,000 or \$4,000 over and above the ordinary cost of maintenance.

Mr. Kinzel complained that the highway department forces, in connection with snow removal operations along the Old Oregon Trail, about 7 miles west of La Grande, frequently deposit snow from the highway upon their railroad, which not only constitutes a hazard to railroad traffic but is also an inconvenience and an expense to them. He also stated that along this section there is a tendency for the highway embankment to slough off onto the railroad. He suggested that this condition could be remedied by the construction of a retaining wall, and urged that that be done.

Mr. Kinzel also asked for the installation of culverts at five different locations on the Hilgard-Starkey Secondary Highway, to eliminate the necessity for traffic to ford streams at these points. He advised that

AUG 26 1937

supplies for their camps in the Starkey district have to be trucked over this highway, and, under present conditions, it is necessary to drive the trucks through streams at several places, which is very inconvenient, especially during the early part of the year when water often reaches a depth of more than two feet. He asked for a statistical report from the Commission on the number of secondary highways throughout the state where similar conditions exist.

Mr. Kinzel also asked for the construction of an approach road to this highway at a certain location. He alleged that at one time an approach road existed at this particular point but it was later destroyed by reason of highway department activities, and he asked that it be replaced. Mr. Kinzel also asked the Commission to widen the highway grade at a point known as Ox Bow, and the construction of guard fence along this section. He said that the highway is about 40 feet above the Grande Ronde River at this location, and, under present conditions, because of the narrowness of the highway grade, a serious traffic hazard exists, which should be remedied at the earliest possible time.

In the discussion of the snow-removal operation and the sloughing-off of the highway grade onto the railroad west of La Grande, the question arose whether or not the railroad had prior rights over the highway. Mr. Kinzel alleged that the railroad should be given first consideration because it had its right of way before the right of way was acquired for the highway. His assertions were questioned by the Highway Engineer, whereupon Mr. Kinzel agreed to furnish evidence to that effect. After further discussion, the Commission ordered an investigation of the complaints made by Mr. Kinzel, such investigation to be made by Division Engineer W. C. Williams, and a report rendered thereon. Mr. Williams is to contact Mr. Kinzel and make a joint inspection if necessary.

The Engineer reported that expenditures of state funds in connection with the Wolf Creek and Wilson River W.P.A. projects will, in the near future, overrun the amounts that to date have been authorized by the Highway Commission. He asked the Commission to authorize an additional \$62,000 in order to carry on operations to the end of the present year. The Commission approved the request by unanimous vote.

The Engineer brought up for discussion the matter of increasing the amount previously authorized by the Commission for furnishing rock for the Siletz River Secondary State Highway, in Lincoln County. He recalled that the Commission, at its meeting on August 12, authorized him to advertise for bids for a project costing not to exceed \$50,000, which amount, it now appears, will not be sufficient to finance a satisfactory project. He requested authority to increase the amount of this project to \$59,000, which would include surfacing an 8-mile section east from Kernville, furnishing maintenance rock in the vicinity of Siletz, and the surfacing of the road south of Siletz so as to keep the road open for traffic during the winter. The Commission approved the request by unanimous vote.

A letter was presented from L. A. Hollinshead offering his services in the procurement of right of way for a connection between the Oregon Coast

AUG 26 1937

Highway and the Wolf Creek Highway, in the vicinity of Cannon Beach. The Engineer advised that no surveys have as yet been made for this connection, hence it would not be possible to take advantage of Mr. Hollinshead's offer at this time. The Commission ordered that this matter be referred to Division Engineer F. D. Eason to so inform Mr. Hollinshead and to ascertain from him definitely just what he has in mind.

The Secretary reported that he has arranged with the Shell Oil Company for a showing of their film predicting "The City of Tomorrow" and that the company has indicated its willingness to show these pictures to the Commission on September 14, which is the date of the next regular meeting of the Commission in Portland. He inquired what time of the day the Commission would like to view these pictures. He was instructed to arrange for the showing at 1:30 o'clock p. m. in the Chamber of Commerce rooms in Portland, if possible.

The Engineer reported that the Nehalem River Bridge, near the Oregon-American Lumber Company's sawmill in Vernonia, being Bridge No. 102-60.2, was recently damaged by the passage thereover of a heavy load and that he has ordered the posting of this bridge for an 8-ton load limit, pending the placing of falsework under the structure so that it will be safe for legal loads. He asked the Commission to confirm the posting of this structure and the removal of the reduced load limit when the reinforcements have been completed. The Commission approved the request by unanimous vote.

The Engineer reported that he has been invited by the Board of Directors of "The Asphalt Institute" to prepare and personally deliver a paper covering "Penetration Macadam as Developed and Used in Oregon" at the Annual National Asphalt Conference which is scheduled to be held in Memphis, Tennessee, from December 6 to 10, 1937. He inquired whether or not he should accept this invitation. After discussion the Commission authorized the Engineer to attend this meeting at state expense in the event that it will not interfere with his other duties and that the trip is approved by Governor Martin.

The Secretary presented a letter from Dr. E. B. McDaniel, President, Oregon State Motor Association, in regard to the \$1,000,000 Oregon highway bonds that the Commission proposes to sell on September 14. The Commission instructed the Secretary to ask Dr. McDaniel to be present at a special meeting of the Commission on the evening of Wednesday, September 15, for a discussion of this matter.

A letter was presented from Mrs. J. S. Evans, Marshfield, inquiring as to what action the Commission has taken on the request of residents of Barview and Charleston districts, Coos County, for repairs and oiling on the Cape Arago Secondary State Highway. The Secretary was instructed to inform Mrs. Evans that the Commission is not in a position at the present time to render a decision but of necessity will have to wait until it has a better idea what funds will be available for construction purposes next year. Further, that the Commission contemplates holding a special meeting some time during the month of November for consideration of the 1938 budget and will give this

particular project serious consideration at that time. He was also instructed to convey similar information to Mr. W. M. Hiller, Empire, Oregon, who was one of the delegation that appeared before the Commission on August 12 in regard to this improvement.

The Commission had under consideration a petition signed by 220 residents of Douglas and Coos Counties residing along and adjacent to the old Coos Bay Wagon Road, requesting that such road be designated as a state highway and improved as such. The Secretary was instructed to inform the petitioners that the Commission is not in a position financially or otherwise to assume any more responsibilities in Coos County, particularly in view of the heavy expenditures that the Commission has made in this county in recent years for highway improvements.

Reconsideration was given by the Commission to the request of County Judge Hugh McLain, Coos County, for the extension of Coos River Secondary Highway from its present terminus, about 5 miles north of the town of Allegany, northerly a distance of about 3 miles; also, to Judge McLain's request for the designation as a secondary state highway of the county road which extends southeasterly from Marshfield to Sumner. The Secretary was instructed to inform Judge McLain that the Commission has found it necessary to decline his offers of county cooperation for the improvement of these two roads because it is not in a position to assume additional responsibilities or obligations in Coos County at this time.

A letter was presented from C. E. Greider, State Supervisor of Recreational Study for the Branch of Recreational Planning and State Cooperation of the National Park Service, requesting approval of a plan for the cooperative study of recreational possibilities in the State of Oregon, as authorized by Governor Martin on December 30, 1936. The Engineer advised that, according to this plan, the cooperation of the State Highway Department would be limited to consultation with the State Parks Superintendent, Mr. S. H. Boardman, and that the Highway Department would not be required to expend funds in connection therewith. He recommended affirmative action on Mr. Greider's request. After discussion, the Commission approved the recommendation by unanimous vote.

Chairman Oball reported receipt of a request from officials in charge of the Western Safety Conference, which was recently held in Portland, for a contribution of \$200 to assist in financing the same. In the discussion of this matter it was pointed out that it has been the established policy of the Commission for many years to refuse to contribute funds for such purposes. The Commission decided that it would be inadvisable to diverge from this policy, hence denied the request.

The Commission also had under consideration a letter from Mr. Norman N. Rupp, timber owner, Portland, offering for sale to the state, as a recreational area, a tract of timber land situate adjacent to the Nehalem Highway just west of the town of Jewell, in Clatsop County. The Commission referred this matter to the Secretary with instructions to ascertain from the State Parks Superintendent whether or not the tract is valuable for park

purposes and would fit in with the state's plans for park development; and, in the event that the Parks Superintendent's report is adverse, to inform Mr. Rupp that the State Highway Commission is not interested at the present time in this proposition.

The Commission discussed a complaint from Mr. E. B. McNaughton, Portland, that Marion County road forces are removing materials from a quarry located near Champeog State Park, at variance with the method previously agreed upon, and, if they are permitted to continue, the landscape will be left in an unsightly condition that will be an eyesore to people who have private residences along the Willamette River at this point. The Commission referred this matter to the Engineer for investigation and report.

The Commission had under discussion the proposition initiated by Mr. John B. Yeon, Jr., of Portland, for construction by the National Parks Service of a parkway up the Columbia River. It appears, according to the plan, that an attempt is to be made to secure federal funds for the construction of such parkway, the work to be undertaken under the supervision of the Bureau of Public Roads, and that the state's cooperation would consist of acquiring right of way only. It also appears that Mr. Yeon's committee is desirous of securing the approval of the State Highway Commission to such plan. The Commission deferred a decision in this matter pending consultation with federal authorities in Washington, D. C., when the Commission attends the annual meeting of the American Association of State Highway Officials in Boston; however, the Commission indicated that in any event it must have control of the design of this parkway and must have full jurisdiction over the same after it has been constructed, in view of the fact that it will be a major highway route.

The Commission discussed the matter of securing the approval of the Bureau of Public Roads and the United States Forest Service to the extension of the Flora-Enterprise Highway from its present terminus to the Washington State line, in order to facilitate the construction of this section with Forest Highway funds. The Engineer was instructed to arrange a conference with Mr. C. J. Buck, Regional Forester, and Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, on September 14, the date of the next regular Commission meeting, for a discussion of this matter.

The Commission took the following action on proposed improvements to state highways in Baker County, as a result of inspection of such highways earlier in the day:

Baker-Homestead Highway - The Commission approved a rock-crushing project for this road between Love Bridge and Black Bridge, a distance of about 15 miles. The contract is to provide for the stockpiling of 500 cu. yds. of crushed rock per mile for use in connection with oiling operations which are proposed for this section next year;

Baker-Medical Springs Secondary Highway - The Commission approved the furnishing of crushed rock for a 3-mile section of this

road between Mile Posts 35.6 and 38.6; the contract to provide for 1,000 cubic yards materials per mile for resurfacing and 500 cubic yards of maintenance material per mile in stock piles;

Baker-Unity Highway: The Commission approved the resurfacing of a 4-mile section of this road between Stations Nos. 560 and 770, across what is known as Salisbury Flat. The contract is to provide for 1,000 cubic yards of materials per mile for resurfacing and 500 cubic yards of maintenance materials per mile in stock piles.

The Engineer was instructed to prepare plans for a federal aid secondary highway project on the Baker-Homestead Highway. He was authorized to make a location survey for such federal aid secondary highway project between Baker and a point known as Upper Keating Junction and to make a reconnaissance survey of such highway between Upper Keating Junction and Powder River. The Commission indicated that it would approve an oiling project on the Flagstaff Hill Section of this road in the event that the survey indicates that the alignment of the present highway will not be changed.

Consideration was given by the Commission to the matter of extending the Robinette-Homestead Secondary State Highway from its present terminus at Robinette northwesterly a distance of about 4 miles to a connection with the Baker-Homestead Highway. The Commission decided to so designate such road if the Baker County Court will make formal request for such designation. The Commission also considered the matter of removing from the Secondary State Highway System the northerly end of the Robinette-Homestead Secondary Highway between the mouth of Pine Creek and Homestead where this highway coincides with a section of the Baker-Homestead Primary State Highway, which was designated by the legislature. The Commission decided unanimously to make such change if it meets with the approval of the Baker County Court, so that the expense for maintenance and betterment along this section may be properly charged. The Commission ordered a resolution prepared covering the matter, for adoption by the Commission at its next meeting.

The Commission had under consideration the following requests for extensions of time in which to complete highway construction projects:

M. L. O'Neil & Son, contract No. 1926, for grading, and construction of two trestle bridges on the Burns-Buchanan Section of the Central Oregon Highway, in Harney County, requested an extension of time of 30 days, from July 31 to August 30, 1937, within which to complete this project. They gave bad weather conditions as their reason for failure to complete the project within the specified time limit. The Engineer advised that unfavorable weather prevented the contractor from working borrow pits through the Harney Valley, earlier in the spring, so the failure to complete the project within the time limit specified in the contract could not be avoided. He further advised that the engineering costs for supervision have not been increased

AUG 26 1937

and the traveling public has not been inconvenienced by the delay; neither has the surfacing contractor been held up in his work. He recommended that the extension requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

McNutt Bros., contract No. 1938, for grading and surfacing the Pumping Plant Hill Section of the Old Oregon Trail, in Malheur County, requested an extension of time from May 31 to June 14, 1937, within which to complete this project. They gave no reason for failure to complete the project within the time limit specified in the contract. The Engineer advised that the contractors were somewhat late in starting operations on this project, as they were held up by bad weather conditions which delayed completion of their contract for the construction of the Gales-Tunnel Section of the same highway. He also said that the work on the Pumping Plant Hill Section had to be coordinated with operations of the United States Reclamation Service, which work was going on at the same time and affected the placing of concrete pipes under the highway. He pointed out that the overrun of time limit on this contract was only 14 days and advised that the engineering costs on the job have not been increased by the delay, neither has the traveling public been inconvenienced. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Fisher Bros., contract No. 1954, for grading and topping Unit No. 3, Chichester Gulch-Summit Section of the Shaniko-Fossil Secondary Highway, in Wheeler County, requested an extension of time of three months, from May 30 to August 31, 1937, within which to complete this project. They attributed their failure to complete the job within the time limit specified in the contract to inclement weather experienced in the spring. The Engineer advised that this project is located in mountainous country and the contractor was unable, as he states, to begin grading operations until a much later date than would be expected normally, due to bad weather conditions. He further advised that traffic has not been unduly inconvenienced by the delay in completion and there has been no increase in the cost of engineering supervision as there was no expenditure for such purpose prior to the actual commencement of operations. He said, further, that the contractor prosecuted the work with all possible speed as soon as weather conditions were favorable. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Homer G. Johnson, contract No. 1964, for furnishing crushed rock in stock piles for the Myrtle Point-Mystic Creek Section of

AUG 26 1937

the Coos Bay-Roseburg Highway, in Coos and Douglas Counties, requested an extension of time of one month, from July 31 to August 31, 1957, within which to complete this job. He attributed his failure to complete the job within the specified time limit to unavoidable delays encountered with the handling of rock. The Engineer advised that, in his opinion, the real reason for the failure of the contractor to complete the project within the specified time limit was trouble that the contractor encountered at his plant, rather than with the rock. He recommended, however, that the extension requested be granted without penalty, in view of the fact that the traveling public has not been inconvenienced by the delay and the state has incurred very little extra expense for engineering supervision. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1872, 1884, 1920, 1926, 1931, 1938, 1946 and 1980, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance.

The following resolution accepting the above contracts was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1872, with J. C. Compton, for pavement planing and resurfacing, and furnishing crushed material in stock piles on the Azalea-Wolf Creek Summit Section of the Pacific Highway, in Douglas and Josephine Counties. Completed August 8, 1957.

Contract No. 1884, with J. W. and J. R. Hillstrom, for resurfacing and furnishing crushed rock in stock piles, on the McKenzie Pass-Little Butte Section of the McKenzie Highway, in Deschutes County. Completed July 24, 1957.

Contract No. 1920, with McNutt Bros., for grading and surfacing the Ochoco Dam-Mill Creek Section of the Ochoco Highway, in Crook County. Completed July 22, 1957.

Contract No. 1926, with M. L. O'Neil & Son, for grading, and constructing two trestle bridges on the Burns-Buchanan Section of the Central Oregon Highway, in Harney County. Completed August 19, 1957.

AUG 26 1957

Contract No. 1931, with Colonial Construction Company, for grading the Shelton Ranch-Flora Junction Section of the Lewiston-Enterprise Highway, in Wallowa County. Completed July 31, 1937.

Contract No. 1938, with McMutt Bros., for grading and surfacing the Pumping Plant Hill Section of the Old Oregon Trail, in Malheur County. Completed June 14, 1937.

Contract No. 1946, with E. H. Itschner & E. L. Rigdon, for grading, surfacing, and oiling the Chalk Cliff-Paisley Section of the Fremont Highway, in Lake County. Completed August 19, 1937.

Contract No. 1980, with J. C. Compton, for oiling three sections of secondary highways in Linn and Yamhill Counties. Completed July 27, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

There being no further business to come before the Commission at this time, the meeting was adjourned at 10:00 o'clock p. m.

State Highway Engineer

Secretary

Chairman

Commissioner

Lakeview, Oregon, August 31, 1937.

The State Highway Commission conferred informally with representatives of the Lakeview Chamber of Commerce at 9:00 o'clock p. m. in the Hot Springs Hotel, all Commissioners being present and participating. Also present were the State Highway Engineer and the Secretary.

Mr. Victor Johnson, County Agent, headed the local group and introduced the speakers. He called on County Judge John R. Heckman, who asked the Commission to designate as a secondary state highway the county road which extends along the west side of Goose Lake from the California state line to a connection with the Klamath Falls-Lakeview Highway, thence northerly and easterly to a connection with the Fremont Highway at its junction with the Lakeview-Adel Secondary Highway, a distance of about 25 miles. He said that this road passes through a very productive district which is now without good road facilities, and urged favorable consideration by the Commission as soon as possible.

AUG 31 1937

Mr. Johnson said that their most important project is the oiling of the unoled section of the Klamath Falls-Lakeview Highway. His arguments for such improvement were endorsed by Mr. Burt Snyder, President of the Shasta Wonderland Association, Mr. Forrest Cooper, Secretary of the Lakeview Chamber of Commerce, and Mr. W. O. Harriman, Forest Supervisor of the Fremont National Forest and Chairman of the Chamber of Commerce Forestry Committee. They asked for a dust palliative treatment similar to that which was applied to the Lakeview-Burns Highway last year in order to allay the dust nuisance, if the Commission cannot construct a more suitable oiled surface.

The Engineer explained that this road is not in suitable condition to receive an oil treatment at this time and the Commission does not have funds to spare to finance a proper improvement without sacrificing federal aid moneys.

Chairman Cabell advised that the Commission realizes the importance of this road and the need for improving it but is precluded from doing very much because of shortage of funds and the fact that the improvement would be very costly. He explained that the Klamath Falls-Lakeview Highway is not a Federal Aid Highway, hence is not eligible for federal aid moneys; and, if the Commission took state money to finance the improvement, it would lose an equal amount of federal aid money, which the Commission does not feel justified in doing because there are so many federal aid roads in the state on which the federal aid moneys could be spent to excellent advantage. He pointed out that there is a possibility of applying Federal Aid Secondary Highway moneys on this road if the Bureau of Public Roads will approve the same but there is a question whether or not such approval can be secured in view of the fact that the Klamath Falls-Lakeview Highway is of primary importance. He also pointed out the possibilities of applying federal public lands moneys for the improvement of the section within the Warm Springs Indian Reservation, and advised that the Commission is now considering such arrangement, which it hopes to be able to work out to a satisfactory conclusion.

There followed a general discussion of highway matters pertaining to Lake County.

The meeting was adjourned at 10:00 o'clock p. m.

AUG 31 1931

Klamath Falls, Oregon, September 1, 1937.

The State Highway Commission conferred with representatives of the Klamath County Chamber of Commerce in the Chamber of Commerce rooms at 1:00 o'clock p. m., all Commissioners being present and participating. Also present were the State Highway Engineer and the Secretary.

Representing the Chamber of Commerce were Mayor Clifton Richmond; Earl Reynolds, Secretary; Mr. T. B. Watters, Mr. Paul Landry; County Commissioners Roy Taber and Wm. F. B. Chase; and Mr. Frank Z. Howard, County Engineer. Mr. Watters headed the group. They requested particularly the oiling of the unrolled section of the Klamath Falls-Lakeview Highway.

Chairman Cabell outlined the plans of the Commission in regard to this road, which plans include the financing of a portion of the part within the Indian Reservation with federal public lands moneys if approval for the same can be secured from the Bureau of Public Roads. The delegation appeared to be satisfied with the explanation.

Mr. Howard brought up for discussion the matter of designating certain county roads as federal aid secondary highways. He presented a map on which were shown in colors the county roads eligible for federal secondary funds, state secondary highways eligible for federal secondary funds, proposed new secondary highways, and county roads eligible for forest funds. He advised that the County Court realizes that all of the county roads that are eligible for federal secondary funds cannot be included in the federal aid secondary highway system, but its first choice is the county road which extends from the California state line about three miles southwest of Malin, northerly through the town of Bonanza to a connection with the Klamath Falls-Lakeview Highway, in T. 38 S., R. 12 E., W. M., which is about 24 miles long; and its second choice is Market Road No. 12, which extends from The Dalles-California Highway about two miles east of Merrill, southerly by what is known as Stone Bridge to the California state line, a distance of about two miles. The County Court's first choice for state secondary highway construction, he said, is the secondary highway which extends westerly from The Dalles-California Highway at a point known as Mack's Store to a connection with the Klamath Falls-Weed Highway.

In this connection Mr. Howard filed with the Commission a copy of a resolution adopted by the Klamath County Court relating to the designation of certain county roads as being eligible for federal funds under the federal aid secondary highway program. Mr. Reynolds said that the program outlined in this resolution has the undivided approval of the Klamath County Chamber of Commerce.

Mr. Howard also filed with the Commission a map showing the existing and proposed state secondary highways of Klamath County, and a resolution adopted by the County Court requesting the designation of the following Klamath County roads as state secondary highways: (1) Market Road No. 19 extending from Keno, on the Green Springs Highway, to Worden, on the Klamath Falls-Weed Highway, a distance of about seven miles; (2) Sprague River County

Road extending from the town of Chiloquin via Sprague River to a connection with the Klamath Falls-Lakeview Highway near Beatty, a distance of about 55 miles; (5) the Lake-of-The-Woods county road extending from its junction with the state secondary highway on the west side of Upper Klamath Lake westerly via Lake-of-The-Woods to the Klamath-Jackson County line, a distance of 14 miles.

The Commission took no action on these matters but advised the delegation that the projects would be given careful consideration in the adoption of future state and federal secondary highway programs.

Mr. Landry particularly urged the Commission to designate the Lake-of-The Woods Road as a secondary state highway. He stated that he has been in consultation with officials of the United States Forest Service with a view in mind of securing the construction of this road as a forest development road, but he was informed that the State Highway Commission would have to designate it as a secondary state highway before the Forest Service could build it as a forest development project. It appeared to the Commission that Mr. Landry must have misunderstood the information given him by the Forest Service officials because it does not agree with the Commission's understanding or with past practice with respect to forest development projects. The Commission agreed to discuss the matter with Mr. C. J. Buck, Regional Forester, at the first opportunity.

The meeting was adjourned at 2:00 o'clock p. m., following which the Commission drove to Medford over the Klamath Lake Secondary Highway in Klamath County and the Little Butte Secondary Highway in Jackson County, and inspected the Lake-of-The-Woods road enroute.

Medford, Oregon, September 1, 1937.

The State Highway Commission met in special session at 8:30 o'clock p. m. in the Medford Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

SEP 1 1937

The Engineer brought up for discussion matters pertaining to the Commission's application for P.W.A. funds for financing eighteen building, bridge and road projects, which application has been on file in the office of Mr. C. C. Hockley, State Director, Public Works Administration, for more than a year. The Engineer advised that a number of these projects are urgently needed and attention must be given to them in the very near future, because, if it develops that P.W.A. funds cannot be secured, other arrangements will have to be made to finance them. After discussion, the Commission instructed the Engineer to inform Mr. Hockley of the need for early action in connection with its application and to furnish him with a list of the projects arranged in order of priority, with a request that such schedule be given consideration in making allocations in the granting of P.W.A. funds. The Commission approved the following arrangement of such projects as to priority for submission to Mr. Hockley:

1. Coos River Secondary Highway	Docket Oregon 1172
2. Nehalem Secondary Highway	Docket Oregon 1195
3. Weston-Elgin Secondary Highway	Docket Oregon 1195
4. Portland Division Office	Docket Oregon 1176
5. Klamath Falls Building	Docket Oregon 1177
6. Nehalem Secondary Highway	Docket Oregon 1199
7. Klamath Falls-Lakeview Highway	Docket Oregon 1192
8. Hermiston Secondary Highway	Docket Oregon 1190
9. Salem-Dayton Secondary Highway	Docket Oregon 1185
10. Jordan Valley Secondary Highway	Docket Oregon 1196
11. Sunnyside-Umapine Secondary Hwy.	Docket Oregon 1198
12. Territorial Secondary Highway	Docket Oregon 1188
13. Williams Secondary Highway	Docket Oregon 1189
14. Lexington-Echo Secondary Highway	Docket Oregon 1197
15. Tigard-Aurora Secondary Highway	Docket Oregon 1200
16. Albany-Lyons Secondary Highway	Docket Oregon 1184
17. Wasco-Heppner Secondary Highway	Docket Oregon 1194
18. Little Butte Secondary Highway	Docket Oregon 1186

The Engineer reported the need to install traffic-actuated signals and overhead flashing signal at the intersection of the Pacific Highway West and the McMinnville-Tillamook Highway just south of the city of McMinnville, where a hazardous condition exists on account of traffic congestion. After considerable discussion, the Commission, by unanimous vote, approved the installation of the signals.

The Commission had under consideration a report from the Attorney on the complaint against a man by the name of McCutcheon, who destroyed a number of trees growing on the right of way of the Pacific Highway, at Woodburn, without first obtaining permission from the State Highway Department to do so. The Attorney advised that he has secured reports from the Landscape Engineer and the District Maintenance Superintendent in charge of this section of the highway, in an endeavor to secure the facts, conditions and results of the tree-cutting, and is now of the opinion, after studying these reports, that Mr. McCutcheon has violated the statute and that a complaint should be filed against him so as to find out whether or not, under all of

the circumstances, a jury will find him guilty. He gave as his belief that a property owner's right of access to a highway at convenient places does not mean that he can destroy state property or require the destruction of state property in order to permit him to conduct his private business; and, if the court holds that a contrary principle of law prevails, then the Highway Commission should know it. (See Mr. Devers' letter directed to the Oregon State Highway Commission, dated August 30, 1937). After discussion, the Commission ordered that suit be instituted against Mr. McCutcheon, as recommended by the Attorney.

The Engineer requested authority to advertise for bids to be received in September for the furnishing of 10,000 cubic yards of maintenance materials for the West Diamond Lake Secondary Highway and the Crater Lake-North Secondary Highway, at an estimated total cost of \$22,000. He advised that this material will be needed next year in connection with the construction of an O-50 oil surface on this road. The Commission approved the request by unanimous vote.

The Engineer also requested authority to advertise for bids to be received in October for the furnishing of maintenance materials for the following projects in Division 5:

<u>Section</u>	<u>Highway</u>	<u>Amount</u>
Shuttler Flat-Condon	John Day	\$ 13,000.00
Union County Line-LaGrande	Old Oregon Trail	12,500.00
Arlington-Castle Rock and Heppner Junction-Rhea	Columbia River and Oregon-Washington	13,000.00
Wallowa-Enterprise	Wallowa Lake	9,500.00
Forest Boundary-Long Creek	Pendleton-John Day	9,500.00
Weiser Junction-Ontario	Old Oregon Trail	9,500.00
Baker-Durkee	Old Oregon Trail	10,000.00
		<u>\$ 77,000.00</u>
TOTAL		

The Commission approved the request by unanimous vote.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with contractors Kern & Kibbe, disposing of their claim for extra compensation arising out of their contract, No. 1812, with the State Highway Commission for the construction of a reinforced concrete undercrossing structure to carry traffic under the Southern Pacific Company's tracks at the north city limits of Salem.

Quitclaim deed conveying unto Lydia Meier 1.62 acres of land situate adjacent to the Wolf Creek Highway between Barnes Road and the Multnomah County line, in Washington County. This property is being deeded to Mrs. Meier in order to clarify a right of

SEP 1 1937

way situation. Mrs. Meier is to reconvey it to the state with additional land that is needed for embankment slope protection. The Commission ordered that its quitclaim deed be not delivered to Mrs. Meier until a new deed has been secured.

There being no further business to come before the Commission at this time, the meeting was adjourned at 10:30 o'clock p. m.

W. B. Eason
State Highway Engineer

H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

E. B. Aldrich
Commissioner

F. L. Tou Velle
Commissioner

Astoria, Oregon, September 13, 1937.

The State Highway Commission met at 2:00 o'clock p. m. in the City Council Chambers in the City Hall, in accordance with notice previously given to the City Council through its City Manager on August 6, 1937, to conduct a public hearing as required by law relative to the rerouting of the Columbia River Highway and the Oregon Coast Highway within the city of Astoria. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
H. B. Glaisyer, Secretary
F. D. Eason, Division Engineer

Also present were 24 local citizens, including the Honorable J. C. TenBrook, Mayor; Councilmen Lloyd VanDusen, Anton Sorensen and William Mannila; James O. Conwill, City Manager; Guy Boyington, County Judge; William Larson, County Commissioner; Louis Franetivich, restaurant owner; and F. S. Elfving, owner of the Astoria ferry.

Chairman Cabell opened the meeting and explained its purpose and the law which requires the Commission to hold a public hearing in a city or town before it alters or changes the route of a state highway into or through such city or town. He called upon Division Engineer Eason to explain the plans of the Commission in regard to the contemplated change of the highway in Astoria.

Mr. Eason explained that the Highway Commission contemplates the rerouting of the highway so as to avoid the hill on the present route on Bond Avenue and to eliminate the right-angle turns at Eighth Street and Commercial Avenue and at Eighth Street and Bond Avenue. He exhibited a blueprint map

SEP 13 1937

showing in colors the present route and the proposed change, which is described as follows: Beginning at a point in the center of Commercial Street, the present route of the Columbia River Highway, near its intersection with Sixteenth Street; thence in a northwesterly direction approximately paralleling the S.P. & S. Railway to a point in the center of Bond Avenue, just north of its intersection with Fourteenth Street; thence following along Bond Avenue to a point somewhere between Eleventh Street and Eighth Street; thence northwesterly to a point in the center of Astor Avenue somewhere between Eighth Street and Sixth Street; thence westerly along Astor Avenue to the western terminus thereof and continuing in a westerly and then in a southwesterly direction to a connection with the present Oregon Coast Highway on Taylor Avenue, near its intersection with Bond Avenue. He called attention to the difficulties confronting the Commission in the selection of the route for the connection between Bond Avenue and Astor Avenue, where numerous buildings exist, and advised that the Commission is now considering three alternate routes for such connection, one of which crosses blocks 55 and 9; another crosses blocks 55, 9, and 10; and the third crosses blocks 9, 10, and 11, with a view to selecting the route that will be to the best interests of the general public.

Chairman Cabell then invited those present to express themselves either for or against the improvement. He advised that the proposed new location has been quite definitely decided, with the exception that there is still a question as to which one of the diagonals between Bond and Astor Avenues should be adopted. This feature, he said, will be given very careful study and consideration before selection is made, because of the Commission's desire to secure the cheapest and best line for such connection.

Mr. Franetivich offered objections to the change because it will affect his restaurant business, known as Liberty Grill, which is located on the present route on Commercial Street. He gave as his thought that the State Highway Commission should not change the route of an existing highway when it will affect business adversely, as this change will do.

County Commissioner Larson voiced his approval of the change. He suggested the adoption of the most westerly of the alternates for the diagonal between Bond and Astor Avenues.

Mr. Elfving also expressed his approval of the change, stating that in his estimation it will be a very fine improvement.

Chairman Cabell, in reply to the objections of Mr. Franetivich, stated that, in changing or altering any existing highway route, the State Highway Commission always has to face the problem of damage to business. The Commission does not like to hurt business interests, he said, unless it is forced to do so in the interests of the general public which would be greatly benefitted by the change. He gave as his belief that the damaging effect in changing a highway route is over-estimated, because it is his observation that, when a highway has been rerouted, business interests are more than pleased with the change, because customers are given a much better chance to carry on their shopping by reason of the elimination of traffic

congestion in the shopping district. He repeated his invitation to the local citizens to express themselves in regard to this proposed improvement. None wishing to be heard, he concluded the hearing at 2:40 o'clock p. m. with a statement that the Commission will consider the objections offered at this hearing in its future deliberations with respect to this proposed change, and, when a decision has been reached, appropriate notice thereof will be forwarded to the city officials.

H. B. Glaisyer
Secretary
J. A. Evans
Division Engineer

Henry F. Cabell
Chairman
E. B. Aldrich
Commissioner
F. L. Tou Velle
Commissioner

Portland, Oregon, September 13, 1937.

The State Highway Commission met in regular session at 8:00 o'clock p. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission conferred with Dr. E. B. McDaniel, President, and Mr. Ray Conway, Manager, Oregon State Motor Association, in regard to the proposed sale on the following day of \$1,000,000 Oregon State Highway bonds. Chairman Cabell explained the need for securing a loan at this time, and the necessity to sell bonds in order to obtain the same legally. Mr. McDaniel and Mr. Conway both expressed their approval of the explanation and the sale but requested that the word "bond" be not used in connection therewith if possible to avoid it, in view of the fact that the State Highway Commission at one time agreed with the Oregon State Motor Association that it would incur no more bonded indebtedness as long as existing bond obligations cause such a drain on highway funds. In their estimation the sale of bonds at this time is not in conformity with such agreement and understanding. They suggested calling the issue a "six-month seasonal loan" in order to keep the word "bond" silent, at least in so far as newspaper publicity is concerned; otherwise, they said, it would establish a precedent in the sale of bonds which should be avoided for the benefit of future highway commissions. The Commission concurred in the viewpoint and so ordered.

SEP 13 1937

Mr. John Logan, representing the Consolidated Highway Company, Inc., and Messrs. A. W. Murray and John C. McCollister, representing the United States Fidelity & Guaranty Company, which wrote the bonds furnished by the Consolidated Highway Company, Inc., in connection with its state highway contracts, were present. The State Highway Engineer asked Mr. Logan what plans he has for the completion of the Rock Creek-Wallowa oiling project on the Wallowa Lake Highway, in Wallowa County, State Highway Contract No. 1929, the contract for which was awarded to the company on October 29, 1936, and should have been completed not later than August 31, 1937. The Engineer pointed out that the season is getting very late for oiling work and the State Highway Department will not permit oiling operations after September 15, which has been set as a dead line therefor; and, unless the company can give assurance that the job will be definitely completed before then, the Commission will order discontinuance of operations until next spring. Mr. Logan advised that the oil for this project has already been ordered and that he can complete the job within ten days if weather conditions are favorable. He attributed his delay to failure of the Washington Asphalt Company to enter into a subcontract to do the oiling work, so he had to make arrangements to do the work himself and has rented oiling equipment from Contractor F. J. Kernan. After further discussion the Engineer recommended that Mr. Logan be allowed to proceed with the oiling work notwithstanding the fact that it cannot be completed before September 15, inasmuch as he has already placed the order for the oil; provided, however, that such work shall be postponed until next spring if it cannot be done in strict conformity with the specifications concerning weather conditions and temperature, the placing of oil being strictly prohibited when weather conditions and temperature are unsuitable for such work. The Commission approved the recommendation by unanimous vote.

Mr. McCollister brought up for discussion the question whether or not the Commission intends to let the Consolidated Highway Company, Inc., submit bids on future Oregon highway work, the Commission having previously disqualified this company from bidding until the jobs that it now has under way are completed. Mr. McCollister stated that the United States Fidelity & Guaranty Company is satisfied with the way that the Consolidated Highway Company is financing its projects and is perfectly willing to write the bonds. In fact, it believes that Mr. Logan, of the Consolidated Highway Company, Inc., is entitled to a lot of credit for the way in which he has brought his company out of disrepute. He also said that Mr. Logan is very anxious to submit bids for certain projects on which the Commission will receive bids on the following day, and he urged the Commission to accept Mr. Logan's bids for such work.

Chairman Cabell stated that the Highway Commission has had extremely unsatisfactory relations with the Consolidated Highway Company, Inc., during the past two years, and is now in a position to judge future relations by the past, hence the Commission does not care to enter into any new contracts with the company, at least not until the ones now under way are completed. Mr. Logan inquired whether or not the Commission would permit him to bid on the rock production projects for which bids are being called on the following day, one of which projects is located on the Pendleton-John Day Highway, in Grant County, and the other on the Siletz Secondary Highway, in Lincoln County.

It was his thought that he is the logical contractor to secure such contracts, in view of the fact that he has construction equipment available in these localities. Chairman Cabell replied that the Commission will not permit Mr. Logan or the Consolidated Highway Company, Inc., to bid on any of the jobs for which bids are to be opened tomorrow; that such action is final and is based on the experience of the Commission with this company during the past two years. Commissioners Aldrich and Tou Velle concurred. This concluded the conference.

The Engineer brought up for discussion the matter of revising the 1938 Regular Federal Aid program, in order to provide funds with which to finance the Albany Railroad Grade Separation Project. He submitted the following revised program for such funds, which the Commission considered very carefully and approved by unanimous vote:

PROPOSED REVISION OF 1938 REGULAR FEDERAL AID PROGRAM

Highway	Project	Original Allocation	Revised Allocation
<u>DIVISIONS NO. 1 & 2</u>			
Pacific	Oregon City (11th to 5th & Main Sts.), Paving & Bridge	\$ 160,000	\$ 160,000

The Engineer also submitted a plan for financing the Albany Grade Separation Project, which the Commission discussed and tentatively approved.

The Commission also considered and tentatively approved the proposed revision of the 1938-39 Railroad Grade Separation Program which the Engineer submitted.

The Commission by unanimous vote approved the minutes of the meetings held on April 12, April 26, 27 and 28, May 16, 17 and 18, and June 3 and 4, 1937.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Abandonment of portion of Chandler State Park adjacent to the Fremont Highway, in Lake County: The Parks Superintendent advised that the highway is being revised at this location to eliminate curvature in the existing road and that the new highway will be located only a short distance from the old highway, rendering valueless for state park purposes that portion of the present park which lies west of the present highway between Engineer's Stations 830 and 850 unless the Commission acquires the area between the present park and the new highway location, which he recommended against because the area is devoid of trees. He suggested, rather, that the present park between Engineer's Stations 830 and 850, west of the old highway, be deeded back to the donor, Mr. S. B. Chandler of Lakeview, such portion being narrow, devoid of trees, and of no value to the park. The Commission indicated a desire to retain the present park and to acquire the rest of the land between the park and the new highway if it can be purchased at reasonable cost. The Parks Superintendent was instructed to contact Mr.

Chandler relative thereto. In the event that Mr. Chandler will not sell the additional area at a fair price, then the Parks Superintendent is to ask Mr. Chandler to accept a deed from the state returning to him that portion of the park which lies west of the old highway between Engineer's Stations 830 and 850, which would eliminate the necessity of constructing more than one right of way fence.

Addition to the state park at Depoe Bay: The Parks Superintendent advised that Mr. Winchell, owner of this property, which is situated on the ocean side of the highway at the end of the Depoe Bay Bridge, is now asking \$5000 for this property, being \$3000 more than the price that he originally agreed to accept. He said that this is a key tract to the present park and that the state should own it, but he did not believe it is worth \$5000. The Commission concurred and instructed the Parks Superintendent to so inform Mr. Winchell.

State park at the south end of Coos Bay Bridge in North Bend: The Parks Superintendent recalled that the city of North Bend several years ago deeded to the state for park purposes an area at the south end of the Coos Bay Bridge, known as Simpson Park, and included in the deed, evidently by mistake, land lying outside of the 200-foot right of way limit and east of the road leading to the old ferry landing which is not particularly desirable from the park standpoint. He advised that the city has received an offer for this portion of the park but upon investigation finds that it cannot sell the same because title rests with the state; hence the City Council is now asking the Commission to deed the area back to the city, particularly in view of the fact that the city did not intend in the first instance to deed the area to the state. He stated that the area in question is not of any particular value to the park and recommended that the city's request be given favorable consideration. After discussion the Commission approved the recommendation by unanimous vote.

Road leading from the Wolf Creek Highway to Saddle Mountain State Park, in Clatsop County: The Parks Superintendent advised that the Grand Rapids Oregon Timber Company, which owns most of this road, is now demanding \$13,600 for the same, and that he has secured an option from the Crown Willamette Paper Company to purchase a portion of the road that crosses its property, at the rate of \$15 per acre, which option expired on September 3, 1937. Also, that the Smith Waterhouse Company is demanding \$50 per acre for that portion of the road which crosses its property. He recommended acceptance of the offers of the Crown Willamette Paper Company and the Smith Waterhouse Company at \$15 and \$50 per acre, respectively, and condemnation of that portion of the road which crosses the property of the Grand Rapids Oregon Timber Company if this company will not reduce its price for the 125 acres involved. The Commission approved the recommendation by unanimous vote but instructed the Parks Superintendent not to close the options with the Crown Willamette Company and the Smith Waterhouse Company until the case against the Grand Rapids Oregon Timber Company has been decided. He also was instructed to secure, if possible, an extension of time on the option secured from the Crown Willamette Paper Company. The Commission indicated that, if a jury does not set a satisfactory price on the Grand Rapids Oregon Timber

Company property, it would secure the right of way for a road in another location and would build its own road to the park.

The Engineer reported another case of tree mutilation on the Pacific Highway right of way at Woodburn. It appears that a new service station has been erected at this place and that during the construction of the same the owner thereof requested permission from the State Highway Department's Landscape Engineer to remove some trees that were growing on the highway right of way, because, he alleged, they interfered with the proper ingress to and egress from his premises, but the request was denied. It also appears that a few days later it was discovered that several of these trees had been girdled and portions of the tree trunks removed, which would eventually kill them, and the trees would then have to be cut down. The Engineer said that investigation does not reveal who perpetrated this deed. He recommended prosecution of the offender if he can be found, and that the matter be turned over to the Department of State Police to carry on further investigations. The Commission approved the recommendation by unanimous vote and referred the matter to the Attorney to handle.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

* The Commission approved settlements Nos. 4240, 4364, 4297 and 4955 with the Resettlement Administration, as set forth in the above resolution, in so far as price is concerned, but referred to the Engineer and the Attorney the matter of finding a way to adjust these settlements in view of the fact that they involve certain water pipe installation.

The Commission adjourned at 11:40 o'clock p. m., to reconvene at 9:00 o'clock the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, September 14, 1937.

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 F. L. Tou Velle, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of buildings at Marshfield were opened and read in conformance with previously published notice:

Chairman Cabell announced that the awards of contracts and sale of buildings would be made at 2:00 o'clock p. m. in the same room.

The Attorney brought up for discussion the matter of the application of Gilchrist & Company, Ltd., to the Public Utilities Commissioner, for a permit to construct and operate its railroad across the Willamette Highway in Klamath County, at grade, pending construction of an overcrossing for its facilities. He said that the company estimates that it will take eighteen months to build its overhead structure and has asked the privilege of maintaining the grade crossing during this period so it can operate this year; otherwise their operations would be delayed a year or more. The Engineer said that he is fundamentally opposed to letting the company maintain a grade crossing across this highway, but if it is absolutely unavoidable, then, in his estimation, it should not be allowed to maintain such grade crossing longer than twelve months, which should give the company ample time within which to complete the overhead structure. He also said that special provision for this structure should be contained in the Public Utilities Commissioner's order covering this matter. After considerable discussion the Commission decided unanimously to recommend to the Public Utilities Commissioner that the company be allowed to maintain a grade crossing over this highway for a period of twelve months on the condition that at the end of that period the company will remove the same and will restore the highway right of way to the satisfaction of the Engineer. The Commission also approved relieving the company from maintaining an automatic "wig-wag" signal at this crossing, on account of the temporary nature of the crossing.

County Commissioner William Baer, Deschutes County, was present in regard to the Tumalo Falls road which leads to Deschutes County's winter sports playground area. He said that the county is improving this road but is fearful that it will not be able to maintain travel over it this winter on account of snow conditions, hence is asking the State Highway Commission to authorize the Engineer to keep the road open with the state's rotary snow plow, which is to be stationed this winter at Redmond. He said that Deschutes County will pay the expense of the operations. After discussion, the Commission granted the request subject to the condition that the county will pay the estimated cost of the work by certified check or warrant in advance of operations and provided, further, that the grade of the road is such that the snow plow can be operated over it without damaging the equipment; and provided, further, that the snow plow is not needed elsewhere on state highways.

A delegation from Grants Pass and vicinity, consisting of Messrs. J. W. Pirmiger, Manager of the Oregon Lime Products Company; M. B. Winslow,

Superintendent of Schools; County Judge Grant Matthews; and County Commissioner H. S. Morgan, came before the Highway Commission and asked for the improvement of Williams Secondary State Highway between the towns of Provolt and Williams, particularly the reconditioning and oiling of this section, which is about six miles long. Mr. Firmiger headed the group. He stated that the present road is rough and dusty and is in very bad condition generally; that it carries a large volume of traffic, including the trucks of some thirty-nine concerns which operate in this vicinity, being the only road serving the Williams district. He presented a list of the concerns which operate trucks over this road, and advised that they will be satisfied with a good, year-round, travelable road.

Mr. Winslow spoke for the improvement from the standpoint of transportation of school children. He said that the condition of the road is such that school busses cannot be driven over it without serious damage, which might result in injuries to the children; in fact, officers of the Department of State Police have condemned their busses as being unsatisfactory for use in transporting school children. He advised that many students from the Williams and Provolt districts attend school in Grants Pass and have to be transported by bus to Grants Pass, a distance of about 25 miles, and it is important that they arrive on time, which is difficult of accomplishment under present road conditions. He urged the improvement of the road from this standpoint as well as from the standpoint of providing safety for the school children.

Chairman Cabell advised that the State Highway Commission appreciates the need for the improvement of this road but is confronted with the fact that there are many roads throughout the state in similar condition. He further advised that even if funds were available to improve the road this year, it could not be done because the season is too late for oiling work, so that about all the Commission can do is to maintain the road in the best possible condition this winter. He added that this road will be considered along with others for improvement in the 1938 construction program, but no promises or commitments can be made at this time.

Mr. Paul Landry, Klamath Falls, was present in the interests of a proposed highway extending from the Klamath Lake Secondary Highway westerly to the Lake-of-The-Woods. He urged the Commission to designate this road as a secondary state highway as far as the Jackson County line so that the United States Forest Service can proceed with the construction of the same as a forest development road. Present and entering into the discussion of this matter were Mr. C. J. Buck, Regional Forester, and Mr. James Frankland, Regional Engineer, United States Forestry Department.

Mr. Frankland advised, in reply to an inquiry of Chairman Cabell as to whether or not it is necessary to designate this road as a secondary highway before forest development funds can be expended thereon, that it is not necessary that the road be designated as a state secondary highway but it would have to be placed on the forest highway system before it would be eligible for forest highway funds. He gave as his thought that available forest highway funds should be used to finance additional construction on

SEP 14 1937

the Klamath Falls-Lakeview Highway rather than to start a new project, and that the forest development funds should be used for construction of roads within the Lake-of-The-Woods recreational district rather than for roads leading up to such district.

Mr. Buck advised that the Forest Service recognizes the recreational possibilities of the Lake-of-The-Woods district and is spending a lot of money there for development, including road construction; in fact, the district is more highly developed than the Diamond Lake recreational area. He agreed that there should be a good road leading into the district but gave as his thought, in view of the improvements that the Forest Service is making around the lake, that funds for the construction of roads leading into the area should come from some other source; otherwise, he said, the Government might as well cancel its appropriations for development roads if the money is to be expended for purposes other than intended.

Chairman Cabell advised that this is a costly project and that, because of limited funds available to the Commission, it does not appear possible to include this project in the construction program for a long time.

Mr. Landry then asked the Commission to construct a five-mile section of the Klamath Lake Secondary Highway immediately south of the national forest and advised that they would be satisfied with grading only, if the Commission could not finance surfacing.

Chairman Cabell pointed out that there are only two possibilities of financing such project, one being as a federal aid secondary highway, using federal moneys that must be spent for farm traffic roads and which the Commission will consider; the other being with state money, of which there is none available at the present time.

Mr. Landry then asked the Commission to oil another section of the Klamath Lake Secondary Highway along the section that has already been graded to state standards. He was informed by Chairman Cabell that the Commission has many obligations to meet, hence can make no promises at this time, although the project will be kept in mind for further consideration when future construction programs are formulated.

At 11:00 o'clock a. m. bids as follows for the purchase of \$1,000,000 Oregon State Highway bonds were opened and read in conformance with previously published notice:

Bid of STATE BOND COMMISSION:

"For all of the \$1,000,000 Oregon State Highway short-term bonds, or for any part thereof that the Oregon State Highway Commission shall allocate to us, to be dated October 1, 1937, to mature April 1, 1938, but to be subject to optional redemption on January 1, 1938, or upon any date thereafter on thirty days' published notice, to be in denominations of \$100,000 each, to bear interest payable upon maturity or upon redemption date

at the rate of one-half per cent ($\frac{1}{2}\%$) per annum, we offer \$100.001 for each \$100 par value of such bonds and accrued interest to date of delivery. "

Bid of THE FIRST NATIONAL BANK OF PORTLAND:

"For \$1,000,000 State of Oregon Highway bonds to be dated October 1, 1937, and to mature April 1, 1938, but subject to redemption on January 1, 1938, or on any date thereafter on thirty days' published notice, to be in denominations of \$100,000 each and to bear interest at the rate of forty-five hundredths of one per cent (.45%).

"We will pay \$100 for each \$100 par value thereof plus accrued interest from the date of the bonds to the date of delivery to us in Portland, Oregon. "

Chairman Cabell announced that the Commission would take these offers under advisement and would announce its decision relative thereto at 2:00 o'clock p. m. in the same room.

The Commission conferred with Mr. C. J. Buck, Regional Forester, and James Frankland, Regional Engineer, representing the United States Forest Service; W. H. Lynch, District Engineer, F. E. Andrews, Senior Highway Engineer, and T. M. Davis, Highway Engineer, representing the Bureau of Public Roads, relative to forest highway matters of mutual interest, as follows: Extension of the Flora-Enterprise Forest Highway in Wallowa County from its present northern terminus to the Washington state line. Mr. Buck pointed out that if this project is approved it would mean extending the forest highway about ten miles outside of the national forest boundary, which is a new departure for forest highway construction and there is a question whether or not the officials in Washington, D. C., will approve the same; nevertheless, Mr. Lynch and he are recommending the project, in view of the importance of the road and the fact that there appears little possibility of construction on any other basis, due to lack of available funds. He advised that the recommendation is based solely on the merits of the project and would not require that any portion of the present forest highway system be eliminated, although they want an understanding with the Commission that the forest highway funds that are being taken from some other forest highway project to finance this extension will be replaced by other funds. Mr. Lynch confirmed Mr. Buck's statements. The Highway Commission approved the arrangement and it was mutually agreed that the understanding should be covered by joint letter, which is to be prepared by Mr. Lynch.

Mr. Buck then brought up for discussion the matter of maintenance of the road which extends from the Mt. Hood Highway near Government Camp to the newly constructed lodge at the timber line on Mt. Hood. He said that the United States Forest Service has appropriated about as much money as it can spare for this project and it appears to him that travel over the road is going to increase to such an extent that eventually it will have to be designated as a state highway in order to insure that it will be properly maintained. He explained the need for surfacing of the road and for the removal

SEP 14 1937

of snow therefrom during the winter season. He also explained that, for the time being, during the winter season when cars cannot be driven over the road up to the Lodge, they propose to operate a motor-propelled snow-sled bus to take care of the transportation problem. He asked the Commission to take over this road, to surface the same, and to assume the responsibility for the snow-removal operations; otherwise, he added, it will be necessary for the Government to assume such responsibility and to charge a toll to pay the expense.

Chairman Cabell advised that he has given this matter considerable thought, and, while he appreciates there are objections to charging a toll for the use of the road, there are also two main objections to designating the road as a state highway and to maintaining it and keeping it open for travel during the snow period. The first of these objections, he said, is that the state would be maintaining a public road for the benefit of the private individual who operates the concession at the Lodge; and the other is, how could the Commission explain and justify the enormous expense of snow-removal operations for the benefit of winter sports enthusiasts in this area and continue to deny requests of winter sports enthusiasts in other parts of the state who are asking for similar consideration? The Commission took no definite action on this matter but after considerable discussion agreed to consider it seriously because it appears to be a problem that must be disposed of next year.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all of the Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

Chairman Cabell announced the following awards of contracts, sale of houses, and sale of highway bonds, for which bids were taken at the morning session, the awards and sales having been previously approved by the Commission by unanimous vote:

*Construction of a 52'x 48' frame storage building just south of the city limits of Portland, on the Pacific Highway East, in Clackamas County. The low bidder was Frank Watt Construction Company, Portland, at \$7,156.65. The next low bid was that of F. C. Himer Company, Eugene, at \$7,685.00. The only other bid received was that of E. F. and W. F. Philpott, Portland, at \$8,201.50. The Commission has awarded the contract to the low bidder, Frank Watt Construction Company, at its bid price of \$7,156.65.

*Construction of a bridge over the South Fork of Quartz Creek on the Wolf Creek Highway, about 5.5 miles east of Elsie, in Clatsop County. The low bid was submitted by F. C. Himer Company, Eugene, at \$8,910.00. The next low bid was that of Mountain States Construction Company, Eugene, at \$9,340.00. There were three higher bidders. The Commission has awarded the contract to the low bidder, F. C. Himer Company, at its bid price of \$8,910.00.

"Diamond Lake Rock Production Project on the West Diamond Lake and Crater Lake-North Secondary Highways, in Douglas and Jackson Counties. The Commission received seven bids for this job, the low one being that of R. I. Stuart & Sons, Medford, at \$19,850.00. The next low bid was that of A. S. Wallace, Roseburg, at \$19,879.00. The Commission has awarded the contract to the low bidder, R. I. Stuart & Sons, at their bid price of \$19,850.00.

"Furnish 5,200 cubic yards of crushed rock in stock pile for the Forest Boundary-Long Creek Section of the Pendleton-John Day Highway, in Grant County. Rogers Construction Company, Dayton, Washington, submitted the low bid for this job at \$7,820.00. The next low bid was submitted by Jones-Scott Company, Walla Walla, Washington, at \$9,168.00. There were five higher bidders. The Commission has awarded the contract to Rogers Construction Company, the low bidder, at its bid price of \$7,820.00.

"Bloucher Section of the Hood River Secondary Highway, in Hood River County. 1.6 miles surfacing and oiling and furnish 4000 cubic yards crushed rock in stock pile. The low bid was submitted by Fisher Bros., Oregon City, at \$21,881.00. The next low bid was submitted by Rogers Construction Company, Dayton, Washington, at \$22,386.00. There were four higher bidders. The Commission has awarded this contract to the low bidder, Fisher Bros., at their bid price of \$21,881.00.

"Siletz Highway Surfacing and Rock Production Project on the Siletz Secondary Highway, in Lincoln County. 16.7 miles surfacing and furnishing 5,400 cubic yards crushed material in stock piles. The low bidder was Mountain States Construction Company, Eugene, at \$39,635.00. The next low bidder was R. O. Dail and Warren Bros., Inc., Aberdeen, Washington, at \$42,525.00. There were 12 higher bidders. The Commission has deferred the award of this contract and has referred the bids received therefor to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Construction of approximately 234 lineal feet of treated timber bulkhead along the Mt. Hood Highway, in the town of Gresham, in Multnomah County. The low bid was submitted by Frank Watt Construction Company, Portland, at \$11,577.00, based on the use of preservative oil. This company bid \$11,757.00, based on the use of Wolman Salts, but submitted no bid based on the use of Chemonite Salts. The next low bid was that received from Mountain States Construction Company, Eugene, at \$13,275.00, based on the use of preservative oil. This company did not submit bids based on the use of Wolman Salts or Chemonite Salts. There were three higher bidders. The Commission has awarded the contract to the low bidder, Frank Watt Construction Company, at its bid of \$11,577.00, based on the use of preservative oil treatment.

"The Dalles Roadside Improvement Project on the Columbia River Highway, in Wasco County. The Commission received two bids for this project, the low one being that of George Schmitt, Portland, at \$9,750.00, and the other being that of Fisher Bros., Oregon City, at \$10,500.00. The Commission has rejected these bids and has ordered the project to be readvertised for bids to be received at the next meeting."

Sale of Residence Property at Marshfield:

"The Commission received two bids for the purchase of Building 'A', the high one being that of F. R. Pendleton, Everett, Washington, at \$500.00. The Commission has sold this building to Mr. Pendleton at his bid price.

"The Commission received one bid for the purchase of Building 'B', being that of Charles Forrest, Marshfield, at \$25.50. The Commission has rejected this bid.

"The Commission received one bid for the purchase of Building 'C', being that of Charles Forrest, Marshfield, at \$125.75. The bid is satisfactory to the Commission and the building has been sold to Mr. Forrest at his bid price.

"The Commission received two bids for the purchase of Building 'D', the high one being that of Arthur L. Fitch, Marshfield, at \$102.00. The other bid was that of Charles Forrest, at \$35.00. The Commission has sold the building to Mr. Fitch at his bid price of \$102.00.

"The Commission received three bids for the purchase of Building 'E', being those of Arthur L. Fitch, Marshfield, at \$102.00; Asbjorn Moen, Marshfield, at \$26.00; and Charles Forrest, Marshfield, at \$75.00. Mr. Fitch qualified his bid by stating that he would purchase only one building, and Mr. Forrest qualified his bid by stating that he would not accept Building 'E' unless he also received Building 'D', which disqualified both of these bids. The bid of Mr. Moen is too low. The Commission has rejected the bids.

"The Commission received two bids for Building 'F', being those of Charles Forrest, at \$60.75, and J. F. Burkhart, at \$50.00. Mr. Forrest qualified his bid by stating that he was not interested in the purchase of more than one building and he has already been sold Building 'C'. The Commission considers the bid of Mr. Burkhart too low, hence has rejected it.

"The only bid received for the purchase of Building 'G' is that of Charles Forrest, at \$50.50. It cannot be considered because Mr. Forrest qualified his bid by stating that he would not accept this building unless he was also given Buildings 'H' and 'I', bids for which have been rejected by the Commission.

"The Commission received two bids for the purchase of Building 'H', being those of Asbjorn Moen at \$10.00 and Charles Forrest at \$25.50. Mr. Forrest's bid cannot be considered for reasons previously stated, and the Commission considers Mr. Moen's bid too low, hence has rejected it.

"Only one bid was received for the purchase of Building 'I', being that of Charles Forrest at \$25.50. It cannot be considered for reasons previously stated."

Sale of \$1,000,000 Oregon Highway Bonds:

"The Commission received two bids for the purchase of these bonds, being that of the State Bond Commission at an interest rate of one-half of one per cent ($\frac{1}{2}\%$) per annum plus a premium of one mill (\$.001) for each \$100 par value of the bonds, and that of The First National Bank of Portland at par with an interest rate of forty-five hundredths of one per cent (.45%) per annum. The Commission considers the bid of The First National Bank of Portland to be the best and accordingly has sold the bonds to this bank."

The Commission thereupon by unanimous vote upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle adopted the following resolution with respect to the sale of said \$1,000,000 Oregon Highway bonds:

WHEREAS, in response to a call for bids duly issued and published by the Highway Commission for the sale of \$1,000,000 par value Oregon State Highway bonds, there was received by the Commission the following bids, to wit:

Bid of STATE BOND COMMISSION:

For all of the \$1,000,000 Oregon State Highway short-term bonds, or for any part thereof that the Oregon State Highway Commission shall allocate to us, to be dated October 1, 1937, to mature April 1, 1938, but to be subject to optional redemption on January 1, 1938, or upon any date thereafter on thirty days' published notice, to be in denominations of \$100,000 each, to bear interest payable upon maturity or upon redemption date at the rate of one-half per cent ($\frac{1}{2}\%$) per annum, we offer \$100.001 for each \$100 par value of such bonds and accrued interest to date of delivery.

Bid of THE FIRST NATIONAL BANK OF PORTLAND:

For \$1,000,000.00 State of Oregon Highway Bonds to be dated October 1, 1937, and to mature April 1, 1938, but subject to redemption on January 1, 1938, or on any date there-

SEP 14 1937

after on thirty days' published notice, to be in denominations of \$100,000 each and to bear interest at the rate of forty-five hundredths of one per cent (.45%).

We will pay \$100.00 for each \$100.00 par value thereof plus accrued interest from the date of the bonds to the date of delivery to us in Portland, Oregon.

WHEREAS, in the judgment of the Commission the bid of The First National Bank of Portland is the best bid of all bids offered, and it is the further judgment of the Commission that the said bid should be accepted and the sale of the bonds made to The First National Bank of Portland.

NOW, THEREFORE, all members being present and affirmatively participating, it is hereby resolved as follows:

1. That the bid of The First National Bank of Portland be and the same hereby is accepted.
2. That the said bonds when prepared and when executed by the Governor, the Secretary of State and the State Treasurer be delivered to the said The First National Bank of Portland on or before the first day of October, 1937, on payment of the purchase price thereof.
3. That this resolution be entered in the minutes and records of the Highway Commission.

The County Court of Tillamook County, represented by Commissioners E. H. Lindsey and E. G. Anderson, accompanied by Mr. John Naegeli, President, and H. T. Botts, Attorney and Secretary, for the Wilson River Drainage District, came before the Commission in regard to securing state cooperation in connection with the construction and maintenance of a revetment along the Wilson River to prevent this stream from overflowing its banks into Dougherty Slough during periods of high water. Mr. Botts, as spokesman, stated that the drainage district constructed the revetment as a W.P.A. project at a cost of some \$5,000, upon receipt of information from the Tillamook County Court to the effect that the Highway Commission would pay one-half of the cost thereof up to a maximum of \$1,000, and they were very much surprised to learn a short time ago that the Highway Commission had rescinded its previous action and on February 17 decided not to cooperate in this undertaking. He urged the Commission to reconsider its action and to help the district out.

The Engineer advised that his recommendation to the Highway Commission that the Commission do not cooperate in this project was based on reports of Bridge Engineer G. S. Paxson and Maintenance Engineer J. N. Bishop, who made a thorough investigation of the project and convinced him that the revetment would be of no benefit to the state highway but on the other hand

might be the cause of damage suits against the Commission in view of the possibility that the revetment would divert the river to other channels and would damage valuable property.

After considerable discussion, Chairman Cabell stated that there is a question in his mind whether the revetment will be of sufficient value to the state highway to justify state expense in the cost thereof; and, from the discussion at this meeting is unable to determine if the Commission at one time agreed to cooperate and later retracted, so a decision cannot be rendered until the Commission has reviewed the record. He inquired if the district would be willing to assume full responsibility for any claims that might arise from the construction of the revetment in the event, upon examination of the records, the Commission decides that it is morally obligated to cooperate. Mr. Naegeli and Mr. Botts both replied that the district would assume all such responsibility and expense incident thereto. After further discussion the delegation was informed that the Commission will review the record of this matter and will decide at its next meeting definitely whether or not it will contribute to the cost of this project. The Secretary was instructed to assemble correspondence and excerpts from the minutes covering the matter and forward copies of the same to the individual members of the Commission prior to the next meeting.

Mr. John Beckman, Attorney, Portland, headed a delegation representing the owners of property along the Oregon Coast Highway at Gleneden Beach, Lincoln County, which asked the Commission to revise its plans for the improvement of the Oregon Coast Highway at this location so as to utilize the existing road rather than an entirely new location as is now planned. Others in the delegation were Mrs. Mary Boyle, Ed Hartman and W. F. Cary, all of Gleneden.

Mr. Beckman alleged that, if the Commission reconstructs the highway in accordance with present plans, it will react to the serious detriment of Mr. Cary, who owns some 400 acres of beach property which he is developing, and will put Mr. Hartman's service station out of business. He advised that Mr. Hartman is a world war veteran and has all of his assets invested in his service station, and that Mr. Cary made a huge investment in developing his property on the understanding that the highway was permanently located. It was his thought that the interests of these men and of other property owners should be given more consideration, and that the proposed revision is not justified, because, he alleged, a 60-mile per hour speed can now be maintained on the present road. He further stated that Mr. Cary is willing to donate sufficient land to widen the present highway across his holdings, if the Commission will not make the change.

The Engineer advised that the Highway Commission adopted the new location for the highway only after very careful study of three alternate routes, two of which are considerably farther away from Gleneden Beach than the one selected, which was considered the most conservative. He also advised that, even if the Commission had decided to retain the highway in its present location, property would be no better off than if the highway is constructed on the adopted location, because the present road would have to be

lowered in order to provide for construction on a permanent basis. It was his thought that, if the highway is to be rebuilt, the job should be done right and on a permanent basis; otherwise, it would have to be changed at some future date, which would be very costly from the standpoints of both construction and right of way.

Chairman Cabell advised that public opinion today demands that highways be located on better alignment than they have been in the past; and that the present Highway Commission, in an endeavor to satisfy these demands, is reconstructing them for permanency so as to eliminate necessity for rebuilding them later on. Surveys for the improvement of the Oregon Coast Highway between Siletz River and Newport, he said, were conducted in accordance with such policy, and the Commission, after careful study, adopted a location that it considered sound and best for through traffic. He favored the change as his duty to the general traveling public. Commissioner Aldrich stated that, in his opinion, if the highway is to be rebuilt, it should be placed where it belongs. Commissioner Tou Velle favored the change as recommended by the Engineer. This concluded the conference.

Mr. U. G. Walker, Portland, came before the Highway Commission in regard to a right of way matter at Cottage Grove. He gave as his understanding that the Commission has plans to reroute the Pacific Highway through Cottage Grove and in connection therewith needs a small portion of certain property that he owns near the corner of Ninth and Main Streets, and needs also all but a small portion of the adjoining lot at the southwest corner of this intersection, which is owned by another party. He expressed his fear that someone will erect a building on this small tract, which would hurt the business on his property; so, in order to avoid such condition, offered to donate to the state the fraction of his lot that the state needs for right of way if the state will purchase all of the adjoining lot rather than only a portion thereof, both tracts being triangular in shape and about the same size. The Engineer gave as his thought that the state should own the extra area in order to preserve unobstructed vision at this intersection. The Commission thereupon informed Mr. Walker that his proposition will be considered and that he will be advised later whether or not it is accepted. The matter was referred to the Attorney for investigation and report.

The Engineer brought up for discussion the matter of providing greater safety for traffic at the approaches to the Ross Island Bridge in Portland, particularly at the intersection of Powell Boulevard and Milwaukie Avenue on the east side of the bridge and at the intersection at the west end of the bridge. He presented a plan prepared by the State Traffic Engineer, John Beakey, and the City Traffic Engineer, F. T. Fowler, which provides for the installation of special traffic lights at the intersection of Milwaukie Avenue and Powell Boulevard, and the construction of strips for the division of traffic on both approaches to the bridge, and the removal of the monument now located in the intersection at the west end of the bridge. He estimated that the cost to install the traffic signals and construct the strips or safety islands would amount to about \$16,000, and recommended the expenditure. After careful study and considerable discussion, the Commission approved the project by unanimous vote, subject to the condition that the strips for the

guidance of traffic at the west end of the bridge shall not be constructed on permanent basis until they have been tried out with sand bags to determine whether or not the cost to construct permanent guide lines is justified.

The Engineer also recommended installation of traffic signals at the intersection of 17th and Schiller Streets and at the intersection of Union Avenue with Hawthorne Avenue, in Portland, where considerable traffic congestion occurs. He estimated the cost of installing such signals at \$4,000. The Commission approved the expenditure by unanimous vote.

The Commission considered and denied the claim of Joseph Teresi and Agostino Galluzzo, and the claim of Mr. and Mrs. G. H. Huthman, Portland, for damages arising out of the construction of the Ross Island-Schiller Street Section of the East Portland-Oregon City Highway, in East Portland.

The Attorney reported as follows on the status of acquisition of right of way needed for the new Columbia River Highway, in the vicinity of Bridal Veil. He said that he contacted the officers of the Bridal Veil Timber Company, the Union Central Life Insurance Company, and Minnie T. Reed, all of whom own property needed by the state for this improvement; that he offered the Bridal Veil Timber Company \$50 per acre for its land, or a total of \$900, but the company demands \$4,500 for the same and will absolutely not reduce its price. He recommended acquisition of this property by condemnation. He also said that the insurance company owns 192 acres, for which it demands the sum of \$20,000, whereas he values the property at \$8,500, and Mr. Parker, right of way buyer, estimates its value at \$5,600. He explained that the 192 acres is not all needed for right of way, but a considerable portion thereof is valuable for park purposes. He recommended, in view of the fact that the company will not settle on a reasonable basis, that its property be acquired by condemnation in two suits, one for the right of way and the other for park.

Relative to the Reed property, the Attorney advised that Mrs. Reed and several other property owners in this district are now occupying land that belongs to the State Highway Commission, being the land that the Commission acquired from the State Land Board, between the low- and high-water mark of the Columbia River. He inquired what procedure to take in connection with these people and was instructed by the Commission to notify all of them that they are occupying state land and to ask them to vacate the premises. The Commission also instructed and authorized the Attorney to condemn the properties of the Bridal Veil Timber Company and the Union Central Life Insurance Company, as he recommended.

The Attorney also reported on his contact with Mr. George Joseph, Jr., relative to acquiring right of way for this highway across the Joseph property at Latourell Falls, which property is located on an island in the Columbia River at this point. He said that Mr. Joseph owns 277 acres on this island and 110 acres additional on the mainland, on which a dairy ranch is being maintained, and, while Mr. Joseph appeared willing to sell the island property at a reasonable figure, he is fearful that the dairy business on the other tract will be handicapped because there is not sufficient feeding

ground on the 110-acre tract to maintain a dairy, hence it might be inadvisable to dispose of all of his acreage on the island. He advised that Mr. Joseph made three alternate offers for the sale of his holdings: (1) for right of way only, plus the land between the right of way and the river, totalling about 50 acres, for which Mr. Joseph asks \$425, which is at the rate of about \$15 per acre; (2) for the northerly 140 acres of island property Mr. Joseph asks the sum of \$3,000; whereas (3) Mr. Joseph wants \$11,000 for the 277 acres on the island. The Commission considered that Mr. Joseph's offers were reasonable but deferred definite action thereon pending personal inspection of the premises to determine which of the offers it would be advisable to accept.

The Attorney reported that there have been various properties ordered acquired on which he has been unable to reach agreements with the various property owners, and requested authority to institute condemnation proceedings in the event that further negotiations fail. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the state acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Troutdale-Multnomah Falls Section of the Columbia
River Highway
Marshfield Section of the Oregon Coast Highway
Saddle Mountain Park Road
Wall Creek-Siskiyou Section of the Pacific Highway
Orient Section of the Mount Hood Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Troutdale-Multnomah Falls Section of the Columbia
River Highway

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

5. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and

SEP 14 1937

J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney also reported results of further negotiations with Mr. Ralph I. Robertson for the disposition of his claim for damages arising out of a slide that occurred by reason of the construction of the Pacific Highway (new route) across Mr. Robertson's property in the Siskiyou Mountains south of Ashland, Jackson County. He said that Mr. Robertson will not sell any more of his property but insists that his claim be settled by the payment of \$2,500 cash, and, if the state will settle on such basis, he will sign a statement relieving the State Highway Commission from further responsibility and liability in the event that the slide continues doing further damage to his land. The Commission refused to accept settlement on such basis and instructed the Attorney to institute condemnation proceedings to acquire a sufficient amount of Mr. Robertson's land to take in the slide area, which the Engineer estimates would be about 20 acres.

The Attorney presented a letter from City Commissioner Ormond R. Bean, Portland, relative to acquisition by the State Highway Department of various parcels of city-owned property on the proposed East Lombard Street extension. The Commission referred this matter to Chairman Cabell with power to act.

The Attorney reported receipt of a letter from the Eastern Oregon Light & Power Company, La Grande, requesting that the Commission deed back to the company certain land that was acquired from the company for right of way in connection with the construction of the La Grande Undercrossing Project. He explained that the Power Company deeded this property in the first instance without cost and that a portion of it is outside of the standard width highway right of way and is not needed by the state for highway purposes, but, according to the company, is valuable for their use. He recommended compliance with the request. The Engineer advised that the property in question is not needed for the highway and he concurred in the recommendation. The Commission thereupon by unanimous vote ordered that the excess property be deeded back to the Eastern Oregon Light & Power Company.

Landscape Engineer Otten was present and reported that on September third he and Division Engineer Chandler inspected the site of the proposed maintenance headquarters and oasis at a place known as Brothers, on the Central Oregon Highway, in Deschutes County, and it is their joint recommendation that the Commission acquire a site on the north side of the highway just east of the group of store buildings in Brothers and at the junction of the highway with a county road, because it is satisfactory from the oasis standpoint and apparently satisfies all maintenance requirements. After discussion, the

Commission approved in general the location of the site but referred to the Engineer the matter of designating the location for the maintenance buildings which are to be constructed thereon.

Mr. John B. Yeon, Jr., Portland, was present and discussed briefly with the Commission matters pertaining to a proposed parkway up the Columbia River Gorge between Troutdale and Multnomah Falls. He mentioned the possibility of securing federal funds for the construction of such parkway, the matter having been brought to his attention by a representative of the National Park Service in Washington, D. C. As a result of a short discussion of this matter, the Commission decided to contact the Chief of the National Park Service in Washington, D. C., during the week of the annual meeting of the American Association of State Highway Officials in Boston, which meeting the members of the Commission plan to attend.

The Engineer reported receipt of a complaint from Mr. Frank Forth, Ashland, resulting from the construction of the Pacific Highway (new route) over the Siskiyou Mountains, in Jackson County. It appears that Mr. Forth is grieved because he has not been given permission to construct a trestle from the new highway grade, a short distance north of Siskiyou Station, to a store and service station which he proposes to build on piling outside of the 100-foot highway right of way. The Engineer advised that the grade of the highway at the point where Mr. Forth proposes to construct his buildings is at least 30 feet higher than the property owned by Mr. Forth and it is totally incomprehensible to him how Mr. Forth expects to construct a store building at the roadway level outside of the highway right of way limits. He further advised that this is a mountain section where it will be necessary to use all of the highway right of way on which to deposit snow from snow-removal operations, so it would not be possible or practicable to permit the encroachment of buildings thereon and it is impracticable to construct buildings off the highway right of way to serve the traveling public. The Engineer advised that in his reply to this communication he informed Mr. Forth that the Commission regrets the circumstances but apparently there is nothing the Commission can do in the matter. He read aloud his letter which the Commission approved by unanimous vote.

The Commission considered and approved the claim of the Northwest Cities Gas Company for reimbursement in the amount of \$515.27 for expense incurred by the company in revising its facilities in the city of Pendleton to accommodate the construction of the East Pendleton Overcrossing Project.

The Engineer requested authority to purchase at a cost of about \$89.00, a portable air-blower for use in connection with the transmission of radio messages from the car of Mr. William R. Patton, Radio Supervisor. He explained that Mr. Patton has been experiencing considerable difficulty with at least two of the radio transmitters, because of accumulated dust in inaccessible places, which causes shortages in the current; and that the blower, which would be carried with him on his trips to the various stations, could be used to good advantage in cleaning out the transmitters and avoiding this nuisance. The Commission approved the purchase by unanimous vote.

SEP 14 1937

The Engineer requested authority to advertise for bids for the furnishing of crushed rock materials for the following maintenance projects:

1. Alsea Highway:
Between the summit east of Alsea and end of oil west of Alsea. 6000 Cu. Yds. at \$2.00 \$12,000
2. Corvallis-Newport Highway:
Between Eddyville-Burnt Woods 8000 Cu. Yds.
Eddyville-Blodgett Secondary Hwy. 2000 Cu. Yds.
near Eddyville 10000 Cu. Yds. at \$2.00 20,000
3. Oregon Coast Highway:
Between Hebo and Neskowin
McMinnville-Tillamook Highway
Between Hebo and Dolph 6000 Cu. Yds. at \$2.00 12,000
4. Columbia River Highway:
M.P. 58.2 to 76.3 5500 Cu. Yds.
Mt. Hood Loop Highway:
M.P. 100.0 to M.P. 104.21 1500 Cu. Yds.
7000 Cu. Yds. at \$2.00 14,000
5. Columbia River Highway:
M.P. 100.0 to 120.0 6000 Cu. Yds. at \$2.00 12,000
6. The Dalles-California Highway:
M.P. 74.51 & 95.75 6500 Cu. Yds. at \$1.60 10,400
7. The Dalles-California Highway:
M.P. 193.0 to 214.0 6000 Cu. Yds. at \$1.75 10,500
8. Mt. Hood Highway:
Between Rhododendron and Bennett Pass
Wapinitia Highway:
Between Mt. Hood and Bear Sprs. 14,000 Cu. Yds. 56,800

The Commission approved the first seven of these projects without alteration but ordered further investigation of project No. 8 for the furnishing of 14,000 cubic yards of materials for the Rhododendron-Bennett Pass Section of the Mt. Hood Highway and for the Mt. Hood-Bear Springs Section of the Wapinitia Highway, which is estimated to cost \$56,800.

The Commission had under consideration the matter of extending the contract with Mr. Julius Gunnell for furnishing ferry service across Coos River on the Coos River Secondary Highway, in Coos County, which contract is designated as state highway contract No. 1755, and expires on September 30, 1937. He explained that the present contract contains a provision for the extension of the existing contract for a period of two years or any portion thereof. He recommended, in view of the fact that funds are not available to finance a bridge at this point, that the Commission take advantage of this

clause and extend the contract for a period of one year if, after studying the contract, the Attorney is convinced that it can be extended for such a period; otherwise, that the contract be extended for a two-year period. The Commission approved the Engineer's recommendation by unanimous vote and referred the matter to the Attorney to handle.

The Engineer reported that on September 4, in accordance with authority previously granted him by the Commission, he awarded to J. C. Compton the contract for the Tillamook County Oiling Project, for which Mr. Compton submitted the low bid on August 12, 1937; and that on September 10 he awarded to Berke Bros., Inc., the contract for clearing on the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties, for which project Berke Bros., Inc., submitted the low bid on August 12. The Commission by unanimous vote approved the award of the contracts as reported by the Engineer.

Consideration was given by the Commission to a letter, dated August 25, 1937, from Mr. Charles P. Pray, Superintendent of the Department of State Police, relative to the reclaiming of special carrier permit plates, issued by the Public Utilities Commissioner, of logging operators who have been arrested for transporting loads weighing in excess of the statutory load limits. The Commission approved the suggestion offered by Mr. Pray and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, before issuing a special carrier permit for the hauling of logs over a state highway the Highway Commission is called upon by the Commissioner of Public Utilities to submit in writing such recommendations or suggestions as in the opinion of the Commission should be imposed for the protection of the highway involved and as will be for the best interests of the general public; and

WHEREAS, by virtue of the provisions of Section 55-1353, Oregon Code 1930, as amended, the Public Utilities Commissioner is required to revoke, upon a recommendation of the Highway Commission with respect to a state highway, a special carrier permit when, in the judgment of the State Highway Commission, such revocation is required in order to preserve the highway or highways involved; and

WHEREAS, it appears that arrests and fines imposed after conviction in and of themselves do not result in adequate protection to the highway, nor do they in many instances effect a control and prohibition of overloading, and, therefore, as a result of a conference held in the office of the Public Utilities Commissioner and attended by members of the Highway Department, representatives of the log hauling industry, the Public Utilities Commissioner and members of his staff it was mutually agreed that the State Highway Commission, before recommending or requiring the cancellation of a permit of a special carrier arrested on a charge of having an overload of logs, should offer the arrested person an

SEP 14 1937

opportunity to surrender his P.U.C. plates and take out of service for a period to be fixed by the Commission the offending vehicle; and

WHEREAS, it is recognized that the Highway Commission is without authority to require the surrender of P.U.C. plates, but the Commission does have authority to require the revocation of a permit, which revocation would remove from service all of the vehicles operated by the said arrested permittee; and

WHEREAS, the voluntary surrender of the P.U.C. plates for a fixed period of time in lieu of the revocation of the permit was, in the opinion of those attending the said conference, equitable and in the interests of the highways involved and of the log-hauling industry as well; and

WHEREAS, to accomplish the results of said conference and provide a procedure it is recommended that, upon the arrest of a permittee or person charged with the offense of overloading, the arresting officer shall give to the arrested person an opportunity to surrender to the arresting officer his P.U.C. plates carried on the overloaded vehicle, such plates to be held for the period fixed by the Highway Commission.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That Charles P. Pray, Superintendent of State Police, be and he hereby is respectfully requested to instruct the members of his department, upon arresting a log hauler for the offense of having an overload on his truck, trailer or other vehicle to take from and hold for the period fixed by the Commission and by this resolution the P.U.C. plates carried on the offending or overloaded vehicle at the time of the arrest; provided, however, that such plates shall be taken by the arresting officer from the arrested person only in the event the arrested party voluntarily surrenders the same. Should the arrested party refuse to surrender the P.U.C. plates such refusal shall be promptly reported to the Highway Commission by the arresting officer. Upon delivery of the P.U.C. plates to the arresting officer by the arrested person the arresting officer shall deliver such plates to the District Maintenance Supervisor in charge of the highway over which the overloaded vehicle was being moved at the time of the arrest.

2. That the period for which such P.U.C. plates shall be held shall be as follows:

- a. When the arrest is for the first offense of overloading the plates shall be held for ten days.

SEP 14 1937

b. When the arrest is for the second offense for overloading the plates shall be held for twenty days.

c. When the arrest is for the third offense for overloading the plates shall be held for thirty days.

3. At the expiration of the time for which the surrendered plates are to be held the District Maintenance Supervisor into whose custody the plates have been delivered by the arresting officer shall return said plates to the arrested person upon request or demand of such arrested person and said plates may be again attached to the vehicle involved and the vehicle may then be returned to service.

4. In the event an arrested party refuses to surrender the P.U.C. plates, then the Commission shall request the Public Utilities Commissioner to revoke the permit held by such arrested party.

5. In the event the amount of overload per axle is not in excess of 1500 pounds in excess of the limit prescribed or fixed by law, then the arrested party shall not be required or requested to surrender his P.U.C. plates; provided, however, that this tolerance provision shall not be construed to in any way relieve the arrested party from the penalty fixed by law in the event such arrested party pleads guilty to the charge, or upon trial is found guilty.

6. That this resolution be entered in the official minutes of the Commission and a duly certified copy thereof delivered to the Superintendent of State Police and a duly certified copy thereof delivered to the Public Utilities Commissioner.

The Commission thereupon signed a letter directed to Honorable Chas. P. Pray, Superintendent of the Department of State Police, transmitting a copy of said resolution and requesting his cooperation in carrying out the provisions thereof. The Secretary was instructed to forward a copy of said resolution and of said letter to Honorable N. G. Wallace, Public Utilities Commissioner, and to request Mr. Wallace to indicate either by endorsement on such letter or independently thereof his concurrence therein so that the same may be transmitted to the Superintendent of the Department of State Police for his information.

The Engineer reported that revised estimates indicate that it will cost about \$8000 per mile to install a lighting system along the East Portland-Oregon City Highway between the Ross Island Bridge in Portland and the town of Milwaukie, or about twice the amount of the original estimate of \$4000 per mile. He said that he was prepared to recommend the installation at the lower figure but not on the basis of the present estimate. After a brief

SEP 14 1937

discussion the Commission decided to defer action on this matter until it returns from the annual convention of the American Association of State Highway officials in Boston, Massachusetts, during the last week in September, it being the desire of the Commission to discuss highway lighting with other state highway officials at such meeting.

The Engineer reported receipt of information to the effect that the City Council of Salem has taken action which will not permit the city to co-operate in the cost of lighting the undercrossing recently constructed on the Pacific Highway at the north city limits of Salem. He pointed out that it is the established policy of the Commission to require cities to assume a portion of the cost of lighting such structures and gave as his thought that the city of Salem should not be relieved of such expense, in view of the fact that it would establish a precedent that would be difficult to avoid in disposing of similar problems throughout the state. The Commission concurred in the viewpoint of the Engineer.

The Engineer requested authority for Mr. N. M. Finkbiner, Materials Engineer, to attend a meeting of the Materials Engineers' Committee of the Western Association of State Highway Officials which is to be held in Salt Lake City on September 20 and 21, 1937, Mr. Finkbiner being a member of that committee. The Commission approved the request by unanimous vote, subject to confirmation by Governor Martin, the expense of the trip to be paid with state funds.

The Commission considered and ordered filed a letter from the Neighborhood Community Club, Portland, to the Portland City Commission, objecting to the construction of a highway across Duniway Park, in south Portland.

The Commission also considered and ordered filed a mimeographed letter prepared by the Road Committee of the Wasco County Granges and directed to all county courts of Oregon, all senators and legislative representatives, all granges and newspapers and farmers of Oregon, and all highway and school officials, relative to the subject of school bus and mail route roads.

A letter was presented from Mr. Walter W. Larsen, County Engineer of Linn County, stating that Warren Northwest, Inc., which has a contract with the State Highway Commission for the reconstruction of the Shedd-Halsey Section of the Pacific Highway, in Linn County, has done considerable damage to county roads by reason of heavy hauling over such roads in connection with the performance of their contract; and inquiring what procedure should be followed by the county to guarantee the repair of the roads and restoration of the same to their original condition. The Engineer gave as his thought that inasmuch as the damage occurred as a result of the operations of the state's contractor, the state should be responsible for repairing the roads, and he recommended that this be done at state expense. The Commission approved the recommendation by unanimous vote.

The Secretary presented a letter from Mr. Ed. W. Miller, Manager of the Oregon Coast Highway Association, inviting the members of the Commission and its staff to attend the annual banquet of the Association in Astoria on

SEP 14 1937

Monday, October 11, 1937. All members of the Commission indicated that they would be present at the meeting if at all possible. The Secretary was instructed to so inform Mr. Miller and to thank him for his kind invitation.

A letter was presented from Tillamook County Court, in which the Commission was urged to complete the unfinished portion of the Little Nes-tucca Secondary Highway, in Tillamook County, which would require approximately eight miles of construction work. The Commission ordered the communication filed and the County Court informed that the Commission will give this project consideration along with others in the formulation of its future construction programs.

A telegram was presented from the John Day Lions Club Road Committee, John Day, Oregon, urgently requesting the award of a contract, not later than October, 1937, for the construction of the John Day-Prairie City Section of the John Day Highway. The Secretary was instructed to inform the committee that the Commission has this project in mind and intends to award a contract for the same as soon as possible.

The Commission considered and ordered filed a letter from Ben C. Flaxel, District Attorney for Coos County, concerning the prosecution of Mr. R. J. Lewis, who was arrested for transporting over a state highway in Coos County a load of logs weighing in excess of the statutory weight limits, said letter being dated September 4, 1937.

A letter was presented from Mr. S. W. Maupin, Woodburn, requesting permission to erect a sign partially over the right of way of the Pacific Highway in front of his tourist camp at Woodburn. The Commission denied the request upon recommendation of the Engineer.

The Engineer brought up for discussion the advisability of constructing two safety islands at the Oak Grove Avenue intersection of the East Portland-Oregon City Highway, in Clackamas County for the added protection of pedestrians who are obliged to cross the highway at this point. He estimated that such islands would cost about \$5,000. The Commission deferred action on this matter pending its return from the annual meeting of the American Association of State Highway Officials in Boston, it being the Commission's desire to discuss safety matters of this kind with other highway officials at such meeting.

The Secretary presented resolutions from the County Court of Baker County, as follows: (1) resolution requesting that Robinette Secondary Highway No. 412 be extended northwesterly from its present terminus in the town of Robinette, a distance of 3.8 miles to a connection with the Baker-Homestead Primary State Highway; (2) resolution requesting the elimination and removal from the secondary state highway system of that portion of the Robinette-Homestead Secondary Highway which extends southerly from the town of Homestead a distance of approximately four miles to a point near the mouth of Pine Creek. The Engineer recommended approval of both of these resolutions. He explained that the second one is required simply to clarify a confusing situation, this particular section being also a unit of the Baker-

Homestead Primary Highway. It appearing to the Commission that the County Court's resolutions are in conformity with the Commission's previous agreement and understanding with the county, the Commission approved the request and by unanimous vote adopted the following resolutions in regard thereto upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the County Court of Baker County, has selected the route hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said route as a highway to constitute, together with other highways which have heretofore been added and which may hereafter from time to time be added, a part of the system of secondary state highways of Baker County under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

That the following named route in Baker County be and the said route is hereby selected, designated, established, adopted, and approved as a secondary state highway and shall be and is hereby designated as a part of the secondary state highway system, to wit:

An Extension of Robinette-Homestead Secondary Highway No. 412:

Beginning at the junction of the Baker-Homestead Primary State Highway with Market Road No. 4 in Baker County; thence in an easterly direction along Powder River to the south end of the Robinette-Homestead Secondary Highway No. 412, a distance of approximately 3.8 miles.

That said route shall be, and is hereby qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof;

That the Engineer be, and he hereby is authorized to make proper surveys with respect to the physical location upon the ground of the said route and properly file in the records of the Commission all of said data;

That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Baker County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Baker County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Robinette-Homestead Secondary Highway No. 412; and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Baker County Court of the State of Oregon, to eliminate from the system of secondary state highways, under the provisions of Chapter 196, Laws of 1935, the hereinafter described section of the Robinette-Homestead Secondary Highway No. 412; and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the Baker County Court of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission, the hereinafter described section of the Robinette-Homestead Secondary Highway No. 412 shall, under the provisions of Chapter 196, Laws of 1935, be eliminated and removed from the secondary highway system of Baker County;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described section of the Robinette-Homestead Secondary Highway No. 412 is hereby eliminated and removed from the secondary state highway system, to wit:

A section of the Robinette-Homestead Secondary Highway No. 412, described as follows:

A portion of the Robinette-Homestead Secondary Highway No. 412 beginning at a point near the mouth of Pine Creek; thence extending in a northerly direction to Homestead, a distance of approximately 4 miles.

2. That the said above described section shall be and is hereby declared to be eliminated and removed from the secondary system of highways, as provided in Chapter 196, Oregon Laws 1935.

3. BE IT FURTHER RESOLVED that from and after the adoption of this resolution the Robinette-Homestead Secondary Highway No. 412 shall be known as the Robinette-Copperfield Secondary Highway No. 412.

The Engineer reported that in conformance with authority previously granted him by the Commission he has ordered a number of surveys since the last meeting of the Commission. He presented the list of such surveys and asked the Commission to confirm the action. After due consideration Commissioner Aldrich moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for survey expenditures are as follows:

Location - 226-2830 - Lombard-Sandy Blvd., County Road - 5.0 miles -	
2nd Authorization - \$1,500.00 - Total - \$3,000.00	
3rd Authorization - \$1,000.00 - Total - \$4,000.00	
Location - 135-2807 - Shoofly Creek - Service Creek-Mitchell -	
1st Authorization - \$ 200.00 - Total - \$ 200.00	
Recon. - 18-2820 - Gilchrist Logging R.R. Crossing - Willamette Highway -	
1st Authorization - \$ 500.00 - Total - \$ 500.00	
Location - 121-2815 - Reed Creek-Bear Creek - Siletz Secondary Highway	
1st Authorization - \$ 250.00 - Total - \$ 250.00	
Location - 18-2815 - Crooked Creek-Modoc Point - The Dalles-Calif.- 14.55 mi.	
2nd Authorization - \$2,910.00 - Total - \$7,275.00	
Location - 18-2818 - Chiloquin Preliminaries - The Dalles-Calif. Hwy. 22.0 mi.	
2nd Authorization - \$2,200.00 - Total - \$7,400.00	
Location - 4-2803 - Commercial St.-Astor St.- Columbia River Hwy. - 0.5 mi.	
1st Authorization - \$ 475.00 - Total - \$ 475.00	
Location - 20-2818 - Cottage Grove - Pacific Highway - 1.7 miles -	
2nd Authorization - \$1,700.00 - Total - \$1,810.00	
Location - 10-2818 - "L" Street, Reedsport - Umpqua Highway	
1st Authorization - \$ 300.00 - Total - \$ 300.00	
Location - 6-2808 - Bandon Section - Oregon Coast Highway	
3rd Authorization - \$ 300.00 - Total - \$5,300.00	
Location - 26-2802 - Troutdale-Cascade Locks - Columbia River Hwy.-38.0 mi.	
3rd Authorization - \$1,000.00 - Total - \$56,000.00	

SEP 14 1937

Timber - 19-2204 - Quartz Mountain - Klamath Falls-Lakeview Highway -
 Preserve 1st Authorization - \$ 300.00 - Total - \$ 300.00

Park - 6-2204 - Golden and Silver Falls - Coos River Secondary Highway -
 1st Authorization - \$ 550.00 - Total - \$ 550.00

The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Fred H. Slate, Contract No. 1756, for grading the Nehalem River-Rock Creek Section of the Wolf Creek Highway, in Clatsop County, requested an extension of time from November 30, 1936, to August 19, 1937, within which to complete this project. He attributed his delay in completing the project within the specified time limit to the following reasons: extreme wetness of material to be handled; unstable condition of fill foundations and foundations for drainage structures, making much extra work and unavoidable delays; inability to make wet material stand up or hold its own weight in fills when handled rapidly; extra time required to remove slides; and extremely short working season in 1936. The Engineer advised that the reasons given by Mr. Slate for failure to complete the project within the

SEP 14 1937

specified time limit are correct. He recommended, in view of the circumstances, that the extension requested be granted without penalty and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

McNutt Bros., Contract No. 1890, for grading Unit No. 3, McCallister Section of the Little Butte Secondary Highway, in Jackson County, requested an extension of time from May 31 to August 18, 1937, in which to complete this project. They attributed their delay to the fact that they were not permitted to burn debris during the fall of 1936 because of danger of forest fires and were delayed in commencing operations in the spring of 1937 because of the muddy condition of the ground. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He further advised that the traveling public has not been inconvenienced by the delay, neither has the state incurred any extra expense for engineering supervision. He recommended in view thereof that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Schmeer, Williams & Gentemann, Contract No. 1918, for furnishing crushed gravel in stock pile for the Haines-Baker Section of the Old Oregon Trail, in Baker County, requested an extension of time from May 31 to October 15, 1937, in which to complete this project. They attributed their delay to the following: severe weather, which made it impossible to do any work in their gravel pit until late in the spring; interference of operations in the gravel pit with irrigation water which slowed up the progress of the work in order to let material dry out sufficiently to be screened to meet the oil work specifications. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He further advised that the State Highway Department has not been inconvenienced by the delay because the contractor furnished sufficient materials for this season's use well enough in advance to cause no interference with the state's operations. He also stated that the state has incurred no extra expense for engineering supervision. He recommended that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Tom Lillebo, Contract No. 1928, for construction of bridges over Rock Creek and Wallowa River on the Wallowa Lake Highway, in Wallowa County, requested an extension of time of 30 days, from August 15 to September 15, 1937, in which to complete this project. He attributed his delay to failure of the state to furnish right of way for this project, which required postponement of the award of the contract. The Engineer advised that bids for this project were taken on October 1, 1936, but the contract was not awarded until October 29, 1936, which was undoubtedly the reason that the job

SEP 14 1937

was not completed within the specified time limit. He recommended, in view of the circumstances, that the extension requested be granted without penalty, and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Dolan Construction Company, Contract No. 1933, for construction of a bridge over the North Fork Nehalem River on the Oregon Coast Highway near Mohler, in Clatsop County, requested an extension of time of 30 days, from August 31 to September 30, 1937, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that they were required to place rip-rap that was not contemplated in the original contract. The Engineer advised that this job was completed within the specified time limit with the exception of the placing of the rip-rap mentioned by Mr. Dolan, rock for which had to be secured from a site that was available only after a certain logging road in the vicinity had been opened up for use. He further stated that this logging road will be available for use within the next few days and undoubtedly the rip-rap work will be finished by September 30. He recommended, in view of the circumstances, that the extension requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

W. C. White, Contract No. 1942, for furnishing crushed gravel in stock pile for the Sage Hen Creek-Burns and Poison Creek-Burns Sections of the Central Oregon and John Day-Burns Highways, in Harney County, requested an extension of time, from June 15 to August 15, 1937, within which to complete this project. He alleged that he was unable to start this job until he had completed his contract with the state for the construction of the Miles Bridge Section of the Medical Springs Secondary Highway, in Baker County, Contract No. 1940, because his foreman was taken sick and he (Mr. White) was forced to assume direct supervision of both jobs for a period of two months. He further stated that the Miles Bridge contract was slowed down because of strike conditions on the coast, which delayed furnishing of materials. He also said that he was delayed some two weeks by bad weather conditions, which forced him to close down his plant several times during the course of the work. The Engineer advised that Mr. White did not complete this project within the specified time limit solely for the reason that he was two months late in starting the work. He recommended, nevertheless, that the extension requested be granted without penalty, in view of the fact that sufficient materials were furnished the state well enough in advance for maintenance operations during the current year and because the state has incurred no extra expense for engineering supervision. The Commission approved the recommendation by unanimous vote.

SEP 14 1937

E. F. and W. F. Philpott, Contract No. 1944, for construction of a bridge over Necarney Creek on the Oregon Coast Highway, near Nehalem, in Tillamook County, requested an extension of time, from August 31 to September 30, 1937, within which to complete this project. They attributed their delay to failure of the steel company to deliver structural steel for a period of four weeks after the order was placed, the steel company being unable to furnish this material sooner on account of being required to fabricate steel in connection with the new Capitol Building in Salem. They also alleged that their work was held up for a week during the month of June because of inclement weather. The Engineer advised that there is no apparent reason for the contractor's failure to complete this project within the specified time limit, and that it is his recommendation that the extension of time requested be granted, subject to the condition that the contractor be required to reimburse the state for engineering expense incurred subsequent to the date of completion specified in the contract. He submitted a letter from the Bureau of Public Roads concurring in this recommendation. The Commission approved the recommendation by unanimous vote.

H. L. Rice, Contract No. 1965, for furnishing crushed rock in stock pile for the Memaloose Park-Dillon and John Day River-Blalock Sections of the Columbia River Highway, in Gilliam, Sherman and Wasco Counties, requested an extension of time from August 15 to September 15, 1937, in which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions prevailing during the months of April and June. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He further advised that the delay has caused no interference with traffic nor any loss to the state for engineering supervision or otherwise. He recommended that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Babler Bros., Contract No. 1973, for constructing an oil mat surface treatment on the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Harney and Lake Counties, requested an extension of time of one year, from August 31, 1937, to August 31, 1938, within which to complete this job. They stated that this request is made necessary by reason of the fact that there is not sufficient mineral aggregate available to complete the job this year. The Engineer advised that it is no fault of Babler Bros. that they will not be able to complete this project within the specified time limit, but the fault lies entirely with the Medford Concrete Construction Company which has the contract with the state for the furnishing of materials that are to be used by Babler Bros. in connection with their contract. He recommended, therefore, that the extension requested by Babler Bros. be granted without penalty. The Commission approved the recommendation by unanimous vote.

Averill & Corbin, Contract No. 1981, for the reconstruction of the west approach to the bridge over the Willamette River on the Salem-Dallas Highway, at Salem, in Polk and Marion Counties, requested an extension of time of 60 days, from August 31 to October 31, 1937, within which to complete this job. They gave the following reasons for such request: that at about the time they placed their order for treated timber that was to be used in connection with this job, a strike occurred in the logging camps, and the McCormick Lumber Company, with whom their order was placed, was unable to secure logs with which to fill the order; also, that after the job was started, it was necessary to add fire walls and strengthen the old bents, which work was not contemplated in the original contract and is now being accomplished on force account basis. The Engineer advised that this contract was awarded on April 28, 1937, and, due to labor troubles in the logging and sawmill industries, it was not until July 8, 1937, that delivery was completed on the treated timber. He further advised that the contractor has attempted in every way to expedite the work and has worked double shifts to use all daylight possible. He further advised that the state has incurred no additional expense for engineering supervision, and recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1756, 1874, 1881, 1928, 1942, 1945, and 1954, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above contracts was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1756, with Fred Slate, for grading and clearing the Nehalem River-Rock Creek Section on the Wolf Creek Highway, in Clatsop County. Completed August 18, 1937.

Contract No. 1874, with Joplin & Eldon, for furnishing crushed rock and oiling work on the Criterion-Cow Canyon Section of The Dalles-California Highway, in Wasco County. Completed July 31, 1937.

Contract No. 1881, with Hoffman Construction Company, for construction of an overcrossing over the Southern

SEP 14 1937

Pacific Company's tracks on Union Avenue, East Portland-Oregon City Highway, in Multnomah County. Completed July 30, 1937.

Contract No. 1928, with Tom Lillebo, for construction of bridges over Rock Creek and Wallowa River, near Wallowa, on the Wallowa Lake Highway, in Wallowa County. Completed August 20, 1937.

Contract No. 1942, with W. C. White, for producing crushed rock for the Sage Hen Creek-Burns Section of the Central Oregon Highway and the Poison Creek-Burns Section of the John Day-Burns Highway, in Harney County. Completed September 14, 1937.

Contract No. 1945, with Fisher Bros., for grading, surfacing and oiling the Fossil-Kinzua Junction Section of the John Day Highway, in Wheeler County. Completed August 31, 1937.

Contract No. 1954, with Fisher Bros., for grading and topping Unit No. 3, Chichester Gulch-Summit Section of the Shaniko-Fossil Secondary Highway, in Wheeler County. Completed August 31, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Oregon Portland Cement Company covering occupancy by the company of a portion of the right of way of the Gales-Tunnel Section of the Old Oregon Trail.

Agreement with T. R. Maxwell relative to the sale of property consisting of a portion of Lots 1, 2 and 3 of Block 32, Zurcher's Amended Addition to the City of Enterprise, in Wallowa County.

Revised agreement with the Union Pacific Railroad Company covering the construction of an electric power transmission line on the company's property near Bonneville.

Agreement with the Southern Pacific Company covering the lease of a site for the unloading of asphalt at Myrtle Point, in Coos County.

Application for right of way needed for the improvement of the Siletz Secondary Highway across certain Indian land in Lincoln County.

SEP 14 1937

Application for right of way needed for the improvement of the Salmon River Highway across Indian land located in Section 33, T. 6 S., R. 10 W., W. M., in Lincoln County.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:45 o'clock p. m.

Chairman

E. B. Aldrich
Commissioner

F. L. Tou Velle
Commissioner

Portland, Oregon, October 21, 1937.

The State Highway Commission met at 8:00 o'clock p. m. in the Rose Room of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. T. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
James McFarland, Chief Clerk and Acting Secretary

H. B. Glaisyer, the Commission's Secretary, was absent on account of illness.

A delegation representing the Federated Garden Clubs of Oregon was present and conferred with the Commission on matters of highway beautification. The delegation was headed by Mrs. E. C. Dalton, of St. Helens, President, and included the following: Mrs. A. E. Rockey and Mrs. Jessie M. Honeyman, Portland, representing the Oregon Roadside Council; Mrs. E. M. Blanding, Portland, Secretary of the Federated Garden Clubs of Oregon; Mrs. J. L. Karnopp, Portland, State Chairman of the organization; and Mrs. H. J. Pearson, McMinnville, Chairman of the Roadside Development Committee.

Mrs. Dalton stated that their organization has always been interested in roadside beautification and the preservation of natural scenery and it is their desire to work in harmony with the State Highway Commission along those lines if the Commission will advise the garden clubs what activities they might engage in to that end. She introduced the other members of the delegation, all of whom spoke briefly on this subject.

OCT 21 1937

Chairman Cabell thanked the delegation for its offer of assistance and advised that the Commission will give it serious consideration, but he is not in a position at the present time to make any suggestions. He mentioned, however, the matter of providing freeways and advised that the Highway Commission is very anxious to secure authority from the legislature for such freeways but hesitates to take the initiative in the matter because it is of the belief that some other organization should sponsor it, in view of the fact that there are many people who think that the Highway Commission now has too much authority. He gave as his thought that the garden clubs of the state could assist greatly in securing proper legislation by educating the general public along these lines. He also mentioned the matter of billboard advertising along state highways and expressed the opinion that the garden clubs could do a lot of good in securing appropriate legislation that eventually would rid the highways of such means of advertising. He said he believed that moral persuasion by groups such as the garden clubs would be very effective in securing the needed legislation.

The State Highway Engineer mentioned the progress that is being made by the states of Texas and Massachusetts toward the elimination of billboard advertising and the preservation of roadside scenery. He concurred with Chairman Cabell in the matter of securing legislation for freeways and advised that such legislation would enable the Highway Commission to build beautiful roads that would stay beautiful and would insure the preservation of aesthetic features which, under present conditions, are constantly being marred by the construction of hot dog stands, service stations, et cetera. He gave as his thought that if the garden clubs would concentrate on freeways and billboards they would be doing a very commendable thing for the State of Oregon.

In the further discussion of this matter it appeared to be the opinion of all present that not much could be accomplished in the way of securing needed legislation until the general public has been educated up to the point where it realizes the importance and value thereof and will back the sponsors of such legislation to the fullest extent. Mrs. Dalton advised that their organization plans to conduct a series of conferences the following week and they want to be in a position to tell the various club members just what to do when the question of roadside beautification comes up for discussion. She inquired whether or not they should concentrate on the matter of freeways, elimination of billboard advertising and beautification of city entrances, or should they stress the matter of roadside planting.

Chairman Cabell again advised that the Commission is not in a position to state now just what features should be emphasized but will endeavor to work out something and will advise them later when a plan has been arranged. He suggested that the members of the garden clubs at the conferences next week be told that the Highway Commission is sympathetic with their ideas and intends to decide upon a plan of cooperation as soon as possible. This arrangement appeared to be satisfactory to the delegation. The conference was concluded after further brief discussion of a general nature.

Commissioner Aldrich reported receipt of an invitation for the members of the Commission to be present at the Annual Meeting of the Oregon Trail Association which is to be held in Pendleton on October 28. It was decided that Commissioner Aldrich, State Highway Engineer R. H. Baldock, and Division Engineers W. C. Williams and W. E. Chandler should attend this meeting as representatives of the State Highway Department.

The Commission discussed the claim of Mrs. Virginia Hickey for damages that she alleges occurred to her property at Brightwood by reason of reconstruction of the Mount Hood Highway at that place. Chairman Cabell stated that, in accordance with the decision reached by the Highway Commission some time ago, he offered to settle with Mrs. Hickey for the sum of \$175, and evidently she is unwilling to accept such amount and now desires to reopen the case and intends to come before the Commission on the following day relative thereto. After discussion, the Commission decided to inform Mrs. Hickey that the Commission's previous offer of \$175 is the maximum that it feels it can pay her and that such offer is final and conclusive.

Reconsideration was given by the Commission to the claim of Mrs. Pearl S. Koble arising out of a settlement for right of way needed for the Pacific Highway (new route) across her property in the Siskiyou Mountains south of Ashland. After discussion, the following arrangement for the settlement of this claim, constituting full and complete settlement, was approved by the Commission by unanimous vote.

(1) The state shall deed back to Mrs. Koble for a site for her garage a parcel of land 50' wide by 100' long, between Highway Engineer's Stations 470 and 471, on the west side of the highway. Said property shall not be used for parking of cars to be serviced at a service station or for other trade accommodations.

(2) The state shall excavate an area 50' x 20' as a site for Mrs. Koble's garage, said excavation to be taken down to a level with the grade of the highway at a point near the center of said 50' x 100' tract and shall be adjacent to and connect with said tract.

(3) The state shall fill in to a level with the highway and for a distance of 150' adjacent to the highway embankment a certain hole on the above-described 50' x 100' tract.

(4) The state shall lease to Mrs. Koble for a period of 10 years a strip of land lying adjacent to and along the west side of the highway, between Highway Engineer's Stations 462+50 and 464+00, which area Mrs. Koble desires to landscape. This property is to be leased to Mrs. Koble with the strict understanding that it is to be used for landscaping purposes only and that the lease will be terminated by the Highway Commission at any time that the area is required by the state for highway purposes, construction or maintenance, or if the area is being utilized for purposes that interfere with highway use.

OCT 21 1937

(5) The state shall construct a standard guard fence along the west side of the highway between Highway Engineer's Stations 462 and 464.

(6) The state shall pay to Mrs. Koble \$1,000 cash, in addition to the amount of \$1,200 previously paid.

(7) Mrs. Koble shall release the state from any claim for damages that may occur to her property by reason of Highway Department snow removal operations or any other maintenance operations on the highway, and shall deed to the state a right of way 200 feet wide across her property, less the 50' x 100' area described above, if investigation reveals that the description in the deed heretofore given the state is in error in that respect.

The Attorney was instructed to prepare a form of agreement covering the matter and to present the same to Mrs. Koble for acceptance.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the prices that he recommended be paid for each. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution relative thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission considered but deferred action on properties needed from the city of Portland and Multnomah County for the proposed Lombard Street extension in North Portland, being right of way file Nos. 4900 and 4861. The Commission also deferred action on the acquisition of the George Joseph property which is needed for park purposes and for right of way for the Troutdale-Multnomah Falls Section of the Columbia River Highway (new route), right of way settlement No. 1832. The Commission indicated that the price asked by Mr. Joseph is satisfactory for 73.2 acres but there is a question whether or not Mr. Joseph's entire acreage on the island of which this is a part should be acquired, hence a decision with respect to the acquisition of the 73.2 acres was deferred until the next meeting. The Attorney was instructed to secure options in the meantime from other owners in this vicinity, if possible, at the price quoted by Mr. Joseph, and to deliver the options to Chairman Cabell, who agreed to inspect the various properties before the next meeting.

The Commission also considered but deferred action on the acquisition of the Nina I. Belt property which is needed for right of way for a revision of the Oregon Coast Highway at Fogarty Creek between Siletz Bay and Newport, in Lincoln County. The Attorney was instructed to render an additional report on this matter at the next meeting.

The Attorney reported on the status of acquiring the Minnie T. Reed property along the Upper Columbia River Highway in Multnomah County, which property is needed as a quarry site and source of road-building material. He said that he offered the owner of this property \$4,000 for four acres but the owner advises that she has received an offer of \$15,000 from the Parker-Schram Company, Portland, which is ready and willing to buy the property at that figure. He requested instructions. The Commission considered that \$15,000 is too much to pay for this land and accordingly instructed the Attorney to proceed with condemnation in the event the owner will not accept a reasonable amount.

OCT 21 1937

The Commission also authorized the Attorney to institute condemnation proceedings, if necessary, to acquire a certain quarry site which is needed in connection with the Shuttler Flat-Condon Rock Production Project, in Gilliam County, for which bids are to be taken on the following day, it appearing that the owner of this property is unwilling to sell to the state because of a grievance of some kind against the Commission, arising out of the destruction of a well which he alleges was ruined when the highway was constructed across his premises.

Reconsideration was given by the Commission to the matter of acquiring land from the Union Central Life Insurance Company for right of way for the proposed highway up the Columbia River between Troutdale and Multnomah Falls, in Multnomah County. The Commission decided to extend this purchase to include additional land for state park purposes, and accordingly, by unanimous vote, adopted the following resolution authorizing the Attorney to include such park area in condemnation proceedings that were ordered on September 14, 1937:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby; and

WHEREAS, said Highway Commission is likewise authorized and empowered to acquire by purchase, agreement, gift, or by the exercise of the power of eminent domain land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, public squares, recreational grounds or resorts, which in the opinion of the State Highway Commission are necessary for the convenience of the public and which are so situated as to be accessible to and conveniently reached by and from state highways; and

WHEREAS, in the opinion and judgment of the Highway Commission, certain property owned by and in the possession of The Union Central Life Insurance Company, which property is located in Multnomah County, Oregon, and generally described as follows, to wit:

A parcel of land lying in Government Lot 1 and the Northeast quarter of the Northeast quarter, and in the Southwest quarter of the Northeast quarter of Section 30, Township 1 North, Range 5 East, W. M., Multnomah County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to The Union Central Life Insurance Company, recorded in book 1063, page 319, of Multnomah County Record of Deeds, the said parcel being described as follows:

Beginning at a point 400 feet south of the Northwest Corner of Lot 1 of Section 30; thence northeasterly to the Northeast Corner of Section 30; thence South 20 chains; thence West 20 chains; thence South to the O.W.R.R. & N.Co. right of way; thence West to the intersection of the center line of the said section; thence North to the point of beginning.

Also:

The northwest quarter of the northwest quarter of Section 29, Township 1 North, Range 5 East, W. M., Multnomah County, Oregon.

Also:

The south 660 feet of Government Lots 1, 2, and 3, Section 20, Township 1 North, Range 5 East, W. M., Multnomah County, Oregon.

The parcels of land to which this description applies contain 192 acres.

is necessary for right of way for the further improvement and permanent location of a portion of the Columbia River Highway in Multnomah County, and likewise is necessary for the convenience of the public, a portion of which said property is within the boundaries of the said highway as surveyed and located, and a portion is so situated as to be accessible to and conveniently reached by and from the said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That this Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement and maintenance of the Tunnel Point-Bridal Veil Section of the Columbia River Highway in Multnomah County a portion of the property described above and owned by and in the possession of The Union Central Life Insurance Company and other persons claiming some interest in said property.

2. That this Commission does hereby find and declare that in its opinion and judgment a portion of said property is necessary for the convenience of the public in the use and enjoyment of the Columbia River Highway for parking places, recreational and other public uses specified in Section 44-3209, Oregon Code 1930, which said property is so situated as to be accessible to and conveniently reached by and from said highway.

3. This Commission does further find and declare that the acquisition of the property herein described is necessary and required

for right of way purposes and for the development of parks, parking places, recreational uses and other uses specified in Section 44-3209, Oregon Code 1930, and this Commission does hereby further declare and find that said property is necessary, is needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes and for the other purposes specified herein in order to make it possible for the State Highway Commission to properly locate, construct and maintain said portion of said Columbia River Highway in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety, and in order to contribute to the convenience and enjoyment of the public using and traveling upon said highway, and for the purpose of affording parks, parking places, recreational grounds and other uses and benefits specified in Section 44-3209, Oregon Code 1930.

4. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the said parcel or parcels of land required for right of way purposes and the parcel or parcels of said land required and necessary for parks, parking places, recreational grounds or other uses enumerated in said statute, and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties or which descriptions may be used in the preparation of a complaint in the event condemnation proceedings are necessary.

5. That the boundaries of said parcel or parcels of land as defined and determined by the said survey made by said Engineer for right of way along the route and location adopted by the Highway Commission shall be and the same hereby are adopted and the lands therein defined are declared to be and the same are included within the right of way of the said portion or portions of the state highway system, and hereby are declared to be necessary for the proper location, improvement, construction and maintenance of said portion or portions of the state highway system, and it further is hereby declared and found that the portions of said property not required for right of way purposes or for use in the construction of said highway shall be and the same hereby are declared to be necessary for the convenience of the public using and traveling upon said highway.

6. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if any there be, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney

General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

7. That this resolution be entered in full in the minutes and records of this Commission.

In this connection the Engineer was instructed by the Commission not to take possession of any property that is being condemned until the condemnation proceedings have been completed. The Commission by unanimous vote adopted such procedure as the policy to be followed hereafter in all cases of condemnation.

The Attorney also reported the status of the acquisition of the Beckley property, which is needed as a source of materials for surfacing a section of the Umpqua Highway in Douglas County. He said that Mr. Beckley does not care to part with title to the property but is willing to lease it to the state for approximately 25 years for the sum of \$3,600. The Engineer advised that, based on the yardage of materials that it is contemplated will be taken from this gravel pit, it will take about 50 years to justify an expenditure of \$3,600 for a lease, which would bring the cost of the materials down to about 5 cents per cubic yard. He added that he could not recommend leasing the property on any other basis and not then if Mr. Beckley insists upon including in the lease agreement numerous conditions that would work to the disadvantage of the state. The Commission considered the offer of Mr. Beckley unsatisfactory and referred the matter to the Engineer and the Attorney to ascertain whether or not suitable materials can be obtained from some other source.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

(1) Disposal of cordwood in Shelton Park:- He said that the Wheeler County Relief Committee is desirous of securing for relief purposes some 50 cords of wood which are now stacked in Shelton State Park as a result of C.C.C. activities under his supervision. He recommended that the committee be allowed to have this wood free of cost, which is in accordance with the precedent established by the Commission in previous years. The Commission approved the recommendation by unanimous vote.

(2) Acquisition of property owned by Carl G. Washburne adjacent to the Oregon Coast Highway, in Lincoln County:- The Parks Superintendent advised that Mr. Washburne owns 250 acres of land near Heceta Head, which he once offered to sell to the state for \$25,000 but is now willing to let the state have for park purposes for the sum of \$10,000. He further stated that the property is valuable from the park standpoint and that Mr. J. C. Ainsworth and Mr. E. C. Sammons, Portland, have signified their willingness

OCT 21 1937

to contribute \$5,000 toward the purchase of the same if the state will pay the balance. He requested an expression from the Commission in regard to this offer. The Commission deferred action on this matter for the time being. (This was discussed further the next day.)

(5) Acquisition of James Moore property adjacent to John Day Highway at Mile Post No. 116 in Grant County:- The Parks Superintendent advised that Mr. Moore has a homestead filing on a 40-acre tract of government land, which is valuable for the fossil beds located thereon and that he has indicated a willingness to relinquish his rights in favor of the state if the Highway Commission will purchase for him a 40-acre tract belonging to the State Land Board, which is estimated to cost about \$4.00 per acre. He recommended acceptance of this offer in view of the desirability of acquiring the fossil beds. The Commission approved the recommendation by unanimous vote. (The Commission signed an agreement with Mr. Moore on the following day, covering the matter.)

(4) Timber strips along the Wilson River Highway:- The Parks Superintendent said that he has inspected the wayside strips that were to have been donated by the Weyerhaeuser Timber Company and also the strips that were recommended for purchase by the Tillamook County Court, and he is of the belief that the Highway Commission should not purchase the latter-mentioned strips because they are in the burned area and have no value from the scenic standpoint. As to the Weyerhaeuser Timber Company property, he said that present plans are for the company to deed this property to Tillamook County. The State Highway Engineer gave as his understanding that the Tillamook County Court was to secure these strips from the Weyerhaeuser Timber Company and then deed them to the state. The Commission took the attitude that the state should own these strips and accordingly instructed the Parks Superintendent to contact Mr. Wells Gilbert, Manager of the Weyerhaeuser Timber Company, relative thereto. Mr. Gilbert is to be informed that the Highway Commission understood that the property would be deeded to the state but if the company prefers to transfer title through the county, that will be satisfactory, provided the county will agree to make another transfer of title to the state.

(5) Park site adjacent to the Nehalem Secondary Highway, near Mist, in Columbia County:- The Parks Superintendent reported that Natal Grange, of Columbia County, has petitioned the State Highway Commission, through Governor Martin, to purchase for park purposes a tract of timber land containing 5.64 acres located in the S.E. $\frac{1}{4}$ of the N.E. $\frac{1}{4}$ of Section 29, Township 6 N., Range 4 E., W. M., from the Clark Wilson Lumber Company. He said that this tract contains a fine stand of fir timber and would make a valuable addition to the state park system. He recommended purchase of the same if the timber can be purchased at a reasonable rate from the lumber company. In this connection a letter was presented from Governor Charles H. Martin, in which the State Highway Commission was asked to give particular consideration to the petition signed by the citizens of Columbia County urging the Commission to acquire the 5.64 acres of land under discussion, for state park purposes. After discussion, the Commission approved Mr. Boardman's recommendation by unanimous vote, subject to the condition that the price demanded for the timber by the lumber company is in keeping with the proper value of the property.

The Commission adjourned at 11:30 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the Auditorium of the Public Service Building.

Portland, Oregon, October 22, 1937.

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 F. L. Tou Velle, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 James McFarland, Chief Clerk and Acting Secretary

The Commission's Secretary, H. B. Glaisyer, was absent on account of illness.

Bids as follows for highway construction projects, sale of buildings, and sale of used tires and tubes, were opened and read in conformance with previously published notice:

Chairman Cabell made the following announcement in regard to the bids that were received for the Shuttler Flat-Condon Rock Production Project on the John Day Highway, in Gilliam County: "The Commission has decided not to open the bids on the Shuttler Flat-Condon Project for the reason that difficulties have arisen in acquiring quarry and stock pile sites. Bids received for such project have been ordered returned to the respective bidders, unopened. The project will be readvertised for bids to be received at some future date when the present difficulties have been cleared up."

Chairman Cabell also announced that the award of contracts on highway construction projects, sale of buildings and scrap materials would be made at 3:00 o'clock p. m. in the same room.

Landscape Engineer George Otten was present and discussed with the Commission matters pertaining to the property that the Commission is considering purchasing from Mr. Carl G. Washburne for a park site adjacent to the Oregon Coast Highway, near Heceta Head, in Lincoln County. He was authorized by the Commission to contact Mr. Washburne and ascertain what plans he has for the development of this property. The question arose whether or not it would be possible to finance the purchase of this tract with private funds. The Commission referred this matter to Chairman Cabell to determine the possibility of such method of financing. The Commission indicated that it would authorize the expenditure of state funds for the purpose in the event attempts to secure private funds prove successful, the state's contribution to be the amount required over and above the \$5,000 contribution that has been offered by Mr. J. C. Ainsworth and Mr. E. C. Sammons, Portland, as reported by the Parks Superintendent on the previous evening.

A delegation from Coos County, consisting of Mrs. Charles Magee, Marshfield, Chairman, representing the Berview and Charleston property holders'

group; Henry Kern, North Bend, representing Coos County Chamber of Commerce; L. S. Henrie, Marshfield, representing the Marshfield Chamber of Commerce; Harold J. Hickerson, North Bend, Secretary of the North Bend Chamber of Commerce; and W. M. Hillar, Empire, representing the Gateway Chamber of Commerce of Empire and Charleston, came before the Highway Commission in the interests of the Cape Arago Secondary State Highway.

Mrs. Magee read aloud a letter directed to the Commission and signed by her, as Chairman of the group she represented, extolling the attractive features of the Cape Arago road and urging the Commission to improve the condition of the road by surfacing and oiling at the earliest possible time so its use may be enjoyed to the utmost by pleasure-seekers as well as by those who use the road for commercial purposes. She asked the Commission particularly to make provision in its next budget for financing such improvement.

Mr. Kern declared that this road is practically impassable during the winter months. He urged improvement of the same by the construction of a permanent oil surface, especially on the 8-mile section between Tarheel Point, $2\frac{1}{2}$ miles west of Empire, and Cape Arago State Park, a distance of 8 miles. He presented a letter from the Coos County Chamber of Commerce in support thereof.

Mr. Henrie urged the improvement on behalf of the Marshfield Chamber of Commerce and presented a letter from the Highway Committee of the Chamber of Commerce in support of his oral arguments. Mr. Hickerson urged the improvement on behalf of the North Bend Chamber of Commerce.

Chairman Cabell explained briefly the difficulties confronting the Commission in financing new projects. He explained that the cost of maintaining highways has increased greatly and that the Commission is short of funds for even matching money provided by the Federal Government, which has made it necessary to postpone a number of projects on the Federal Aid Highway System. He advised that the Commission hoped at one time to secure federal P.W.A. funds to finance the Catching Slough Bridge in Coos County but the plan did not materialize and it is now necessary to secure funds from some other source in view of the fact that the bridge is in very poor condition and must be replaced; so the outlook for financing an oiling project on the Cape Arago road does not seem to be very promising. He inquired what section of the road it would be most desirable to improve in the event the Commission finds, after further study, that it has funds to finance a portion of it.

Mrs. Magee replied that they would prefer the oiling of the 2-mile section from Tarheel Point to and through Charleston, especially through the business district of Charleston. Mr. Kern gave as his thought that the worst section of the road is west of Charleston but they are not particular where the Commission spends its money, just so long as it provides a permanent improvement.

Chairman Cabell then advised that the Commission has not yet made its program for next year's oiling work and will consider the Cape Arago

project in the arrangement of such program, although no commitments or promises can be made at this time relative thereto. He also said that the Commission realizes that this road is very dusty and carries a considerable amount of traffic but the Commission is confronted with a similar condition in other parts of the state, which accounts for the fact that no definite statement can be made at this time. He concluded the conference by reiterating that the Commission will bear in mind the Cape Arago project in the formulation of its 1938 construction program and will advise the delegation of the action taken. The delegation requested that all correspondence in regard to this matter be directed to Mrs. J. S. Evans, Route 2, Marshfield.

County Judge Nelson B. Higgs, of Harney County, was present. He inquired whether or not the State Highway Commission plans to hold public hearings in connection with the programming of the 1938 highway funds. He was informed that the Commission does not propose to hold public hearings for this purpose but if the members of the Harney County Court have certain projects in mind, the Commission will be glad to have the Court present them for consideration in the formulation of the construction program.

Judge Higgs then asked for the oiling of a 3-mile or 4-mile gap on the Central Oregon Highway in the vicinity of Buchanan, which section, he alleged, is now in very bad condition. He was informed by the Engineer that it would not be possible to do the oiling work at this time because the Commission does not have on hand a supply of fine rock that is needed for such improvement. The Engineer also said that he would see to it that the road is smoothed out and maintained in the best possible manner pending construction of the oiled surface.

A delegation representing the Obsidians of Eugene and consisting of Paul R. Lafferty, President; George H. McMorran, and Robert Lemon, came before the Commission and urged that the McKenzie Highway be kept open during the winter season, east from Belknap Springs to a point known as Frog Camp, a distance of about 12 miles, for the benefit of winter sports enthusiasts who wish to make use of the winter sport facilities in the vicinity of Frog Camp. Mr. Lafferty alleged that this area is unequalled for winter sports in any locality and could be made a national attraction if the Highway Commission would assist by keeping the highway open up to this playground. He gave as his thought that the advertising value of such recreational area to the state would fully justify the expense of keeping the highway open and called attention to the things that are being done in other western states along that line, referring particularly to the Mt. Shasta winter playground in California, the Mt. Rainier winter playground in the State of Washington, and the Sun Valley resort in the State of Idaho. He presented letters from County Judge Fred Fisk of Lane County; W. M. Tugman, Editor, Eugene Register-Guard; C. Valentine Boyer, President, University of Oregon; Elisha Large, Mayor of Eugene; and J. E. Luckey, President, Eugene Chamber of Commerce, all of whom urged the Commission to give favorable consideration to this request.

Mr. McMorran endorsed the remarks made by Mr. Lafferty. He added that in his estimation the cost of keeping the road open to Frog Camp would be more than offset in the increased amount of revenue that the State Highway Department would receive from the gasoline tax paid by those who would use the road.

He predicted that if the road were kept open it would be used, not only by the people of Eugene, but also by the people in the surrounding territory as far west as the coast and into southern Oregon. Mr. Lemon also spoke in favor of this project.

Chairman Cabell advised that highway maintenance costs are mounting steadily and it is necessary that highway funds be conserved as much as possible. He gave as his thought that the cost of keeping the road open up to Frog Camp would amount to a considerable sum and more than the Commission can possibly pay. The Engineer estimated that it would cost about \$6,000 to keep the road open with push-plow equipment if it would be possible to do so with such equipment, which he doubted, in view of the snow conditions on this highway during the last two years. If the work could not be done with push-plows, he said, it would then be necessary to assign a rotary snowplow for the work, which would necessitate the purchase of new equipment costing about \$16,000.

The suggestion was offered that the Obsidians develop a winter playground adjacent to some road that is to be kept open during the winter season and in this connection the Engineer advised that the Commission plans to keep the Santiam Highway open through Hogg Pass and the Willamette Highway open for all-year traffic when it is completed. He offered the suggestion that a winter recreational area could be found adjacent to one of these roads, which would obviate the necessity of keeping an additional road open over the Cascade Range. Mr. Lafferty countered with a statement to the effect that it is only 70 miles from Eugene to Frog Camp, whereas it would be a much greater distance to any winter playground that might be selected on either of the other highways. He urged the Commission to conduct an experiment this winter on the McKenzie Highway to ascertain the cost and practicability of keeping this road open to Frog Camp.

After further discussion the conference was concluded by a statement from Chairman Cabell to the effect that the Commission would give this matter further study and let the delegation know the decision within the next two weeks. This matter was discussed further by the Commission after the departure of the delegation, at which time the Commission voted unanimously to expend a maximum amount of \$1,000 for snow removal on this section this winter as a trial proposition to ascertain the feasibility of keeping the road open to travel and to determine approximately the amount of revenue that will accrue to the State Highway Fund by reason of winter sport activities in this vicinity.

The Commission signed a joint letter with W. H. Lynch, District Engineer, Bureau of Public Roads, and C. J. Buck, Regional Forester, directed to the Chief of the Forest Service and Chief of the Bureau of Public Roads, Washington, D. C., recommending that Oregon Forest Highway, Class 2, Route No. 58 (Flora-Enterprise Highway), be extended northerly from its present terminus to the Oregon-Washington State Line, a distance of 9.56 miles.

The Commission also signed a letter directed to the U. S. Bureau of Public Roads, Portland, requesting that the West Portland-Hubbard Highway,

(Wilsonville Cutoff), be made a part of the Federal Aid Highway System at this time in order that a portion of the available 1939 Regular Federal Aid Funds may be utilized in the construction of the same, said road being 17.5 miles in length, no part of which is within the limits of any incorporated city or town, and described as follows:

Beginning at a point on Federal Aid Road No. 9, northeast of the town of Tigard, in Washington County, and extending southerly to a point on Federal Aid Road No. 3 northeast of the town of Hubbard, in Marion County.

The Commission also by unanimous vote adopted the following resolution revising the descriptions of the highways included in the Oregon Federal Aid Highway System, in accordance with a request from the U. S. Bureau of Public Roads:

WHEREAS, the State Highway Commission has heretofore, from time to time, duly and regularly adopted resolutions by which there were designated, defined and adopted the roads and highways in the State of Oregon which were made parts of and constituted the Oregon Federal Aid Highway System; and

WHEREAS, since the adoption of said resolutions numerous changes have been made in many of said highways and some of the said designated highways or parts thereof have been eliminated or removed from the Oregon Federal Aid Highway System; and

WHEREAS, it is now deemed advisable and appropriate that a resolution be adopted by the State Highway Commission by which there will be redesignated and readopted as modified or altered the roads and highways or parts thereof which by said former resolutions were declared to be the Oregon Federal Aid Highway System;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and affirmatively voting, as follows:

1. That the following designated and defined highways with their respective numbers and their respective mileages as given herein shall be and said highways as defined and described herein and their respective numbers and mileages hereby are declared to be and are the Oregon Federal Aid Highway System:

Route No.	Route Description	Total Mileage of Route	Mileage in Cities of 2500 Population or More
1	From a connection with Federal Aid Road No. 2 in Astoria via Portland, The Dalles, Arlington, Pendleton, LaGrande, and Ontario, to the Oregon-Idaho State Line east of Ontario	518.90	31.89

Route No.	Route Description	Total Mileage of Route	Mileage in Cities of 2500 population or more
2	From the Oregon-California State Line southeast of Brookings via Port Orford, North Bend, Reedsport, Newport, and Tillamook, to a connection with Federal Aid Road No. 1 in Astoria.	394.02	10.24
3	From the Oregon-California State Line northeast of Hilt, California, via Ashland, Medford, Grants Pass, Roseburg, Eugene, Junction City, Albany, Oregon City and Oswego to a point on Federal Aid Road No. 24 in Portland	337.85	23.12
4	From a connection with Federal Aid Road No. 15 in Klamath Falls via Fort Klamath Junction, Crescent, Lapine, Bend, Redmond, and Maupin, to a point on Federal Aid Road No. 1 northeast of The Dalles.	285.11	4.73
5	From a point on Federal Aid Road No. 3 east of Eugene via McKenzie Bridge, Redmond, Prineville, Mitchell, John Day, and Vale to a point on Federal Aid Road No. 1 in Ontario.	385.00	
6	From a point on Federal Aid Road No. 1 at Arlington to a point on Federal Aid Road No. 5 northwest of Dayville.	123.63	
7	From a point on Federal Aid Road No. 1 in La Grande via Minam to Enterprise.	66.25	.46
8	Eliminated		
9	From a point on Federal Aid Road No. 3 near Junction City via Corvallis, McMinnville, and Fourth Avenue in Portland to a point on Federal Aid Road No. 1 at the intersection of Fourth Avenue and Burnside Street in Portland and from another point on Federal Aid Road No. 1 in Portland at the intersection of Burnside Street and Broadway via Broadway, Interstate Avenue and Denver Avenue to a point on Federal Aid Road No. 26 at the south end of the Interstate Bridge over the Columbia River.	116.04	13.34
10	From a point on Federal Aid Road No. 3 in Albany to a point on Federal Aid Road No. 9 in Corvallis.	10.50	.65

OCT 22 1937

Route No.	Route Description	Total Mileage of Route	Mileage in Cities of 2500 population or more
11	From a point on Federal Aid Road No. 9 southwest of McMinnville to a point on Federal Aid Road No. 2 at Hebo.	46.66	
12	From a point on Federal Aid Road No. 1 at Biggs via Moro to a point on Federal Aid Road No. 4 southwest of Shaniko.	69.00	
15	From a point on Federal Aid Road No. 4 at Fort Klamath Junction to the south boundary of Crater Lake National Park.	6.75	
14	From a point on Federal Aid Road No. 3 near Dillard to a point on Federal Aid Road No. 2 between Fort Orford and North Bend, near Coquille.	61.81	0.29
15	From a connection with Federal Aid Road No. 4 in Klamath Falls to a point on Federal Aid Road No. 3 southeast of Ashland.	56.34	0.98
16	From a point on Federal Aid Road No. 4 approximately 2 miles southwest of Lapine via Silver Lake and Lakeview to the Oregon-California State Line at New Pine Creek on route to Alturas, California.	158.23	
17	From a point on Federal Aid Road No. 8 at Grants Pass via Kerby to the Oregon-California State Line en route to Crescent City, California.	42.34	
18	From a point on Federal Aid Road No. 1 at Umatilla to the Oregon-Washington State Line south of Wallula, Washington.	19.71	
19	From a point on Federal Aid Road No. 1 at Pendleton to the Oregon-Washington State Line southwest of Walla Walla, Washington.	56.60	
20	From a point on Federal Aid Road No. 3 at Drain via Scottsburg to a point on Federal Aid Road No. 2 at Reedsport.	50.13	
21	From a point on Federal Aid Road No. 4 in Bend to a connection with Federal Aid Road No. 51 in Burns.	151.71	2.59

Route No.	Route Description	Total Mileage of Route	Mileage in Cities of 2500 population or more
22	From a point on Federal Aid Road No. 2 in Newport to a point on Federal Aid Road No. 9 in Corvallis.	56.91	.99
23	From a point on Federal Aid Road No. 2 near Otis to a point on Federal Aid Road No. 11 at Valley Junction.	21.92	
24	From a point on Federal Aid Road No. 1 in Portland via Sandy and Government Camp to a point on Federal Aid Road No. 4 west of Maupin	99.21	6.69
25	From a point on Federal Aid Road No. 2 at Florence to a point on Federal Aid Road No. 3 south of Junction City	67.32	
26	From a point on Federal Aid Road No. 3 in Oregon City via Milwaukie and Union Avenue in Portland to the Oregon-Washington State Line at the Interstate Bridge over the Columbia River south of Vancouver, Washington.	19.51	9.36
27	From a point on Federal Aid Road No. 9 in Portland via the Wolf Creek route to a point on Federal Aid Road No. 2 at Necanicum.	65.52	2.31
28	From a point on Federal Aid Road No. 2 near Wheeler via Cannon Beach to a point on Federal Aid Road No. 2 approximately 5 miles north of Cannon Beach.	20.96	
29	From a point on Federal Aid Road No. 3 at Goshen to a point on Federal Aid Road No. 4 south of Crescent.	87.17	
30	From a point on Federal Aid Road No. 1 in Pendleton via Nye to a point on Federal Aid Road No. 5 near John Day	122.15	1.73
31	From a connection with Federal Aid Road No. 21 in Burns to a point on Federal Aid Road No. 5 at Vale.	114.97	1.01
32	From a point on Federal Aid Road No. 27 west of Portland via Hillsboro and Forest Grove to a point on Federal Aid Road No. 9 northeast of McMinnville	42.36	1.82

Route No.	Route Description	Total Mileage of Route	Mileage in Cities of 2500 population or more
33	From a point on Federal Aid Road No. 15 south of Klamath Falls to the Oregon-California State Line south of Worden en route to Weed, California	14.30	
34	From a point on Federal Aid Road No. 11 near Dolph to a point on Federal Aid Road No. 23 west of Grand Ronde.	5.60	
35	From a point on Federal Aid Road No. 2 in Tillamook via Wilson River to a point on Federal Aid Road No. 27 near North Plains.	54.32	.48
36	From a point on Federal Aid Road No. 1 approximately 8 miles west of Pendleton to a point on Federal Aid Road No. 18 east of Umatilla	18.50	
37	From a point on Federal Aid Road No. 3 in Albany via Lebanon and Cascadia to a point on Federal Aid Road No. 5 at Sisters.	101.50	.48
38	Eliminated		
39	From a point on Federal Aid Road No. 1 at or near the Sandy River Bridge, via Base Line Road to a point on Federal Aid Road No. 1 at the intersection of Sandy Boulevard and East Burnside Street in Portland	15.40	4.58
40	From a point on Federal Aid Road No. 1 at the intersection of Sandy Boulevard and Columbia Boulevard northeast of Portland, via Columbia Boulevard, Lombard Street, and St. Johns Bridge to a point on Federal Aid Road No. 1 near the northwest limits of Portland.	10.90	7.90
41	From a point on Federal Aid Road No. 1 at the intersection of East 82nd Street and Sandy Boulevard, at the northeast limits of Portland, via East 82nd Street and Meridian Road to a point on Federal Aid Road No. 26 near Gladstone.	<u>13.50</u>	<u>5.78</u>
Total		3,868.22*	131.42

* Includes Reservation Mileage - 482.11 miles.

2. That the roads and highways or parts thereof heretofore designated and adopted by resolutions of this Commission as and constituting the Oregon Federal Aid Highway System shall be, as modified or altered herein, deemed to be readopted and redesignated by this resolution, and such highways or portions of highways included in said former resolution but eliminated by this resolution either in whole or in part by way of alteration or modification shall no longer be deemed to be a part of the said Oregon Federal Aid Highway System, subject, however, to such action or ruling as the Commission may hereafter make.

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the United States Bureau of Public Roads, and a copy to each of the counties in which any of said roads or highways are located.

Mr. Jack Summerville, United States Marshal, Portland, was present and asked the Commission to revise its plans for the construction of the new highway along the waterfront in Oregon City so as to eliminate the two curves in the proposed line south of the Abernethy Creek Bridge. He said that he is not personally interested in this matter but is simply appearing in behalf of numerous residents of Oregon City who believe that such change will be for the best interests of the highway and the traveling public. He exhibited a map showing the proposed change, which involves realignment to eliminate two curves south of Abernethy Creek Bridge.

The Engineer pointed out that the curves referred to by Mr. Summerville are not extreme, being 6-degree curves, and that it would be possible for traffic to negotiate them at a speed of 80 miles an hour with safety were it not for the fact that the curves are located within the corporate limits, where such speed is not permissible because of traffic congestion. He estimated that it would cost about \$100,000 to make the change proposed by Mr. Summerville, and recommended against the same. The Commission approved the recommendation by unanimous vote.

Dr. T. M. Birkbeck, Mayor, and Mr. George Hibbert, City Manager, of Milton, Oregon, came before the Commission and urged the straightening of the Oregon-Washington Highway through their city. They pointed out that the present highway contains numerous turns within their city limits, is narrow, and is not nearly capable of taking care of the traffic, and as a consequence there is considerable traffic congestion and accompanying hazard. They asked for the elimination of the turns and the widening of the pavement from curb to curb. The Engineer estimated that such project would cost about \$15,500 and would involve the removal of railroad tracks. After discussion, Chairman Cabell advised that the Commission will be pleased to consider this project in the formulation of its construction program next year but is not in a position at the present time to make any definite statements in regard thereto. He further stated that the Commission will inspect the situation next time it is in the vicinity of Milton.

Representative S. R. Fatland, Condon, conferred with the Commission in regard to the oiling of the unoled sections of the John Day Highway between Branson Creek and Service Creek, in Wheeler County. He said that if the Commission will allocate \$20,000 to their project, half of which could be federal funds, they will be satisfied and will not ask for anything else. The Engineer advised that there are 27 miles of unoled road between Branson Creek and Service Creek and that it would cost at least \$1,000 per mile to do what Mr. Fatland asks. Chairman Cabell explained the need for conserving state highway funds in order to provide funds with which to take up Federal Aid allotments. He pointed out that the cost of maintaining state highways is increasing, and, in order to provide proper maintenance and to construct the projects that have to be financed with state money, it has become necessary to defer a number of Federal Aid projects, so there is a question whether or not it will be possible for the Commission to undertake the John Day Highway project during the next construction season. He further stated that the members of the Commission are as anxious as others for the oiling of state highways but the shortage of funds makes it necessary to defer some projects; however, the Commission will be glad to consider this project along with others in the formulation of next year's construction program.

The Commission adjourned for luncheon at 12:30 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, the same persons being present and participating.

The Engineer requested authority to trade in three old Pontiac automobiles assigned to division engineers as part purchase price on three new automobiles of similar type, the old cars having outlived their usefulness for purposes for which they have been used. He also requested authority to trade in seven additional automobiles of the lightweight class as part purchase price on seven new cars of the same class, for similar reasons. He estimated the total cash outlay for the ten cars to be \$6,800. The Commission approved the request by unanimous vote and ordered that the transaction be consummated through the State Purchasing Agent in the usual manner.

The Engineer reported the need for 5,000 gallons of yellow traffic line lacquer in order to complete the season's program of stripe painting on highway pavements. He requested authority to purchase such material, which he estimated would cost \$1.13 per gallon, or a total of \$5,650. The Commission approved the purchase by unanimous vote.

The Commission also, by unanimous vote, approved the purchase of a fireproof safe, costing approximately \$600, for use in connection with the safe-keeping of valuable documents in the office of the Secretary of the Commission.

The Engineer requested authority to purchase five radio receiving sets for installation on the five large Oshkosh trucks that were recently purchased for use exclusively in snow-removal operations, same being equipped with snowplows. He estimated that such radio sets would cost about \$50 each, or a total of \$250. The Commission approved the purchase by unanimous vote.

The Engineer also requested authority to purchase one No. 603 illumination meter at a cost of \$75 for use in determining the type and power of light globes. He also requested authority to purchase one Pastor No. 1 stopwatch at an estimated cost of \$6, for use in connection with the timing of traffic signals and flashers. The Commission approved the purchases by unanimous vote.

The Commission had under consideration the matter of purchase of a privately-owned, one-story residence building with combination garage and woodshed, located on state property at the Sand Creek section headquarters on The Dalles-California Highway, in Klamath County. The Engineer advised that these buildings were constructed several years ago by one of the Highway Department employees, as there was no other place for him or his family to live in that vicinity. He gave as his thought that the state should own these buildings and he recommended their purchase for the sum of \$150, which is the price set on them by the owner, Mr. Harold Moon, inasmuch as they are located on state property and are needed as living quarters for Highway Department employees; also, that they should be rented to the employee occupying them for a small monthly charge. The Commission approved the Engineer's recommendation by unanimous vote.

The Engineer reported the sale of an old 10-ton steam roller, which has been in storage at Astoria for a number of years, to the city of Astoria for the sum of \$500. He explained that this roller is of an obsolete type and is of no value to the State Highway Department and that it has been offered for sale several times during the past five years but no satisfactory bid has been received for the same, and when the city of Astoria offered \$500 for it he thought it was a good idea to take advantage of the opportunity to get rid of it, and accordingly accepted the offer. The Commission by unanimous vote approved the sale of this roller to the city of Astoria at the price mentioned by the Engineer.

The Engineer requested authority to advertise for bids for the furnishing of 10,000 cubic yards of maintenance materials that are needed for the Paradise Creek-Drain Section of the Umpqua Highway, in Douglas County, which he estimated would cost about \$19,000. The Commission approved the request by unanimous vote.

The Commission also, by unanimous vote, confirmed the Engineer's award to Mountain States Construction Company, on September 18, of the contract for surfacing and rock production on the Siletz Secondary Highway, in Lincoln County, bids for which were received by the Commission on September 14, the conditions of the award having been satisfied.

The Commission also confirmed the Engineer's sale of the following buildings at Marshfield, bids for which were taken on September 14:

Building "F", sold on September 18 to J. F. Burkhart, Marshfield, for \$100.

Building "B", sold at private sale to Dave Adams, Marshfield, for \$40.

OCT 22 1937

The Commission had under consideration the sale of the building located on property purchased from Pearl M. Brown for the Cook Overcrossing section of the West Portland-Hubbard Highway, to Charles Loeschon for the sum of \$5.00. The Attorney advised that this building is simply a small shed of very little value and that it would be of no use to anyone unless he lived in the immediate vicinity, as does Mr. Loeschon. He recommended that the building be sold to Mr. Loeschon at the price offered. The Commission approved the recommendation by unanimous vote.

The Engineer reported on the cost to remove snow from the Tumalo Falls county road in Deschutes County, as requested previously by the County Court of that county through County Commissioner Baer. He stated that inspection of this road reveals that it is in such condition that it would be impracticable to undertake snow-removal operations, as it is a one-way mountain road and in some places only six feet wide and lined with boulders and brush and it is almost certain that snowplows could not operate thereover without serious damage to the equipment. He advised that Deschutes County Court made an attempt last winter to keep the road open for the benefit of winter sports enthusiasts, but had to discontinue operations because of the condition of the road. He recommended, in view of the circumstances, that the Commission deny the request of the County Court, at least until the grade of the road has been improved to such an extent that snow-removal equipment can be operated over it without being damaged. Even then, he added, it would cost approximately \$10,000 to keep the road open satisfactorily to traffic. The Commission approved the report and instructed the Engineer to convey the information contained therein to the Deschutes County Court with a request for an expression from the Court as to whether or not it will proceed with the grading work to permit the operation of snow-removal equipment over the road. Definite action as to whether or not the Commission would assume the responsibility of snow removal was deferred pending the County Court's reply.

The Commission reconsidered the matter of the encroachment of the building owned by Mr. Wilbur Badley on state park property at Otter Crest, adjacent to the Oregon Coast Highway, in Lincoln County. The Engineer reported that the property line between the state park and Mr. Badley's property has been rerun by Locating Engineer A. G. Johnson of the State Highway Department, and the new line practically coincides with the line previously run by Locating Engineer B. A. Martin, so there is little question that it is correct. It is apparent from these surveys, he said, that Mr. Badley's building has been constructed partly upon the state's property, and he believed that if the Commission wanted to go to court about the matter, the position that the building is on the state's property could be sustained. He read aloud the report of Construction Engineer H. G. Smith on this subject, dated October 15, 1937, which report was discussed by the Commission.

Chairman Cabell questioned the advisability of taking the matter into court because it appeared to him a situation exists that cannot be corrected without bringing upon the Commission adverse criticism from the general public which, according to information that he has received, is of the opinion that the building is located on Mr. Badley's property.

He suggested that the matter might be disposed of by granting to Mr. Badley a temporary lease or license to occupy a portion of the state park with his building, provided the business conducted therein is carried on properly and in a satisfactory manner, which would still give the Commission control over the situation. Commissioners Aldrich and Tou Velle approved the Chairman's suggestion and it was so ordered. The Attorney was instructed to prepare a form of agreement covering the matter and embodying the suggestions made at this meeting. Such agreement is to be presented to the Commission when signed by Mr. Badley, and, when approved by the Commission, shall be entered in the minutes of the Commission for the information of future State Highway Commissions.

In this connection the Attorney advised that when this matter first came up for discussion, Mr. Ralph Cake, attorney for Mr. Badley, presented a form of deed which was intended to correct an error that Mr. Badley alleges inadvertently crept into the description contained in the deed by which he conveyed the park property to the state. He gave as his thought that the Commission should not sign this deed, in view of the results of the surveys of the property line. The Commission concurred in the viewpoint of the Attorney and instructed him to return the deed to Mr. Cake and to explain to him the reason that the Commission did not feel disposed to sign it.

The Attorney reported briefly that he has received information to the effect that Gilchrist & Company, Ltd., has decided to abandon its plans to construct its railroad at grade across the Willamette Highway to facilitate its logging operations and has decided to proceed at once to construct an overhead structure, thus eliminating the necessity of securing an order from the Public Utilities Commissioner for the temporary grade crossing heretofore considered, and avoiding any further conflict with the State Highway Commission. The Commission took no action.

The Engineer reported the necessity to either place additional surfacing material on the easterly end of the Little Nestucca Secondary Highway, in Tillamook County or to prohibit the hauling of logs over this road. He said that log hauling is being carried on to quite a large extent over the $1\frac{1}{2}$ -mile section of this road just west of Dolph, which section was graded to state highway standards last year but on which no surface material was placed, and unless the road is surfaced or log hauling is prohibited, the road will be impassable this coming winter even for the few farmers who reside in the district. He estimated that it would cost at least \$1,500 to place a topping surface on this grade, and recommended against the project because of shortage of funds. He also recommended that a 10,000-lb. maximum load limit for this road during the winter season be established, which would prevent the hauling of logs thereover. The Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolution relative thereto:

ORDER REDUCING MAXIMUM LOAD LIMIT ON LITTLE NESTUCCA SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved

OCT 22 1937

and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

LITTLE NESTUCCA SECONDARY HIGHWAY

AND WHEREAS, the said above-named state highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced:

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided:

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order;

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to wit:

LITTLE NESTUCCA SECONDARY HIGHWAY between its junction with the McMinnville-Tillamook Highway at Dolph to a point two miles westerly thereof, in Tillamook County

shall be as follows: The combined weight in pounds on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any axle of a vehicle or combination of vehicles, other

than the front axle of a truck or truck-tractor, shall not exceed the product of two hundred (200) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit of 6,000 pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 580 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Tillamook County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer also reported the necessity to reduce the maximum load limit on the Tampico-Lewisville Secondary State Highway, in Benton County. He said that the road is now in very good condition but log hauling is being carried on quite extensively over the same, and unless some means of protection is provided, the road very likely will break up during the winter months and will cause great inconvenience to the people who reside adjacent thereto, this being the only road available to them. He recommended that the Commission make an order reducing the load limit to 50 per cent of the maximum specified by law. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

ORDER REDUCING MAXIMUM LOAD LIMIT ON TAMPICO-LEWISVILLE SECONDARY HIGHWAY

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

TAMPICO-LEWISVILLE SECONDARY HIGHWAY

AND WHEREAS, the said above-named state highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway

OCT 22 1937

Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced:

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order;

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to wit:

TAMPICO-LEWISVILLE SECONDARY HIGHWAY from its junction with the Pacific Highway West, north of Corvallis to the Benton-Polk County Line, in Benton County

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the

provisions of Chapter 360 of the laws of Oregon for 1951, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Benton County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Commission by unanimous vote approved the Engineer's request for an additional authorization of \$13,500 to complete the work on the city street inventory of the State-wide Planning Survey. The Engineer explained that the original authorization for this work was found to be insufficient, due partly to the fact that it was necessary to secure data that was not anticipated when the project was first discussed, and also to the fact that it was not possible to foresee the many complications that would arise from the survey of street intersections, which information has been requested by the Bureau of Public Roads.

Reconsideration was given by the Commission to the request of Mr. G. T. Cochran, attorney of La Grande, for the construction of a footpath along the Wallows Lake Highway between La Grande and Island City for the benefit of school children and other pedestrians. The Engineer advised that Mr. Cochran's first request was simply for a permit authorizing the construction of a footpath along this highway, same to be financed with W.P.A. funds or funds to be secured from some other source than the state; but it now appears that Mr. Cochran not only wants the state to furnish the right of way but he also wants it to cooperate in the cost of the improvement, which, the Engineer estimated, would amount to a considerable sum. The Commission discussed the matter but deferred action thereon pending a report from the Engineer at the next meeting, on how much money the improvement would embrace.

The Commission also had under consideration a letter from the Cannon Beach Library and Woman's Club requesting repairs to the sidewalk along the Oregon Coast Highway through that town. The Engineer advised that this is not an incorporated town but there is approximately one mile of wooden sidewalk along the west side of the highway, which is the main street of the town, and that this sidewalk is badly in need of repair. He further stated that the original sidewalk was constructed by the county but was turned over to the state at the time that the State Highway Commission designated the road as a state highway. He requested instructions from the Commission as to what to do about the matter. The Attorney advised that, inasmuch as the Highway Commission has taken over complete jurisdiction of this highway

within the right of way limits, it likewise has taken over the responsibility of the sidewalk and is under obligation to keep it in a safe condition. He suggested that the walk should either be repaired or taken up entirely; otherwise, the Commission might become involved in a damage suit. After discussion, the Commission decided to repair the existing sidewalk and instructed the Engineer to proceed with the work. The Engineer was also instructed by the Commission to render a report on the cost to construct an entirely new sidewalk of a type that would be permanent.

The Commission had under discussion the compilation of the records, including minute entries and correspondence, pertaining to the construction of a revetment along the Wilson River, in Tillamook County, to prevent flood waters of this river from flowing into Dougherty Slough and causing damage to adjacent private property and to the highway, this discussion being a continuation of the discussion presented at the meeting on September 14, when members of Tillamook County Court and the Wilson River Drainage District appeared before the Commission relative thereto. After a review of the record the Commission decided unanimously that it is morally obligated to cooperate in the cost of this improvement, and thereupon authorized an expenditure of \$1,000 for such purpose, subject to the condition that Tillamook County Court will assume all responsibility for damage that may occur to persons or property by reason of the construction of such revetment. The Attorney was instructed to prepare a form of agreement with Tillamook County and the Drainage District covering the matter.

Mr. R. L. Stout, Portland, appeared before the Commission on behalf of the Pacific Power and Light Company and requested authority to construct and maintain an electric distribution line along the Pendleton-Cold Springs Highway across Section 3, Township 3 North, Range 32 East, W. M., and across Section 34, Township 4 North, Range 32 East., W. M. He asked that a location on the easterly side of the highway be specified for this pole line and that the company be authorized to construct two crossings over the highway, one about $\frac{1}{4}$ mile south of the township line and the other about $\frac{1}{4}$ mile north of the township line, in order to avoid constructing their pole line along the highway curves between these two points. He said that the company has already constructed its pole line, having done so inadvertently before securing permission from the Highway Commission, and that all they are asking now is the Commission's approval of the constructed line.

The Engineer advised that he did not take very kindly to this request inasmuch as the company did not secure a permit before constructing its pole line; however, he would recommend approval of the request if the power company will provide an easement for telephone pole line construction between the two crossings if and when a telephone company desires to construct a telephone line along this section, so as to avoid the necessity for the telephone company's wires to cross beneath the wires of the power company.

Chairman Cabell stated that the Highway Commission demands that pole line companies comply with the rules and regulations of the Commission with respect to the construction of their facilities on state highway rights of way, including the rules governing crossings and the requirement that a

permit be secured before construction is commenced. He further stated that, inasmuch as the power company has already constructed its pole line along this highway in accordance with plans that it is now asking the Commission to approve, thus making it impossible for a telephone company to construct its facilities along the highway without interfering with the power company, the Pacific Power and Light Company should agree to provide a location off the highway right of way for the poles and facilities of the telephone company between the two points of crossing of the power wires over the highway. Mr. Stout indicated his company's acceptance of the condition and said the company would make such arrangement. The Commission thereupon authorized the granting of the permit to the Pacific Power and Light Company, subject to such condition.

Mr. Claude H. Giles, attorney, Marshfield, was present on behalf of property owners, residents, and logging operators residing and/or working on North Coos River, Coos County, who desire 24-hour-day ferry service on the Enegren Ferry, which operates across the Coos River on the Coos River Secondary State Highway. He said that a number of logging camps have opened up in this district during the last few years, employees of which must cross the Coos River about 5:00 o'clock in the morning in order to reach the logging camps on time, which they cannot do unless they pay for ferry service out of their own pockets, as the free ferry does not commence operating until 7:00 o'clock in the morning, or cross in boats, or, as some of the men do, on saw logs, which is very dangerous. He asked the Commission to authorize 20-hour-day service at least, if it could not comply with the 24-hour-day service requested, in order to eliminate the hazard and provide greater convenience for the people working in this district. He presented a brief in support of his oral arguments; also a letter from the Marshfield Chamber of Commerce requesting the extra service; and petitions signed by 701 Coos County residents who are obliged to use this ferry.

The Engineer advised that the present free ferry operates 16 hours a day, from 7:00 o'clock a. m. until 11:00 o'clock p. m., for which service the Commission is paying \$472.06 a month, or approximately 97½¢ an hour; also, that the owner of the ferry has the privilege of operating longer hours if he so desires, but must depend upon receiving his compensation for such extra service from the persons using the ferry outside of the regular hours. He further stated that the present ferry operator, Mr. Julius Gunnell, has been contacted relative to providing 24-hour service and asserted his unwillingness to do so unless he receives an additional \$472.06 a month for the same. He gave as his thought that this extra expense is not justified at this time.

After discussion of this matter, Chairman Cabell stated that, on account of shortage of highway funds, the Highway Commission is reluctant to take on any additional obligation; however, the matter will be given due consideration.

A delegation from Benton County, consisting of County Commissioners W. H. Malone and T. A. Logsdon; former County Judge Victor P. Moses; W. F. Groves, Secretary of the West Side Highway Association; and C. C. Cochran,

President of the Corvallis Chamber of Commerce, was present and urged the Commission to designate and construct as a secondary state highway a 5-mile extension of the Territorial Secondary Highway from the Lane-Douglas County line southerly to a connection with the Pacific Highway at Anlauf, in Douglas County. They pointed out that this is the only uncompleted section of the Territorial Highway and alleged that its construction will provide an excellent optional route between Southern Oregon points and the Willamette Valley. Mr. Malone presented a letter signed by the Benton County Court and the West Side Highway Association recommending this project, and a letter from County Judge George K. Quine, Douglas County, endorsing the project on behalf of the Douglas County Court.

Chairman Cabell advised that the Highway Commission is experiencing a shortage of funds and is endeavoring to curtail expenses as much as possible in order to have money available to match Federal Aid Funds, so it is necessary to postpone some of the purely state projects, in view of which it does not appear possible to give the delegation any encouragement at this time. He added that the Commission realizes the facts concerning this road and will be glad to consider it for improvement when funds become available but present indications are that the project cannot be undertaken during the 1938 season.

A delegation composed of citizens from Washington County, Tillamook County and Multnomah County, and the city of Portland, was present and conferred with the Commission relative to the completion of the Wilson River Highway. County Judge Donald T. Templeton, of Washington County, headed the group, which included the following: County Commissioner H. D. Kerkman of Washington County; County Judge H. H. Rosenberg and County Commissioners E. H. Lindsey and E. G. Anderson of Tillamook County; Frank Shull, Chairman, and Commissioners C. A. Bigelow and Erwin A. Taft, representing the Board of County Commissioners of Multnomah County; L. G. Apperson, City Engineer of Portland; G. H. Huthman, J. L. Peacock, L. M. Lepper, W. W. Tyler, and Norman Todd, all of Portland; Loyal M. Graham, J. A. Thornburgh, F. D. Gardner, and Hugh McGilvra, all of Forest Grove; E. A. Griffith and F. Briethauer, of Hillsboro; and John Aschim, Oscar Effenberger, Walter Nichols, and Clarence M. Coe, all of Tillamook.

Judge Templeton advised that the purpose of their appearance before the Commission is to ask the state to contribute funds to insure the continuance of construction work on the Wilson River Highway. He advised that, unless the state assists in this project, it will be necessary to close down the work because of the new rules of the W.P.A. which limit the things for which W.P.A. money may be expended. He pointed out that money heretofore contributed by the city of Portland for this work came from a special bond issue; that all of such money has been expended, and it would be illegal for the city to appropriate additional funds through its budget for work on a highway outside the city limits. He also said that the Washington County end of the work is practically completed and that the work remaining is nearly all in Tillamook County. Washington County, he said, feels that it has gone as far as it can in contributing funds to the project; in fact, is not financially able to continue putting up the sum of \$25,000 per year, as in

the past, and, under the circumstances, the persons interested in this road feel that they are compelled to appeal to the State Highway Commission to supply funds that are necessary to keep the work going. He read a letter, dated October 18, 1937, directed to the Oregon State Highway Commission and signed by County Judge H. H. Rosenberg of Tillamook County; County Judge Donald T. Templeton of Washington County; Frank Shull, Chairman, Multnomah Board of County Commissioners; and Ormond R. Bean, Commissioner of Public Works, Portland, urging the Highway Commission to authorize an expenditure to pay the cost of repairs and supplies necessary to maintain equipment that is now being operated in the construction of this road, which was estimated at \$25,000 annually, and to assume the payment of rental and the cost of miscellaneous supplies that will be required the next year, also estimated at \$25,000, such contributions to be in addition to those now being made by the Highway Commission; also, in which the Commission was asked to award a contract immediately for the surfacing of this road from the end of the present surfaced section, at Jordan Creek, to McNamar's Camp, a distance of approximately 10 miles, and to award additional contracts for surfacing and the construction of necessary small bridges in Washington County, from Glenwood westerly to the end of the graded section, a distance of approximately 4 miles. The letter also mentioned that the counties would be willing to let the Highway Commission use the county-owned equipment that is now being used on the job. Judge Templeton then called upon other members of the delegation for remarks.

Judge Rosenberg confirmed the statements made by Judge Templeton. He added that the three counties, together with the city of Portland, contributed a total of \$100,000 at the start of this work, and last year contributed an additional \$50,000, which is about as far as they can go because of shortage of funds for such purpose. He gave as his thought that the three counties had been more than generous in their contributions and probably have contributed more to this work than other counties throughout the state have contributed to similar work in their respective counties, which should be justification for additional expenditures by the state on the Wilson River road. He gave as his understanding that the project from Jordan Creek to the Washington County line will cost a little over \$100,000 and advised that the three counties are willing to contribute the sum of \$50,000 toward this expense, represented by rental of equipment. Judge Rosenberg also made an appeal from the standpoint of preservation of scenery on this section. He advised that the Weyerhaeuser Timber Company has offered to deed, either to the state or to Tillamook County, a strip of timber land about one-half mile wide on each side of the highway for park purposes across its holdings. He visualized, if the offer is accepted, an extremely fine park and recreational area adjacent to this highway throughout its entire length.

Mr. Shull declared that Multnomah County has reached the limit of its contribution to this project. He explained that Multnomah County joined in this work two years ago as an emergency relief proposition and for the same reason continued to support the project in 1937, but the county's finances at this time are such that it cannot contribute further. He expressed confidence in Mr. Apperson, City Engineer of Portland, under whose direction the work was carried on.

Mr. Apperson stated that the city of Portland is not in a position to contribute any more funds for this work. He declared that the paramount issue at the present time is to make provision for the repair of equipment, inasmuch as it is practically impossible to secure W.P.A. funds for such purpose; in fact, on account of the procedure that now has to be followed in securing such funds, the equipment would be tied up practically half of the time waiting for authority from Washington, D. C. He asserted that the main purpose of the appearance of the delegation before the Highway Commission today is to urge the Commission to authorize equipment repairs at state expense, which would make it possible for the construction work to proceed.

Others speaking in behalf of this project were Mr. L. M. Lepper and W. W. Tyler, representing the East Side Commercial Club; Erwin A. Taft and C. A. Bigelow; E. A. Griffith, representing the Hillsboro Chamber of Commerce; Walter Nichols, representing the North End Tillamook County Chamber of Commerce; John Thornburgh and Loyal M. Graham, representing the Forest Grove Chamber of Commerce; and Clarence M. Coe, representing the Tillamook Chamber of Commerce.

Judge Templeton concluded the presentation by urging the early completion of both the Wilson River Highway and the Wolf Creek Highway.

Chairman Cabell advised that the Commission has not yet prepared its 1938 budget, but present indications are that the Commission will not be able to increase its allocation to the Wilson River Highway although the matter will be given full consideration at the time the budget is discussed. He added that this will be done in the near future and the delegation will be advised of the action taken.

The following persons constituted a delegation which appeared before the Highway Commission in regard to right of way for the proposed highway up the Columbia River, between Troutdale and Multnomah Falls, and particularly concerning the right of way in the immediate vicinity of Multnomah Falls: Frank S. Grant, City Attorney, Portland; R. E. Riley, Portland City Commissioner; John F. Logan, attorney, Portland, representing the interests of former State Highway Commissioner Simon Benson; and Sam Murray, representing the Union Pacific Company.

Mr. Logan read a letter from Mr. Benson in which he advised that he would have no objection to the waiver of his reversionary rights on the property involved.

The matter was discussed at some length but definite action in regard thereto was deferred pending a conference with the Oregon-Washington Railroad and Navigation Company in regard to right of way involved, particularly the portion that Mr. Benson donated to the city of Portland for park purposes, known as Benson Park. Mr. Murray said that before the railroad company would consent to releasing any of its land that is needed for highway right of way, the company would have to have full and complete information with respect to all of the right of way that is needed for this improvement.

Mr. Riley and Mr. Grant stated their willingness to wait for a decision on the right of way matter until the railroad company has had an opportunity to review the entire right of way situation. The Attorney was authorized to get a quitclaim deed from Mr. Benson, in favor of the city, and also a quitclaim deed from the railroad company, in favor of the city, after which the city will deed to the state, but the deed from the railroad company cannot be obtained until the railroad company and the Highway Commission have reached an agreement with respect to other rights of way. Further discussion on this matter was deferred pending the perfection of the agreement with the railroad company.

The Commission discussed with the city officials acquisition of parts or all of Lots B, 1, 2 and 3 of Block 98, and Lots 3, 4, 5 and 6 of Block 99, Irvington Park Addition to the City of Portland, which property is needed for right of way for the North Lombard Street Extension (N.E. Portland Secondary Highway No. 123.) The Assistant Attorney advised the Commission that there is a question whether or not this property is needed as a site on which to store highway maintenance equipment and that he has asked advice from the Division Engineer in regard thereto. In view of this report, the Commission deferred a decision until such information is received.

County Judge David F. Graham, Malheur County, was present. He asked for the improvement of the Central Oregon Highway between Harper and Juntura and for the improvement of the John Day Highway between Jamieson and Brogan. He also asked the Commission to investigate a new route for the Old Oregon Trail across Malheur County, extending from Ontario to a point near the Baker County line, which, he said, would reduce by several miles the distance between these points. He also asked for the improvement of the road known as Graham Boulevard, being a secondary state highway extending westerly from the town of Vale, and that an investigation be made to determine the possibility of a bypass in Ontario. Judge Graham presented a letter requesting the above improvements and setting forth arguments in support of the same. He was informed by the Engineer that he could not recommend to the Commission the proposed shortcut route for the Old Oregon Trail north of Ontario. He was also informed that the Highway Commission is not in a position to make any definite statements regarding the projects mentioned at this time but will keep them in mind in the formulation of future highway programs.

In this connection there was presented to the Commission a letter from J. L. Taylor, Manager of the Vale Chamber of Commerce, requesting the following: (1) Completion of the Central Oregon Highway between Vale and Bend to permanent, all-weather standards; (2) Completion to modern standards of that portion of the John Day Highway between Lancaster and Brogan; and (3) A substantial and orderly schedule of betterment on secondary roads in Malheur County. There was also presented a petition signed by 123 residents along the Lancaster-Brogan Section of the John Day Highway requesting the early and substantial betterment of that section of this road. The Commission ordered the communications filed for future consideration.

At 4:00 o'clock p. m. Chairman Cabell announced the following awards of contracts, sale of buildings, and sale of old tires and tubes, bids for which were received at the morning session:

OCT 22 1937

"Furnish 9,000 cu. yds. of crushed rock in stock piles for the Middle Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County. The low bid received for this project is that of E. H. Itschner, Molalla, at \$15,050.00. The next low bid is that of Smith & Company, Goldendale, Washington, at \$15,550.00. There were twelve higher bidders. The Commission has awarded this contract to the low bidder, E. H. Itschner, at his bid of \$15,050.00.

"North Powder-Muddy Creek Section of the Old Oregon Trail, in Baker County. 5.69 miles grading, surfacing and penetration type bituminous macadam; also furnish 3,000 cu. yds. crushed rock in stock piles. The low bid submitted for this project was that of Roy L. Houck, Salem, at \$132,185.00. The next low bid was that of Warren Northwest, Inc., Portland, at \$147,264.50. There were ten higher bidders. The Commission has awarded this job to Roy L. Houck, Salem, at his low bid of \$132,185.00.

"Furnish 6,000 cu. yds. crushed rock or gravel in stock piles on the Lincoln County Line-Alsea Mountain Section of the Alsea Highway, in Benton County. R. O. Dail & Warren Bros., Inc., Portland, submitted the low bid for this project at \$11,100.00. The next low bid was that of Saxton, Looney & Risley, Portland, at \$11,340.00. There were two higher bidders. The Commission awards this job to R. O. Dail & Warren Bros., Inc., the low bidders, at their bid of \$11,100.00.

"Furnish 6,200 cu. yds. crushed rock in stock piles on the Wasco County Line-Madras Section of The Dalles-California Highway, in Jefferson County. The low bid received was that of H. L. Rice, Portland, at \$8,742.00. The next low bid was that of A. S. Wallace, Roseburg, at \$9,672.00. There were 14 higher bidders. The Commission awards this contract to H. L. Rice at his low bid of \$8,742.00.

"Furnish 11,500 cu. yds. crushed rock in stock pile for the Eddyville Rock Production Project on the Corvallis-Newport and Eddyville-Blodgett Highways, in Lincoln County. The low bidder is Roy L. Houck, Salem, at \$17,480.00. The next low bidder is O. C. Yocom, Portland, at \$18,850.00. There are ten higher bidders. The Commission has awarded this contract to the low bidder, Roy L. Houck, at his bid of \$17,480.00.

"Hebo Rock Production Project on the Oregon Coast and McMinnville-Tillamook Highways, in Tillamook County. The Commission received only two bids for this project, the low one being that of Saxton, Looney & Risley, Portland, at \$14,180.00. The other bid was that of Dolan Construction Company, Tillamook, at \$15,400.00. The Commission has awarded this project to Saxton, Looney & Risley Portland, at their low bid of \$14,180.00.

"Furnish 5,100 cu. yds. crushed rock in stock piles for the Wallowa-Enterprise Section of the Wallowa Lake Highway, in Wallowa

County. The low bidder on this job was O. C. Yocom, Portland, at \$8,885.00. The next low bidder was Rogers Construction Company, Dayton, Washington, at \$9,070.00. There are five higher bidders. The Commission has awarded this contract to O. C. Yocom at his bid of \$8,885.00.

"The Dalles Roadside Improvement Project on the Columbia River Highway, in Wasco County. Van Cleave & Van Cleave, Hoever, Oregon, submitted the low bid on this project, in the amount of \$5,375.00. The next low bidders were J.A. Terteling & Sons, Boise, Idaho, with their bid of \$7,750.00. There are three higher bidders. The Commission awards this contract to the low bidders, Van Cleave & Van Cleave, at their bid of \$5,375.00.

"Sale of buildings in Oregon City. The Commission received two offers for the purchase of group "A", being those of E. Dodge, Oregon City, at \$75.00, and the Sullivan Wrecking Company, Portland, at \$60.75. Only one offer was received for group "B" buildings, being that of the Sullivan Wrecking Company, Portland, at \$167.69. The Commission has rejected all of these offers.

"Sale of residence buildings at Marshfield. The Commission received only one offer for the purchase of these buildings, being that of Asbjorn Moen, Bunker Hill, at \$70.00 for Building "A". The Commission considers Mr. Moen's offer satisfactory and has sold Building "A" to him at his bid price.

"Sale of factory buildings in Portland. The Commission received three offers for the purchase of these buildings, the high one being that of McCullough & Sons, Portland, at \$380.00, the others being those of the O. K. & Rose City Wrecking Company at \$151.00 and of the Sullivan Wrecking Company at \$102.98. The Commission has sold the buildings to the high bidder, McCullough & Sons, Portland, at their offer of \$380.00.

"Sale of used tires and tubes. The Commission received two bids for the purchase of Lot No. 1 located at Salem, being those of Cluster's Auto Wreckers, Eugene, at \$106.00, and the City Tire Company, Portland, at \$85.00. The Commission has accepted the high bid submitted by Cluster's Auto Wreckers and has sold the material to them at their bid of \$106.00. The Commission received only one bid for the purchase of Lot No. 2 at La Grande, being that of the City Tire Company, Portland, at \$45.00. The Commission considers this bid unsatisfactory and has rejected it."

Mrs. Virginia A. Hickey, Brightwood, Oregon, came before the Commission and asked reconsideration of her claim against the Commission arising out of the reconstruction of the Mt. Hood Highway in front of her premises at Brightwood. She asked particularly that some provision be made so that she would have access to her property from the highway, which facility, she alleged, she does not enjoy because of the removal of material from the front

of her property by reason of highway construction. She intimated that she was given to understand at one time that the Highway Commission would construct a roadway for her if she would let the state have some more of her land for highway right of way.

Chairman Cabell advised that the offer of settlement made to Mrs. Hickey some time ago by the Highway Commission was considered final and did not include the building of a roadway. He further stated that the Highway Commission discussed this matter on the previous evening and arrived at the conclusion that the previous offer of \$175 cash settlement is fair and is all that the Commission can pay, and if Mrs. Hickey is not satisfied with such settlement, then, of course, she has the alternative of securing the services of a lawyer and going to court about the matter.

Mrs. Hickey then inquired whether or not the Highway Commission would object to her building a road from the highway up to her property. The Engineer stated that he would offer no objections provided that when the road is completed the highway facilities will not be impaired by the filling up of the highway drainage ditches and the ravelling of slopes, etc. He said that he would have the highway right of way line staked out for Mrs. Hickey's guidance just as soon as she definitely decides where she wants her road. He also said that he would have the Division Engineer contact Mrs. Hickey during the following week.

Mr. Joseph Terresi, and his attorney, Mr. Smith, came before the Commission in regard to Mr. Terresi's claim for damages arising out of the construction of the East Portland-Oregon City Highway in East Portland. Mr. Smith was spokesman. He said that Mr. Terresi's property lies adjacent to Union Avenue, between Stephens and Harrison Streets, and is situate between the Peters and Morrison properties, which were also damaged by the highway construction and for which the Highway Commission recompensed the owners. He gave as his thought that Mr. Terresi is as much entitled to compensation for damages to his property as the Peterses and Morrisons, and accordingly urged the Commission to reverse its decision previously rendered denying the claim.

After considerable discussion, during which the facts in the case were reviewed and Chairman Cabell explained the law which authorizes the Highway Commission to make settlements for damages in certain instances where property has been affected by a change in the grade line of a city street necessitated by state highway construction, the Commission confirmed its previous decision, it being apparent that the property in question is just as valuable now as it was before the highway was built, and that the highway project was contracted and under way before the law authorizing the Highway Commission to pay damages in such cases was enacted. Chairman Cabell pointed out that, while the law authorizes the Commission to pay damages in cases of this kind, it is not retroactive, which can be considered fortunate from the state's standpoint because it relieves the state from liability for innumerable claims that might arise out of projects completed long ago. He added that, were it not for the non-retroactive feature of the law, highway construction work would be greatly affected; in fact, the Highway Commission

would not be in a position to carry on a definite highway construction program because of uncertainty of highway funds with which to finance the projects.

The Attorney requested instructions in regard to acquiring the balance of the right of way needed for the new highway along the waterfront in Oregon City. He was authorized and instructed by the Commission to proceed with the taking of options for such right of way so that no delays will be encountered from this standpoint when the project is ready to advertise for bids.

The Engineer presented a letter dated October 20, 1937, from the Landscape Engineer, recommending that the State Highway Commission make formal application to the Works Progress Administration for W.P.A. blanket project proposals covering approximately twenty-five counties throughout the state in order to expedite W.P.A. projects after they are approved for construction. He explained that the granting of the blanket proposal by the Works Progress Administration in Washington, D. C., will in no way obligate the State Highway Commission to undertake the projects listed therein and will not obligate the State Highway Commission to spend any money in connection with them unless it so desires, but it will expedite the undertaking of individual projects later on when the Commission is ready to proceed with them, by requiring, at that time, approval only by the Board of Review in Oregon. The Engineer gave as his thought that it would be advisable for the Commission to file an application for such blanket project proposal as outlined in the Landscape Engineer's letter and he so recommended. After discussion, the Commission approved the recommendation by unanimous vote and authorized the Engineer to proceed in accordance therewith.

The Commission discussed the situation presented by the District Attorney of Coos County in his letter to the Highway Department with respect to prosecutions for the violation of the law by log haulers with respect to overloading. The District Attorney's letter disclosed that juries in Coos County are friendly to log haulers and the logging industry to such an extent that it is almost impossible to get convictions for violations of the law by log haulers, notwithstanding the fact that the evidence of the State Police may be very definite and conclusive with respect to the violation charged.

The Commission, after discussion, concluded that when a log hauler is arrested by the State Police charged with overloading or other violation, he will be given an opportunity to voluntarily surrender his P.U.C. plates for the period heretofore fixed by the Commission, and, should he refuse to turn over his plates, the Commission will then recommend to the Public Utilities Commissioner that his special carrier permit be revoked.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has ordered a number of surveys since the last meeting of the Commission. He presented a list of such surveys and asked the Commission to confirm the action. After due consideration, Commissioner Tou Velle moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways

OCT 22 1937

of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Right of Way - - 20-1910 - Glenada-Douglas County Line, Oregon Coast Highway,
Lane County. 2nd authorization \$150.00
Total to date \$522.00.

Location - - - 150-2818 - Hermiston-Columbia River Highway, Umatilla County,
6.7 miles. 1st authorization \$700.00
Total \$700.00.

Location - - - 226-2850 - Lombard-Sandy, N.E. Portland Secondary Highway,
Multnomah County. 4th authorization \$500.00
Total to date \$4,500.00.

Location - - - 26-2802 - Troutdale-Cascade Locks, Columbia River Highway,
38 mi. Multnomah Co. 4th authorization \$2000.00
Total to date \$58,000.00.

Signal Device - 18-1821 - Olene Grade Crossing, Klamath Falls-Lakeview Hwy.,
Klamath County. 1st authorization \$100.00
Total \$100.00.

Quarry Stock - 14-2811 - Viento-Memaloose, Columbia River Highway,
File Hood River County. 1st authorization \$300.00
Total \$300.00.

Right of Way - 20-1009 - Lincoln County Line-Florence, Oregon Coast Highway,
Lane County. 2d authorization \$700.00
Total to date \$1,558.00.

Location - - - 15-2815 - Sardine Creek, Pacific Highway, Jackson County,
2nd authorization \$100.00
Total to date \$250.00.

Quarry - - - - 29-2821 - Hebo-Dolph Section, McMinnville-Tillamook Highway,
Tillamook County. 1st authorization \$200.00
Total \$200.00.

Location - - - 6-2809 - North Bend-Marshfield, Oregon Coast Highway,
Coos County, 3 miles. 3rd authorization \$250.00
Total to date \$4,750.00.

Location - - - 7-2803 - Mill Creek-Marks Creek, Ochoco Highway.
Crook County, 4.7 mi. 5th authorization \$600.00
Total to date \$6,650.00.

Location - - - 53-2812 - Dufur-Maupin and Wapinitia-Maupin, The Dalles-
California & Wapinitia Highways.
Wasco County, 36 mi. 1st authorization \$300.00
Total to date \$300.00.

Vicinity- - - - 20-2824 - Hill Creek Bridge, Pacific Highway,
Lane County, 0.5 mi. 1st authorization \$150.00
Total \$150.00.

Location- - - - 23-2811 - Nyssa Undercrossing, Old Oregon Trail,
Harney County, 2.0 mi. 1st authorization \$1200.00
Total \$1,200.00.

Location- - - - 22-2801 - Sheeps Ridge East, Santiam Highway,
Linn County, 5.11 mi. 2nd authorization \$1000.00
Total to date \$1,300.00.

Revised - - - - 123-2812 - Owyhee River-Blue Mountain Pass, I.O.N. Highway,
Location Malheur County, 40.15 mi. 1st authorization \$2000.00
Total \$2000.00.

Location- - - - - Boardman-Stanfield, Old Oregon Trail,
Umatilla Co., 25.5 mi. 1st authorization \$10,200.00

The motion was duly seconded and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Engineer brought up for discussion the matter of conducting a location survey for a proposed revision of the Old Oregon Trail between Stanfield, in Umatilla County, and Boardman, in Morrow County. He said that the Commission has no plans for constructing this revision in the immediate future but he believed that it would be a good idea to have the location survey completed well in advance of construction so that no delays will be encountered on that account when the Commission is ready to proceed with construction. He requested authority to make such location survey this coming winter. The Commission approved the request by unanimous vote.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Hoffman Construction Company, Contract No. 1915, for the construction of the Milwaukie Avenue Undercrossing on the East Portland-Oregon City Highway, in Portland, requested an additional extension of time, from July 24 to August 28, 1937, in which to complete this project. They alleged that the extra time required to complete this job was needed to construct the hand rail on the northwest and southeast corners of the structure, which work could not be done until certain riprap work had been completed on the banks supporting the same, which riprap work was not contemplated in the original contract. The Engineer advised that the reason given by the contractor for failure to complete the job within the time specified is substantially correct. He recommended that the extension of time requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

McNutt Bros., Contract No. 1917, for grading the Wall Creek-Siskiyou Section of the Pacific Highway, in Jackson County, requested an extension of time from May 31 to August 18, 1937, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was occasioned by the fact that they were not permitted to burn slashings until December, 1936, and that during the months from January, 1937 to April, 1937 they were handicapped by an unusual fall of snow followed by heavy periodical rain, which made the handling of excavated material very difficult. The Engineer advised that the United States Forest officials would not permit McNutt Bros. to burn slashings until well along in the month of December, and as a result they were not able to do any of their grading work until spring of this year. He further advised that the contractor was required, in connection with this job, to remove a large quantity of slide materials on an adjoining section, which work was not contemplated in the original contract. He recommended, in view of the circumstances, that the extension requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Medford Concrete Construction Company, Contract No. 1945, for furnishing crushed material in stock pile for the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Lake and Harney Counties, requested an extension of time from May 31 to November 1, 1937, within which to complete this contract. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that, due to the failure of the contractor to complete this job within the specified time limit, it will not be possible for the ciling contractor to complete his contract this year, which will require additional maintenance during the coming winter, costing between \$1,000 and \$2,000. He recommended, in view of the circumstances, that the extension now requested by the Medford Concrete Construction Company be granted but that this contractor be charged for all engineering expense incurred by the state subsequent to the completion date specified in the contract. The Commission approved the recommendation by unanimous vote.

Jacobsen-Jensen Company, Contract No. 1955, for paving the Shady Point-Kelly Corner Section of the Pacific Highway, in Douglas County, requested an extension of time of 50 days, from August 31 to September 30, 1937, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to unfavorable weather conditions and other conditions beyond their control. The Engineer advised that the contractor actually completed this project on September 10, requiring an extension of time of only 10 days rather than 50 days as he has requested; also, that the main reason that the contractor failed to complete this project within the specified time was the fact that their gravel plant was continuously broken down and they were unable to obtain the necessary rock. He

further advised that the contractor did everything possible to correct this situation and complete the project within the specified time limit but was unable to do so. He also stated that the traveling public has not been greatly inconvenienced by the delay because it has had the use of a paved detour at all times during construction; furthermore, the engineering costs of the project have not been greatly increased by the delay. He recommended, in view of the circumstances, that the Commission grant an extension of time of 10 days, up to September 10, 1937, rather than 30 days, without penalty, and in support thereof he submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Harold Blake, Contract No. 1970, for furnishing crushed materials in stock pile for the Willamina Rock Production Project on state highways in Polk and Yamhill Counties, requested an extension of time from July 31 to October 31, 1937, in which to complete this job. He alleged that his failure to complete the project within the time limit specified was due to the fact that he was required to furnish additional materials that were not contemplated in the original contract. The Engineer advised that the contractor actually furnished all of the materials called for in the contract by September 9, which is really the date of completion of the contract, but he was requested to furnish additional materials, which it is anticipated will be delivered by October 31. He recommended that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

R. I. Stuart & Sons, Contract No. 1974, for furnishing crushed rock in stock piles for the Beatty-Bly Section of the Klamath Falls-Lakeview Highway, in Klamath County, requested an extension of time of one month, from July 31 to August 31, 1937, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that he knew of no reason why the contractor could not complete the job within the time limit specified in the contract. He recommended that the extension requested be granted subject to the condition that the contractor be required to reimburse the state for engineering and inspection costs incurred subsequent to July 31, 1937. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1906, 1914, 1918, 1933, 1937, 1944, 1947, 1953, 1965, 1974, 1981, and 1982, for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

OCT 22 1937

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1906, with Berke Bros., Inc., for grading and bridge construction on the Tunnel Section of the Old Oregon Trail, in Baker County. Completed June 7, 1937.

Contract No. 1914, with Roy L. Houck, for grading, surfacing, and rock production on the Crawfordsville-Holley Section of the Halsey-Sweet Home Secondary Highway, in Linn County. Completed September 9, 1937.

Contract No. 1918, with Schmeer, Williams and Gentemann, for producing crushed rock for the Haines-Baker Section of the Old Oregon Trail Highway, in Baker County. Completed September 21, 1937.

Contract No. 1933, with Dolan Construction Company, for grading, surfacing, and construction of a bridge on the North Fork Nehalem River Section of the Oregon Coast Highway, in Clatsop County. Completed September 21, 1937.

Contract No. 1937, with A. S. Wallace, for producing crushed rock for the Eagle Point-Crater Lake Section of the Crater Lake Highway, in Jackson County. Completed August 28, 1937.

Contract No. 1944, with E. F. and W. F. Philpott, for the construction of a bridge over Necarney Creek on the Oregon Coast Highway, in Tillamook County. Completed September 30, 1937.

Contract No. 1947, with Mountain States Construction Company, for grading and paving the Rex Hill-Newberg Section of the Pacific Highway West, in Yamhill County. Completed October 14, 1937.

Contract No. 1953, with Jacobsen-Jensen Company, for grading and paving the Shady Point-Kelly Corner Section of the Pacific Highway, in Douglas County. Completed September 9, 1937.

Contract No. 1965, with H. L. Rice, for producing crushed rock for the Memaloose Park-Dillon Section and the John Day River-Blalock Section of the Columbia River Highway, in Gilliam, Sherman and Wasco Counties. Completed September 23, 1937.

Contract No. 1974, with R. I. Stuart & Sons, for producing crushed rock for the Beatty-Bly Section of the Klamath Falls-Lakeview Highway, in Klamath County. Completed August 27, 1937.

Contract No. 1981, with Averill & Corbin, for the construction of the west approach to the bridge over the Willamette River on the Salem-Dallas Highway, at Salem, in Polk County. Completed October 12, 1937.

Contract No. 1982, with Mountain States Construction Company, for grading and paving the Middleton-Votaw Section of the Pacific Highway West, in Washington County. Completed October 14, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under consideration a claim made by Mr. Walter C. Miller, McMinnville, for damage to hops which he alleges were rendered unmarketable because of dust that was deposited on them as a result of state highway construction adjacent to his hop field. Mr. Miller states that he was forced to leave at least three thousand pounds of hops on the vines, representing a loss to him, at the present market value, of approximately \$500, and asks compensation from the State Highway Commission in that amount. The Commission refused to assume responsibility for this damage and thereupon denied the claim.

The Commission considered and signed the following agreements, et cetera:

Agreement with James Moore providing for relinquishment of a homestead filing on the Southeast quarter of the Northwest quarter of Section 7, Township 11 South, Range 26 East, W. M., Grant County, Oregon, and the acquisition of the same by the State Highway Commission;

Agreement with Lester J. Peters and Martin A. Peters disposing of their claim for damages arising out of the construction of the Union Avenue Undercrossing project on the East Portland-Oregon City Highway, in East Portland;

Supplemental agreement with Julius Gunnell extending his contract with the Commission for furnishing ferry service across Coos River at Enegren Ferry, in Coos County;

Agreement with the City of Portland covering the subject of maintenance of streets in the city of Portland over which state highway traffic is routed;

Agreement with Mr. and Mrs Ernest F. Koble disposing of claim arising out of construction of Pacific Highway (new route) across the Koble property, in Jackson County;

OCT 22 1937

Bargain and sale deed conveying unto School District No. 12, Yamhill County, 1.08 acres of land located in the Charles Johnson D.L.C. No. 62, in Section 10, Township 5 South, Range 4 West, W.M., Yamhill County, Oregon, being a part of the land acquired by the state from Sophia R. Houch et al for right of way;

Voucher covering payment to James T. Goodman Insurance Agency in the sum of \$3,313.15, representing premium for the first year on insurance policy No. 1528 issued by the underwriters of Lloyds, London, in connection with the Columbia Gorge snow-removal agreement between the State Highway Commission and the Union Pacific Railroad Company, the balance of the premium to be paid later, making a total of \$6,490.00;

Agreement with the United States Soil Conservation Service renewing a previous agreement relative to demonstrations of erosion control along highways.

The Commission had under consideration the setting of a date for its next regular meeting to receive bids for highway construction projects. Such meeting was scheduled for Tuesday, November 30, in Portland. The Secretary was instructed to arrange to hold this meeting in the Auditorium of the Public Service Building, Portland, as usual.

The Commission also set Wednesday, November 17, as the date for a special meeting to consider the adoption of a construction program for the 1938 season and to dispose of accumulated routine matters. The Secretary was instructed to arrange to hold this meeting in the Benson Hotel, Portland.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

F. L. Soule
Commissioner

Portland, Oregon, November 17, 1937

The State Highway Commission met in the Tyrolean Room of the Benson Hotel at 9:00 o'clock a. m. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The County Court of Polk County consisting of County Judge Herman Van Well and County Commissioners Fred Gibson and Harrison H. Brant came before the Commission in regard to Polk County's indebtedness to the state for state highway construction, which indebtedness amounts to \$106,278.85. Judge Van Well stated that the county court recognizes the state's claim and does not want to repudiate it but on the other hand desires to settle the account if satisfactory arrangements can be made with the Commission for disposing of it on a time basis. He pointed out that the county's budget contains an item of only \$90,000 for road purposes so they are not in a position to go very far in taking up this account at an early date.

The State Highway Engineer suggested that, if the county could see its way clear to pay this account, the Highway Commission might be willing to spend the money for construction of secondary highways in Polk County as the county court might desire. This suggestion appeared satisfactory to the county court and Judge Van Well proposed that consideration be given to a five-year program for such funds. He suggested, for improvement in such program, the Ballston Road and what is known as the Gibson Road which extends westerly from the town of Lincoln toward McCoy. He particularly requested that the Gibson Road be improved in the Federal Aid Secondary Highway Program. Commissioner Gibson suggested that the Kings Valley Road might be improved in such program inasmuch as it is badly in need of improvement.

Chairman Cabell explained that it is the desire of the Commission to close the accounts against the counties so as to avoid public criticism. He inquired what the Commission could expect from the Polk County Court in this regard.

Judge Van Well stated that the county could not pay anything at the present time and they would have to increase the amount of their budget in order to take care of the indebtedness but they are limited to approximately \$10,000 on account of the six per cent tax limitation.

Chairman Cabell then suggested that the county might give the Commission an order on the Secretary of State to pay to the state a portion of Polk County's share of the gasoline tax and motor vehicle license fee fund as has been done by other counties. He indicated that the Commission might reduce the principal amount of the indebtedness and spend the proceeds on projects approved by the county court if the county would provide for the orderly

NOV 17 1937

payment of its account. The county court agreed to take this proposition under advisement and let the Commission know its decision as soon as possible.

The Commission's Attorney was instructed to prepare a statement of facts in regard to the county's indebtedness and to send a copy of the same to the county court for its information and study in the preparation of a proposition to be submitted to the Commission.

The Attorney reported on a controversy with the Sumpter Valley Railway Company involving an encroachment of the Sumpter Valley Secondary Highway on the railway right of way in Baker County. It appears that the Baker County Court originally acquired the right of way for the highway and entered into an agreement with the railway company covering the matter of the highway's encroachment upon the railway company's property, the road being a market road at that time. It also appears that rocks have been deposited on the railroad tracks and that the railroad officials allege that these rocks have been placed there as a result of operations of the highway department maintenance forces and that the railway company has been damaged to the extent of some \$2,500, and, unless the company is reimbursed in such sum and is protected from further damages of this kind, they will cancel the agreement for the right of way, alleging violation of the provisions thereof, which would react seriously on the state because the road is now on the secondary system and no other right of way for the same is available. After discussion the Commission referred this matter to the Engineer for immediate investigation and report.

The Engineer requested authority to acquire certain parcels of real property that are needed for various improvements throughout the state and submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request, and adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the

acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

In regard to right of way transaction No. 1832 with George W. Joseph, the Commission accepted Alternate "C" involving a cash payment of \$7,500 and the construction of fences by state forces at an estimated cost of \$302.25. This alternate involves the retention of grazing rights by Mr. Joseph for a period of 20 years with a right for the Commission to acquire such grazing rights at the rate of \$175 per annum for the unexpired portion of such period.

NOV 17 1937

With regard to the acquisition of the McGowan property, transaction No. 1836, the Commission decided to confine its purchase to land which is located outside of the beach area along the Columbia River, it being the thought of the Commission that such beach area is not desirable inasmuch as it lies over the ridge from the highway and for the further reason that the state owns other beach area in the same vicinity.

The County Court of Malheur County consisting of David F. Graham, County Judge, and Ora E. Clark and L. P. Peterson, County Commissioners, was present and inquired as to the plans of the Commission with respect to the Federal Aid Secondary Highway Program. Chairman Cabell explained that the program for the federal aid secondary highway funds cannot be arranged until the State-Wide Planning Survey, which is now under way, is completed because the Commission needs the information that is being gathered under such survey for the selection of projects. He asked the county court to which projects they desired preference given in the selection of Malheur County roads for such program. Commissioner Clark mentioned the county road between Vale and Adrian, known as Lytle Boulevard. Judge Graham stated that the road between Vale and Nyssa is one of the county's most important roads. Commissioner Peterson requested improvements on the Central Oregon and John Day Highways, particularly oiling work. Judge Graham also asked the Commission to investigate a proposed cutoff on the Old Oregon Trail between Ontario and Olds Ferry. He was informed by the Engineer that, in his estimation, if a cutoff at this location is considered at all, it should extend farther north than Olds Ferry so as to secure the benefits of the greatest reduction in mileage possible between Ontario and Huntington. Judge Graham agreed.

Judge Graham then brought up for discussion the matter of securing labor from CCC camps located in Malheur County for work on county roads. He said that there are five CCC camps in this county and, according to his understanding, it would be possible to secure the services of the men employed in these camps to do work on the county roads were it not for the fact that contractors object to such procedure because they allege it will interfere with the contracting business. He also said that it is a rule of the CCC officials that they will not let their men engage in any affair that will interfere with contractors' work. He asked the aid of the Commission in securing the waiver of this CCC ruling which, he said, means a lot to Malheur County because the county now has only \$10,000 of county money budgeted for road work and can use the services of the CCC men to good advantage. The Commission instructed the Engineer to investigate Judge Graham's allegations and ascertain the details.

The Secretary presented four deeds executed by the Clatsop County Court conveying unto the State of Oregon certain parcels of land, all of said parcels being located within Clatsop County and described as follows:

Parcel No. 4898 being 0.387 acre of land situate in the NE $\frac{1}{4}$ of Section 28, T. 6 N., R. 10 W., W.M.

Parcel No. 4906 being 7.52 acres of land situate in the NE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 31, T. 4 N., R. 10 W., W.M.

Parcel No. 4983 being 2.33 acres of land situate in Section 13, T. 8 N., R. 10 W., W.M.

Parcel No. 5019 being 4.46 acres of land situate in Government Lot 2 of Section 22 and in Government Lot 6 of Section 27, T. 4 N., R. 9 W., W.M.

It was explained that these properties are being conveyed unto the state without the payment of a monetary consideration but are conditioned upon being used exclusively for park and highway purposes, and are not to be sold to third parties; but, if alienated at all by the state, they are to revert to and become the property of Clatsop County. The Commission accepted the deeds with the reservations and instructed the Secretary to send an appropriate letter of thanks to the Clatsop County Court.

The Attorney reported on the status of acquisition of certain parcels of land owned by Multnomah County and situate adjacent to Barbur Boulevard. He said that five parcels of land, as follows, were being considered for purchase: part of Lot 9, Block 4, Alder Springs Addition, \$40.45; part of tract 18 Madison Villa, \$5.67; part of Lots 9 and 10 Werlock, \$476.61; tract lying between the highway and Boones Ferry Road at station 105, \$248.00; and tract lying between the highway and Boones Ferry Road at station 114, no charge. He advised that since inspection of the properties he has received a letter from Mr. Frank L. Shull, Chairman of the Board of County Commissioners advising that the county has received offers for some of the property and the Commissioners do not feel that they are justified in disposing of such parcels at the prices originally quoted the Highway Commission so they are now asking increased amounts for four of them, the first tract being now listed at \$50, the second at \$120, the third at \$2,000, and the fourth at \$1,000, which increases the total cost from \$770.73 to \$3,170. The Commission decided, after some discussion, to acquire parcels one, two and five at the prices quoted but to let the other two tracts remain in the possession of the county.

The Commission considered and re-referred to the Attorney for additional information the matter of acquiring property from Nina J. Belt for right of way for a revision of the Oregon Coast Highway at Fogarty Creek in Lincoln County.

The Commission had under consideration a letter from Mr. C. Dethman, Hood River, renewing his offer to sell to the Commission for park purposes a 50-acre tract of land situate adjacent to the Upper Columbia River Highway at Lindsey Creek. Mr. Dethman asks the sum of \$4,000 for his property but is willing to discount this figure \$800 in the event the Federal Government pays him such amount for a flowage easement over the land that will be flooded by reason of the Bonneville Dam construction. The Parks Superintendent, who was present, stated that the Dethman property has no value from the state park standpoint unless the state will also acquire several parcels of privately-owned property that are interspersed within the Dethman holdings and on which several buildings have been constructed. In view of this report the Commission decided to defer action on the matter pending the securing of options for the purchase of such other privately-owned property. The Parks Superintendent was instructed to secure such options at his convenience.

The Attorney brought up for discussion the controversy with Mr. George Stonefield of Yachats which pertains to property that Lane County acquired from Mr. Stonefield some years ago for right of way for the Oregon Coast Highway. Mr. Stonefield alleges that, when he deeded his property to the county, he purposely reserved for his own use as a building site a small area between the highway and the ocean, but it now seems that this area was included in the deed description which places him in an embarrassing position because he has sold the property to a third party who has constructed a residence building thereon so he now wants the state to reconvey this area to him so he can deed it to the parties that are building the house. The Attorney explained the situation in detail and inquired whether or not the Commission would care to waive its rights to this property in view of the circumstances. The State Parks Engineer stated that this property is of no value from the state park standpoint because the state does not own any other property between the highway and the ocean at this particular location. After discussion the Commission decided, if there are no legal barriers, to sell the building site back to Mr. Stonefield at a cost equal to the present reasonable cash market value of the property. The matter was referred to the Attorney to handle the details with Mr. Stonefield.

The Attorney reported on the progress that is being made to secure right of way from the Grand Rapids Oregon Timber Company for a road extending from the Wolf Creek Highway to Saddle Mountain State Park in Clatsop County. He read aloud a letter from the company stating that they demand an amount of \$13,692.50 for such right of way. The Commission considers this price too high and authorized the Attorney to condemn the right of way if the company will not sell its property at the rate of \$15 per acre which is the amount that the Commission is paying to the Crown Willamette Paper Company for right of way across its holdings.

In this connection the State Parks Engineer brought up the matter of securing a right of entry from the Grand Rapids Oregon Timber Company authorizing the use of its road pending completion of the right of way negotiations. He explained that the CCC forces need the use of this road constantly going to and from the park and up to the present time they have used it under oral permission from the company. He was fearful that the company would withdraw this authority if the Commission started condemnation proceedings to acquire the right of way. The Commission instructed the Attorney to contact the company relative thereto and secure a written agreement providing for right of entry on the road if possible.

The Commission had under consideration the offer of Robert B. Porter, Amity, to pay \$5 per year per acre for the use of certain state-owned property lying outside of the standard width highway right of way in Yamhill County. The Attorney advised that the Commission granted Mr. Porter this privilege last year at the same rate and he wants the lease renewed with the privilege of deferring payment of the rent until he harvests his crop next year. The Commission approved leasing the land to Mr. Porter provided he will pay the rental charge in advance and not otherwise.

The Commission had under consideration a request from Mr. J. E. Squier representing the S & S Shingle Mill, Sandy, Oregon, for the use of the

pond that was created by the excavation of a borrow pit adjacent to the railroad grade separation structure on the new Pacific Highway just north of Eugene, as a mill pond in connection with shingle mill operations which he proposes to conduct at this location. The Commission denied the request.

The Attorney presented a request from Mr. W. Saftenberg, Portland, for permission to purchase a portion of some state-owned property in Portland described as parts of Lots 4, 5 and 6 of Block 5 of the subdivision of Lot 2, Riverside Homestead Addition. He was instructed to inform Mr. Saftenberg that the Commission prefers not to sell this property at this time but, if the sale is contemplated in the future, such sale will be advertised and he will be given an opportunity to submit a bid along with others.

The Attorney also presented an offer from the E. L. Taylor Company, Oregon City, to purchase, for the sum of \$250, a certain building located on what is known as the Brady property in Oregon City which property was acquired by the Commission for right of way for the new highway at this place. He advised that this building was previously advertised for sale by the Commission but no satisfactory bid was received so the Commission authorized him to make a private sale if possible. The offer of the Taylor Company, he said, equals the amount that it was estimated the building should sell for and he recommended acceptance of the same. The Commission approved the recommendation by unanimous vote.

A letter was presented from Mr. Claude C. Inman, Tucson, Arizona, regarding some property that he owns at the town of Port Orford. Mr. Inman gave as his understanding that the Highway Commission contemplates revising the Oregon Coast Highway at this location and will probably need some of his property for right of way so, if the Commission is interested at this time, he would like to know because he has an offer from a certain mining company to purchase a portion of it but does not want to close the deal until he knows for certain that the state doesn't want the land. The Commission instructed the Attorney to ascertain how much Mr. Inman wants for his property.

The Commission had under consideration an offer from the City of Bandon to deed to the state for park purposes 26 acres of land overlooking the ocean at the west end of their town. The tract lies within the city limits and the consideration involved calls for the state to construct a road from the Oregon Coast Highway to this park. The Engineer estimated that it would cost about \$16,000 to construct a 30-foot roadbed with 20-foot oiled surface thereon. The Commission deferred action on this matter for the time being.

The Commission conferred with W. H. Lynch, District Engineer, Bureau of Public Roads, and James Frankland, Acting Regional Forester, in regard to programming forest highway funds that have accumulated as savings in the contracting of forest highway work. Mr. Lynch advised that they now have available in the forest highway contingent fund a sufficient amount to warrant an allocation of \$140,000 to some forest highway improvement. He suggested the grading of an additional 1.26 miles of the Columbia River Highway reconstruction project extending from the end of the project recently constructed to Cascade Locks, and the surfacing of this section and the section recently completed, totalling about 2.03 miles. He pointed out that the completion

of such a program will make usable the investments heretofore made on this road and will provide a highway constructed on modern standards from Bonneville to Cascade Locks. He also pointed out that this particular project is now included in the tentative program for construction next year but construction can be advanced if the Commission will join with them in recommending that the savings now available be allocated thereto. After discussion the Commission approved Mr. Lynch's suggestion by unanimous vote and thereupon signed a joint letter with him and Mr. Frankland directed to the Chief of the Forest Service and Chief of the Bureau of Public Roads recommending the same.

Mr. Lynch also suggested that a date should be set for a conference between the State Highway Commission, the Bureau of Public Roads and the United States Forest Service to arrange a program for the fiscal year 1939 forest highway funds. After discussion it was decided to hold such conference on Wednesday, December 1, 1937, in Portland. The Secretary was instructed to arrange for a room in the Benson Hotel in which to hold such meeting.

The Commission discussed the matter of paying the premium on insurance furnished for the protection of the O.W.R. & N. Railway Company in connection with operations of Contractor Earl L. McNutt for the construction of the Ruckel Slide Section of the Columbia River Highway in Hood River County. The Attorney advised that the railroad company demands insurance protection and to furnish the same would cost about \$500. He further advised that the State Highway Department had an understanding with the railroad company at one time that it would provide for such protection when the contract was awarded but for some reason this item was not included in the Bureau of Public Roads' contract and the government officials allege that the Government cannot now assume such expense so it appears necessary for the state to assume it if the insurance is to be provided. The Commission decided, in view of the fact that there was an understanding between officials of the railroad company and the highway department regarding the matter, to pay the premium with state funds and authorized the Engineer to honor an invoice for the same.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, all Commissioners being present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

The Engineer reported a request from a Mr. Kingsbury of Union, Oregon, for the reconstruction of his privately-owned pipe line on the Medical Springs Secondary Highway about six miles east of the town of Union. He said that Mr. Kingsbury alleges that the Commission is responsible for the repairs to the pipe line but is willing to forego same and to release the Highway Commission from such responsibility if the Commission will pay to him the sum of \$500 in lieu thereof. He further stated that the pipe line was installed by Mr. Kingsbury several years ago under authority from the Union County Court when the road was still a county market road and he questioned the obligation of the State Highway Department to maintain the same or to be responsible for it in any manner. He estimated that it would cost about \$1500 to make the repairs and requested instructions in regard thereto. In a discussion of this matter the question arose as to what rights Mr. Kingsbury has with respect to the maintenance of his pipe line on the highway. The Commission deferred its decision pending investigation and report by the Engineer in regard thereto.

NOV 17 1937

Reconsideration was given by the Commission to the matter of naming the Short Sand Beach Creek bridge on the Oregon Coast Highway in northern Tillamook County in honor of Mr. Samuel G. Reed, a prominent citizen of that county; and the naming of the state park located in this vicinity for Mr. Reed. The State Park Superintendent pointed out that the original park at this location now bears the name Short Sand Beach State Park and in his estimation the Commission is duty bound to retain such name on account of the manner in which it was acquired through the services of Mr. E. S. Collins, Portland. He gave as his thought that any additions to this park should bear the same name. The Secretary presented a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Historical Society, suggesting, if the Commission wants to honor Mr. Reed in some manner, that it dedicate the bridge to him rather than name it for him because it is common practice for people, when referring to a bridge, to call it by the name of the body of water that it spans and it would be confusing to refer to it by the name of some individual. The Commission concurred in the viewpoint of the Park Superintendent and approved the suggestion offered by Mr. McArthur to dedicate the bridge to Mr. Reed. The Secretary was instructed to notify the North Tillamook County Chamber of Commerce of the action taken and to state that the State Highway Department will install appropriate dedicatory plates on the bridge if the Chamber of Commerce will furnish them.

The Engineer reported on the matter of footpath construction along the Willowa Lake Highway between La Grande and Island City. He recalled that, when the city's attorney, Mr. G. T. Cochran, conferred with the Commission on August 11, 1937, he said that, if the Commission would designate a location on the highway for a three-foot sidewalk, he would see to it that the sidewalk was constructed at no cost to the state, possibly as a W.P.A. project sponsored by the city or the county; however, Mr. Cochran is now hopeful of securing financial assistance from the state in addition to the furnishing of right of way and engineering supervision and is depending upon the state to oil the walk after it has been constructed. Furthermore, he wants the State Highway Department to prepare plans as may be necessary for the securing of a W.P.A. project. He estimated that the plans could be prepared at a cost of about \$250. The Commission after discussion ordered that Mr. Cochran be informed that the State Highway Department is willing to prepare plans as may be necessary for securing a W.P.A. project covering the grading and surfacing of the footpath but cannot contribute any state funds to pay for construction work or any part thereof due to the fact that highway funds are at a low ebb and must be conserved in every way possible to meet debt obligations and to satisfy the government requirements with respect to the matching and securing of federal aid moneys.

The Commission had under consideration a petition signed by 128 patrons of School District No. 38, Benton County, requesting a footbridge on the Marys River Bridge on the Pacific Highway West, south of Corvallis, and a footpath along this highway from Corvallis to the southern boundary of the school district for the safety and benefit of school children and other pedestrians. A letter was also presented from the Corvallis Chamber of Commerce asking for this improvement. The Engineer advised that to construct the footbridge and the pathway between the schoolhouse and Corvallis would cost about \$1500, but,

if the improvement were extended to the southern boundary of the school district as requested, it would involve a considerably larger sum. The Commission deferred a decision in this matter pending a full report on the cost involved.

The Engineer reported the cost to oil the gravelled strips on each side of the pavement along the Pacific Highway West through the town of Monroe, Benton County, which improvement has been requested by the Monroe City Council. He estimated that such project would cost about \$750. He was instructed by the Commission to bear this project in mind for consideration in the preparation of the minor betterment budget for 1938.

The Commission considered reducing the maximum load limit on the McKenzie Highway between McKenzie Bridge and Springfield, it having been reported by the Engineer that the pavement on this section is showing evidence of failure due to concentrated heavy logging traffic. The Engineer recommended that the maximum load limit be reduced 50 per cent along this section. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

MCKENZIE HIGHWAY

AND WHEREAS, the said above-named state highway is in the judgment of the State Highway Commission being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road and the Commission having found upon due investigation that it will be for the best interest of the said state highway

that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

McKENZIE HIGHWAY from the McKenzie Bridge to the east city limits of Springfield, in Lane County

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Clerk of Lane County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

- - - - -

The Commission had under discussion matters pertaining to the revision of the Mountain States Power Company's water lines within the limits

NOV 17 1937

of the proposed Albany overcrossing project and particularly the letter of Bridge Engineer G. S. Paxson dated October 28, 1937, relative thereto in which he estimates that to revise the present large water main will cost approximately \$8,000; also in which he states that he believes the company will assume the expense of revising its service connections if the State Highway Commission will pay the cost of revising the large main. The Attorney advised that he has gone into this matter thoroughly from the legal standpoint and it is his opinion that, if the City of Albany, under the provisions of the company's franchise, refuses to be responsible for the cost of any change or alteration of the water mains or pipe lines, then the state, if it proceeds with the highway project, must assume and pay such expense. The Engineer recommended in view of this opinion that the State Highway Commission assume this cost in connection with the highway project. The Commission approved the recommendation by unanimous vote and referred the matter to the Attorney to work out as good a proposition as he can with the city and the power company.

The Commission had under consideration the matter of adopting a permanent route for the Oregon Coast Highway along Astor Street in the City of Astoria in connection with which matter the Commission held a public hearing in Astoria on September 13, 1937. Action on this matter was deferred pending a report on appraisals of the property involved in this revision. The Attorney was authorized and instructed to make appraisals of the property and render a report thereon at the earliest possible time.

The Commission considered the claim of one Frank Triska for reimbursement for the loss of a horse which he alleges was so badly injured when it attempted to cross a cattle guard constructed and maintained by the state on a road under state jurisdiction that he had to kill the animal. Mr. Triska values the horse at \$100 and demands reimbursement in such amount from the state. The Attorney advised that the state is responsible for this accident in the event that the Commission had jurisdiction over the road on which the cattle guard is installed and is maintaining this road. The Engineer advised that the road in question is not a state highway but is simply an old road that was furnished to one of the state's contractors in connection with the construction of a state highway project. He doubted the responsibility of the Commission for the damage inasmuch as Mr. Triska does not own the land on the opposite side of this old road and there is a question whether or not he had any authority to drive his horse across this cattle guard onto the other man's land. The Commission deferred action on this matter pending investigation as to whether or not Mr. Triska was within his rights in letting the horse go across this cattle guard onto property belonging to another.

In this connection the Attorney reported receipt of a letter from County Judge Earl B. Day of Jackson County in which the Highway Commission was requested to install a cattle guard on the Crater Lake Highway to keep cattle from going onto and along the highway, and from the highway into the Rogue River National Forest. He gave as his opinion that the Commission has a legal right to refuse permission to construct a cattle guard on any state highway, if it so desires, and cited as a legal reference Chapter 243, Laws of 1933, as amended by Chapter 18, Laws of 1935. It appeared to the Commission

NOV 17 1937

that the existence of a cattle guard on the Crater Lake Highway would not be for the best public interests and accordingly Judge Day's request for the same was denied. The Attorney was instructed to convey such information to Judge Day and to advise him why the Commission found it necessary to take such action.

The method of financing the construction of the division office building in Portland had the attention of the Commission. The Engineer recommended that the building be constructed as a W.P.A. project rather than as a P.W.A. project as was first intended. It was his thought that the Commission could secure a better building at less cost by so doing. The Commission approved the recommendation and so ordered.

The Engineer reported that certain contractors on Oregon highway work have demonstrated that they do not have adequate personnel and/or equipment to undertake jobs in an aggregate amount for which they have been pre-qualified. He gave as his thought that the prequalification of these contractors should be reduced so as to make certain that when they are awarded a contract it will be carried on to completion in a satisfactory manner. He presented a list of contractors in this category as follows and recommended that their prequalifications be reduced as shown:

Contractor	Present Pre-qualification	Recommended Pre-qualification
R. I. Stuart & Sons	\$ 150,000	\$50,000
Brookfield Company	150,000	50,000
Dolan Construction Company	100,000	75,000
Edwin C. Gerber	500,000	200,000
Joplin & Eldon	350,000	200,000
M. C. Leninger & Son	75,000	50,000
Medford Concrete Construction Co.	100,000	50,000
Schmeer, Williams & Gentemann	150,000	75,000
Umpqua River Navigation Company	200,000	100,000

The Commission approved the recommendation by unanimous vote and so ordered.

The Engineer also recommended that the following contractors, Andersen Construction Company, Consolidated Highway Company, Inc., and A. A. Hardesty, be refused the privilege of bidding on future highway construction work because they have demonstrated that they are not adequately financed and are constantly bringing trouble to the state highway department either by failure to pay claims incurred against their jobs or by overrunning the time limit specified for the completion of their work. The Commission after discussion approved disqualifying the Andersen Construction Company and A. A. Hardesty from bidding on future highway work but deferred its decision in regard to the Consolidated Highway Company pending completion of projects which this company now has under way for the state when a definite decision will be rendered. The Commission was guided in its decision in regard to these matters by the opinion of the Attorney who quoted the Oregon law on this subject, particularly Chapter 225, Laws of Oregon for 1931. The Secretary was instructed to notify the Andersen Construction Company and A. A.

Hardesty of their disqualification the next time they request plans for highway construction projects.

The Commission discussed briefly but took no action on the matter of rerouting the Pacific Highway along Summer Street in the city of Salem so as to fit in with the plans for the new state capitol grounds. The Commission indicated that it would hold a public hearing in Salem in regard to this matter as required by law at the proper time.

The Commission had under consideration the plan originated by Mr. Harry Failing, Advertising Manager of the Oregon Journal, for marking points of interest along Oregon highways. This plan calls for the erection of a colored marker at the roadside with an identifying number thereon, referring to a printed description of the spot in an official bulletin to be issued by the State Highway Commission, thus eliminating any attempt to describe the spot, view or historical location on the marker itself. The Commission indicated a favorable attitude toward the adoption of such method of indicating historical locations but deferred definite action thereon pending consultation with the advisory committee on publicity and travel information matters. It was proposed that this matter be discussed with such committee at a meeting on Monday evening, November 29, 1937.

The Engineer requested authority for Harold B. Say, Director of the Travel and Information Department, to attend at state expense the meeting of the Evergreen Playground Association in Vancouver, B.C., on November 27, 1937, and the annual meeting of the Pacific Northwest Tourist Association in Spokane, Washington, on November 18, 1937. The Commission approved the request by unanimous vote subject to the condition that it meets with the approval of Governor Martin.

The Secretary presented a number of propositions submitted by several bonding companies for the furnishing of blanket bonds to cover highway department employees who are engaged in activities that require them to be bonded. It appeared to the Commission that no particular advantage would be gained by securing a blanket bond to cover these employees so it was ordered that individual bonds be secured as in the past.

The Commission considered and ordered filed a copy of a letter from Mr. and Mrs. Jack Robertson, Ashland, Oregon, addressed to President Franklin Delano Roosevelt regarding the controversy existing between them and the State Highway Commission relative to a slide which occurred on their property as a result of highway construction on the Pacific Highway south of Ashland, and the reply thereto by L. E. Boykin, Acting Chief of the Bureau of Public Roads, which letters were brought to the attention of the Commission by W. H. Lynch, District Engineer, Bureau of Public Roads, Portland.

The Commission had under consideration the claim of Mr. Edgar R. Means, Principal of the Redmond High School, Redmond, Oregon, with respect to damage that occurred to his car by reason of coming in contact with a rock on the McKenzie Highway near the Lost Creek service station. The Attorney advised that there is some question as to the Commission's liability in view

NOV 17 1937

of the varied reports that have been received concerning this accident, and that he has written to Mr. Means about it but has not yet received a reply. The Commission decided, in view of the circumstances, to let the matter rest until the Attorney receives a reply from Mr. Means and has additional information to report.

The Commission also considered the claim of James B. Adams for damage that he alleges occurred to his car when it collided with some oiling equipment, owned by the state, on July 22, 1937, at mile post 42.5 on the Lower Columbia River Highway. It appeared to the Commission that, inasmuch as the state's equipment was covered by public liability and property damage insurance, this is a matter for the insurance company to adjust, hence denied the claim. (The Attorney reported later in the session receipt of information to the effect that the insurance company has settled this claim to the satisfaction of Mr. Adams.)

The Commission also considered the claim of a Mr. W. H. Redberg, in the amount of \$6.75, for damage that he alleges occurred to his car when a highway employee threw a shovelful of gravel on the same, damaging the paint, the accident having occurred on June 2, 1937, on the Oregon Coast Highway about one mile north of the town of Hebo. The Attorney advised that he has gone thoroughly into this matter and it is his opinion, under the circumstances as stated in the letters making up his file on the subject, that the Commission is not legally obligated to pay the claim because the evidence does not show that the employee failed to exercise due diligence and care in his work. The Commission thereupon denied the claim by unanimous vote.

The Commission considered the claim of Mrs. Anna M. Ley, Portland, for reimbursement for the cost of repairing the windshield of her car which she alleges was broken by a rock which was put in motion by a pick wielded by an employee of the State Highway Department. The Attorney advised that investigation of this claim reveals that there is a question whether or not the rock was actually dislodged by the highway workman, in fact it is the workers version of the matter that he did not dislodge the rock but that the rock was thrown against the windshield by a passing car. He gave as his opinion that the claim is one for which the state is not legally liable regardless of what caused the rock to be put in motion. It is one of those accidents, he added, for which no one in particular can be called upon to respond in damages, being an unavoidable accident. In view of the report the Commission refused to accept the responsibility for the accident and thereupon denied the claim.

The Commission reconsidered and again denied the claim of Dr. G. H. Huthman for damage to his property that he alleges was devaluated by reason of the construction of the Union Avenue viaduct on the East Portland-Oregon City Highway in Portland.

The Commission also reconsidered the claim of Mrs. Maud Campbell for damages to her property by reason of the said Union Avenue viaduct in Portland. The Commission refused to alter its previous decision denying Mrs. Campbell's claim, no new evidence in support thereof having been presented.

The Commission considered the claim of Mr. E. W. Williamson, Band, Oregon, for damages to his service station business in the town of Ontario which he alleges will be ruined by the construction of the Ontario railroad grade separation project unless the plans for this project are altered. The Engineer advised that Mr. Williamson's property is located at the southeast corner of Oregon Avenue and North First Street and at the present time Mr. Williamson has access to his property from both of these streets but the plan for the highway project contemplates blocking the North First Street entrance which unquestionably will decrease the value of the property as a service station site. He further advised that Mr. Williamson wants the Commission to alter the plans for the highway project so he can continue to have access to First Street but he (the Engineer) is opposed thereto because such access would create a serious traffic hazard in view of the fact that First Street is a primary highway route and will carry all of the traffic to and from Idaho points. It was his thought that the hazard created by such change in plans would be greater than the hazard that the Commission is endeavoring to eliminate by the construction of the railroad grade separation project. He requested the views of the Commission in regard to the settlement of this controversy. After considerable discussion the Commission indicated that it would not approve the alteration of the plans to allow Mr. Williamson ingress or egress to his property from North First Street because of the traffic hazard that would be created thereby. The suggestion was offered that the controversy might be settled by the state purchasing Mr. Williamson's holdings. The Commission indicated a favorable attitude to the suggestion and instructed the Attorney to ascertain how much Mr. Williamson wants for his property and report his findings at the next meeting.

The Engineer reported a request from the Oregon American Lumber Corporation, Vernonia, Oregon, for permission to log its timber across the Wolf Creek Highway at two locations in Sections 11 and 14, T. 4 N., R. 7 W., W.M., particularly at engineers' stations 813 and 845, by means of sky lines rather than to truck the logs out as was originally contemplated when the agreement between the company and the Commission covering right of way matters and timber purchase was executed. He advised that he could see no good reason for not granting the request in view of the fact that the highway at such points will not be available for general public use for some time and he recommended the granting of the request subject to the following conditions: (1) that yarders be placed on the south side of the highway at each location so that the haul across the highway will be limited to a narrow width of not more than 100 feet; (2) that the company will agree to reimburse the State Highway Commission for the expense of repairing all damage done to the highway grade by reason of the company's operations and will agree to the deduction of such amount from the amounts that the Commission may owe the company; (3) that the company will furnish the State Highway Commission a suitable bond for the protection of anyone injured by the company's operations as a result of inadvertently using the constructed highway grade or the highway right of way; (4) that the company will agree to the opening up of the highway for construction purposes upon ten days' notice. The Commission approved the Engineer's recommendation by unanimous vote and ordered that the matter be covered by appropriate agreement between the company and the state.

The Commission had under consideration a resolution adopted by the County Court of Deschutes County requesting that the old state highway between Redmond and Bend, which is no longer of value as a primary state highway since the construction of the new primary highway between these points, be designated as a state secondary highway. The Commission approved the request upon recommendation of the Engineer and by unanimous vote adopted the following resolution so designating this road:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the County Court of Deschutes County, has selected the route hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said route as a highway to constitute, together with other highways which have heretofore been added and which may hereafter from time to time be added, a part of the system of secondary state highways of Deschutes County under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

That the following named route in Deschutes County, be and the said route is hereby selected, designated, established, adopted, and approved as a secondary state highway and shall be and is hereby designated as a part of the secondary state highway system, to wit:

Redmond-Bend Secondary Highway No. 375

Beginning at the intersection of the old Dalles-California Highway with the new location of The Dalles-California Highway in the City of Redmond; thence in a southwesterly direction to the intersection of the old Dalles-California Highway with the McKenzie-Bend Highway, a distance of 13.5 miles.

That said route shall be, and is hereby qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931 and amendments thereof;

That the engineer be, and he hereby is authorized to make proper surveys with respect to the physical location upon the ground of the said route and properly file in the records of the Commission all of said data;

NOV 17 1937

That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Deschutes County.

The Commission also had under consideration a resolution adopted by the County Court of Marion County requesting the designation, as a secondary state highway, of the old Pacific Highway route between Salem and Illahe School which has been replaced by a new highway built to modern standards. The Engineer advised that, while the county court adopted this resolution for the Commission's consideration, it is not particular that the Commission act on it at this time because there are other county roads which the court may wish to have considered as secondary highway roads in the event that the Commission intends to limit the number of new secondary highways in this county. In view of the Engineer's report the Commission decided unanimously to defer action on the county court's resolution for the time being.

The Secretary presented a resolution from the County Court of Hood River County requesting that the Interstate Bridge Secondary State Highway No. 280, beginning at the east end of the Hood River Bridge and extending to the Hood River-White Salmon Interstate Bridge, be eliminated from the state secondary highway system. The Engineer recommended compliance with the request. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission, by mutual agreement with the County Court of Hood River County, has heretofore selected and regularly adopted, as provided by law, the Interstate Bridge Secondary State Highway No. 280, described as follows:

Bridge Market Road No. 7, beginning at the east end of the highway bridge across Hood River and extending to the Hood River-White Salmon Interstate Bridge, approximately 0.5 miles in length,

and,

WHEREAS, it now appears that the United States of America, in connection with the construction, operation and maintenance of Bonneville Dam, has found it necessary to flood certain areas traversed by the said Secondary Highway, and for that purpose, has requested Hood River County to enter into a flowage agreement with the United States of America, and

WHEREAS, it is the purpose and desire of Hood River County to cooperate with the Federal Government, insofar as is consistent with the best interests of Hood River County, and

WHEREAS, under the provisions of Chapter 196, Laws of Oregon, 1935, the State Highway Commission, by mutual agreement with the County Court, may eliminate and remove from the State Secondary

NOV 17 1937

Highway System, secondary highways which have heretofore been made a part of the Secondary Highway System, and

WHEREAS, the County Court of Hood River County has duly and regularly adopted a Resolution and has delivered to the Highway Commission, a duly executed copy of the same, in which Resolution, one of the "Whereas" clauses reads as follows, to-wit:

"WHEREAS, the County Court of Hood River County in view of all of the circumstances, and particularly of the fact that a portion of said area will be flooded in connection with the construction, maintenance and operation of Bonneville Dam, now believes that it is and will be for the best interests of the State of Oregon and Hood River County in particular that the secondary highway hereinabove described should be eliminated and removed from the secondary highway system and left to revert to and fall under the exclusive jurisdiction of Hood River County so that Hood River County may be at liberty to enter into a flowage agreement with the United States of America."

and

WHEREAS, it is the desire and purpose of the Highway Commission to cooperate with Hood River County and the Federal Government, insofar as the Highway Commission has authority to do, in the promotion of the said project and Federal Government activity, and therefore, the Commission deems it to be in the best interests of the State and general public that the Highway Commission join with Hood River County in removing from the Secondary Highway System, the secondary highway hereinbefore described.

NOW, THEREFORE, Be it and it hereby is Resolved, by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described Secondary Highway shall be, and the same hereby is taken from the Secondary Highway System, and shall no longer be designated or known as, or improved or maintained as a secondary highway by the State Highway Commission, to-wit:

The Interstate Bridge Secondary State Highway No. 280, described as, "Bridge Market Road No. 7, beginning at the east end of the Highway Bridge across Hood River and extending to the Hood River-White Salmon Interstate Bridge, being approximately 0.5 mile in length."

2. That said Highway, if maintained as a public highway, shall be under the exclusive jurisdiction of the County Court of Hood River County.
3. That this Resolution be entered in full in the minutes and

records of the State Highway Commission, and a duly certified copy thereof, delivered to the County Court of Hood River County, and a copy to the United States Bureau of Public Roads, and a copy to the United States Army Engineers.

The Commission had under consideration the matter of abandoning a portion of the Shady Point-Kelly Corner Section of the Pacific Highway in Douglas County which has been rendered valueless as a state highway by reason of the reconstruction of the highway on new location. The Engineer advised that the old road at this place is of no use for state highway purposes and he recommended that it be abandoned and turned over to the Douglas County Court for maintenance or for disposal as it sees fit. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Shady Point-Kelly Corner Section of the Pacific Highway in Douglas County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Shady Point-Kelly Corner Section of the Pacific Highway in Douglas County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to

NOV 17 1937

the control and supervision of the County Court of Douglas County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that portion of the Shady Point-Kelly Corner Section of the old Pacific Highway lying westerly of the reconstructed Pacific Highway between Station 1401+00 and Station 1302+80, situated in Sections 2 and 11, Township 28 South, Range 6 West, W.M., Douglas County, Oregon.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated October 4, 1937, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Douglas County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Douglas County and beyond any responsibility or supervision by the State Highway Commission.

- - - - -

The Commission also considered the abandonment of a portion of the Cunningham Creek Bridge Section of the Oregon Coast Highway in Coos County, a short distance north of the town of Coquille. The Engineer advised that the highway has been reconstructed at this location by elimination of a sharp

* Map filed in Right of Way Abandonment and Retention File - No. 46

curve at Cunningham Creek and that the old section is no longer of any value for state highway purposes. He recommended that the old section be abandoned in favor of Coos County for maintenance or for reversion to the adjoining property owners. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Cunningham Creek Bridge Section of the Oregon Coast Highway in Coos County; and

WHEREAS, by reason of said relocation and the reconstruction of the said section of highway there was eliminated and made unnecessary as a part of the completed highway a certain section which is more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the Oregon Coast Highway, and therefore as a part of the state highway system, the fragment or portion of the right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of the Oregon Coast Highway as formerly located between the said termini and as heretofore improved and used; and

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, a majority of members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which said fragment of land was formerly within the limits of the right of way of the Oregon Coast Highway, but which is now without the limits of the right of way as said highway has been relocated be and said fragment of land is hereby abandoned as a part of the right of way of said highway and said fragment of land so abandoned is left to revert to the adjoining property owner or owners or to the control of the County Court of Coos County or the City of Coquille for highway, street or other public purposes.

2. The fragment of land or right of way hereby abandoned and eliminated from the state highway system is described as follows, to-wit:

All that portion of the Cunningham Creek Bridge Section of the Oregon Coast Highway, lying east of a line 35 feet distant from and parallel to the reconstructed center line between Engineer's Station 876+60 and Station 880+02; situated in the City of Coquille, Coos County, Oregon.

In addition to the foregoing description of said abandoned right of way there is attached hereto a print or map, marked "Exhibit 'A'", and by this reference made a part hereof upon which map there is shown shaded in red the abandoned section of said highway, which exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer; and bears date of November 1, 1937.*

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said abandoned section, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Coos County, together with a copy of said exhibit, and a copy of said resolution and exhibit shall be delivered to the Mayor of the City of Coquille for such action as said County Court may desire to take and for such action as the City of Coquille may desire to take, and should said abandoned portion of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Coos County and/or the municipal authorities of the City of Coquille, and the same shall be beyond any responsibility or supervision by the State Highway Commission

The Engineer reported that it would be desirable to paint stripes on the pavement on the state highway route in the city of Newport for four lanes of traffic and requested authority from the Commission so to do. The Commission approved the request by unanimous vote.

The Attorney reported requests from the National Hospital Association, Portland, and the Physicians and Surgeons Hospital Association of Salem for authority to raise the rates for furnishing group insurance to highway department employees from \$1.75 per month to \$2.00 per month per person. He said that he has been informed that the associations have been losing money on their accounts with the state highway department employees and feel that they should be allowed to increase their rates, especially in view of the fact that costs of medical supplies are higher now than when the original agreement was executed. He was instructed to inform the associations that the members of the Highway Commission are neutral in this matter and consider

* Map filed in Right of Way Abandonment and Retention File - No. 47

that it is a question that should be decided by the highway department employees themselves.

The Engineer requested authority to purchase flashing signals to be installed at the following intersections on 82nd Avenue in the city of Portland:

- One at N. E. Sandy Boulevard (U.S.#30)
- One at N. E. Glisan Street
- One at S. E. Stark Street (U.S.#30 alternate)
- Two at S. E. Division Street
- One at S. E. Powell Boulevard
- One at S. E. Foster Road

He estimated that the cost of such signals installed would be \$550. He also requested authority to purchase two overhead flashing signals for installation at the following locations: one at the intersection of Oregon No. 8 (Tualatin Valley Highway) and Sylvan Road, and one at the intersection of U. S. No. 99 W. (Pacific Highway West) and the Old Capitol Highway. He estimated that such installations would cost about \$160. In addition to the above beacons the Engineer recommended the purchase and stocking of six additional overhead flashing beacons for installation on short notice as occasion may require. He estimated that these six beacons, not installed, would cost about \$360. After due consideration the Commission approved the Engineer's requests by unanimous vote.

The Commission had under consideration a letter from Division Engineer W. C. Williams advising that he has inspected the highway construction work performed by the United States Bureau of Reclamation around the Unity Dam site and that he finds that all of the grading and bridge work has been performed satisfactorily. He recommended acceptance of the same for future maintenance by state highway forces. The State Highway Engineer expressed his concurrence in the recommendation. The recommendation was approved by the Commission by unanimous vote. The Secretary was instructed to advise Mr. C. H. Spencer, Construction Engineer for the United States Bureau of Reclamation at Unity, of the Commission's action and to inform him that the Commission has authorized the taking over of this project for use and maintenance as a state highway.

The Engineer reported that the Salem City Council has gone on record as opposed to paying any portion of the cost of lighting the North Salem undercrossing. He recalled that it has been the practice of the Highway Commission for a long time to require cities to pay at least a portion of the cost of lighting such structures and gave as his thought that the City of Salem should not be relieved from such expense in the present instance unless the Highway Commission wanted to change its established policy in regard thereto. The Commission decided not to change its policy and instructed the Engineer to advise the Salem City Council that it will order discontinuance of the lighting of this structure unless the city will assume the payment of one-half the expense thereof.

NOV 17 1937

The Commission had under discussion the matter of creating a "no-parking" zone along Fifth Street (state highway route) in Oregon City between Main Street and Water Street on account of the narrowness of the pavement and the high cost of the property that would be needed for widening the highway to accommodate the parking of automobiles at this location. The Engineer advised that this street is plenty wide enough now for four lanes of traffic, if cars were prohibited from parking against the curb, but there is no way to prevent people from parking their cars next to the curb line unless the City Council will adopt an ordinance to that effect. He further advised that the property at the corner of Fifth and Main Streets is occupied by business houses which would have to be paid large damages in the event the Commission decided to acquire additional land to accommodate the parking of cars. It was his thought that such expense is unjustified in view of the fact that even then there would be room for the parking of only three or four cars on the north side of the street. He suggested that the Commission ask the city council to pass an ordinance prohibiting the parking of cars at this location and to issue instructions to its city police force to enforce the provisions of the same, and, if the city police will not act, then to ask the state police officers to do whatever is necessary to keep this space cleared. After considerable discussion of this matter the Commission approved the Engineer's suggestion by unanimous vote and instructed him to take the matter up with the city council. He was authorized to advise the council that, if the city will adopt an ordinance prohibiting the parking of cars in this block, the Highway Commission will mark off the "no parking" area, and, if the city will not adopt such ordinance, then the Commission will defer the awarding of additional contracts for the construction of this highway in Oregon City until it is assured of full cooperation from the city council.

In connection with this matter a letter was presented from C. T. Gates, Portland, who owns a 75-foot frontage on Fifth Street which will be affected by the Commission's decision in this matter. Mr. Gates expressed a desire to talk with the Engineer concerning his interests. The matter was referred to Traffic Engineer John Beakey to contact Mr. Gates.

The Secretary presented communications, petitions, et cetera, as follows for the attention of the Commission:

Letter from the San Francisco Convention and Tourist Bureau suggesting that the Oregon State Highway Engineer be authorized to take membership in the American Road Builders' Association as an aid in securing the 1939 convention of that association in San Francisco. The Engineer advised that there are advantages in belonging to this association but he did not feel disposed to take out membership on his own account. The Commission by unanimous vote authorized the Engineer to join the association at state expense.

Letter from the American Road Builders' Association offering free space for an Oregon exhibit at the association's 1938 Road Show which is to be held in Cleveland, Ohio, during the week of January 17, 1938. The Engineer recommended acceptance of this offer. The Commission approved the recommendation by unanimous vote subject to the condition that it will not take up

too much time of highway department employees and will not cost the state too great a sum.

Resolution from the Stayton Chamber of Commerce urging completion of the North Santiam Highway at the earliest possible time regardless of the prospects for the construction of the power dam in the North Santiam River in connection with the Willamette Valley flood control project. The Commission ordered the communication filed for future reference.

Letter from F. W. Deedon renewing the request of Lane County citizens for the oiling of the secondary highway from Elmira west to Badger Mountain in Lane County. The Commission denied the request because of lack of funds to finance such improvement.

Letter from Jewell Grange No. 876, Jewell, Oregon, urging the Commission to oil the Nehalem Secondary Highway between the towns of Jewell and Mist at the earliest possible time during the 1938 season. The Commission ordered that the grange be informed that the Commission has this project in mind and expects to consider it along with other projects for the 1938 program but no definite commitment of funds can be made to it at this time.

Resolution from the McEwen and Stewart Granges of Baker County urging construction of a guard rail at all narrow places and curves on the Sumpster Valley Secondary Highway between McEwen and Salisbury as a safeguard for traffic. The Engineer reported that he has recently built some guard fences along this road that should take care of the worst conditions. The Commission thereupon ordered the communication filed.

Letter from County Judge Fred Fisk, Lane County, suggesting that the Highway Commission undertake, this winter, the construction of the new route for the Pacific Highway through the town of Cottage Grove in order to assist in the relief of unemployment in that vicinity. The Secretary was instructed to inform Judge Fisk that the Commission is not in a position financially to undertake this job this year but will bear it in mind for consideration when some of the other jobs that are now under way in Lane County have been completed.

Letter from Honorable Rufus C. Holman, State Treasurer, offering the services of his field deputy to the State Highway Commission to assist in the collection of unremitted fines for traffic law violations, provided the Highway Commission will pay a portion of the expense thereof. The Commission decided to accept this offer and instructed the Engineer to contact Mr. Holman in regard thereto.

Joint petition signed by representatives of the County Court of Grant County, Grant County Union High School No. 3, and the Edward Hines Lumber Company urging improvements to the connecting road between the newly constructed portion of the John Day-Burns Highway and the old highway at the summit of the Pass south of Canyon City, where they allege a condition exists that is dangerous and unsafe for travel. The Secretary was instructed to inform the petitioners that the Commission has no funds with which to finance

NOV 17 1937

such project at the present time but has tentatively approved it for construction next year in the forest highway program.

Letter from W. H. Lynch, District Engineer, Bureau of Public Roads, transmitting a copy of the act approved by Congress on August 14, 1937 (Public 286, 75th Congress) covering reimbursement to State Highway Departments, under certain conditions, for making publicly-owned toll bridges on the Federal Aid Highway System free of toll. The Commission took no action on this matter.

Letter from C. C. Hockley, State Director, Federal Emergency Administration of Public Works, advising that all of the projects included in the Highway Commission's P.W.A. Program have qualified for construction under the Public Works Administration Act of 1937 but there is no present assurance of an allotment of funds for the same. The Commission ordered the communication filed.

Petition from residents of Ocean Lake and vicinity urging the construction of a sidewalk along the Oregon Coast Highway throughout the Ocean Lake and Taft districts for the benefit of pedestrians. The Commission referred this matter to the Engineer for consideration in the formulation of the Minor Betterment Program for next year.

Petition from citizens and taxpayers of Woodburn and the territory between Woodburn and Mt. Angel urging the Commission to reroute the Hillsboro-Woodburn Secondary Highway along the extension of Young Street, Woodburn, to a connection with the present highway about 550 feet east of the Pacific Highway so as to eliminate the right angle turn in the present route a short distance south of the intersection of Young Street with the Pacific Highway. The Commission referred this matter to the Engineer for investigation and report.

Letter from the Redwood Empire Association thanking the Commission for the interest shown in favor of the development of the Redwood Empire and its system of state highways. The Commission ordered the communication filed.

Letter from the City Council of the town of Molalla alleging that the State Highway Commission on November 1936 promised to budget funds for the improvement of the secondary highway through the town during the season of 1937 and inquiring when the Commission expects to undertake such project. The Engineer advised that the 1937 budget contained an item of \$11,000 for such improvement but the project was not undertaken because of a shortage of funds, there being other projects that were considered more important for the funds available. The Commission ordered that the city council be so informed.

Letter from School District No. 26, Clatsop County, requesting the construction of a sidewalk on the Walluski River Bridge on the Nehalem Secondary Highway, near Jewell, for the benefit of school children. The Engineer advised that the bridge referred to is an old structure, and it is planned to replace it with a new structure next year. He gave as his thought that, under the circumstances, it would be a waste of funds to construct a sidewalk on the existing structure which he estimated would cost between \$1,500 and

NOV 17 1937

\$2,000. The plans for the new structure, he said, include provision for a sidewalk. The Commission concurred in the viewpoint of the Engineer and thereupon denied the request. The Secretary was instructed to inform the Directors of the School District the necessity for such action.

Letter from J. W. Elliott, Superintendent of the Warm Springs Indian Agency, urging the Commission to construct a rock surface on the newly graded section of the Warm Springs Highway between the town of Madras and the Deschutes River Bridge crossing as an aid to travel and the elimination of a hazardous condition which he alleges exists on account of the slippery condition of the Deschutes River grade during wet weather. Also a letter from County Judge W. R. Cook of Jefferson County stating that the county court prefers that the Commission spend its money for additional grading work on this highway north of Warm Springs Agency rather than to surface the section already graded to state standards. It was the thought of the Commission that, from a general public standpoint, greater benefit would be received by continuing the grading work as suggested by Judge Cook than by surfacing the section previously graded and it was so decided. The Secretary was instructed to convey such information to Judge Cook and Mr. Elliott.

Letter from the Hillsdale Community Club requesting that highway road signs in the vicinity of Hillsdale (Bortha) be changed to read "Hillsdale" so as to conform with the name of their post office. The Engineer advised that investigation reveals that the post office at this place is now known as Hillsdale Post Office as is also the district in which the post office is located, and in his estimation it will be proper for the Commission to change the highway signs accordingly. He recommended approval of the request. The Commission approved the recommendation by unanimous vote.

Letter from County Judge Bert Johnson, Morrow County, complaining of the treatment that Morrow County has received from the hands of the State Highway Commission with respect to highway construction and requesting a greater allocation of funds for the improvement of Morrow County roads. The Commission ordered the communication filed.

Letter from W. W. Evans, Halfway, expressing appreciation for improvements ordered by the State Highway Commission for the Baker-Halfway road in Baker County. The letter was ordered filed.

Letter from Gilliam-Wheeler Pomona Grange, Condon, Oregon, in which the Commission is asked to authorize the placing of some fine surfacing rock on the one-mile section of the Fossil-Antelope Secondary Highway, in Wheeler County, commonly known as the Chichester Grade Section, which was recently graded to state standards, so that cars may be driven over this section with greater comfort and without fear of tires being cut with sharp rocks as occurs under present conditions. The Commission referred this matter to the Engineer for investigation and report on what it would cost to do this work.

Letter from County Judge Earl B. Day of Jackson County asking the State Highway Commission to give to Jackson County the old 90-foot steel bridge over Sardine Creek on the Pacific Highway near Gold Hill after it has

been replaced with a new structure. The Engineer advised that the Commission is taking bids on November 30 for the new bridge over Sardine Creek and when the new structure is open for general public use the state will have no further use for the old bridge, particularly in view of the fact that it is only 15 feet wide and is not suitable for use on any state highway. He recommended that the old bridge be given to Jackson County. The Commission approved the recommendation by unanimous vote subject to the condition that the county will haul the dismantled structure away at county expense and will clean up the premises to the satisfaction of the State Highway Engineer.

Letter from P. R. Lafferty, President of the Obsidians of Eugene, thanking the Highway Commission for its decision in authorizing snow removal operations on the McKenzie Highway between Belknap Springs and Frog Camp for the benefit of winter sports' enthusiasts. (The Commission previously authorized this work as an experiment to ascertain whether or not it would be possible to keep the road open by the use of pushplow equipment. The work will be closed down in the event that operations on that basis are unsuccessful.)

Letter from Illinois Valley Grange No. 370, Kerby, Oregon, urging the Commission to undertake, as one of its first major construction projects, the straightening and widening of the Pacific Highway between Grants Pass and Roseburg to remove existing driving hazards. The Commission ordered the communication filed.

Resolution from the City of Roseburg, bearing endorsement by the County Court of Douglas County, wherein the State Highway Commission is requested to remove a certain hump in the old Pacific Highway near its junction with the new Pacific Highway at the north city limits of Roseburg so as to provide a better grade for the connection of these two roads; also to remove any embankment adjoining such highway connection which might be unsightly or detrimental to the free flow of traffic. The Commission referred this matter to the Engineer for investigation and report.

Letter from Reverend John W. Hoyt, Medford, requesting permission to collect wild flowers for botanical purposes, study and pressing from state highway rights of way. The Commission referred this matter to Commissioner Tou Velle with full power to act, and instructed the Secretary to so inform Reverend Hoyt.

Letter from Vance Bolick, owner of the Smith River Cash Store, Smith River, California, advising that he proposes to place a sign on private property near the north end of the Winchuck River Bridge on the Oregon Coast Highway in Curry County, and inquiring as to the wishes and desires of the State Highway Commission in regard thereto. The Secretary was instructed to reply that the Commission has no jurisdiction over the property outside of the highway right of way but is extremely desirous of preserving the roadside beauty and scenery which cannot be done if advertising signs are maintained on such property, and to ask Mr. Bolick's cooperation.

Newspaper clipping from the Coos Bay Times, submitted by the North Bend Chamber of Commerce, calling attention to numerous accidents that have

NOV 17 1937

occurred on Sherman Avenue in North Bend by reason of the slippery condition of this street which is a state highway route. The Secretary was instructed to inform the Chamber of Commerce that the Commission has it in mind to construct a nonskid surface on this street and intends to give such project consideration in the formulation of next year's construction program but is not in a position at the present time to state definitely whether or not it will be included in such program.

Letter from Patrick F. Payne, Director of Safety for the Interstate Transit Lines, Omaha, Nebraska, expressing appreciation for courtesies extended to the drivers of Interstate Transit equipment (U. P. Stages) by Oregon Highway Department maintenance crews. The Commission ordered that an appropriate letter of thanks be sent to Mr. Payne.

Letter from R. F. Hanke of the Equitable Savings and Loan Association, Portland, Oregon, in regard to the condition of the unpaved portion of Interstate Avenue, Portland, and requesting repairs to the same so that traffic will not throw rocks through plate glass store windows nearby. The Commission ordered that Mr. Hanke be informed that the Commission now has under consideration the paving of the unpaved portion of this street and hopes to be able to advertise the project for construction during 1938 if there are funds available to finance the work, although no definite assurance can be given at this time that the work will proceed as contemplated.

Letter from Mr. Walter Meacham, Portland, regarding the placing of the name "Old Oregon Trail" on state highway maps and inquiring whether or not the Commission has as yet taken any definite action in regard to the request of a delegation that appeared before the Highway Commission on July 8, 1937, regarding such matter. After some discussion of this matter the Commission decided to place the name of the Old Oregon Trail in the legend in the lower right hand corner of the 1938 maps, the number 30 denoting this U. S. Highway route to be placed in the yellow colored shield on the same line with the name, and the number appearing in the shield on the 1937 map to be changed from 30 to 99. This decision was conditioned upon its being approved by the Advisory Committee on publicity matters. The Commission ordered that Mr. Meacham be advised of the Commission's action and that he be informed that the Commission did not previously decide this matter because it considered that there was plenty of time to give it full consideration before the 1938 maps were published, which is the thought that the Commission tried to convey to the delegation when the matter was first discussed.

The Commission had under consideration for approval W.P.A. projects as follows:

(1) Proposed clearing and grubbing project on the Wolf Creek Highway right of way extending east from Sunset Camp to Buxton Road. The Commission, as sponsor, approved an allocation of approximately \$30,000 of state funds for this project to pay the cost of equipment, equipment repairs, powder, and engineering, the balance of the funds, amounting to approximately \$178,000, are to be contributed by the W.P.A.

NOV 17 1937

(2) Beautification project on the Wilson River Highway in Tillamook County. This project is being sponsored by Tillamook County which is to pay all costs over and above those assumed by the W.P.A. The Highway Commission's approval is needed simply because the work is on a state highway right of way. The work consists of construction of drainage ditches, riprapping, retaining wall construction, beautifying slopes and fills, et cetera, for a distance of approximately five miles beginning at a point near the northwest corner of Section 10, T. 1 N., R. 7 W., W.M., and extending southwesterly to a point near the northeast corner of Section 25, T. 1 N., R. 8 W., W.M., Tillamook County.

(3) Tooth Rock roadside beautification project on the Upper Columbia River Highway. The Commission, as sponsor for this project, authorized a contribution thereto of approximately \$9,310 of state funds for rentals, supervision, et cetera, the balance of the funds, amounting to about \$16,656, is to be contributed by the W.P.A.

(4) Proposed clearing and grubbing project on the Wilson River Highway between Jordan Creek and the Washington County line in Tillamook County. This project is being sponsored jointly by Tillamook County, Washington County, Multnomah County, and the City of Portland and involves a contribution of approximately \$118,690 by the state for equipment rentals and repairs, purchase of powder and some supervision. It has been proposed that the equipment on this job be furnished by the counties at the customary rental rate but that the state pay the cost of equipment repairs and return the equipment to the counties when the work is done in as good condition as it was when it was placed on the job, less reasonable wear and tear. The Commission indicated that it would approve this project if a satisfactory working agreement can be effected with the counties in regard to the equipment and if the W.P.A. projects on the Wolf Creek and Wilson River Highways can be kept on a parity so far as state funds are concerned.

The Commission had under discussion the selection of projects to be financed with fiscal year 1939 federal aid funds and proposed for construction during the season of 1938. The Engineer submitted a list of projects from which the Commission selected the following as a partial program for such funds, being projects which the Commission considers should be given preference over others:

Oregon City, Abernethy Bridge to 11th Street	\$105,000
Nehalem River Bridge (Wolf Creek Hwy.)	120,000
Rock Creek Bridge (" " ")	17,000
Albany Project, Grading (39G.S.-\$115,000, 39F.A.-\$37,000)	152,000
Siuslaw Junction-Ross Station (Junction City-Eugene)	190,000
Brothers-Lake County Line (Central Oregon Hwy.)	164,431
Lake County Line-Gap Ranch	23,000
Muddy Creek-Haines (Old Oregon Trail)	120,000
Wolf Creek-Jimmy Creek (Old Oregon Trail)	30,000
Planning Survey	54,000
Catching Slough Bridge	75,000
	<u>\$1,050,431</u>

The Commission authorized the Engineer to proceed with the securing of options for the right of way needed in connection with each of these projects.

Consideration was given by the Commission to the budgeting of the state funds that it is expected will be available for expenditure during the calendar year 1938. Estimates presented by the Engineer indicate the probable income of state funds would be \$13,580,000. The requirements for fixed expenses of all kinds and for non-cooperative construction were estimated at \$12,765,000. The amount remaining (\$815,000), plus approximately \$3,950,000, which it is expected will be collected from the Federal Government, and approximately \$157,000 that it is expected will be collected from the several counties, is estimated as the amount that will be available for expenditure on the federal aid and other cooperative projects. After consideration of the estimates of income and requirements the Commission by unanimous vote budgeted the following amounts for the purposes indicated, it being understood that the individual projects making up the minor addition and betterment items and the special maintenance items will be selected at a later date:

WPA Projects on Wolf Creek and Wilson River Highways	\$280,000
WPA Projects on other State Highways	50,000
*State construction projects on Primary Highways	200,000
" " " " Secondary Highways	300,000
Minor additions and betterments on Primary Highways	175,000
" " " " Secondary Highways	125,000
*Special maintenance, Primary and Secondary Highways	450,000
General maintenance on Primary Highways	2,500,000
" " " Secondary Highways	650,000
Installation and maintenance of signs on county roads	25,000
Operation of drawbridges and ferries	40,000
State parks	125,000
Rights of way, patrol stations, et cetera	500,000
Principal and interest payments on bonds	3,680,000
Administration and general supervision	370,000
Surveys on Primary Highways	175,000
" " Secondary Highways	35,000
Traffic surveys	50,000
Miscellaneous general expense	50,000
Travel and Information Bureau	100,000
Contribution to State Police as required by law	348,000
" " Counties as required by law	2,137,000
Reserve for contingencies, Prim. & Sec., Hwy. Maint.	150,000
" " " " " Constr.	250,000
	<u>\$12,765,000</u>

* The amounts budgeted for the items "State construction projects on Primary Highways" and "Special maintenance, Primary and Secondary Highways" are understood to be in addition to the amounts required to complete payments on projects included in 1937 programs but not fully paid for in 1937, which amounts are expected to be approximately as follows:

State construction projects on Primary Highways	\$75,000
Special maintenance, Primary and Secondary Highways	25,000

NOV 17 1937

The Engineer reported that under authority previously granted him by the Commission he has ordered a number of surveys since the last meeting of the Commission. He presented a list of such surveys and asked the Commission to confirm his action. After due consideration Commissioner Tou Velle moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Prepare Plans	- 15-2815	Sardine Creek Section, Pacific Highway. Jackson County. 3rd authorization \$100 - Total to date \$350.00.
Bridge Location-	131-2812	Meadowbrook Bridge, Starkey Secondary Highway. Union County. 1st authorization \$350.00.
Location	- 31-2811	La Grande-Island City Section, Wallowa Lake Highway. Union County. 1st authorization \$250.00.
Location	- 233-2813	Forest Boundary-Hette Butte Section, Warm Springs Road. Wasco County. 1st authorization \$5,600.00.
Location	- 24-2801	Salem-Pringle Creek Section, Pacific Highway. Marion County. 2nd authorization \$1,200 - total to date \$2,800.00.
Right of Way	- 21-2818	Yaquina Bay Bridge Approach, Oregon Coast Highway. Lincoln County. 1st authorization \$450.00.
Right of Way	- 21-2817	Alsea Bay Bridge Approaches, Oregon Coast Highway. Lincoln County. 1st authorization \$350.00.
Location	- 6-2810	Marshfield-Coquille Section, Oregon Coast Highway. Coos County. 2nd authorization \$1,000. Total to date \$16,300.00.
Right of Way	- 20-1909	Lincoln County Line-Florence Section, Oregon Coast Highway. Lane County. 3rd authorization \$600. Total to date \$2,158.00.
Right of Way	- 29-2822	Hebo-Neskowin Section, Oregon Coast Highway. Tillamook County. 1st authorization \$50.00.
Reconnaissance	- 120-2805	Monroe-Anlauf Section, Territorial Secondary Highway. Lane County. 1st authorization \$1,440.00.
Location	- 26-2802	Fairview-Cascade Locks Section, Columbia River Highway. Multnomah County. 5th authorization \$4,000. Total to date \$62,000.00.
Right of Way	- 117-2807	Murphy-Provolt Section, Williams Secondary Highway. Josephine County. 1st authorization \$125.00.

- Gravel Pits - 115-2819 Provolt-Jacksonville Section, Medford-Provolt Secondary Highway. Jackson County. 1st authorization \$250.00.
- Location - 8-2808 Brookings Section, Oregon Coast Highway. Curry County. 1st authorization \$1,600.00.
- Location - 115-2818 Gold Hill-Dodge Bridge Section, Sams Valley Secondary Highway. Jackson County. 1st authorization \$250.00.
- Location - 14-2810 Hood River-Mosier Section, Columbia River Highway. Hood River County. 2nd authorization \$1,000. Total to date \$10,500.00.
- Stock Pile Sites- 2-2810 Lincoln County Line-Alsea Mountain Section, Alsea Highway. Benton County. 1st authorization \$150.00.
- Right of Way - 29-2823 Polk County Line-Lincoln County Line, Salmon River Highway. Tillamook County. 1st authorization \$1000.00.
- Reconnaissance - 1-2810 Baker-Middle Bridge Section, Baker-Homestead Highway. Baker County. 1st authorization \$1,000.00.
- Location - 20-2818 Cottage Grove Section, Pacific Highway. Lane County. 3rd authorization \$490.00. Total to date \$2,300.00.

The motion was duly seconded by Commissioner Aldrich and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Consolidated Highway Company, Inc., contract No. 1851, for grading, surfacing and oiling the Toledo-Simpson Creek Section of the Corvallis-Newport Highway, in Lincoln County, requested an additional extension of time to October 1, 1937, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to the reason that slide conditions increased the amount of work approximately forty per cent. The Engineer advised that the date of completion specified in the contract was September 30, 1936, but weather conditions were such that the oiling work could not be done during the 1936 season and accordingly the contractor was allowed to postpone such work until the 1937 season and he was granted an extension of time of 30 working days in 1937 to complete the job. During the winter season, he said, a large slide occurred which delayed the contractor's operations and it was not until August 3 that the road was in condition to receive the oil treatment although the contractor was busily engaged in removing the slide material from June 1, 1937, to July 26, 1937,

there being about 35,000 cubic yards of such materials to be moved. He further advised that the slide removal work interfered with the oiling work which was subcontracted to contractor E. C. Gerber whose equipment was tied up on other projects in eastern Oregon so, because of inability to secure another oiling outfit, it was not until the first of September that he was able to start the oiling on the Toledo-Simpson Creek job but he completed the work in 22 days. He recommended in view of the circumstances surrounding this job that the extension requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Orion, Birkemeier & Saremal, contract No. 1868, for grading and construction of bituminous macadam surfacing on the Bonneville-Eagle Creek Section of the Columbia River Highway, in Multnomah County, requested an extension of time of 60 days, from July 31, 1937, to September 30, 1937, within which to complete this project. They alleged their failure to complete the project within the specified time limit was due to delays caused by the noncompletion of the Bureau of Public Roads Project 28A on the adjoining section, which project was supposed to have been completed early in the year but was actually not completed until August 20, 1937. The Engineer advised that the Bureau of Public Roads Contract 28A is the Tooth Rock Tunnel project and as stated by the contractor was not completed until considerably later in the year than was anticipated, resulting in unavoidable delays in the completion of the state project. He further advised that the traveling public has not been particularly discommoded by the delay inasmuch as the old paved road has been available for travel at all times. He recommended that the extension of time requested be granted without penalty notwithstanding that there has been some increase in cost to the state for engineering supervision, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Averill & Corbin, contract No. 1900, for the construction of an undercrossing project on the Butteville Road-Hubbard Highway under the Southern Pacific Company's tracks near Aurora, in Marion County, requested an extension of time, from January 31, 1937, to October 9, 1937, within which to complete this job. They alleged their failure to complete the project within the specified time limit was due to the marine strike which prevented the delivery of structural steel that was being shipped from the east by boat. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended in view of the circumstances that the extension requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

S. S. Montague, contract No. 1904, for grading and surfacing the Mills Bridge-Jordan Creek Section of the Wilson River Highway in

Tillamook County, requested an additional extension of time, from August 31 to September 18, 1937, within which to complete this job. Mr. Montague alleged that the additional time required is solely for completing the delivery of crushed materials in stock piles for future use, the amounts of such materials having been increased above those contemplated in the original contract. The Engineer advised that the completion date specified in the contract was May 31, 1937, but this time was extended to August 31, 1937, because of enforced shutdowns due to the order of Governor Martin closing the area during the fire hazard season last fall. The work was also delayed, he said, because of bad weather conditions. He added that all of the road work that comprises the federal aid portion of the project was completed prior to August 31 and that the work undertaken subsequent to that time consisted of stockpiling maintenance rock, the quantity of which was increased over the contract amount because of the oiling work which was done on this road this summer. He recommended in view of the circumstances that the extension requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Parker-Schram Company, contract No. 1916, for grading, paving and construction of structures on the Ross Island Bridge-Schiller Street Section of the East Portland-Oregon City Highway, in Multnomah County, requested an extension of time of 30 days, from September 30, 1937, to October 30, 1937, within which to complete this project. They gave the following reasons for failure to complete the project within the specified time limit: (1) inability of the state to provide access to certain portions of the project for which right of way had not been acquired; (2) delays due to failure of the contractor on the Milwaukie Avenue Viaduct project to complete this structure within the anticipated time limit; (3) difficulties encountered by the state in securing right of way from the Southern Pacific Company for the ramp approach to Milwaukie Avenue at the Milwaukie Avenue viaduct; (4) delays due to interference resulting from operations of the Public Utilities affected by the improvement. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He particularly mentioned that right of way for the Milwaukie ramp was not secured until after the first of October and the construction of the ramp was extra work that was not contemplated at the time the original contract was awarded. It would not be possible, he said, to complete the grading and paving of this ramp before the end of the 30-day extension that is now requested by the contractor. He recommended, in view of the fact that the contractor's delay for failure to complete the job within the specified time limit resulted from things beyond their control, that the extension requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

NOV 17 1937

Harold Blake, contract No. 1925, for grading and paving the Pringle Creek-Illaha School Section of the Pacific Highway, in Marion County, requested an extension of time of 20 days, from September 30 to October 20, 1937, within which to complete this project. He attributed his failure to complete the project within the specified time limit to the fact that the curing period for the concrete pavement did not terminate in time so that the pavement could be used in completing the required shoulder work. The Engineer advised that the paving work was all completed by September 6 but that the contractor was not permitted to use the new pavement until the period of curing had expired so it was necessary to defer the shoulder work and some other details until the first of October, necessitating an overrun of time limit of 20 days. He recommended that the extension be granted but that the contractor be charged for the assessed engineering costs incurred by the state subsequent to the date of completion specified in the contract. He submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Consolidated Highway Company, Inc., contract No. 1929, for grading, surfacing and oiling the Rock Creek-Wallowa Section of the Wallowa Lake Highway, in Wallowa County, requested an extension of time, from August 31 to October 15, 1937, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the fact that the contract was not awarded to them for 28 days after bids were received; also to the fact that the amount of work actually done exceeded the amount contemplated in the original contract. The Engineer advised that the contractor's statement as to the award of the contract is correct. He also advised that the amount of work performed exceeded the estimated amounts by approximately five per cent. He recommended that the extension requested be granted but that the contractor be penalized an amount equal to the engineering costs that the state has incurred on this job subsequent to September 29, due to the fact that the contractor did not prosecute the oiling work with reasonable promptness thereby increasing the cost of supervision and causing the traveling public considerable inconvenience. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Hall, contract No. 1934, for surfacing and construction of bituminous macadam on the Tolman Creek-Siskiyou Section of the Pacific Highway, in Jackson County, requested an extension of time of 18 days, from August 31 to September 18, 1937, in which to complete this job. He gave no reasons for his failure to complete the job within the specified time limit. The Engineer advised that Mr. Hall could easily have finished this project within the specified time limit if the grading contractor on the adjoining section had finished his contract on time. The delay, he said, was due entirely to this cause and was absolutely no fault of Mr. Hall for which reason he recommended that the extension of time be granted without penalty.

He submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

E. C. Hall, contract No. 1967, for furnishing crushed rock in stock pile for the Bend-Crescent Section of The Dalles-California Highway, in Deschutes and Klamath Counties, requested an extension of time, from May 31 to October 5, 1937, within which to complete this job. He gave no reason for failure to complete the work within the specified time limit. The Engineer advised that bids were taken for this work on November 5, 1936, but the contract was not awarded until April 10, 1937, hence the contractor is entitled to the extension of time requested without penalty, particularly so in view of the fact that the state has incurred no extra expense for engineering supervision and no interference has been caused to the normal flow of traffic on this road. The Commission approved the recommendation by unanimous vote.

Jacobsen-Jensen Company, contract No. 1968, for grading and paving the Turkey Hill-Chenoweth Park Section of the Pacific Highway, in Douglas County, requested an extension of time of 30 days, from September 30 to October 30, 1937, within which to complete this job. They alleged that their delay was caused by slow delivery of materials. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct, that Jacobsen-Jensen Company had contracted with another party to furnish the materials, but, after the work was started, other projects came up and this party assumed more work than he could accomplish which resulted in the overrun of time limit specified in their state contract. He gave as his thought that the reasons given for the delay should not be considered ample to relieve the contractor of the payment of penalty and he recommended that the extension of time be granted subject to the condition that the contractor be charged the engineering costs incurred on this job subsequent to the date of completion specified in the contract. He submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Edwin C. Gerber, contract No. 1988, for oiling the McKenzie Pass-Little Butte Section of the McKenzie Highway, in Deschutes County, requested an extension of time of 28 days, from July 31 to August 28, 1937, within which to complete this project. He gave no reasons for his failure to complete the job within the time limit specified. The Engineer advised that there is no apparent reason why Mr. Gerber should not have completed this job within the time limit specified other than that he entered into other contracts that took him longer than he anticipated, such as subcontracting the road mix portion of the Itschner & Rigdon contract on the Fremont Highway north of Paisley. The state has incurred no loss for engineering supervision on account of the delay, he said, neither has the travelling public been inconvenienced any more than it would have been had the

contract been completed within the specified time. He recommended therefore that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1851, 1868, 1899, 1900, 1904, 1925, 1929, 1934, 1962, 1968, 1969, 1988, 1991, 1993 and 1995 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1851, with Consolidated Highway Company, Inc., for grading, surfacing and oiling the Toledo-Simpson Creek Section of the Corvallis-Newport Highway, in Lincoln County. Completed September 22, 1937.

Contract No. 1868, with Orino, Birkemeier & Sarnal, for grading, surfacing and bituminous macadam on the Bonneville-Eagle Creek Section of the Columbia River Highway, in Multnomah County. Completed September 29, 1937.

Contract No. 1899, with Parker-Schram Company, for grading the Salt Creek-Gold Lake Trail Section of the Willamette Highway, in Lane County. Completed October 14, 1937.

Contract No. 1900, with Averill & Corbin, for construction of an undercrossing to carry the S. P. tracks over the Butteville-Hubbard Secondary Highway, north of Hubbard, in Marion County. Completed October 9, 1937.

Contract No. 1904, with S. S. Montague, for grading and surfacing the Mills Bridge-Jordan Creek Section of the Wilson River Highway, in Tillamook County. Completed September 18, 1937.

Contract No. 1925, with Harold Blake, for grading and paving the Pringle Creek-Illahe School Section of the Pacific Highway East, in Marion County. Completed October 20, 1937.

Contract No. 1929, with Consolidated Highway Company, Inc., for grading, surfacing and oiling the Rock Creek-Wallowa Section of the Wallowa Lake Highway, in Wallowa County. Completed October 16, 1937.

	1938	
7949	Feb. 19	Lane County. Junction City-Eugene Secondary Highway. Side-walk construction north and south of Santa Clara. State requested to assume maintenance. Request denied.
		Clatsop County. County Agent asks permission to maintain signs at County line. Request denied.
7950		Klamath Falls. City Council opposes reduction by Congress in 1939 Federal Aid Funds.
		Bend. Robert W. Sawyer inquires regarding Third Avenue railroad grade separation project.
		Wolf Creek Highway. Senator Franciscovich inquires in regard to oiling between Elsie and Necanicum.
		Pacific Highway West. Maintenance of sign north of Corvallis directing traffic to State Game Farm denied.
		Mail route. Commission's aid sought for continuation of Burns-Valley Falls mail route.
		Shelter Shed. Portland realtors request Commission to construct shed on Canyon Road Section of Tualatin Valley Highway. Request denied.
7951		Marshfield. Adoption of route of Oregon Coast Highway through town requested by Mayor. Selection of route deferred pending completion of Bunker Hill Section and Sherman Ave. project.
		Eddyville-Blodgett Secondary Highway. Improvement requested by Corvallis Chamber of Commerce.
		Hillsboro-Woodburn Secondary Highway. Oiling of Hillsboro-Newberg Section requested by J. W. Raynard.
		Nehalem Secondary Highway. Improvement between Mist and Coast Highway Junction requested by Granges.
		Crater Lake Highway. Erection of monument marking site of old Fort Klamath requested by D.A.R. Referred to Engineer.
		Oregon Coast Highway. Permit to transport donkey-engine sled, 78 feet overall length, denied A. C. Anderson, Salem.
7953		Surveys. List ordered since last meeting confirmed.
		Extension of time. Consolidated Highway Company granted extension on Pendleton-Mytinger Section.
7954		Contracts completed and accepted:
		Milwaukie Avenue Undercrossing, Hoffman Construction Co.;
		Pendleton-Mytinger Section, Consolidated Highway Co.;
		Bend-Crescent Section, E. C. Hall;
		Lake County Line-Gap Ranch Section, Babler Bros.;
		Timber bulkhead in Gresham, Frank Watt Construction Co..
7955		Agreements, et cetera, as follows:
		Tillamook County, purchase of county-owned equipment for use on Wilson River Highway;
		Erickson & Schmidt Logging Co., transportation of logs in Tillamook County across state property;
		L. H. Hoffman, payment for steel for use in construction of Quartz Creek Bridge;
		Department of Agriculture, vacation of rooms in Agricultural Building, Salem;

Subject

7955 Feb. 19

Agreements, (continued):

Tillamook County Court, acquisition of timber strip from Weyerhaeuser Timber Company;
Shirley Kingsbury, payment in lieu of reconstruction of pipe line on Medical Springs Secondary Highway;
City of Hood River, lighting Hood River Bridge;
Schmeer, Williams & Gentemann, furnishing rock for Shuttler Flat-Condon Section of John Day Highway;
Columbia River Packers' Association, purchase of Rooster Rock, in Multnomah County;

7956

Oregon American Lumber Corporation, State to retain title to steel girders used in railroad over Wolf Creek Highway;
E. W. Williamson, et al, payment for damage in connection with Ontario Grade Separation Project;
City of Klamath Falls, reconstruction of Main Street;
Oregon-Washington Railway and Navigation Co., Union Pacific Company, Multnomah and Hood River Counties, reconstruction of Columbia River Highway between Eagle Creek and Cascade Locks;

Bargain and Sale Deed conveying to Julia and Bert O'Brien property in Lincoln County;
Bargain and Sale Deed conveying to George and Dorothy Campbell, property in Lincoln County;
Bargain and Sale Deed conveying to R. B. Johnson property in John Day;
Quitclaim deed conveying to Southern Pacific Company property on S. E. 13th Avenue, Portland;
Quitclaim deed conveying to Ernest Koble property in Jackson County, south of Ashland;
Quitclaim deed conveying to Southern Pacific Company property north of Coos Bay.

7957 March 23

Minutes. Commission approves meetings held on Nov. 29, 30, & Dec. 1 and December 21, 1937.

Linn County. County's indebtedness for construction of South Santiam Highway. No action.

Forgery bond. Commission approves purchase of \$100,000 bond. Fidelity bond. Bids to be taken at next meeting for blanket bond covering Highway Department employees.

7958

Acquisition of real property. Resolution adopted.

7963

Right of way. Adoption of policy in regard to acquiring property in advance of contracting deferred.

Condemnation. List of properties required.

7964

Resolution authorizing condemnation, if necessary.

7965

Albany. Resolution authorizing condemnation of properties required in connection with overcrossing project.

7968

Maintenance headquarters. Construction of buildings at Forest Grove, Sontex, Brothers and Medford approved.

7969

Albany. Damage to properties due to grade changes necessitated by overcrossing project. Attorney to contact owners.
Multnomah County. Upper Columbia River Highway. Acquisition of Minnie T. Reed property. \$12,000 authorized.

	1938	
7969	Mar. 23	Neskowin. Acquisition of William S. Walton property deferred.
		Portland. Acquisition of Multnomah Falls and Wahkeena Falls properties from City considered.
7970		Oregon Coast Highway. Purchase of Viola Lee Pratt property and Adelaide Williams property. Option authorized.
		Gearhart. Offer of James L. Conley, Portland, representing Gearhart Park Company, to sell beach frontage, rejected.
		David Douglas. Naming of state park suggested by Robert W. Sawyer.
		Clatsop County Court to erect monument in David Douglas Park adjacent to Wolf Creek Highway.
7971		Port Orford Chamber of Commerce. Re-interment of remains of Chief Tag-On-Ecia requested by Chamber. Request denied.
		State parks. Erection of crosses and benches requested by Reverend Wm. Wallace Youngson of Tillamook. Denied.
		Otter Crest. Construction of memorial building requested by Mrs. Helen M. Warren, through Governor Martin. Denied.
		Lane County. Offer of S. C. Armitage to donate park site adjacent to Coburg County Road. No action
7972		Lincoln County. Acquisition of 120 acres between Oregon Coast Highway and Pacific Ocean. Nelscott Land Company and E.W. Chandler, owners, ask \$21,000 for property.
		Flowage easements. U. S. Army Engineers request easements on four state parks and two units east of Bonneville Dam.
		Agreements, et cetera, signed:
		Deed conveying land in Douglas County to Sarah E. Mulkey;
		Deed conveying land in Lane County to Fred H. and Mary Brown;
		Deed conveying property in Lane County to George Stonefield;
		Deed conveying land in Jackson County to Walter A. Sumner;
		Agreement with Albany Seed Company covering settlement for right of way for Albany Overcrossing Project.
7973	Mar. 24	Bids, as follows:
		Middle Bridge-Black Bridge Section, oil mat surface;
		Bandon-Port Orford Section, crushed rock in stock piles;
		Little Nestucca River Bridge Section, pile trestle and steel I beam bridge;
7974		Albany buildings;
		Marshfield buildings;
7975		Orient buildings;
		West Portland buildings;
		Scrap bridge steel from Sullivan Gulch Overcrossing.
7976		Permit. Pratt Truck Service, Portland, request overheight permit from Portland to Wilsonville. Request granted.
		Overheight permits. Policy adopted with respect to future permits for transportation of overheight loads.
		Tigard. C. I. Scoffin inquired as to plans for revision of Pacific Highway West through town.
		Pendleton. Mayor and delegation request reopening of East Court Street. Commission approves statement, in writing, specifying neutral stand in matter.

Yocom; Snake River Slides-Ontario Section, Rogers Construction Co.; Gibbs Ranch-Baker Section, O. C. Yocom.
8010		
8011		Oregon City. Security & Investment Company property. Conference with Jack Latourette, attorney. Chairman. Action of Commissioners Aldrich and Tou Velle approved by Chairman Cabell. Loan. \$750,000 loan approved to provide funds for 6-month period beginning July 1, 1938. Oregon City. Security & Investment Company property. New appraisals authorized. Condemnation favored, if necessary. Illumination. Commission approves trial lighting on Ross Island Bridge-17th Avenue Section, Portland.
8012		World's Fair. Participation in New York Fair to consist of distribution of Oregon literature only. \$20,000 budgeted for 1938 and like amount for 1939 participation in San Francisco Fair. Traffic signals. Cooperation on 50-50 basis for installations on highway routes within municipalities.
8013		Signs. Circular letter to maintenance superintendents approved regarding removal of signs and billboards. Payment for cost of removal of signs approved from state funds. Linn County. County's indebtedness to State for construction of South Santiam Highway. Settlement discussed. Jackson County. Pacific Highway. Resolution abandoning Bear Creek-Talent Section of old route of Pacific Highway.
8015		Old Oregon Trail. Resolution abandoning portion of Nelson-Malheur County Line Section which has been reconstructed, also, retaining certain portions of said section.
8018		Umatilla County. County Court requests that old route of Old Oregon Trail between Pendleton and Stanfield be designated a state secondary highway. Resolution adopted designating above section as a state secondary highway.
8019		Date for next regular meeting set for April 28 and 29, 1938

Portland, Oregon, November 29, 1937.

The State Highway Commission met informally with members of the Advisory Committee on publicity matters at 8:00 o'clock p. m. in the Rose Room of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary
J. M. Devers, Attorney

The following members of the Advisory Committee were present: Robert W. Sawyer, Bend; Merle Chessman, Astoria; Ed W. Miller, Marshfield; Ray Conway, Portland; John A. Laing, Portland; Frank Jenkins, Klamath Falls; Hugh Ball, Hood River; Charles Reynolds, LaGrande; R. R. Cronise, Albany. Mr. Harold B. Say, Director of the Travel and Information Department, was also present.

Matters of mutual concern and relating to the activities of the Travel and Information Department were discussed briefly. Among other things was the request of the delegation that came before the Highway Commission on July 8, 1937, and headed by Walter Meacham, Portland, requesting that the name "Old Oregon Trail" be printed on future state highway maps. It was explained to the committee members that the Commission told the delegation that it was opposed to printing the name "Old Oregon Trail" along the route of this highway because of the confusion that would result and particularly because the general traveling public finds it more convenient to follow a highway that is designated by number rather than by name, the numbers being shown on the map at numerous locations along the route; further, that while the Commission objects to placing the name of the highway along the route, it would consider printing the name "Old Oregon Trail" in the legend in one corner. The members of the Advisory Committee were asked to express their ideas on this subject. They indicated that they had no choice in the matter and would be satisfied with any decision that the State Highway Commission reached.

The matter of erecting markers along state highways at historical locations, as has been suggested by Mr. Harry Failing of the Oregon Journal, was brought up for discussion. The committee members indicated that they would be satisfied with any decision that the State Highway Commission might render with regard to this matter also.

After further informal discussion, it was arranged that the Advisory Committee should make its formal report to the Commission at 11:00 o'clock a. m. on the following day.

Following the meeting with the Advisory Committee, Mr. Miller and Mr. Chessman requested the State Highway Commission to make the following improvements to the Oregon Coast Highway, on behalf of the Coast Highway Association:

NOV 29 1937

(1) Grade the remaining two-mile section south of Arch Cape Tunnel. They declared that this project is of first importance and should be given priority over others.

(2) Construct a lining in the Arch Cape Tunnel.

(3) Widen the present road around Neahkahnie Mountain, which is narrow and will be dangerous to travel when this road is opened up for general public use.

They alleged that the entire coast district is particularly anxious for the construction of these projects at the earliest possible time and suggested that the Commission sell one-year, two-year, or three-year short-term bonds to secure funds with which to finance the work.

Chairman Cabell advised that the Commission realizes the condition of the road around Neahkahnie Mountain and knows that it should be widened, and hopes to make progress on this road as funds will permit.

Mr. Miller then asked for the following improvements to the Oregon Coast Highway in Coos County:

(1) Reconstruction of the highway between North Bend and Marshfield and improvements to the present highway between Marshfield and Coquille. In regard to the North Bend-Marshfield Section, Mr. Miller pointed out that the existing pavement on Sherman Avenue in North Bend becomes very slippery when wet and should have a nonskid wearing surface applied thereto in order to prevent accidents. He also suggested, in view of the high cost to reconstruct the entire highway between North Bend and Marshfield, that such work could be done by stage construction, as the urgency of traffic demands. He urged the Commission to let a contract as soon as possible for the reconstruction of the Bunker Hill Section just south of Marshfield.

(2) Improvements looking toward the elimination of flood conditions south of Coquille and between Coquille and Marshfield. Mr. Miller advised that the U. S. Army Engineers are just now completing a flood-control survey which involves the construction of a drainage canal across the summit between Coquille and Marshfield and which they believe will effectively control the flood situation in this district. He said that he believed the Southern Pacific Railroad Company would be willing to cooperate in the cost of construction and gave as his thought that the project could be brought to realization if the State Highway Commission would also cooperate. He suggested that the Commission contact the members of the Flood Control Board relative thereto. He further suggested, as an aid to flood control south of Coquille, that the dike section be raised.

Mr. Miller also asked the Commission to consider the improvement of the Coast Highway between Siletz River and Newport and urged the Commission to declare a permanent route for this section as soon as possible. He also asked for improvements south of Reedsport to eliminate curves where accidents frequently occur, and the elimination of two sharp curves a few miles south of

this point, where there have been a number of accidents. He mentioned the Newport-Reedsport Section as being satisfactory in its present location. The Hauser-Coos Bay Section, he said, is not in good condition, but he questioned the advisability of repairing the same because of the possibility of the highway being relocated in the near future.

The Pistol River Mountain Section, Mr. Miller said, is in need of improvement. He gave as his understanding that the Commission has it in mind to relocate this section at a lower elevation and cautioned against the same because of the sliding condition of the soil. He said that sentiment in this district favors improving the highway in its present location by elimination of curves and widening. As another project on the Oregon Coast Highway, Mr. Miller suggested a widening project just north of the California state line. He pointed out that the State of California has already widened its portion of this road, which creates a bottleneck at the Oregon line which is a hazard for the traveling public. He suggested that this section should be widened between the California line and the Winchuck River bridge, which would effectively eliminate the hazard.

Chairman Cabell advised that the Commission would bear in mind the projects mentioned by Mr. Miller and give them due consideration at the proper time.

The meeting was declared adjourned at 9:00 o'clock p. m.

W. B. Aldrich
State Highway Engineer

H. B. Glaisyer

Chairman Cabell announced that awards would be made at 4:00 o'clock p. m. in the same room.

Messrs. John Laing, Frank Jenkins, Charles Reynolds, and Ed W. Miller, representing the Advisory Committee of the Travel and Information Department, were present. Mr. Laing was spokesman for the group. He reported briefly on the action taken by the Advisory Committee on the report rendered by Mr. Harold B. Say, Director of the Travel and Information Department, covering activities of his department during the past year. He said that the Advisory Committee approved Mr. Say's report unanimously and, as a result of the showing made, adopted a resolution unanimously requesting the Highway Commission to appropriate and make available for the Travel and Information program during 1938 the sum of \$101,160.00, representing the total of a budget which was submitted and approved for distribution as follows: magazine advertising, \$52,700.00; newspaper advertising, \$18,000.00; production, including radio, \$4,000.00; bulletins and maps, \$10,650.00; photography, postage, special advertising, salaries, office costs, et cetera, \$15,810.00. He also said that the recommendation that such sum be appropriated was accompanied by a further recommendation that the amounts for the several items be not considered final and definite but that the Director of the Travel and Information Department be allowed to use his own judgment throughout the year in modifying any of the special allocations. He presented a copy of Mr. Say's report, which, he said, the committee has approved and is submitting to the Highway Commission as a supplement to its oral recommendations.

Mr. Laing also stated that the Advisory Committee adopted, in addition to its recommendation pertaining to the appropriation and manner of expenditure of the same, a second recommendation to the Highway Commission suggesting better camping conditions and general roadside beautification. He presented a copy of the recommendation, which reads in part as follows:

"Oregon State Highway Commission
Salem, Oregon

Gentlemen: Following discussion of the attractions Oregon offers

NOV 30 1937

to the world the Advisory Committee adopted the following motion made by Judge Robert W. Sawyer and seconded by Ray Conway:

"That it is the opinion of the Advisory Committee that a necessary concomitant of an efficient advertising undertaking is a study of the thing that is advertised for the purpose of bringing about such improvement as may tend to larger sales, and therefore the committee recommends to the Highway Commission the appointment of a committee to make a study of Oregon conditions tending to affect tourist travel, said committee to make recommendations for changes and betterments that will lead to a more efficient meeting of modern tourist advertising competition and tend to enlarge tourist business in the state."

Mr. Reynolds added that the members of the Advisory Committee are well pleased with the way the moneys budgeted to the Travel and Information Department have been spent.

Chairman Cabell thanked the members of the committee for their services and said that the Commission would take under advisement their recommendation for the appointment of a committee to study Oregon conditions tending to affect tourist travel. Motion was made by Commissioner Aldrich that the Commission adopt the budget of \$101,160.00 for the Travel and Information Department as recommended by the Advisory Committee. The motion was duly seconded by Commissioner Tou Velle and was declared by the Chairman to have passed by the unanimous vote of the Commission.

Mr. Reynolds then conferred with the Commission in behalf of the Oregon Trail Association. He asked the Commission for the following improvements on the Old Oregon Trail and Columbia River highways:

(1) Widening and resurfacing of the 6-mile section between Ontario and Payette Spur Junction;

(2) Widening the undercrossing at Durkee and flattening the curves approaching it;

(3) Reconstruct a 7-mile section through the John Troy property 3 miles east of Pleasant Valley;

(4) Complete the widening and resurfacing of the Muddy Creek-Baker Section and construct bituminous macadam surfacing thereon;

(5) Reconstruct the section between North Powder and Union, which is narrow, crooked and unstable;

(6) Reconstruct the section between Arlington and John Day River by straightening and widening;

(7) Reconstruct the section between The Dalles and Portland for the convenience and safety of modern traffic.

Mr. Reynolds was informed by Chairman Cabell that the Commission will give his projects due consideration in the formulation of future highway programs.

A delegation representing the Eugene and Klamath Falls Chambers of Commerce came before the Commission in regard to the Willamette Highway. Included in the delegation were County Judge Fred Fisk of Lane County; H. S. Merriam, Goshen; O. D. Upton and Ernest McCulloch, Springfield; and Charles G. Briggs, Eugene; also Mr. Frank Jenkins, Klamath Falls. Judge Fisk was spokesman for the group. He urged the Commission to complete this highway as soon as possible so as to make it available for through travel at the earliest possible date. He recalled that, in accordance with an agreement entered into heretofore by Lane County and the State Highway Commission, the County intends to pay off its indebtedness for state highway construction about the first of the year. He asked the Commission to spend at least a part of this money for surfacing the newly-graded portion of the Willamette Highway. The Commission took the matter under advisement.

Mr. Briggs, of the Booth-Kelly Lumber Company, asked the Commission to modify its recent order reducing the load limit on the McKenzie Highway between McKenzie Bridge and Springfield so as to permit loads weighing 75 per cent of the maximum specified by law. He said that under the present ruling, which was ordered by the Highway Commission at its meeting on November 17, and which prohibits loads weighing in excess of 50 per cent of the legal limit, log haulers cannot operate, and if this order is not changed to permit heavier loads, it will be necessary for the lumbering and logging operations affected to close down, putting several hundred men out of employment.

Chairman Cabell advised that the Commission found it necessary to order a reduced load on this road in order to keep it from going to pieces under continuous heavy traffic; also, that the cost of maintaining state highways has been increasing, especially on the roads that are being subjected to logging traffic, and the Commission is forced to do something to keep the maintenance costs to a minimum so that funds will be available to match the Federal Aid funds, and it appears that the only way to do that is to order a reduction in loads on certain highways, which was done in the case of the McKenzie Highway and several other highways. The Engineer advised that he did not recommend a reduction in loads on the McKenzie Highway until inspection revealed that to be absolutely necessary in order to preserve the present surfacing. If legal-limit loads were allowed to continue, he added, it would not be long before the road would go to pieces and the state would be put to heavy expense to repair the same.

Mr. Briggs suggested that 75 per cent loads be given a trial and advised that, if the road still showed signs of failure under such loading, they would not object to going back to 50 per cent weight loads. He also agreed to stop log hauling on this road during heavy rains. After further discussion the Commission consented to try out the proposition as suggested by Mr. Briggs and accordingly, by unanimous vote, adopted the following resolution in regard thereto, with the understanding that the trial period would run until about Christmas time, when the 50 per cent reduced load limit will be replaced if inspection by the Engineer reveals that to be necessary:

WHEREAS, on the seventeenth day of November, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

McKENZIE HIGHWAY from the McKenzie Bridge to the east city limits of Springfield, in Lane County;

and

WHEREAS, the Commission is uncertain at this time as to whether or not existing conditions warrant the imposition and enforcement of the limitations fixed in the said resolution, which order and load limit, if enforced, will, the Commission is advised, necessitate the closing down of log hauling and logging operations to the extent served by said highway, and thereby cause approximately five hundred men to be out of employment; and

WHEREAS, because of said conditions and because of the desire of the Commission to impose only such order and restrictions as the interests of the general public require and as the safety and permanency of the roads demand, it is the judgment of the Commission at this time that said order be modified as a temporary expedient, and, if subsequent conditions disclose that the original order and limit should be reinstated, then the same will be reinstated by subsequent action of this Commission.

NOW, THEREFORE, BE IT RESOLVED that the resolution and order made and entered into by the Commission on the seventeenth day of November, 1937, with respect to the McKenzie Highway, be and the same is hereby modified to read as follows:

The maximum weight of combined load and vehicle which shall be permitted on the McKenzie Highway between McKenzie Bridge and the east city limits of Springfield shall be restricted to the following weights: the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed the product of four hundred fifty (450) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) percent of the maximum limit set by law for any one axle.

BE IT FURTHER RESOLVED that, except as modified herein, the said resolution and order made and entered into by the Commission on November 17, 1937, shall remain in full force and effect except as heretofore modified or changed by the order of the Commission.

BE IT FURTHER RESOLVED that this resolution and order shall be in full force and effect until changed, modified, or rescinded by the Commission.

A delegation from Roseburg, consisting of Messrs. A. C. Marsters, W. C. Harding, Harris Ellsworth, and Senator C. W. Clark, came before the Commission and renewed their request that the North Umpqua Road be placed on the state secondary highway system. They alleged that this road is one of the most important roads in the county and is the County Court's first choice of a road to be improved in the Federal Aid secondary highway program. They urged the reconstruction of the Roseburg-Rock Creek Section as the first project.

Chairman Cabell advised that the Commission has this project in mind and has not forgotten the wishes of the delegation as heretofore expressed, but is not able to make any commitments or promises at the present time in regard thereto.

Mr. Harding then asked the Commission to remove a rock ledge from the old Pacific Highway near its junction with the new Pacific Highway at the north city limits of Roseburg, which, he said, constitutes a traffic hazard. He estimated that this could be done at a cost of about \$500 and urged the improvement as a safety measure. The Engineer recommended that the request be granted. The Commission approved the recommendation by unanimous vote.

The County Court of Linn County, consisting of County Judge J. J. Barrett and County Commissioners Harry W. Cooley and H. A. Renninger, came before the Commission in regard to the county's indebtedness to the state for construction on the Santiam Highway, amounting to approximately \$59,650.00. The Court gave as its understanding that the Highway Commission took action at one time relieving the county from contributing additional funds to this project when the road was placed on the Federal Aid System in 1932, in which case the county owes the state nothing. Judge Barrett presented a statement of the account as the County Court understood it, which statement the Commission referred to the Engineer to check against the Highway Department's figures, with instructions to render a report thereon at the next meeting. The Commission also ordered that a search be made to ascertain whether or not there is any record of action by the Commission relieving the county from further obligation on this road.

The County Court of Tillamook County, represented by County Judge H. H. Rosenberg and County Commissioners E. H. Lindsey and E. G. Anderson, came before the Commission in regard to the land which, according to previous agreement and understanding, the Weyerhaeuser Timber Company proposes to deed to the state for park and recreational purposes, adjacent to the Willson River Highway. Also present were Mr. Wells Gilbert, representing the Weyerhaeuser Timber Company, and County Judge Donald T. Templeton, of Washington County.

The question arose whether or not the company should deed this property direct to the state or to Tillamook County. Judge Rosenberg stated that the Tillamook County Court is not particular whether title is conveyed to the county or not, but it might be better to handle the matter that way because the county has quite a large park program under way and could improve the area in such program. He advised that the county has three parks laid out along the Wilson River Highway and proposes to improve them as W.P.A. projects, and the park now under discussion would fit in with their plans very nicely. Chairman Cabell gave as his thought that the state should own this property, especially since it lies adjacent to the highway. However, if the Commission could be assured that the county would deed the property over to the state after its W.P.A. work has been accomplished, then he would not object to the county taking title to it in the first instance.

The State Highway Engineer gave as his thought that it would be a good idea for the county to take title to the property at this time in order to facilitate needed cleaning-up work and development, provided the county will agree to deed it to the state later on. After further discussion, it was mutually agreed that the timber company should deed its property to Tillamook County in the first instance, subject to the following understanding:

(1) The county will immediately begin the development of the property for public park and recreational uses and will, with W.P.A. forces, clean up and burn debris and other objectionable materials so far as finances are available;

(2) The county, while it still has title to the property, will not sell or dispose of any part of it except to the state and will not lease any part of it or in any way alienate or encumber the property but will maintain the title free and clear of any encumbrances so that it subsequently may be deeded to the state;

(3) The deed from the company to the county shall contain provision that the property shall forever be maintained for public park or recreational purposes and that if the property or any part of it is abandoned for such use then such abandoned portion shall revert to the grantor;

(4) The county shall, within five years from the date of the conveyance by the company to the county, convey to the State of Oregon, by proper deed, title to the property, and thereafter the state shall maintain the property for public park or recreational uses.

The County Court and Mr. Gilbert expressed their acceptance of these conditions, whereupon the Commission instructed the Attorney to prepare a form of agreement covering the matter, it being understood that the timber company will not deliver its deed to the county until said agreement has been executed.

Judge Rosenberg then brought up for discussion the matter of continuing the W.P.A. work on the Wilson River Highway, particularly the proposition submitted by the counties involved relative to the furnishing of county

equipment for use in connection therewith. He said that if the Commission will approve this project the counties will turn their equipment over to the state with the understanding that it will be returned to the counties, when the work is done, in as good condition as it was when it was placed on the job, subject to reasonable depreciation. The Engineer estimated that it would cost about \$50,000 to put the equipment in good working condition and to keep it in good state of repair. The Commission deferred a decision in this matter pending a check of the budget. The delegation was informed that such check would be made shortly and a decision rendered before the first of the year. Later in the session the Commission instructed the Engineer to have an inspection made of the county equipment to ascertain its condition so that it can be determined whether or not there would be any advantage gained in using the county equipment on this job rather than state equipment.

The Commission adjourned at 1:00 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Mr. E. W. Williamson, Bend, came before the Commission in regard to damages to his property located in Ontario, which, he declared, will be greatly devaluated by the construction of the railroad grade separation project in this town. Mr. Williamson's property consists of a service station at the southeast corner of Oregon Avenue and North First Street in Ontario. He was informed by Chairman Cabell that the Commission has heretofore considered his claim but has not yet arrived at a decision in regard thereto, so no information can be given today. The Attorney was instructed to inspect the property and advise the Commission what, in his estimation, the property is worth today and what it will be worth later on when the grade separation project has been completed, to enable the Commission to determine to what extent Mr. Williamson's property has been damaged, if at all.

A delegation from Hood River County, consisting of County Commissioners J. D. Smullin and R. W. Perry; County Engineer C. M. Hurlburt; E. O. Blanchard, R. S. Hazeltine, E. E. Lage, and A. W. Peters, all of Hood River; Lyle McIsaac and W. C. Smullin, of Parkdale, came before the Commission and asked for the reconstruction of the Hood River Secondary Highway from a point at the top of Severson Hill, about $1\frac{1}{2}$ miles south of Dee, southerly to Parkdale, a distance of 3 or 4 miles. County Commissioner Smullin said that this section is very weak and is practically impassable during the winter season; in fact, for a 3-weeks period last winter it was impossible to use the road. They urged the Commission to reconstruct this section this year, if possible; and, if not possible to do so, to at least put on a sufficient amount of rock so that the road can be kept open for travel throughout the winter. They declared that this project is the most important road project in Hood River County.

County Commissioner Perry urged the following improvements on the Mt. Hood Highway: (1) Eliminate a dangerous curve and widen the grade at a point known as Whiskey Creek Junction; (2) Reconstruct the highway at a point known as Fikes Corner, involving reconstruction of the highway on new alignment to eliminate curves. He said this is an important project because it

involves a connection with a county road on which there is a condemned county bridge, which bridge will either have to be repaired, or replaced by a new structure, and they would like to know as soon as possible just what plans the Highway Commission has for reconstructing the highway because the location of their bridge will depend largely on such plans. Mr. Perry also asked for the installation of road signs at the county road junction in the town of Odell and for the elimination of the curve and the widening of the highway embankment at the county road junction just south of the Parkdale Road.

Chairman Cabell advised that the Commission is not in a position to make any commitments now for the projects mentioned but will be pleased to consider them in the preparation of the program for next year's construction.

Mr. Hurlburt brought up for discussion the matter of maintaining lights on the Hood River Bridge on the Columbia River Highway at Hood River. He said that the wiring for the lights needs to be repaired and asked the Commission to assume such responsibility and to maintain the lamps at state expense. He further stated that if the Commission will do this the city of Hood River will furnish electricity for the lights notwithstanding the fact that the bridge is located outside the city limits. The Commission agreed to this proposition by unanimous vote, it being in conformance with its established policy with regard to such matters. The Attorney was instructed to prepare an appropriate form of agreement covering the matter and to forward it to the Hood River City Council for acceptance.

Mr. Hurlburt also brought up for discussion the matter of placing the Odell-Summit county road on the secondary highway system as a substitute for the Interstate Bridge Secondary Highway No. 280, which was recently eliminated from such system. He was informed that the Commission does not have sufficient funds available to assume this extra burden at this time without sacrificing the improvements on the Hood River Secondary Highway.

A delegation from Harney and Deschutes Counties, consisting of County Judge Nelson B. Higgs, of Harney County; Senator Robert M. Duncan, Burns; A. A. Bardwell, Mayor of Burns; County Commissioner William Baer, of Deschutes County; Don Peoples, Secretary of the Bend Chamber of Commerce; M. H. Kundert, Bend; M. O. Tims, President, Burns Chamber of Commerce; J. J. Donegan, C. R. Bennett, and James Mowrey, Burns, came before the Commission and urged additional improvements on the Central Oregon Highway. Judge Higgs headed the group. He read aloud a letter dated November 29, 1937, directed to the Oregon State Highway Commission, in which the Harney County Court asks the Commission to allocate to the Central Oregon Highway for the year 1938 the sum of \$300,000 or more. Also, in which were given numerous reasons in support of this request. He urged the entire completion of the road, including oiling, by 1939.

Mr. Tims spoke for such improvement from the commercial standpoint, pointing out the large tonnage of produce that has to be trucked over this highway annually. He also said that on account of the condition of the existing road, the freight rate for trucking over the same was increased 10 percent

in 1937. He predicted a large increase in production during 1938 on account of the completion of the Vale and Owyhee irrigation projects and gave as his thought that the people are entitled to better road conditions in order to place this produce on the market. He referred to the hotel service in the town of Burns and advised that their best hotel, which was burned last year, cannot be replaced until the Central Oregon Highway has been constructed to modern standards.

Mr. Tims also spoke for the improvement from the traffic standpoint, alleging that there was a considerable increase of traffic over the Central Oregon Highway during 1937 and predicting a corresponding increase each year hereafter. He urged improvements to this highway also from the standpoint of mail deliveries.

Mr. Donegan endorsed the remarks of the other speakers.

Senator Duncan referred to discussions in the legislature when the matter of appropriations for the Coast Bridge Construction Program was discussed. He said that the objections of the Eastern Oregon people to the bridge program were withdrawn upon assurance that the Central Oregon Highway and the Fremont Highway would be given first consideration after the bridges were completed. He gave as his thought that, if any cut is to be made in the allocation to any of the counties, such cut should be made in the amounts allocated to the coast counties in view of this understanding, and that the central and eastern Oregon counties should not be required to suffer thereby. He said that all that they are asking for is that the Central Oregon Highway be made a dustless road by 1939, it being very important that the producers on the Vale and Owyhee irrigation projects have a dustless outlet for their products.

Mr. Peoples stated that the people of Bend are more interested in seeing the Central Oregon Highway completed than any other highway.

The delegation was informed that their arguments on behalf of the Central Oregon Highway will be given due consideration in the allocation of future funds, but no commitments can be made today.

Mr. Peoples and Commissioner Baer then brought up for discussion matters pertaining to the Deschutes Irrigation project. Mr. Peoples advised that the outlook for the construction of this project in 1939 is now very favorable, the only thing remaining to be done being the appraisal of the surplus lands. He pointed out that this project involves the relocation of The Dalles-California Highway, and urged the Commission to adopt definite plans for the highway improvement, because, in his estimation, the cost of constructing the highway could be kept to a minimum if it were known where the highway is to be located and if the plans for the irrigation district could be made to conform with the plans for the proposed highway. The Engineer concurred in the viewpoint of Mr. Peoples and requested authority to make a location survey for the revision of this highway in Jefferson County south of Madras. The Commission approved the request by unanimous vote.

Mr. Peoples also inquired whether or not there were any funds available for surfacing the Warm Springs Highway between Madras and the Deschutes River, in addition to the funds which the Commission proposes to spend for additional grading work south of the Warm Springs Agency. He was informed that the Commission has no funds for such purpose at the present time.

A delegation representing the City Council of the town of Molalla was present in regard to the paving of the unpaved portions of the Woodburn-Mt. Hood Loop Secondary Highway, which passes through their town, particularly the strips on each side of the paved center portion. Included in the delegation were Dr. E. R. Todd, Mayor, and Fred Damm, City Recorder. Dr. Todd said that they understood the Highway Commission to say, when they asked for such improvement last year, that the work would be done during the 1937 season, so they spent about \$20,000 for a new water main in anticipation of the same, and they would like to know now what the Commission plans to do in regard thereto.

Chairman Cabell advised that the project was included at one time in the Commission's tentative program for this year, but it had to be deferred because of shortage of funds with which to finance it. He added that the Commission still has this project in mind and will do it next year if at all possible, although no definite commitment can be made to the project today.

The County Court of Morrow County, represented by County Judge Bert Johnson and County Commissioners Roy Neill and George N. Peck, was present. Mr. Peck was spokesman for the group, which also included County Engineer H. Tamblin and Mr. Burton. Mr. Peck stated that the County Court would like the Highway Commission to undertake as its first project in 1938, in Morrow County, the reconstruction of the Heppner-Rhea Creek Section of the Wasco-Heppner Secondary State Highway, and the elimination of the curves on the Hardman Hill Section of the Heppner-Spray Secondary Highway. He presented a statement showing amounts that have been expended by Morrow County for primary and secondary highway improvements and advised that the county still has outstanding bonded indebtedness amounting to \$415,000, and has spent a total of more than \$800,000 for primary and secondary highway improvements in addition to the amounts spent for maintenance of county roads.

Mr. Peck also asked the Commission to construct an oil surface on the Oregon-Washington Highway between Heppner and Nye Junction, if possible, but they will be satisfied with oiling from Heppner to Lena if the Commission cannot afford to extend the improvement to Nye Junction. He requested information in regard to the program for Federal Aid Secondary Highways. This was explained by Chairman Cabell, who particularly pointed out that the roads that go to make up the Federal Aid Secondary Highway System must be roads that are not on the Federal Aid Primary Highway System and that approximately half of them must be county roads. Mr. Peck reiterated that their preference project is the improvement of the Heppner-Rhea Creek Section but their first choice for a county road project is the improvement of the road extending south from a place known as Jarmans, on the Lexington-Echo Secondary Highway, at approximately the Morrow-Umatilla County line. He said that no road exists up Big Butter Creek from its junction with Little Butter Creek, but the county has

it in mind to construct a road into that district and they are particularly anxious for the state to improve the present road from Jarmans to Pine City, a distance of about 3 miles, where these two streams converge. He was informed that the Commission would bear this project in mind in the formulation of the Federal Aid Secondary Highway program.

The question of snow removal operations was then brought up for discussion. Judge Johnson said that the County Court is not particularly interested in snow removal operations over Franklin Hill on the Oregon-Washington Highway east of Vinson but would like very much to have the Commission concentrate such activities on the Wasco-Heppner Secondary Highway in the vicinity of Eightmile, which would provide an outlet for the people in this district to Heppner during the winter season. The Engineer was instructed by the Commission to bear this in mind in the program for snow removal in Morrow County.

A delegation from Vernonia, composed of Lester Sheeley, J. W. Nichols, Fred Zeiner, and Wm. L. Moore, conferred with the Commission. Mr. Sheeley was spokesman. They asked the Commission to improve the road between Banks and Buxton, a distance of 5 miles, which, they declared, is now in deplorable condition, being narrow, crooked, and very rough. They gave as their understanding that about 3 miles of this road is on the Wolf Creek Highway location and asked particularly that this section be constructed to proper standards in 1938.

Chairman Cabell advised that the Commission is aware of the condition of this section but wants to complete the section between Elsie and Sunset Camp before it starts the improvement further east, and the Commission cannot say definitely at this time whether or not it will have any money for expenditure on the 3-mile section under discussion during 1938, but will bear the project in mind and will do the best it can.

Mr. Nichols asked for improvements along the Nehalem Secondary Highway just east of Vernonia. He said that a very dangerous condition exists on this section between the office of the Oregon-American Lumber Corporation, which is about $\frac{3}{8}$ of a mile east of the city limits of Vernonia, and the Washington Grade School, which is within the city limits, the highway at this place being on a steep grade and containing a rather sharp curve, which makes it hazardous for school children and other pedestrians. He said the hazard is increased by reason of the fact that the sidewalk is very close to the highway at this point and suggested painting a stripe along the south edge of the highway next to the footpath so that motorists could at all times plainly distinguish the edge of the highway from the footpath; also, that lights be installed to enable motorists and pedestrians to see clearly in foggy weather. He suggested also that safety signs be installed along the south side of the sidewalk near the lumber company's property. Mr. Nichols read aloud a letter signed by the American Legion Commander, the Secretary of the Vernonia Chamber of Commerce, Director of their school district, and the Vice President of the Oregon-American Lumber Corporation, in support of his request.

The Engineer advised that the section referred to is about $\frac{1}{4}$ mile in length, half of which is within the city limits of Vernonia and half outside.

He further advised that it has been the long-established policy of the Highway Commission to refuse to construct and maintain footpaths within incorporated cities and he suggested that the situation might be satisfactorily disposed of by installing sight posts along that portion of the footpath outside the city limits and by installing additional safety signs, and he so recommended, as a trial proposition. The Commission approved the recommendation by unanimous vote.

A delegation from Clatsop County, consisting of the members of the County Court, County Judge Guy Boyington and Commissioners James Elliott and Wm. Larson, and City Manager James O. Conville of Astoria, was present. They inquired when the Commission contemplates adopting the permanent route for the Oregon Coast Highway in Astoria along Astor Street, which matter was the subject of a hearing in Astoria on September 15, at which time the Engineer reported three alternate routes for the proposed connection between Bond Street and Astor Street. They expressed a preference for the most westerly or southerly of these alternates. They were informed that the Commission is now having appraisals made of the property involved and expects to make its decision in the near future.

Judge Boyington brought up for discussion the matter of acquiring right of way for the Oregon Coast Highway across the property of a Dr. Foster just south of Arch Cape Tunnel. He said that when the county acquired right of way for this section, the giving of legal notice to Dr. Foster was overlooked and Dr. Foster now alleges trespass and is demanding payment of \$1500 for three acres of his land that have been taken. He said that Dr. Foster's contention is correct and that the County Court will pay him the \$1500 that he demands if the Commission will approve the same and will give the county credit for such expenditure in the amount that the county owes the state for road construction. The Commission by unanimous vote approved settlement with Dr. Foster on such basis.

Judge Boyington asked the Commission to consider placing on the state highway system the county road which extends from the Oregon Coast Highway, near Warrenton, to Fort Stephens. He said the road is paved and, in his estimation, should be under the control and jurisdiction of the state inasmuch as it leads to a governmental area. The Commission took the matter under advisement.

County Commissioner Elliott asked the Commission to oil the Nehalem Highway between Jewell and Mist. He said the county has a rock quarry adjacent to this section, which the state might use for this project if it so desired. He was informed that the Commission is considering this project for the 1938 program.

A delegation from Marion County, consisting of Harry Crain; County Engineer Nathan C. Hubbs; W. W. Chadwick, President, and C. E. Wilson, Manager, Salem Chamber of Commerce, came before the Commission in regard to the North Santiam Highway. Mr. Crain headed the group, which, he advised, is appearing on behalf of the Marion County Court. They asked the Commission to consider in its deliberations on the following day for the programming of

Forest Highway Funds, an allocation of such funds for the construction of the 4-mile section of this road between Gates and Niagara, where the location will not be affected by the proposed dam in the North Santiam River. They also asked for the surfacing and oiling of the section between Detroit and the junction with the South Santiam Highway, which has already been graded to state standards. The committee particularly requested that the amounts allocated for the North Santiam Highway and the South Santiam Highway be made on an equal basis as in previous years.

Chairman Cabell admitted that the State Highway Commission in previous years has allocated approximately equal amounts to these two highways but now the South Santiam Highway is approaching completion and the point where past investments can be realized; so, if the Commission should concentrate on the South Santiam Highway in programming the next Forest Highway Funds, there is a possibility that this highway can be completed and opened for traffic in 1939; but that cannot be done if available funds are divided between the two highways as in the past.

Mr. Crain pointed out that the North Santiam Highway, east of Detroit, is now graded to state standards and is carrying a large amount of summer traffic. He urged the Commission to do something to preserve this grade by placing surfacing thereon. Otherwise, he said, the road would soon become impassable. After further discussion, during which Chairman Cabell pointed out the uncertainty of federal funds, which might preclude the Commission from undertaking a considerable amount of work that is now contemplated, the delegation was informed that the Commission would give the North Santiam project due consideration in the formulation of the Forest Highway Program.

At 4:00 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Smith Point-Young's Bay Bridge Section of the Oregon Coast Highway, in Clatsop County. 0.77 mile grading and paving. The low bid received for this project was that of the Mountain States Construction Company, Eugene, at \$48,975.00. The next low bid was that of the Oregon Contracting Company, Portland, at \$44,961.50. There were seven higher bidders. The Commission has deferred the award of this contract and has referred the bids received therefor to the Engineer with power to award when certain conditions have been satisfied.

"Heppner Junction Rock Production Project on the Columbia River and Oregon-Washington Highways, in Gilliam and Morrow Counties. Furnish 6,000 cu. yds. crushed rock in stock piles. The low bidder on this job was R. O. Dail and Warren Bros., Inc., Portland, at \$8,600.00. The next low bidder was Smith & Company, Goldendale, Washington, at \$8,730.00. There were 15 higher bidders. The Commission has awarded this contract to the low bidder, R. O. Dail & Warren Bros., Inc., at their low bid of \$8,600.00.

John Day-Oliver Ranch Section of the John Day Highway, in Grant County. 4.48 miles grading and gravel topping. McNutt Bros., Eugene, submitted the low bid for this project with their bid of \$63,446.00. M. L. O'Neil & Son, Eugene, submitted the next low bid at \$64,075.10. There were 25 higher bidders on this job. The Commission awards this contract to the low bidder, McNutt Bros., at their bid of \$63,446.00.

"Kimberly Bridge Section of the John Day Highway, in Grant County. 0.57 mile grading and surfacing and 387 feet timber, steel and concrete bridge. The low bid received was that of Leonard & Slate, Multnomah, at \$54,535.00. The next low bid was that of Tom Lillebo, Reedsport, at \$54,998.00. There are five higher bidders. The Commission has awarded this contract to Leonard & Slate at their low bid of \$54,535.00.

"Poison Creek Section of the John Day-Burns Highway, in Harney County. 7.09 miles resurfacing; also furnish 2,500 cu. yds. crushed rock in stock piles. Babler Bros., Portland, were the low bidders with their bid of \$12,850.00. The next low bidder was E. H. Itschner, Molalla, at \$14,550.00. There were five higher bidders. The Commission awards this contract to the low bidders, Babler Bros., at their bid of \$12,850.00.

"Sardine Creek Bridge Section of the Pacific Highway, in Jackson County. 130 lineal feet concrete viaduct; 302 lineal feet highway roadbed, and 550 lineal feet temporary roadway. The low bid received for this project was that of the Mountain States Construction Company, Eugene, at \$14,328.00. The next low bid was that of Tom Lillebo, Reedsport, at \$16,651.00. There were two higher bidders. The Commission awards this contract to the low bidder, Mountain States Construction Company, at their bid of \$14,328.00.

"Harris Creek-Chalk Cliff Section of the Fremont Highway, in Lake County. 13.73 miles grading, surfacing, and ciling. The low bidder on this job was E. L. Rigdon, Barlow, with his bid of \$91,719.70. The next low bid was submitted by McNutt Bros., Eugene, at their bid price of \$98,890.00. There are ten higher bidders. The award of this contract is made to E. L. Rigdon at his low bid of \$91,719.70.

"Bellmap Springs-McKenzie Summit Section of the McKenzie Highway, in Lane County. Furnish 7,000 cu. yds. crushed rock in stock pile. A. S. Wallace, Roseburg, submitted the low bid for this project at \$12,880.00. Rogers Construction Company, Dayton, Washington, submitted the next low bid at \$13,860.00. There were three higher bidders. The Commission has awarded this contract to A. S. Wallace, the low bidder, at his bid of \$12,880.00.

"Snake River Slides-Ontario Section of the Old Oregon Trail, in Malheur County. Furnish 5,500 cu. yds. crushed gravel in stock piles.

Rogers Construction Company, Dayton, Washington, submitted the low bid for this job at \$7,225.00. Chester T. Lackey, Ontario, submitted the second low bid at \$8,510.00. There were five higher bidders. The Commission has awarded this contract to the low bidder, Rogers Construction Company, at their bid of \$7,225.00.

"Kamela-LaGrande Section of the Old Oregon Trail, in Union County. Furnish 6,000 cu. yds. crushed rock in stock piles. Rogers Construction Company, Dayton, Washington, submitted the low bid for this job with their bid of \$9,720.00. Jones-Scott Company, Walla Walla, Washington, submitted the next low bid at \$10,260.00. There were six higher bidders. The Commission awards this contract to the Rogers Construction Company, the low bidders, at their bid of \$9,720.00.

"Maupin Rock Production Project on The Dalles-California and Wapinitia Highways, in Wasco County. Furnish 15,500 cu. yds. crushed rock in stock piles. The low bid received for this project was that of Smith & Company, Goldendale, Washington, at \$19,440.00. The next low bid was that of Rogers Construction Company, Dayton, Washington, at \$20,152.50. There are nineteen higher bidders. This contract is awarded by the Commission to Smith & Company at their low bid of \$19,440.00."

A delegation from Otter Rock, consisting of J. L. Groff and B. C. Shaver, was present. They said that they are contemplating the construction of a water pipe line to serve the people in Otter Rock, but do not have sufficient funds to finance the same unless the State Highway Commission will permit them to connect their pipe line to the state's pipe line serving the Devil's Punch Bowl State Park, and they asked the Commission for such privilege.

Chairman Cabell pointed out that it is strictly contrary to the Commission's policy to allow private parties to use the state's facilities; furthermore, it would establish an undesirable precedent which would be difficult to avoid in passing on similar requests in the future; so, unless the State Parks Superintendent, who has supervision over the Devil's Punch Bowl State Park, recommends the granting of their request, the Commission will have to deny it. The delegation was referred to the State Parks Superintendent for further information.

A delegation from Oregon City, consisting of Mayor L. O. Harding; City Commissioners W. G. H. Krueger and G. F. Everhart; City Attorney Alden E. Miller; City Manager J. L. Franzen; and Jack Latourette, came before the Commission in regard to widening of Fifth Street (state highway route), between Main Street and Water Street, so as to provide space for four traffic lanes and for the parking of cars. The State Highway Engineer advised that Fifth Street is now wide enough for four lanes of traffic but it is not wide enough to permit the parking of automobiles in addition thereto. He said further that it would cost about \$15,000 to acquire sufficient additional right of way

to accommodate parked automobiles, which the Commission has considered too much to pay, especially since there would be space enough to permit the parking of only four automobiles on the north side of the street, and accordingly has ordered the pavement to be constructed within the present street limits and has asked the city to pass an ordinance prohibiting the parking of automobiles along this section.

Chairman Cabell advised that the Commission does not feel justified in spending so much money to provide parking space for only four cars when the same results could be obtained by prohibiting the parking of cars at this location. It was his thought that, if the city wants to provide such parking space, it should buy the property for the same at city expense. Mayor Harding stated that the City Council has considered this matter and is of the belief that it does not have legal authority to prohibit property owners from parking in front of their premises and they would have grounds for suit against the city if such privilege were taken away from them. He pointed out that the postoffice is located on the south side of the street and that the people who use the postoffice must have a place to park their cars for short periods of time. He also said that the City Council feels that it cannot accede to the wishes of the Highway Commission in this matter.

Commissioner Everhart inquired if the state would assume the payment of damages in the event a law suit was instituted against the city, if the City Council should adopt an ordinance prohibiting parking at this location. He was informed by Chairman Cabell that the Commission is not ready to answer that inquiry today but will take it under advisement. The State Highway Engineer pointed out that there is only one property owner involved in this matter and that the Commission has ordered that further construction on this unit of highway be deferred pending a satisfactory settlement of all right of way matters involved, including the one under discussion.

A delegation representing the Lower Columbia Highway Association came before the Commission and asked for additional improvements along the Lower Columbia River Highway between Scappoose and Astoria. The delegation consisted of the following: Tom Cunning, Secretary, and J. C. Perry, President; C. R. Evenson, Vice President; W. E. Proctor, representing the Rainier Commercial Club; Mr. Engle, representing the Central Labor Council, Rainier; L. C. Hall, representing the St. Helens Chamber of Commerce; J. J. Kocarnick, representing the South Scappoose District; E. F. Doyle, representing the St. Johns Businessmen's Club, Portland; George Rhodes, Scappoose; and the following from Clatskanie: H. B. Hager, E. L. Larson, Chas. H. Miller, and Aldon Bailey.

They were informed by Chairman Cabell that the Commission appreciates the need for improving the Lower Columbia River Highway but believes it inadvisable to proceed with the costly construction that would be necessary until the Wolf Creek Highway has been completed and it is known how much of the Lower Columbia River Highway traffic is going to be diverted to the other route. The Commission has it in mind, he said, to continue the present improvements as far as St. Helens, as funds become available, because traffic conditions are considerably different between Portland and St. Helens from

what they are between St. Helens and Astoria, but it does not believe that it is justified in continuing the improvements beyond that point until the Wolf Creek Highway is opened for travel. In reply to an inquiry as to how long it would take the Commission to arrive at a decision in this regard. Chairman Cabell said that he did not think the Commission would spend any substantial sum of money for reconstruction between Rainier and Astoria within the next couple of years. This concluded the conference.

The Commission adjourned at 5:30 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the Benson Hotel.

Portland, Oregon, December 1, 1937.

The State Highway Commission reconvened at 9:00 o'clock a. m. in Room 204, Benson Hotel, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

County Judge W. R. Cook and County Commissioners F. E. Stangland and T. A. Power, of Jefferson County, came before the Commission in regard to the Warm Springs Highway. They asked the Commission to spend its money for additional grading work on this road south of Warm Springs Agency rather than to surface the sections already graded to state standards, and they particularly requested the Commission to approve an allocation of Forest Highway Funds for the construction of the northerly end of this road beginning at Bear Springs on the Wapinitia Highway and extending southerly therefrom as far as funds will permit. They were informed that their request would be given consideration in the allocation of funds, but no definite promises or commitments could be made at this time.

Mr. Don Peoples, Secretary, Bend Chamber of Commerce; Mr. Allan Wilcoxon, owner of a resort at Elk Lake; and County Commissioner William Baer of Deschutes County, came before the Commission in regard to the Cascade Lakes Forest Highway. They asked particularly for an allocation of Forest Highway Funds for construction work on the northern end of this highway, beginning at the Deschutes National Forest Boundary at about the end of the state secondary highway known as Century Drive, and extending westerly to the resort at Elk Lake. They said that the survey for this road was made in 1934 by the Bureau of Public Roads so that construction could proceed without delay on that account. They urged this project on behalf of recreationists who visit the area, of whom, they said, more than 16,000 were counted during the past twelve months, in spite of the existing narrow, dusty, crooked road.

Chairman Cabell pointed out that there are only limited funds available for forest highway construction and the Commission is particularly desirous of putting as much of this money on the South Santiam Highway as is possible in order to open up this road and make it possible to realize a benefit from the investments heretofore made, and that the Commission prefers to complete going projects before it takes on new ones. This has been the policy of the Commissions in the past, he added, and the present Commission feels that it should be continued. He also pointed out that there is a possibility

of the South Santiam Highway being opened up for travel throughout its entire length within the next two years if Forest Highway Funds are concentrated on this road. He asked the delegation which project it would prefer on the Santiam Highway, the completion of the grading work which would open the highway, at least for summer travel, or the surfacing of the graded sections of this road. Mr. Peoples stated a preference for the grading work. He filed a brief with the Commission in support of the oral arguments presented on behalf of the Cascade Lakes Forest Highway improvement.

The Commission conferred with the following government officials with regard to the programming of the fiscal year 1939 Forest Highway Funds, Oregon's share of which will amount to \$1,254,044, if the present Congress does not reduce the amount of the appropriation therefor, as recommended by President Roosevelt: W. H. Lynch, District Engineer; F. E. Andrews, Senior Highway Engineer; Hal D. Farmer, Senior Highway Engineer; and Tom M. Davis, Highway Engineer, all representing the United States Bureau of Public Roads; James Frankland, Regional Engineer, and F. H. Brundage, Associate Regional Forester, representing the United States Forest Service.

After full discussion, the following program for such funds was mutually agreed upon, subject to alteration in the event Congress reduces the amount of the appropriations:

FUNDS AVAILABLE FOR FISCAL YEAR 1939 PROGRAM

Fiscal Year Authorization, 1939	\$1,254,044
Deduct:	
Admin. & Equipment - 10% (approx.)	<u>125,044</u>
Available for Program - - -	\$1,129,000

TENTATIVE PROGRAM ADOPTED ON OCTOBER 23, 1936, FOR FISCAL YEAR 1939, WITH REVISED ESTIMATES

Route	Project	Length	Original Revised		Remarks
			Estimate	Estimate	
16	Tiller-Trail	6.0	\$ 40,000	\$ 85,000	Surfacing and Oiling
21	Willamette	.8	180,000	150,000	Grading (Tunnel financed separately)
23	Santiam	2.0	100,000	175,000	Grading
24	North Santiam	2.0	100,000	100,000	Surfacing and Oiling
28	Columbia River Highway	1.0	150,000	—	Programmed from old funds
30	Klamath Falls-Lakeview	5.0	100,000	100,000	Grading, Surfacing & Bridge
31	Fremont (10.0)	9.0	100,000	120,000	Grad., Surf., & Bit. Surf.
33	Pendleton-John Day	7.1	35,000	—	Oiled under surf. contract.
34	Pendleton-John Day	7.0	75,000	75,000	Reconstr., Grad., & Surf.
35	John Day-Burns	1.6	100,000	125,000	Reconstr. Grad.
46	Cascade Lakes	4.0	35,000	55,000	Surf. & Bit. Treatment

(Continued on next page)

(Tentative Program for Fiscal Year 1939 Forest Highway Funds, continued:)

Route	Project	Length	Original Revised		Remarks
			Estimate	Estimate	
*29	Fremont (oiling)	16.0		55,000	Road-mix oiling
58	Flora-Enterprise	1.0		100,000	Grading
	Location Surveys		25,000	25,000	
	Maintenance		50,000	40,000	

*This project is to be financed with state funds if it cannot be financed with accumulated savings of Forest Highway Funds.

It was decided that, if Congress should reduce the appropriation, then another conference of the above officials is to be held to arrange a program for the reduced amount.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission; outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>North Fork of John Day River Section - John Day Highway</u>				
5279-Wingfield, D. M.	R/W	4.07	\$10 per a. plus \$99.60	Wells
5280-McKenna, Chas. A.	"	1.24	Land Gratis plus \$35	"
5277-McKenna, Chas. A.	Gravel Pit	2.82	\$25 per a. plus necessary fencing	"
<u>Bertha-Washington County Line Section - Bertha-Beaverton Highway</u>				
5300-Dimbat, Otto	R/W	399 sq.ft.	Lump Sum \$20	Collins
<u>Astoria-Seaside Section - Oregon Coast Highway</u>				
5379-Carnahan, Nell G. (Trustee)	R/W	1.36	Land Gratis plus \$176	Collins
<u>Sunset Camp-Sunset Tunnel Section - Wolf Creek Highway</u>				
5222-Wilkins, John	R/W	10.41	\$30 per a.	Collins
5221-Worthington, Ernest F.	"	0.22	Land \$6, plus \$14	"
<u>Albany Overcrossing Section - Pacific Highway East</u>				
5132-Childs, Chas. and Eagles, Wm.	R/W	1989 sq.ft.	5¢ per sq.ft. plus \$507.24	Gardiner
<u>Harris Creek-Chalk Cliff Section - Fremont Highway</u>				
5250-Lake County Loan and Savings Bank	R/W	0.58	\$20 per a. plus \$504	McChesney
5257- " " " "	"	1.28	\$100 per a. plus \$275	"
5251-Nelson, Ed R.	"	0.78	\$100 per a. plus \$79.50	"
5274- " " " "	Gravel Pit and Haul- ing road easement	8.54	\$100 per a.	"
	Easement	0.97	\$50 per a. plus \$442	
5276-Foster, John A.	R/W	8.72	4.72 a. at \$50 4.0 a. at \$10 plus \$1815	"
5252-Campbell, Chas. E.	"	2.51	1.51 at \$50 1.0 at \$10 plus \$495	"
5392-Summer Lake Grange	"	0.70	Lump Sum \$100 + \$112.50	"
5273-Pollock, J. S. (Correction)	"	6.59	5.0 a. at \$100 1.59 a. at \$10, plus \$295 plus fencing \$877.50	"
5253-Brattain, E. M., Estate	"	5.68	\$50 per a. plus fencing \$1827.50	"
<u>Muddy Creek-Lakeview Section - Klamath Falls-Lakeview Highway</u>				
4153-Stuhr, John	R/W	1.55	\$20 per a. plus \$12	McChesney
<u>Marshfield Section - Oregon Coast Highway</u>				
5090-Hirshman, John	R/W	85 sq.ft.	35¢ per sq.ft.	Benson
5112-Thomas, H. P.	"	10,300 sq.ft.	\$2250 Lump Sum	"
5089-LaChappelle, Nettie M.	"	29 sq.ft.	35¢ per sq.ft.	"
5082-Wall, James H.	"	147 sq.ft.	35¢ per sq.ft.	"
<u>Wilson Ranch-Scottsburg Section - Umpqua Highway</u>				
4646-State Board of Forestry	Stock Pile	6.14	\$5 per a.	Benson
	R/W			

Section, Hwy., & Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Siletz River-Newport Section - Oregon Coast Highway</u>				
4374-Rhoten, George and Fred Williams	R/W	13,385 sq.ft.	5¢ per sq.ft.	McCallister
4390-Campbell, George B.	"	0.44	To be exchanged for 0.9 a. acquired from Atlantic Western Co.	"
4389-Smith, Myrtle	"	0.12	Exchange for old rail- road R/W for property taken	"
4059-Schroeder, Edward	"	1080 sq.ft.	2¢ per sq.ft. plus mov- ing fence \$3.40	"
<u>Shelton Ranch-Flora Junction Section - Lewiston-Enterprise Highway</u>				
3782-Oregon Mortgage Com- pany of Spokane	R/W		Construction of fence, \$47.25	DeSouza
<u>Columbia County Line-Scappoose Section - Columbia River Highway</u>				
3317-Johnson & Hall (A.F.Tice)	R/W		Compromise Settlement for moving building, \$57.50	DeSouza
<u>Reed Creek-Bear Creek Section - Siletz Highway</u>				
5040-U.S.A. (Siletz Indian Reservation)	R/W and Quarry	4.4	\$62.82 per a. plus \$155	McCallister
<u>John Day-Prairie City Section - John Day Highway</u>				
4921-Oliver, Herman & Frank (Correction)	R/W and Gravel Pit	5.98	\$500 per a. plus \$167.25	Wells
<u>Dead Horse Creek Section - Tiller-Trail Highway</u>				
4683-Dwinnell, Stanley W.	R/W and Easement	2.02	Lump Sum \$100	DeSouza
<u>Kinzua Junction-Butte Creek Ranch Section - John Day Highway</u>				
5309-Butte Creek Land, Live- stock & Lumber Co.	R/W	7.87	2.25 a. at \$75 5.62 a. at \$2, plus fencing \$321.65 plus \$15	Wells
<u>Weiser Bridge-Ontario Section - Old Oregon Trail Highway</u>				
5237-Leedy, M. F.	Stock Pile	1.0	\$75 per a.	Wells
<u>West Portland-Cook Overcrossing - West Portland-Hubbard Highway</u>				
5046-Dervoe, Wm.	R/W	13,018 sq.ft.	2¢ per sq.ft. plus \$750 (freeway clause)	Parker
<u>Island Section - Columbia River Highway</u>				
1834-Dabney, Martha A.	R/W and Park	27	\$15 per a. plus \$5	Parker

The matter of acquisition of right of way for a revision of the Oregon Coast Highway across the Knapp property at Port Orford had the attention of the Commission. It appears that Mrs. Knapp is an elderly lady and that she is willing to deed to the state the needed right of way across her property, free of cost; also, that the suggestion has been made to the Commission that her offer be accepted as soon as possible. The Commission instructed the Attorney to contact Mrs. Knapp and secure a deed to this property, if possible.

There was presented to the Commission a letter from the Foster & Kleiser Company, Portland, requesting the privilege of leasing from the state a portion of lots 5 and 6 of Block F, Kerns Addition to Portland, at the northeast corner of the intersection of Grand Avenue and Clinton Streets, on which to erect and maintain an advertising sign. They agreed to pay \$80.00 per year for such privilege. The Commission denied the request by unanimous vote.

The Attorney reported receipt of a letter from Claude C. Inman of Tucson, Arizona, in reply to the Attorney's inquiry as to how much he wants for his property at Port Orford, in which Mr. Inman states that he wants \$5,000 for all of his land but will sell the portion that the state may need for right of way for the proposed revision of the Oregon Coast Highway at this point at the rate of \$100 per acre. The Commission considered the price exorbitant and instructed the Attorney to advise Mr. Inman that the Commission feels that it cannot afford to buy this right of way at the present time in view of the fact that the reconstruction of this section of the highway is not contemplated for the near future.

The Commission had under consideration the matter of acquiring right of way for the East Portland-Oregon City Highway across property owned by the Security Investment Company at Oregon City. The Attorney advised that the company is asking \$72,500 for its property, which amount he considers exorbitant, it being far greater than the value placed thereon by four different appraisers, viz.: B. H. Stewart, \$13,950; A. C. Howland, \$15,160; Harvey Starkweather, \$18,750; and C. W. Parker, Highway Department Right of Way Agent, \$17,470. He pointed out that there is a question whether or not the Security Investment Company owns certain areas that are included in the limits of certain streets that end at the river front. He requested instructions as to how much he should offer them for this property, and the Commission instructed him to go as high as \$20,000 to settle without condemnation; but, if condemnation had to be resorted to, then to restrict the state's offer to \$17,500. Before any money is paid for the property described as street ends, the Attorney was instructed to have a court determine title to the property. The Engineer was instructed to defer advertising the Oregon City project for bids until this right of way matter has been satisfactorily disposed of by either purchase or condemnation.

A letter was presented from H. K. and Stella Noles, Tigard, Oregon, in regard to right of way which the state will need across their property for the West Portland-Hubbard Highway, inquiring as to the status of this project so that they will know how to govern their actions in connection with their chicken business which they operate on the premises. The Attorney advised that the new highway will take practically all of the Noles property, which

he values at approximately \$10,000. The Engineer advised that this particular piece of property is beyond the limits of the section proposed for early construction and will not soon be needed for the new highway. The Commission thereupon decided not to purchase this property at the present time.

The Secretary presented a letter from the West Extension Irrigation District, Irrigon, Oregon, in which the Commission was requested to reconstruct their pipe line across the Columbia River Highway near Irrigon, in accordance with the provisions of Sec. 44-3103, Oregon Code 1930. The Commission deferred action on this matter pending the opinion of the Attorney with regard to the responsibility imposed upon the Commission by such law.

For similar reasons the Commission also deferred action on the request of a Mr. Kingsbury for the reconstruction of his privately-owned pipe line on the Medical Springs Secondary Highway in Union County, about 6 miles east of the town of Union. Mr. Kingsbury has asked the Commission to reconstruct this pipe line or to pay him \$500 cash in lieu thereof.

The Engineer presented several alternate plans for the proposed traffic grade separation structure on the Pacific Highway at the intersection of Denver and Union Avenues, Portland. The Commission, after careful study, tentatively adopted one of these plans and instructed the Attorney to proceed with the taking of options for the right of way that is needed for the same. In the discussion of this matter it was brought out that the Peninsula Public Golf Course proposes to construct a new clubhouse at this location and wants to be certain that the house is located so that it will not interfere with the highway improvement. Furthermore, the proposed highway improvement will require the rearrangement of a portion of the golf course. The Engineer pointed out that the traffic separation structure is not proposed for immediate construction and that the golf club facilities will not necessarily have to be rearranged at this time. He suggested that an agreement be entered into between the Commission and the golf club officials allowing them the use of the highway right of way until such time as the state needs the property, which would eliminate the necessity for the state to pay out any exorbitant sum for the rearrangement of such golf club facilities at the present time. The Commission indicated a favorable attitude toward the Engineer's suggestion but deferred action thereon pending the Attorney's report on the options.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 o'clock p. m. in the same room with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

A delegation from Portland, representing the Metropolitan Association, Inc., appeared before the Commission in regard to the construction of highway arterials in Portland to relieve traffic congestion in the west side business district. The delegation was headed by the Hon. William F. Woodward, President, and consisted of about thirty members, among whom were the following: U. L. Upson, Executive Secretary; City Commissioner Ormond R. Bean; Henry A. Sargent; Dean Walker; Jack Bardee; J. H. Edwards; W. F. Pihl; George Lawrence; David Simpson; Packer Scott; Wilson Clark; Eric Stanford; Milton Marrowitz; Joseph Shemanski; Stephen Hull; and Messrs. Boyce, Friendly, Pearson,

Wade, Rickenback, Andrews, Dean, Davis, Sherrill, Steed, Beatty, and P. L. Jackson.

Mr. Simpson, representing the Building Owners and Managers, said that the Westside District of Portland represents the greatest amount of taxable wealth in the State of Oregon, yet they are not particular how the traffic problem is solved but are agreeable to leaving it in the hands of the State Highway Commission for study because they know that the Commission will give the westside property owners fair consideration.

Mr. Dean, representing the Portland Realty Board and the close-in residential property interests, not including the business property interests, pointed out that the Westside District is now building up rapidly and expanding, and the traffic problem must be taken care of. He also said that they are not particular how this matter is solved but will be satisfied with the most practical solution which will relieve traffic congestion. Mr. Rickenback, representing the Multnomah Civic Club, endorsed the remarks of the other speakers.

City Commissioner Bean stated that the Portland City Council is extremely anxious that something be done to relieve the traffic congestion in the Westside District; in fact, it is a vital matter and this district must be served with through arteries in order to relieve the present congestion. Mr. Bardee endorsed the remarks of the other speakers and added that he has a large investment in properties in the Westside District, which is of little value at the present time, but, in his estimation, the value will increase if the traffic congestion is relieved. He gave as his thought that anything that is done to help the Westside District will also help the Eastside District. He stated his willingness to leave the matter up to the State Highway Commission to solve as it considers best.

Mr. Lawrence, representing the George Lawrence Company, spoke on behalf of business interests. He said that his firm has been in business in its present location for eighty years and is of the opinion that the Westside District has not been given fair consideration in the matter of arterial highway improvements.

Mr. Shemanski endorsed the remarks of Mr. Simpson. Mr. Scott, representing the Packer Scott Company, alleged that traffic congestion in the Westside District is far worse now than it was before Barbur Boulevard was constructed. He said that something must be done immediately to remedy this situation while right of way can be obtained at reasonable cost. He also said that business men cannot proceed with the development of their properties until the highway situation has been disposed of. Mr. Pearson spoke for the improvement on behalf of westside property owners.

Mr. Stanford, representing Olds, Wortman & King, said that Portland's Westside District must have main arteries of travel to relieve congestion, and that Olds, Wortman & King have faith in the State Highway Commission to see that the problem is taken care of satisfactorily. Mr. Edwards stated that, from his observation, traffic congestion in Portland's westside

business district is worse than in any other city that he has ever visited, and under present conditions the city is practically upside down, and that something must be done soon to relieve the congestion and to provide an arterial route for through traffic.

Mr. Boice, representing the Portland Hotel, endorsed the remarks of Mr. Simpson. Mr. Sargent, representing the Simmonds Saw Company, spoke about traffic conditions on First Avenue. He suggested the diversion of traffic from that street so as to relieve congestion along the river front. Mr. Walker, of the Behnke-Walker Business College, alleged that there is practically no traffic congestion in Portland's eastside business district but that traffic on the west side of the river is steadily increasing. He gave as his thought that the westside interests are entitled to relief because they represent the state's heaviest taxpayers. He also mentioned that when the original state highway law was enacted it was intended that the highway revenues should be spent for the construction of state highways outside of Multnomah County and declared that times have changed since then and, in his estimation, Multnomah County and the city of Portland are entitled now to a much greater share of the revenues than they received in the past.

Mr. Markowitz, representing Bushong and Company, spoke for the improvement from the standpoint of safety. Mr. Davis declared that Portland's Westside District has been neglected and something must be done immediately to improve existing conditions. He also declared that it is far more important to build city streets than it is to build roads in outlying districts.

Mr. Sherrill, of Sherrill Company, jobbers; Mr. Steed; Stephen Hull, representing insurance companies; Wilson Clark; Mr. Pihl, representing transfer company interests; Mr. Beatty, representing property owners at Eleventh and Washington Streets; and Mr. Friendly, representing apartment house owners, also spoke for this improvement.

Dr. Wade reiterated the remarks expressed by him at a previous meeting of the Commission by stating that the Commission has "killed" Portland with kindness by constructing seven arteries of travel into Portland without making for this traffic after it gets there. Mr. P. L. Jackson, Editor of the Oregon Journal, gave as his thought that the present problem is one for the state and the city to solve jointly. Senator Woodward concluded the presentation by asking the Commission to give the problem serious consideration with a view to eliminating present conditions by appropriate construction in a series of years. He said that the Metropolitan Association is not asking the Highway Commission to spend its money on any particular project or any section thereof but that any and all moneys available for arterial improvement within the city of Portland be expended upon such artery or arteries as the Commission may deem most practicable to relieve congestion in and adjacent to the westside business district.

The Commission considered and approved the following projects for construction and authorized the Engineer to advertise the same for bids to be received at the regular meetings in January and February:

DEC 1 1937

January 6 and 7, 1938:

Ross Station-Arvard, Paving	38-FA	\$ 60,000
Siskiyou Mt. Project, Grading	38-FA	135,000
Kinzua Junction-Butte Creek, G., S. & O.	38-FA	51,000
Vernonia Bridge	35-NRS	50,000
Hermiston-Columbia School, Oiling	38-FAS	15,000
Forest Boundary-Elgin, G., S. & O.	State	59,000
Mt. Hood, Rock Production	"	36,000
Baker-Durkee, Rock Production	"	9,500
Paradise Creek-Drain, Rock Production	"	19,000
Dillon-John Day River, Rock Production	"	16,000
Hood River, Rock Production	"	18,000
Shutler Flat-Condon, Rock Production	"	13,000
Madras-Deschutes County Line, Rock Production	"	14,000
Missouri Flat (Medical Springs Hwy.), Surfacing	"	7,000
Gibbs Ranch-Cottage Farm (Salisbury), Surfacing	"	11,000
Dairy Creek Bridge	"	15,000

February 10, 1938:

Salem-South, Grading and Paving	38-FA	\$100,000
Lancaster-Jamieson, Grade and Oil	37-FA	70,000
Hill Creek Bridge	38-FA	20,000
Grande Ronde River-East, G., S. & Rock Prod.	38-FAS	25,000
Scappoose-Multnomah County Line, G. & P.	38-FA	100,000
Prairie City-East, Resurfacing	State	50,000
Madras-Deschutes County Line, Rock Production	"	14,000

The Commission considered the adoption of budgets for primary and secondary highway minor betterments for the year 1938. After full discussion, the Commission, by unanimous vote, adopted the following budgets for such projects:

PRIMARY MINOR BETTERMENT BUDGET
1938

Asphalt Pavement	\$ 280
Bituminous Macadam	1,500
Oiled Macadam	160
Untreated Macadam (Stabilization)	5,725
Base & Subbase (Stabilization)	1,000
Shoulders—Graveling and Oiling	4,895
Sidewalks & Foot Paths (Cannon Beach)	2,500
Ditches	2,735
Drains & Drainage Tunnels	7,115
Guard Fence, Sight Posts & Mail Box Posts	29,949
Pipe Culverts	15,992
Widening	5,105
Right of Way Fences	75

(Continued on next page)

Primary Minor Betterment Budget for 1938, continued:)

Seeding, Planting & Oiling for Slope Protection	\$ 1,100
Road Approaches	1,575
Slide Prevention	310
Snow Fence	6,550
Highway Beautification	200
Bridges	25,575
Traffic Signals	18,000
Highway Illumination	2,000
Contingencies	15,661
Supervision	6,000
	<u>\$150,000</u>

Construction Projects and Work ordered by the Commission, including the following:

Drainage Tunnel at M.P. 332.7 between Port Orford and Gold Beach	\$11,200	
Widen Intersection of Pacific and Crater Lake Highways in Medford	1,650	
Widen Pavement at south end of Boulevard in Ashland	325	
Construct Drainage Troughs at Honeyman Park	500	
Daylight Cut at Whiskey Creek on Mt. Hood		
Highway two miles from Hood River	250	
Oil 0.8 mile between Paisley & Lakeview to connect B.P.R. Grading and State Oiling	640	
Oil Foot Path, John Day to Canyon City	300	
	<u>\$14,865</u>	14,865
Reserved for Emergencies		<u>10,135</u>
TOTAL		<u>\$175,000</u>

In this connection the Engineer pointed out that he has set up a reserve in the primary minor betterment budget for emergencies, amounting to \$10,135.00. He was authorized by the Commission to select projects to take up the amount of the reserve provided the total amount of the budget is not exceeded.

MINOR BETTERMENT BUDGET FOR SECONDARY HIGHWAYS
1938

Oiled Macadam	\$ 500
Shoulders	1,000
Guard Fence, Sight Posts, & Mail Box Posts	2,955
Culverts	10,759
Drains	700
Roadbed Widening	1,175
Seeding & Planting for Slope Protection	300
Road Approaches	1,555
Snow Fences	250
Bridges	18,665
Traffic Signals	600
Supervision	4,000
	<u>\$42,259</u>

(Continued on next page)

DEC 1 1937

(Minor Betterment Budget for Secondary Highways. cont.)

(Carried forward from previous page) \$42,259

Construction Projects and Work
ordered by
the Commission, including the following:

Woodburn-Mt. Hood Highway	
Add surfacing material from Colton to Springwater and from Eagle Creek to Sandy	\$ 6,000
Hillsboro-Woodburn Highway	
10 miles of nonskid between Newberg and Woodburn	9,000
Add Shoulder Rock	1,000
Cascade Highway	
Nonskid slippery curves between Clackamas County Line and Silverton	1,800
Add Shoulder Rock	400
North Santiam Highway	
Nonskid slippery curves between Aumsville & Mehama	2,700
Add new Shoulder Rock	600
Silver Creek Falls Highway	
4 miles of nonskid from Salem to Cottage Farm	3,600
Add Shoulder Rock	500
Sams Valley Highway	
3.6 miles of Dust Palliative	2,160
Adrian-Parma Highway	
2.53 miles of SC-2	1,520
Add pitrun gravel to stabilize	750
Lexington-Echo Highway	
8 miles of O-30	5,600
Joseph-Wallowa Lake Highway	
5.7 miles of O-30	4,000
Shaniko-Fossil Highway	
Add fine surfacing material	870
Starkey Highway	
Reconstruction of 1.1 mi. line change to eliminate reconstruction of three bridges	5,000
	<u>\$45,500</u>
TOTAL	\$87,759

The Engineer reported the results of surveys of alternate routes for the proposed revision of The Dalles-California Highway between Modoc Point and Chemult, in Klamath County. He recommended the adoption of what is known as Route No. 1, which bypasses the town of Chiloquin, because it is about .65 mile shorter than the route through the town of Chiloquin and will cost about \$200,000 less to construct. After careful consideration, the Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, for the purpose of making possible a better alignment, a more convenient and serviceable highway, and ultimately contributing to the convenience and safety of the traveling public, the Commission has found it necessary and desirable to relocate that portion of The Dalles-California Highway lying between what is known as Modoc Point on the south and a point on said highway approximately 15 miles south of Chemult; and

WHEREAS, for the purpose of ascertaining and determining the best and most available route, the Commission authorized the Engineer to make an extensive study of all available routes and do such survey work as the Engineer deemed necessary in order to furnish the Commission information and data for consideration in the selection of a route between said points; and

WHEREAS, said survey and study was made by the Engineer, and the records, data and information filed in the Salem office accompanied by the Engineer's recommendation as to choice of route; and

WHEREAS, after a special investigation and inspection on the ground of the several proposed routes by the Commission and after due consideration of all of the information and data submitted by the Engineer, the Commission has selected and designated the route hereinafter defined and described:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively participating, as follows:

1. That the route and alignment of The Dalles-California Highway between Modoc Point and a point approximately 15 miles south of Chemult be and the same hereby is modified and changed and said section of said highway is relocated along and shall hereafter follow the following location and route, to wit:

Beginning at a point in the present The Dalles-California Highway which is located in the Southwest Corner of the Southeast Quarter of Section 15, Township 36 South, Range 7 East, W. M.; said point being what is locally known as Modoc Point; thence in a northerly direction, keeping to the easterly side of the S. P. Company's railroad right of way

to a point in the Northwest Quarter of the Southeast Quarter of Section 21, Township 35 South, Range 7 East, said point being near the place locally known as the Southern Pacific Company's railroad station "Lobert"; thence continuing northerly, crossing the Southern Pacific Company's main line railroad, near said "Lobert" railroad station, and crossing the Williamson River at a point located in the Southeast Quarter of the Northeast Quarter of said Section 21; thence continuing northerly to a point near the Southwest Corner of Section 34, Township 33 South, Range 7 East; thence in a northeasterly direction to a point near the Northeast Corner of said Section 34; thence northerly to a point near the West Quarter Corner of Section 1, Township 33 South, Range 7 East; thence northerly to a point in the present The Dalles-California Highway in the Southeast Quarter of the Southeast Quarter of Section 24, Township 29 South, Range 7 East, W.M., said point being approximately 13.0 miles south of Chemult.

2. That said above relocated line and location shall be and the same hereby is duly adopted and designated as the section of The Dalles-California Highway between said termini.

3. That the portion of said route located between Modoc Point and Williamson River Junction shall be and the same hereby is placed upon the program for immediate construction and the Engineer hereby is authorized to prepare the necessary plans and specifications for the Commission's approval and for the necessary procedure with respect to a call for bids.

4. That the Crater Lake Highway from its connection with The Dalles-California Highway on the existing route at or near Klamath Agency be and the same hereby is extended to connect with The Dalles-California Highway as now relocated, which connecting point shall be at or near the Williamson River Junction, and that said section of the said Crater Lake Highway be and the same hereby is placed upon the program for immediate construction, and the State Highway Engineer hereby is authorized to prepare the necessary plans and specifications for the improvement of said highway, and shall submit said plans and specifications to the Highway Commission for its approval and for the necessary procedure calling for bids for said improvement.

5. That the section of said new alignment lying between the said Williamson River Junction and the northerly terminus thereof, which is a point approximately 13 miles south of Chemult, shall not be improved at this time but shall be placed on the state highway program for construction in the future when funds are available therefor.

6. After the said relocated section of The Dalles-California Highway between Modoc Point and Williamson River Junction has been constructed and is thrown open for public use and after the said extension of the Crater Lake Highway between Williamson River

Junction and a point at or near Klamath Agency has been thrown open for public use, then the section of The Dalles-California Highway along the existing route and lying between Modoc Point and the Klamath Agency shall thereafter be dropped from the state highway system and shall no longer be considered a part of The Dalles-California Highway, but said highway shall be left to revert to the County Court and become a county highway or be abandoned altogether as a public highway, and should said highway be abandoned as a public highway, then the Engineer is authorized and directed to erect such barricades as may be necessary to protect the traveling public using the newly established highway from being diverted to the old or abandoned highway.

7. Until the entire newly located section of The Dalles-California Highway has been constructed and thrown open for travel the section of the existing The Dalles-California Highway between a point at or near Klamath Agency and the northerly terminus of the newly located highway shall remain as a part of The Dalles-California Highway and be maintained as such.

8. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the following parties: County Court of Klamath County and the United States Bureau of Public Roads.

The Commission discussed the letter of Mr. H. Douthit, Oregon City, in regard to construction and maintenance of a stairway leading from Water Street, in Oregon City, down to his boat moorage at the foot of Eleventh Street. Mr. Douthit advises that he has maintained the stairway at this location for a number of years for the accommodation of people who use his boat facilities, but the stairway was wrecked in connection with highway improvement at this point and the engineer in charge refuses to reconstruct the same because it will create a hazard to automobile traffic when the highway is completed.

Chairman Cabell stated that he made a personal inspection of the premises, and, in his estimation, it would be inadvisable to permit Mr. Douthit to maintain the stairway at this point because it would encourage pedestrians to cross the highway, which would, no doubt, result in fatalities when the highway is opened for public use. Furthermore, it would encourage the parking of automobiles at this location and thereby interfere with the free use of the highway by other traffic. He gave as his thought that Mr. Douthit's request should be denied. Commissioners Aldrich and Tou Velle concurred in the viewpoint of Chairman Cabell, and it was so ordered.

The Secretary presented a letter from the Multnomah Industrial Health Association advising that it will be necessary, beginning January 1, 1938, to increase the monthly contributions from \$1.75 per month to \$2.00 per month for the individuals employed by the State Highway Commission to receive the benefits of group insurance in that association. The Commission

DEC 1 1937

approved such increase on the same basis as that on which it approved similar increases by the National Hospital Association and the Physicians and Surgeons Hospital Association at the previous meeting.

The Commission discussed a letter, dated November 24, 1937, from the Attorney with respect to the disposition of cases in Coos County involving the overloading of equipment in log-hauling operations. The Commission decided to handle these cases in accordance with the arrangement effected with the Department of State Police and the Public Utilities Commissioner, and so ordered.

The Commission had under discussion a letter from Dooly & Company, Portland, agents for the General Insurance Company of America, which has been carrying the insurance for the city of Portland on the frame bridges known as the Newberry Street Bridge and the Vermont Street Bridge on Barbur Boulevard, Portland, inquiring, since these bridges have been taken over by the State Highway Department, whether or not the Highway Commission wishes to continue this insurance and will pay the premium therefor, which amounts to \$987.84 for the three-year period ending June 12, 1940. The Engineer suggested that the state assume the payment of this premium, if that can be done legally. The Attorney advised that the Commission does not have legal authority to spend state funds for such purpose. The Commission thereupon instructed the Secretary to inform Dooly & Company of the circumstances and to advise them that, in view of the Attorney's opinion, it will be necessary to let the insurance lapse.

The Commission considered and by unanimous vote approved the following allocations of Federal Aid Highway Roadside Improvement Funds for the fiscal year 1938:

Divisions I and II
Total Allocation - \$17,000

List of Proposed Projects:

Rex Hill-Newberg Section	Pacific Highway West	\$5,000
McMinnville Section	" " "	3,500
Pringle Creek-Illahe School	Pacific Highway East	6,500
Shedd-Halsey Section	" " "	<u>2,000</u>
	Total	\$17,000

Division III
Total Allocation - \$6,480

List of Proposed Projects:

Ashland Undercrossing Section	Pacific Highway	\$2,100
Junction City-Eugene	" "	<u>4,400</u>
	Total	\$6,500

Division IV
Total Allocation - \$5,220

List of Proposed Projects:

Oasis at Brothers	Bend-Burns Highway	
(Exclusive of well - needed for Maintenance Houses to be located here)	Total	\$ 5,200

Division V
Total Allocation - \$7,380

List of Proposed Projects:

Entrance to Pendleton	Oregon Trail Highway	\$ 6,380
(River Bottom Lands, inclusive of water mains)		
LaGrande Underpass		
LaGrande-Island City Section		<u>1,000</u>
	Total	\$ 7,380
	Grand Total	\$36,060

The Commission considered the matter of acquiring additional right of way for the East Portland-Oregon City Highway just north of the Abernethy Creek Bridge at Oregon City, as has been urged by certain interests of Oregon City. The Commission decided that the present right of way is sufficiently wide for highway purposes.

The Commission by unanimous vote adopted the following resolution abandoning as a state highway route the old route of the Pacific Highway West through the city of McMinnville, which has been replaced by reconstruction of the highway on new alignment:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Pacific Highway West in Yamhill County, Oregon; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as part of the completed highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the state highway system the fragment or portion of right of way hereinafter designated and heretofore included within the

DEC 1 1937

area of the right of way of the highway as formerly located, improved and used; and

WHEREAS, in connection with the relocation of said highway there was accomplished a change in the point of entrance of the highway into the city of McMinnville from the north and there was likewise accomplished the rerouting of state highway traffic over other and different streets than those over which traffic using the old location was routed:

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, a majority of members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment of land was formerly within the limits of the right of way of the Pacific Highway West immediately north of the city of McMinnville, but which is now without the limits of said right of way as said highway has been relocated and constructed, be and said fragment of land is abandoned as a part of the right of way of said highway, and that part of said right of way so abandoned and which is outside of the corporate limits of the city of McMinnville is left to revert to the adjoining or abutting property owners or to the control or supervision of the County Court of Yamhill County for highway and/or other public purposes, and those streets of the city of McMinnville over which highway traffic was formerly routed before said highway was relocated are hereby abandoned as streets over which state highway traffic is directed by the State Highway Commission to move and said streets hereby are relieved of any burden imposed thereon by the State Highway Commission and are left to revert to the exclusive control and jurisdiction of the municipal authorities of the city of McMinnville.

2. The fragment of land or right of way hereby abandoned and eliminated from the state highway system and the streets over which state highway traffic formerly was routed are described as follows, to wit:

All that portion of the existing highway right of way lying southerly of the reconstructed highway situated in Sections 15, 16 and 21, Township 4 South, Range 4 West.

Beginning at the intersection of Baker Street and Third Street in the city of McMinnville; thence East along Third Street to "J" Street; thence North along "J" Street to Lafayette Avenue; thence northeasterly along Lafayette Avenue to the north city limits of McMinnville; thence northeasterly to Engineer's Station 61+85.4 of the reconstructed center line of said highway.

In addition to the foregoing description of said abandoned right of way there is attached hereto a blueprint or map, marked "Exhibit 'A'", and by this reference made a part hereof, upon which map there is shown shaded in orange the abandoned section of said highway, which exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and bears date of November 5, 1937. *

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Yamhill County, together with a copy of said exhibit or map, and a copy of said resolution, together with said map, shall be delivered to the Mayor of the City of McMinnville, for such action as said County Court may desire to take with respect to said fragment of land and for such action as the city of McMinnville may desire to take with respect to said city streets, and should said abandoned portion of the highway be further employed for public or private highway purposes, such use shall be entirely under the control and supervision of the County Court of Yamhill County and/or the municipal authorities of the city of McMinnville, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

The Commission also adopted the following resolution by unanimous vote, abandoning as a state highway a portion of the Muddy Creek-Pringle Corner Section of the McMinnville-Tillamook Highway, in Yamhill County, which section is no longer of value as a state highway, since the highway has been reconstructed on new alignment:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Muddy Creek-Pringle Corner Section of the McMinnville-Tillamook Highway in Yamhill County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made

* Map filed in Right of Way Abandonment and Retention File - No. 48

DEC 1 1937

unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of land was formerly within the limits of the right of way of the Muddy Creek-Pringle Corner Section of the McMinnville-Tillamook Highway, in Yamhill County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Yamhill County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All of that portion of the old McMinnville-Tillamook Highway right of way lying on each side of the required right of way for the reconstructed highway between Engineer's center line Station 237+50 and Station 362+50.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated the 5th day of November, 1937, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by

* Map filed in Right of Way Abandonment and Retention File - No. 40

DEC 1 1937

reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Yamhill County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Yamhill County and beyond any responsibility or supervision by the State Highway Commission.

The following resolution abandoning portions of the Columbia River Highway, in Multnomah County, and retaining other portions of said highway, which has been reconstructed on new alignment, was adopted by the Commission by unanimous vote:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Highway Commission found it necessary to relocate portions of the Lower Columbia River Highway in Multnomah County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there has been eliminated from the main traveled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on blueprints, marked "Exhibit 'A'" and "Exhibit 'B'", a copy of each of which is attached hereto and made a part hereof; and

WHEREAS, while certain portions of the section hereinafter described as the parcel to be retained and shown in orange on the attached prints are not required for use as a part of the main or traveled section of the highway, nevertheless the same are required, can be used, and are essential for other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragment or parcel of land hereinafter described as the parcel to be retained and shown in orange on the attached prints; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main traveled portion of said highway, which sections are made unnecessary as a part of the completed highway and are shown in yellow on the attached prints;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment or parcel of land shown shaded in orange on the attached prints, portions of which heretofore were within the right of way proper of the Lower Columbia River Highway but which by reason of the relocation or realignment of said highway are now without the area improved and used by the traveling public but are adjacent to and abut upon the said right of way and are needed for public use, shall be preserved by the Highway Commission in connection with the construction, improvement and maintenance of said highway or the use of the same, which said parcel is described as follows:

All that portion of the Old Columbia River Highway right of way lying on both sides of the reconstructed center line of said highway from the west city limits of the city of Portland to the Columbia County line, except that portion of the old right of way lying on the southwesterly side of the required right of way for said reconstructed highway between Stations 54+50 and 59+50, Stations 210+00 and 219+50, and Stations 270+50 and 279+00.

2. That the fragments of land confined within the areas hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Lower Columbia River Highway, be and said fragments of land are abandoned as parts of the right of way of said highway and said fragments or right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Multnomah County. The fragments to be abandoned are described as follows:

All that portion of the Old Columbia River Highway right of way lying on the southwesterly side of the required right of way of the reconstructed highway lying between Engineer's center line Stations 54+50 and 59+50, Stations 210+00 and 219+50, and Stations 270+50 and 279+00.

3. In addition to the foregoing descriptions of said fragments or parcels of land there are attached hereto prints marked "Exhibit 'A'" and "Exhibit 'B'", which by this reference are made a part hereof, and upon which maps there is shown shaded in orange the parcel of land to be preserved for public purposes, and upon which maps there are shown shaded in yellow the abandoned sections of said right of way. Said exhibits for identification purposes bear the signatures of E. A. Collier, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and bear date of November 15, 1937. *

4. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned sections, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

5. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Multnomah County, together with a copy of said exhibits, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Lower Columbia River Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Multnomah County and beyond any responsibility or supervision by the State Highway Commission.

6. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragment of land to be retained for right of way and other purposes by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

The Engineer requested authority to purchase one central callbox at an estimated cost of \$60.00 for use in connection with tunnel lighting. The Commission approved the request by unanimous vote.

The Commission considered and ordered filed letters from the Portland City Council and the Portland Association of Building Owners and Managers, urging the expenditure of state highway funds for the purpose of relieving traffic congestion on the west side of the Willamette River, in Portland.

* Map filed in Right of Way Abandonment and Retention File No. 50.

DEC 1 1937

A letter from the Port Orford Chamber of Commerce, urging the Commission to build the most durable, economical, and practical road to eliminate high water conditions south of Coquille, had the attention of the Commission. The Commission ordered the communication filed for future reference.

The Commission considered and denied a request from F. R. Beals, Warrenton, Oregon, for cattle-pass construction under and across the Oregon Coast Highway at a point about eight miles north of the town of Seaside, there being no funds available to finance such construction and it being the thought of the Commission that the approval of such construction would establish a precedent that would be difficult to avoid in passing on similar requests in the future.

Letters were presented from C. R. Wilson and W. S. Park, Charleston, Oregon, in regard to the oiling of the Cape Arago Secondary Highway, in Coos County. The Secretary was instructed to reply that, due to uncertainty of funds, the Highway Commission has not yet been able to arrange a program for next year's construction, but the oiling of the Cape Arago Road will have the Commission's consideration in the formulation of such program; further, that even if the Commission finds that it can do some work on this road, it is not likely that the entire section can be oiled.

The Commission discussed matters pertaining to the proposed Albany railroad grade separation project. The Engineer advised that the city of Albany has not yet adopted ordinances with respect to the changes in the grade line of the city streets that will be affected by this improvement. The Commission thereupon ordered that no payments whatsoever for this improvement, including right of way, shall be made until such ordinances have been adopted by the City Council.

The Engineer reported that in conformance with authority previously granted him by the Commission, he has ordered a number of surveys since the last meeting of the Commission. He presented the list of such surveys and asked the Commission to confirm the action. After due consideration, Commissioner Aldrich moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for survey expenditures, are as follows:

Location - - - -	34-2818 - Multnomah County Line-South Section, Pacific Highway.	1st authorization - \$1,600.00
Location - - - -	34-2817 - Sunset Camp-Sunset Tunnel Section of the Wolf Creek Highway	1st authorization - \$ 300.00
Plans - - - - -	20-2826 - Siuslaw Junction-Ross Station Section, Pacific Highway.	1st authorization - \$ 200.00
Stock Pile - - -	6-2813 - Bandon-Port Orford Section, Oregon Coast Highway.	1st authorization - \$ 250.00

(Continued on next page)

(Authorization of location surveys, continued:)

Roadside) - - - 2-2811 - West Side Alsea Mountain, Alsea Highway.
 Fountain) 1st authorization - \$ 150.00

Location - - - 226-2830 - Lombard-Sandy Boulevard Section, N.E. Portland Sec-
 ondary Highway. 5th authorization - \$1,000.00

Right of Way - - 19-2812 - Antelope Canyon Section, Klamath Falls-Lakeview
 Highway. 1st authorization - \$ 150.00

Location - - - - 20-2824 - Hill Creek Bridge Section, Pacific Highway.
 2nd authorization - \$ 100.00

Location - - - - 26-2828 - Union Avenue-Denver Avenue Section, Pacific High-
 way. 3rd authorization - \$1,000.00

Location - - - - -12-2810 - Dad's Creek Bridge, John Day Highway in Grant
 County. 2nd authorization - \$ 100.00

Location - - - - 113-2805 - Narrows South Section, Frenchglen Secondary High-
 way. 2nd authorization - \$ 500.00

The motion was duly seconded by Commissioner Tou Velle and was de-
 clared by Chairman Cabell to have carried by the unanimous vote of the Commis-
 sion.

The Commission considered the following requests for extensions of
 time within which to complete highway construction projects:

Berke Bros., Contract No. 1906, for grading and constructing
 two bridges on the Tunnel Section of the Old Oregon Trail, in Ba-
 ker County, requested an extension of time from May 31 to July 7,
 1937, within which to complete this job. They alleged that inclem-
 ent weather caused them to overrun the time limit specified in the
 contract. The Engineer advised that the reason given by the con-
 tractor for failure to complete the project within the specified
 time limit is correct. He also said that the traveling public was
 not unduly inconvenienced by the delay. However, the state did in-
 cur some extra expense for engineering supervision, which, ordinar-
 ily, he would disregard, but in this particular instance the Bureau
 of Public Roads will not concur in his recommendation to that ef-
 fect, so he has no alternative but to recommend that the extension
 be granted with penalty, amounting to the engineering expense in-
 curred since the date of completion specified in the contract. The
 Commission approved the recommendation by unanimous vote.

Coos Bay Construction Company, Contract No. 1949, for grading
 the Elsie-Nehalem River Section of the Wolf Creek Highway, in

Clatsop County, requested an extension of time from December 15, 1937, to June 15, 1938, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to unusually inclement weather encountered during the spring of 1937; also, that it is impracticable to move earth materials during the winter season, so they are asking that the contract completion date be extended to next spring, which will give them sufficient time to complete the job after weather conditions become normal. The Engineer advised that the contractor has encountered considerable difficulty during the last several months in handling the rock excavation in a certain big cut just west of the Nehalem River and he does not anticipate that the cut will be completely excavated until the latter part of February of next year, there being some 50,000 yards of materials yet to be moved. He pointed out that the finishing work cannot be done until next spring when weather conditions are favorable for suchwork; also, that recent rains have caused numerous slides which will have to be removed before the finishing work can be accomplished. He recommended, in view of the circumstances, that the extension requested be granted but that the contractor be required to pay the extra engineering expense that the state will incur by reason of the overrun of the time limit, over and above the cost of the engineering that would be required in connection with the supervision of the extra work involved. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Washington Asphalt Company, Contract No. 1959, for surfacing and bituminous macadam construction on the Stanfield-Pendleton Section of the Old Oregon Trail, in Umatilla County, requested an extension of time from August 31 to September 15, 1937, within which to complete this contract. The Engineer advised that the contractor overran the time limit only 15 days and that he previously recommended to the Commission the granting of the extension of time without penalty. However, the Bureau of Public Roads will not concur in the recommendation and demands that a penalty be imposed, amounting to about \$275.00, which represents the expense that the state has incurred for engineering supervision subsequent to the expiration of the time limit specified in the contract. He also said that he is still of the opinion that the contractor should not be penalized, regardless of how the Bureau of Public Roads officials feel about it, and inquired whether or not the Commission would assume this extra engineering expense in the event that he is unable to get the Bureau of Public Roads to alter its decision. After some discussion, the Commission decided unanimously to pay the final estimate on this job without penalizing the contractor for overrunning the time limit and to assume the extra engineering expense in the event the Bureau of Public Roads will not reimburse the state for such amount. The extension of time requested was approved by the Commission unanimously on such basis.

The Engineer reported that contracts Nos. 1959, 1964, and 1970, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1959, with Washington Asphalt Company, for surfacing and oiling the Stanfield-Pendleton Section of the Old Oregon Trail, in Umatilla County. Completed September 11, 1937.

Contract No. 1964, with Homer G. Johnson, for furnishing crushed rock in stock pile on the Myrtle Point-Mystic Creek Section of the Coos Bay-Roseburg Highway, in Coos and Douglas Counties. Completed October 4, 1937.

Contract No. 1970, with Harold Blake, for furnishing crushed rock on the Salmon River, McMinnville-Tillamook, and Dallas-Coast Highways, in Polk and Yamhill Counties. Completed September 15, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Multnomah County Drainage District providing for the drainage of certain property adjacent to and south of the district by providing for the drainage water to be carried across the Columbia River Highway, near Portland. (Agreement dated November 30, 1937.)

Agreement with Virginia A. Hickey et vir disposing of their claim arising out of the reconstruction of the Mt. Hood Highway in front of their premises at Brightwood. (Agreement dated November 30, 1937.)

DEC 1 1937

Permit authorizing Frank Forth to construct a trestle foot-bridge at Station No. 522+00 on the Wall Creek-Siskiyou Section of the Pacific Highway, in Jackson County.

Bargain and sale deed conveying unto the city of North Bend 3.51 acres of land at the south end of the Coos Bay Bridge.

The Commission set Thursday and Friday, January 6 and 7, 1938, as the date for its next regular meeting for the receiving of bids. The Secretary was instructed to make the usual arrangements to hold this meeting in the Auditorium of the Public Service Building, Portland.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:00 o'clock p. m.

Henry F. Cabell
Chairman

E. B. Cochran
Commissioner

F. L. Douville
Commissioner

Norman
State Highway Engineer

H. B. Cleary
Secretary

Portland, Oregon, December 21, 1937.

The State Highway Commission met in regular session at 9:00 o'clock a. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on June 17 and 18, July 8, July 28 and 29, 1937.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and by unanimous vote adopted the following resolution relative thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission had under consideration the acquisition of a certain rock pinnacle, known as Rooster Rock, on the Upper Columbia River Highway, for park and right of way purposes. The Attorney advised that the Columbia River Packers Association, Inc., which owns this property, demands the sum of \$10,000 for the same because of its value as a source of rock supply for wing dam construction in the Columbia River and for jetty construction at the mouth of this river, there being a scarcity of suitable rock for such purposes, but they are willing to accept payment in three annual installments. He further stated that the Association is asking practically nothing for the right of way and that the \$10,000 offer might be considered as payment for the portion that is included in the park area, amounting to some 33 acres. He inquired whether the Commission is interested in the acquisition of this property in view of its value from the recreational and scenic standpoint. After considerable discussion and in view of the fact that this rock is very valuable as a scenic attraction for tourists and would undoubtedly be destroyed if not acquired by the state, because of the scarcity of suitable rock supplies for wing dam and jetty construction, the Commission voted unanimously to accept the offer with the understanding that the purchase price would be paid in three annual installments and that interest would not be paid on the deferred payments. The

Commission decided, in view of the fact that this area is being acquired primarily as an addition to the state park system, that three-fourths of the cost thereof, or \$7,500, should be charged to the Parks Department's budget and the balance should be charged to acquisition of right of way.

In the discussion of this matter it was brought out that the only other place in this vicinity where suitable rock could be obtained for wing dam and jetty construction is at a place known as Tunnel Point, where there are 3.85 acres of land owned by a Mrs. Reed across which the new highway has been projected. The Attorney estimated that this property would cost the state some \$15,000 because of its value as a rock quarry. After discussion, the Attorney was authorized by the Commission to take an option from Mrs. Reed for the purchase of the property at such figure if he is unable to secure it for a lesser amount.

The Attorney reported that new appraisals have been made of certain properties located in Lake County that are needed for right of way for a revision of the Fremont Highway north of Lakeview. He was instructed by the Commission to secure new options on these properties for consideration by the Commission at its next meeting.

The Attorney also reported the necessity to condemn certain parcels of property that are needed for various highway improvements and requested authority to start condemnation proceedings. The Commission granted the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the state acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Eagle Creek-Cascade Locks Section of Columbia River Highway
West Portland-Cooke Crossing Section of West Portland-Hubbard Highway
South Marshfield Section of Oregon Coast Highway
Albany Overcrossing Section of Pacific Highway East

land and property owned by or in possession of the following parties and/or persons, to wit:

Eagle Creek-Cascade Locks Section of Columbia River Highway

J. B. Labar

P. J. McGowan and Sons

West Portland-Cooke Crossing Section of West Portland-Hubbard Highway

W. F. Schamoni and Ben H. Jacques

South Marshfield Section of Oregon Coast Highway

H. W. Osborne et al

Elmer Newton

Albany Overcrossing Section of Pacific Highway East

J. F. Howard

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement

or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission adopted as its policy in regard to condemnation cases that hereafter, when requests are made to institute condemnation proceedings, the offers that are to be made to the various property owners involved shall first be approved by the Commission before they are presented to such property owners.

The Attorney brought up for discussion the matter of acquiring the existing logging road through the property of the Grand Rapids Oregon Timber Company, which is needed to provide ingress to Saddle Mountain State Park, in Clatsop County. He recalled that the Company's original demand for this road was approximately \$15,000, which the Commission rejected and ordered that the property be acquired by condemnation, if the company would not sell at the rate of \$15 per acre, which is the amount the Crown Willamette Company is asking for its portion of the road. He further advised that he had received information from a Mr. Dickinson, receiver for this company, to the effect that he did not believe the court which has jurisdiction in the receivership case would approve acceptance of the state's offer, but he believed that the court would approve a price of \$7,500. The Attorney asked the Commission for instructions in regard thereto. After considerable discussion, in which it was pointed out that if the existing road is not acquired it will be necessary to construct a new road about 6 miles long, at a cost probably in excess of \$7,500, the Commission authorized the Attorney to offer the company \$6,000 for its road.

Reconsideration was given by the Commission to the Robertson controversy involving acquisition of some of the Robertson property adjacent to the Pacific Highway (new route) in the Siskiyou Mountains, south of Ashland, Jackson County. The Attorney advised that indications are that it will be necessary to institute condemnation proceedings to acquire the portion of the Robertson land that is affected by the slide conditions caused by the construction of the new highway. He inquired what offer to make to the owners in order to avoid condemnation and advised that the Robertsons have stated that they will not sell their property but will lease it to the state for \$3,000. After considerable discussion the Commission authorized the Attorney to pay the Robertsons \$3,000, if necessary, in order to secure a deed, such amount being made up as follows: \$1,700 representing the value of the house on the property; \$300 representing the loss of the lumber on hand, which was to be used in completing the house; \$600 representing the cost of 12 acres of land at \$50 an acre; and \$400 representing miscellaneous damages.

Chairman Cabell reported on the action taken by the Western Association of State Highway Officials at its special meeting in San Francisco, on December 6, for consideration of the President's recommendation for a reduction in federal aid for road purposes.

The State Highway Engineer reported on matters discussed at the Annual Meeting of the National Asphalt Association during the week of December 6. According to these reports, it was the consensus of opinion of those attending the meetings that Congress would make no change in the setup for the fiscal year 1939 Federal Aid Funds, but that uncertainty would still exist until the apportionment of the funds is actually made, which would not be before the first of the year. In view of the reports, the Commission decided to defer until its January meeting a decision with respect to the immediate construction of the Albany railroad grade separation project. However, the Engineer was instructed to secure a hearing before the Public Utilities Commissioner on this subject as soon as possible, so that no delays on that account will be encountered when the project is ordered to proceed.

The matter of releasing payments to several property owners in Albany for right of way acquired for the Albany grade separation project had the attention of the Commission. The Engineer advised that the Albany City Council has adopted the ordinance approving the changes in the grades of the city streets that will be affected by this improvement, and an executed copy of the same is in the Commission's files. The Commission thereupon authorized the release of payments for the right of way for which options have been approved and deeds already delivered to the state, but ordered that payments for the balance of the right of way be held pending the Commission's decision in regard to this project at the January meeting.

The Attorney reported an offer from a Mr. Roy Enlund to purchase for the sum of \$30.00 a building located on Lot 13, Block 9, Bunker Hill Addition to Marshfield, which lot the Commission acquired from W. D. McLarin for right of way for the Oregon Coast Highway at this place. He said that this building was advertised for sale two different times, - on September 14 and October 22, but no bids were received for the same at either meeting. He estimated the value of the building at \$25.00 and recommended that the offer of Mr. Enlund be accepted. The Commission approved the recommendation by unanimous vote.

The Attorney also reported the offer of Mr. V. Kalafate, Portland, to purchase for the sum of \$25.00 the building located on property acquired from Bert I. Reynolds and Elizabeth Rose Reynolds, in Block 25, West Portland Heights, Washington County, for right of way for the West Portland-Hubbard Highway. He said that the Commission paid \$280 for this property, which is in an isolated section, and that recently the house has been entered and some of the accessories taken therefrom. He recommended, in view of the circumstances, the acceptance of Mr. Kalafate's offer so as to avoid further vandalism, notwithstanding the fact that this building has never been offered for sale in accordance with the usual practice. The Commission decided to adhere to the present practice and to advertise this building for sale. The Engineer was instructed to take bids for same at the next regular meeting.

The Commission had under consideration the offer of Mr. Arthur L. Fitch to purchase for the sum of \$60.00 the building located on the property acquired from Jessie McLarin in Bunker Hill Addition to Marshfield, more particularly on Lots 3 and 4 of Block 10 of such addition, which property the Commission acquired for right of way for the revision of the Oregon Coast Highway at this place. The Attorney advised that this building has been advertised for sale twice—the first time on September 14, 1937, when a bid of \$26.00 was received for the same; and on October 22, when no bid was submitted. He placed a value of \$100.00 on the building and recommended that the offer of Mr. Fitch be accepted. The Commission approved the recommendation by unanimous vote.

The Secretary presented a letter from the Weyerhaeuser Timber Company in regard to the timber strips adjacent to the Wilson River Highway, in Tillamook County, which the company proposes to donate to the general public for park and recreational purposes. The company advises that the conditions of the conveyance of their property to Tillamook County as set out in Chairman Cabell's letter directed to the company, under date of December 6, 1937, are satisfactory and that the company will prepare its conveyance in accordance therewith and will submit the same to the County Court of Tillamook County as soon as possible. The Commission ordered the communication filed in the department records.

The Attorney reported the desirability of securing copies of local newspapers throughout the state in which are advertised tax sales. He pointed out that frequently the county courts advertise certain properties for sale, some of which, no doubt, will be needed some time for highway right of way, and advised that he could watch these sales closely if he had copies of the newspapers in which they were advertised and could ascertain whether or not any of them should be acquired by the state before they pass into private ownership, which possibly might save the state considerable right of way expense. He suggested that requests be made of the county judges, county sheriffs, county clerks and the district attorneys to furnish copies of the local newspapers in which tax sales are being advertised. The Commission approved the suggestion and so ordered.

The Commission had under discussion the Attorney's opinion in regard to Section 44-3103, Oregon Code 1930, pertaining to the construction and maintenance of pipe lines, ditch flumes, et cetera, across public highways. It was the Attorney's opinion that, if this act, as it relates to the authority of the Highway Commission, were construed by the court, and the court were to take into consideration all of the circumstances attendant upon the passage of the several amendments and the purpose sought to be accomplished, the court would hold that the maintenance of structures built under the authority and purview of the act is an obligation of the State Highway Commission with respect to state highways. He also advised that, in his opinion, it is safe at least to say that the disbursement of state highway funds for the maintenance of a structure built under the authority of this act would be justified as legal and valid, if challenged. In view of this opinion, the Commission voted unanimously to pay Mr. Kingsbury as much as \$500, if necessary, in lieu of the replacement of his pipe line on the Medical

Springe Secondary Highway in Union County and authorized the Engineer to pay Mr. Kingsbury such amount upon obtainment from him of a release from present and future obligation with respect to such pipe line. The Attorney was instructed to carry on the negotiations with Mr. Kingsbury and secure settlement for less than \$500, if possible.

As a further result of the Attorney's opinion on this subject, the Commission authorized an expenditure of state funds for the replacement of the 30-inch wooden pipe line belonging to the West Extension Irrigation District, Irrigon, Oregon, which crosses the Old Oregon Trail at approximately Mile Post No. 182, near Irrigon, subject to the condition that the new pipe line shall be of the same kind and size as the existing one. If the district desires to install a pipe line of more permanent type of construction than that which now exists, then the Commission will pay its proportionate share of the cost of the same but will not assume payment of the entire cost of the better improvement. The settlement, in such case, is to be a matter of future adjustment and negotiation. The Secretary was instructed to convey this information to the irrigation district and to state, further, that the Commission is willing for the district to make this installation and will reimburse the district for the cost thereof, upon receipt of a bill for the same, in detail; or, if the district prefers, the Commission will have the work done by state forces.

Reconsideration was given by the Commission to the matter of maintaining lights on the North Salem undercrossing. The Engineer again reported that the city of Salem absolutely refuses to pay any of the cost of lighting this structure, and suggested that the lights be discontinued, as a matter of policy, unless the Commission desires to modify its policy in regard to such matters. After some discussion, the Commission ordered a report from the Engineer for consideration at the January meeting, as to the expense of lighting all of the underpass structures throughout the state that are located within cities.

The Engineer reported on investigations relative to the rerouting of the Columbia River Highway along Astor Street, in Astoria, particularly with respect to the connection between Bond Street and Astor Street. He said that four alternate lines were investigated for this connection, being designated as the "L" line, "L2" line, "L3" line, and "L4" line. The "L4" line, he said, is least desirable because it has more central angle and less curvature than the other lines, and all lines are equal as to grade and amount of grading, so the question of the selection of a route would depend mainly on the cost of the right of way, which the Right of Way Department has estimated as follows: "L" line, \$16,540; "L2" line, \$17,890; "L3" line, \$16,320; and "L4" line, \$18,550. He recommended the adoption of the "L" line, the center line of which leaves Bond Street at the intersection of Ninth Street, thence cuts diagonally across the center of Block 10 and through Lot 4 of Block 11, and enters Astor Street near the intersection of Sixth Street. After careful consideration of all the facts, the Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolution in regard thereto, upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, pursuant to notice given as required by Section 44-120, Oregon Code 1935 Supplement, the Highway Commission met in the City Council Chambers of the City Hall in the City of Astoria on the 13th day of September, 1937, for the purpose of conducting a hearing as provided for in said law with respect to the proposed change of a portion of the route of the Columbia River Highway and of the Oregon Coast Highway within the corporate limits of the City of Astoria; and

WHEREAS, said meeting was called to order by Henry F. Cabell, Chairman of the State Highway Commission, who explained to those assembled the purpose of the meeting and the proposed change in location, route and alignment of said highways within said City, and the Chairman then invited discussion with respect to said matters and extended to all persons present an opportunity to be heard for or against said proposed change; and

WHEREAS, after all who evidenced a desire to be heard had entered their names in the record and minutes of the meeting and had declared their approval or disapproval of said proposed change, the Chairman of the Commission advised that said matter would be taken under advisement by the said Commission and a decision announced at a later date; and

WHEREAS, after due and full consideration of said matters and the arguments and declarations made for and against the proposed change at said public hearing with respect to the change of the route in and through said City, and the Commission being fully advised with respect to all of said matters, it is the opinion and judgment of the Commission that the interests of the State at large will be best served by the adoption of said proposed change of route of said highways in and through said City, all of which will, in the judgment of the Commission, make possible a better alignment, a more serviceable and convenient thoroughfare into and through said City; and, therefore, in the opinion of the Commission the route and alignment of said highways should be altered and modified and should be determined and fixed as in this resolution declared, all of which is in conformance with the notice given and at said hearing heard and discussed.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively participating, as follows:

1. That the route and location of the Columbia River Highway from 16th Street to 8th Street shall be along the following defined and designated route, to wit:

Beginning in the center of Commercial Street at approximately 16th Street, thence turning to the right, in a northwesterly direction to approximately the center of 14th

and Bond Streets; thence along Bond Street to 9th Street; thence turning to the right crossing through the Southwest corner of Block 9 to the center of 8th Street.

2. That the route and location of the Oregon Coast Highway in the City of Astoria shall be along a route designated and defined as follows, to wit:

Beginning at a connection with the Columbia River Highway at 8th Street; thence in a Northwesterly direction crossing Blocks 10 and 11 to the center of Astor Street at approximately 8th Street; thence in a westerly direction along Astor Street, to the westerly terminus thereof, and continuing in a Westerly and then Southwesterly direction to a point in the center of Taylor Avenue at approximately Columbia Avenue, said point being also in the center of the present Oregon Coast Highway.

3. That said above described routes, locations and alignments of said highways and the said designated streets be and the same hereby are adopted as the routes and locations of said highways in the City of Astoria between the termini above designated.

4. That the portion of Commercial Street between 16th and 8th Streets and 8th Street to Columbia Avenue over which state highway traffic has heretofore been directed and routed shall hereafter be no longer considered as routes over which state highway traffic shall be directed by the State Highway Commission in the City of Astoria, but said sections of said streets shall be relieved of the burden of state highway traffic under the direction of the State Highway Commission.

5. That the Engineer be and he is hereby instructed to definitely locate and establish the said routes by proper monuments and markers and make proper record thereof in the records of the Highway Commission, and erect proper signs on the street or streets over which said highways are routed, and proceed with the permanent improvement and maintenance of said highways along the routes herein defined and in harmony with plans and specifications by this Commission approved.

6. That this resolution be entered in the records and minutes of the Highway Commission, and a duly certified copy thereof mailed to the Mayor of the City of Astoria and a like copy to the County Court of Clatsop County.

The Engineer reported the advisability of securing a hearing before the United States War Department in regard to the proposed bridge across Coalbank Slough on the Oregon Coast Highway just south of Marshfield, so as to

secure approval of the clearances of this structure before the contract for the grading of the adjacent sections is awarded. He requested authority from the Commission to present the plans of this structure to the War Department for such approval and to ask for a hearing on the subject at an early date. The Commission approved the request by unanimous vote.

The Engineer also reported the necessity to secure approval by the United States War Department of the plans for the proposed bridge over the Little Nestucca River on the Oregon Coast Highway, in Tillamook County, which project is now included in the Commission's bridge reconstruction program for contracting next year. He requested authority from the Commission to present the plans for this structure to the War Department for such approval and to ask for a hearing on the subject. The Commission approved the request by unanimous vote.

The Commission had under consideration the Engineer's report on a conference that was held with officials of the Mountain States Power Company, Albany, with reference to an agreement covering reimbursement to that company for the cost of revising its facilities that will be affected by the construction of the proposed Albany railroad grade separation project, said report being dated December 13, 1937, and signed by G. S. Paxson, Bridge Engineer. The report contained the following recommendations, which the Engineer advised were concurred in by the company officials: (1) That the state shall reimburse the company for the cost of removing and replacing such of its 10-inch and 12-inch water mains as will be covered by the highway embankment between Baker Street on the south and Lafayette Street on the north, where the grade is raised an appreciable amount above the present grade, which work is estimated to cost about \$7,850; (2) That the state shall reimburse the company for the cost of moving any fire hydrants that are interfered with by the highway project; (3) That the Mountain States Power Company shall assume and pay the cost of rearranging all of its service connections other than fire hydrants; (4) That the Mountain States Power Company shall assume and pay the cost of all revisions to its electric lines.

After full discussion of this report, the Commission by unanimous vote approved the same and the recommendations contained therein.

The Commission considered and ordered filed in the department records the report from the American Association of State Highway Officials showing the amounts of 1938 Federal Aid Funds available to the respective states for new projects, as of December 1, 1937. It was pointed out by the Engineer that Oregon stands ninth in the list of states, with 59.6% of the apportioned amount obligated.

The Commission considered and signed an agreement with Douglas County and the Umpqua Highway Improvement District providing for the payment of the cost of making a location survey of the North Umpqua Highway between Roseburg and Rock Creek. The Engineer was instructed by the Commission to bill the county and the district for the balances due according to the terms of this agreement.

DEC 21 1937

Mr. Russell Hubbard, Reedsport, came before the Commission at this time and asked the Commission to repair and maintain as a state highway route the old section of the Umpqua Highway between its new connection with the Oregon Coast Highway, in Reedsport, and the Scholfield bridge. He said that this section is very much in need of repair, due largely to the volume of Oregon Coast Highway traffic from the south that uses it enroute inland over the Umpqua Highway, it being shorter and more direct than the new connection between the two highways. It was his thought, in view of the circumstances, that the state should maintain the section notwithstanding that it is not now a unit of the state highway system. In the discussion of the matter it was pointed out that the Southern Pacific Railroad tracks cross this section at grade, and when the hearing was held before the Public Utilities Commissioner with respect to the construction of the new highway connection across the railroad company's tracks, the railroad officials demanded that the grade crossing on the old route be closed and did not consent to leave it open for traffic until certain concessions were made with respect to the other crossing, so there is a question as to whether or not the Commission could maintain this section without breaking faith with the railroad company. The Engineer was instructed to investigate and secure an estimate of cost to repair and maintain the old route and to secure from the railroad company an expression relative thereto.

Chairman Cabell advised Mr. Hubbard that if the Commission does finally decide to repair and maintain this section, it would be only as a temporary proposition and any order that the Commission might give to the Engineer with regard thereto would be cancellable at any time.

The Engineer brought up for discussion the matter of changing the name of State Highway No. 40, now known as Bertha-Beaverton Highway, to Beaverton-Hillsdale Highway, inasmuch as the Commission at its previous meeting authorized the changing of the road signs in this vicinity from "Bertha" to "Hillsdale" to conform to the name of the post office. He gave as his thought that it would be proper to change the name of the highway as well as the signs, and so recommended. The Commission concurred in the viewpoint of the Engineer and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, a certain highway has heretofore been known as the Bertha-Beaverton Highway, which highway extends from an intersection with the Tualatin Valley Highway at or near Beaverton and runs thence in an easterly direction through or near the village of Hillsdale (formerly Bertha) to a point on Barbur Boulevard (Pacific Highway West) at or near the intersection of that boulevard with S. W. Slavin Road in the City of Portland, the distance between the beginning and ending points being 6.7 miles, more or less; and

WHEREAS, Because of a change in the name of the post-office, which instead of being Bertha now is Hillsdale, it is deemed advisable to change the name of said highway from Bertha-Beaverton Highway to Beaverton-Hillsdale Highway;

NOW, THEREFORE, BE IT RESOLVED by the Highway Commission, all members being present and affirmatively participating, as follows:

1. That the state highway heretofore known as Bertha-Beaverton Highway and otherwise designated as state highway No. 40 shall be and the same hereby is changed in name so that the same shall be known and designated as the Beaverton-Hillsdale Highway but shall still be known as state highway No. 40.
2. That a copy of this resolution be entered in the minutes and records of the Highway Commission and a duly certified copy thereof delivered to the County Commissioners of Multnomah County and a copy to the Mayor of each of the cities through which said highway may pass, and a copy to the American Automobile Association.
3. That the State Highway Engineer is hereby directed to erect and maintain appropriate road signs along said highway.

The Commission discussed briefly the matter of appointing a committee, as recommended by the Advisory Committee on Publicity Matters, to make a study of Oregon conditions tending to affect tourist travel, and a letter from Robert W. Sawyer, Bend, in regard thereto. Action on this matter was deferred for future consideration.

The Engineer brought up for discussion matters pertaining to the Willamette Highway and in connection therewith recommended the following order of procedure for the completion of this highway from Lowell Junction easterly, except for about ten miles of surfacing, during the summer of 1940:

State Portion

July 1938 - July 1939	Grading	\$135,000
March 1939 - December 1939	Surfacing 20 Miles	150,000
March 1939 - December 1939	Oiling 20 Miles	17,000
June 1940 - October 1940	Surfacing 10 Miles	80,000
June 1940 - October 1940	Oiling 10 Miles	8,000
Total		\$390,000

Bureau Portion

January 1938 - October 1938	Construct Tunnel	\$140,000
March 1938 - September 1938	20 Miles Surfacing and Oiling	100,000
October 1938 - June 1939	Tunnel Lining	80,000
June 1939 - December 1939	Grading	150,000
Total		\$470,000

DEC 21 1937

The Commission by unanimous vote tentatively approved the procedure recommended by the Engineer.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission had under discussion matters pertaining to forgeries committed by a former Highway Department employe, Wilbur L. Moorman. The Engineer was instructed to check the records and ascertain the exact amount of the defalcation and the exact amount recoverable under the Commission's bonds covering Mr. Moorman. He was also instructed to present the facts to the Secretary of State and to discuss with him the matter of securing an additional audit of the State Highway Commission's accounts by a reputable concern, said audit to be in addition to the one recently completed by the Secretary of State's forces.

The Engineer made certain suggestions in regard to the handling of time statements through which Mr. Moorman was able to hide his defalcations. After due consideration the matter was referred to Chairman Cabell and the State Highway Engineer to perfect a method of procedure to be followed hereafter, whereby defalcations such as were committed by Mr. Moorman could not be duplicated by any Highway Department employe.

The Commission also discussed matters pertaining to certain right of way transactions. This matter was referred to Chairman Cabell to inspect the properties in question.

The Commission discussed matters pertaining to the continuation of W.P.A. work on the Wilson River Highway and particularly the amount of the state's contribution for such work and the use of county-owned equipment. The Engineer pointed out that the counties which are sponsoring this work have signed up for a project estimated to cost \$318,000, of which amount the counties are supposed to put up \$200,000, and the state the balance, or \$118,000, but the counties want the state to assume the counties' share of the cost, or the entire \$318,000, although they have indicated a willingness to turn over to the state certain county-owned equipment for use on the job; however, they want it returned to them in as good condition as it was in when it was turned over to the state. He estimated the value of this equipment, new, at \$90,000, and its present value at about \$30,000, and pointed out that it is not in good condition at the present time and that it would cost about \$30,000 to make it usable. He suggested, if the Commission wants to consider acceptance of the proposition, that it would be advisable to purchase the equipment outright from the counties for a nominal sum rather than borrow it. He also suggested that the Commission sponsor a project costing about \$182,000 on this road, which would place it on a par with the Wolf Creek W.P.A. project as far as state funds are concerned. After full discussion of this matter, the Commission by unanimous vote tentatively approved the Engineer's suggestions and instructed him to work out the proposition on such basis with the counties, if possible. He was authorized to offer \$15,000 for the county equipment.

The Engineer requested authority to purchase a safe cabinet, costing approximately \$600, for use in the office of the Highway Commission's Auditor. The Commission approved the request by unanimous vote.

The Commission discussed briefly matters pertaining to the Federal Aid Secondary Highway Program, but deferred action thereon until its next regular meeting in January. The Secretary was instructed to invite the county ty courts of some of the counties in which Federal Aid Secondary Highway projects are contemplated, to be present at such meeting.

The Commission had under consideration the application of the Silverton Hills Cooperative Electric Company for permission to overbuild a short section of telephone line on the Silver Creek Falls Secondary Highway, in Marion County. The Engineer explained that a telephone line now exists on this road, a portion of it being on the north side of the highway and the balance on the south side. He said that the Electric Company has been assigned the south side of the highway for its pole line, with the understanding that it will arrange for the moving of the telephone poles on that side to the north side, so when the lines are completed there will be no crossing of the wires over the highway and there will be only a single pole line on each side of the highway, which is in line with the established policy of the Commission in such matters; however, the Electric Company alleges that it is not financially able to change over the telephone facilities at the present time and wants to defer such change at least until the telephone poles are in need of replacement, which, they anticipate, will be within the next five years. The Engineer advised that there are about twenty telephone poles involved. He suggested the granting of the company's request in view of the financial condition of the company and the fact that only a short section of highway will be affected. The Commission approved the suggestion by unanimous vote.

The Commission also considered the application of the Mountain States Power Company to construct its power line across the Salem-Dallas Highway at two points in the immediate vicinity of a place known as Brunk's Corner so as to avoid cutting down or trimming some fine oak trees at this location. It appears that the company now has a permit to construct its pole line along the south side of the highway at this point, which permit contains provision that no trees shall be cut or trimmed, also, that the power company has endeavored to obtain private right of way so as to avoid trimming the trees and the construction of its wires over the highway, but the owner of the property absolutely refuses to grant the company an easement over his land; so, unless the power company is permitted to trim the trees, it will be forced to construct its wires across the highway at two locations. The Commission denied the request as a matter of policy and ordered that the company be instructed to string its wires through the trees without trimming and to use specially insulated wires for such purpose.

The Engineer requested instructions whether or not to continue to hold the \$5,000 certified check that was deposited by the Gilpin Construction Company and the General Construction Company, pending the satisfaction of certain labor claims arising out of their contract with the Commission for the

construction of the Yaquina Bay Bridge. He advised that a letter has been received from Mr. C. C. Hockley, Regional Director of the P. W. A., stating that the Board of Labor Review of the P.W.A. has carefully considered the various reports regarding the labor claims and is of the opinion that the evidence does not substantiate them, so they are closing their files on this subject. He also advised that the Federal Government is still holding some \$25,000 of the grant moneys due the state in connection with the Coast Highway bridge jobs. He suggested, in view of the fact that the conditions requiring the \$5,000 deposit apparently are satisfied, that the Commission release to the contractor all but \$500, which, in his estimation, would be sufficient to cover any claims that might arise against this job. The Commission approved the Engineer's recommendation by unanimous vote and authorized the release of the \$5,000 certified check upon receipt from the contractor of another certified check in the amount of \$500.

A claim was presented from the Union Pacific Railroad Company covering one-half the expense incurred as a result of the derailment of the Union Pacific train at Oneonta on February 21, 1936. The Commission indicated that it would approve the payment of this claim, which is in accordance with previous oral understanding and agreement with the railroad company officials, but not on the basis that State Highway Department employees were responsible for the accident as was indicated in the body of the claim. The claim was re-referred to the Attorney with instructions to ask the railroad company to submit its claim in detail and to re-word it so that it would not appear that the Highway Department employees were responsible for the accident.

The Commission had under consideration its claim against Harold T. Warren for damaging the gate on the Umpqua River Bridge at Reedsport. The Engineer advised that Mr. Warren drove his car into the gate, necessitating repairs costing \$45.00, which Mr. Warren refuses to pay, and alleges that the state should reimburse him for the damages that he sustained, amounting to \$39.00 for hospital and doctor bills, and \$150.00 for the repair of his car, because, he alleges, the bridge gate was not properly lighted and the accident would not have occurred if the State Highway Department had maintained suitable lights and warning signs at this location. The Attorney gave as his opinion that the Commission would have difficulty in recovering from Mr. Warren in a lawsuit because juries are always more sympathetic with individuals than with public bodies in cases of this kind. After some discussion, the Commission instructed the Attorney to again present the Commission's bill to Mr. Warren and to request the payment of the same but not to go to the expense of a lawsuit to collect it.

Reconsideration was given by the Commission to the matter of dedicating Short Sand Beach Creek Bridge, on the Oregon Coast Highway in northern Tillamook County, to Samuel G. Reed. The Commission on November 17 approved dedicating this bridge to Mr. Reed at the request of the North Tillamook County Chamber of Commerce; but it now appears that the bridge which the Chamber of Commerce had in mind was the one over Necarney Creek which flows into the ocean at Short Sand Beach. The Commission expressed no preference in the matter and left it with the North Tillamook County Chamber of Commerce to decide which of these two bridges should be dedicated in honor of Mr. Reed.

DEC 21 1937

The Commission by unanimous vote adopted the following resolution abandoning as a part of the state highway system a short section of the Pacific Highway (old route) at the north city limits of Roseburg which no longer is of value as a state highway since the highway has been reconstructed on new alignment through the city of Roseburg:

WHEREAS, the Highway Commission by resolution duly and regularly adopted on the twenty-third day of April, 1936, selected the street and/or streets of the City of Roseburg and the route within said City over which to direct and route state highway traffic entering and leaving said City over the Pacific Highway, and said Commission has constructed and improved the said route and the same is now open to public travel; and

WHEREAS, by reason of the rerouting of traffic into and through the City of Roseburg and the selection and designation of other and different streets than those heretofore selected and designated over which to route state highway traffic there has been made unnecessary a short fragment of the Pacific Highway outside of the corporate limits of the City of Roseburg on the north; and

WHEREAS, it is the judgment of the Commission that said fragment or section of said highway which is no longer needed as a part of said highway should be abandoned;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the following described section or fragment of the Pacific Highway in Douglas County, to wit:

Beginning in the center of the existing right of way at Engineer's Station 2524+50, M.P. 198.284, opposite and thirty feet distant from which point the northerly right of way line intersects the westerly line of Prospect Street, if extended; thence easterly along the center line of the old Pacific Highway a distance of 0.09 miles to Engineer's Station 2529+01, M.P. 198.373 opposite and thirty feet distant from which point the northerly right of way line intersects the north city limits of the City of Roseburg, which right of way is 60 feet wide and contains approximately 0.57 acre,

be and the same hereby is eliminated from the route of the Pacific Highway and is abandoned and left to revert to the adjacent or abutting property owners or to the County Court of Douglas County for such public use as the County Court may desire to make of the same.

2. That the route of the Pacific Highway as heretofore used entering Roseburg from the north and following along Winchester

DEC 21 1937

Street to a connection with Jackson Street; thence over Jackson Street to an intersection with Cass Street; thence over Cass Street to an intersection with Stephens Street, and the same hereby is abandoned as the route of the highway into and through said City of Roseburg and said streets or sections thereof over which the said highway has heretofore been routed shall no longer be deemed the route of the Pacific Highway into and through said City, but the route into and through said City shall be as selected and designated by the resolution of the Commission duly adopted on the 25th day of April, 1936

8. For a more specific description of the right of way of said highway hereby abandoned and for a more definite description of the streets or sections of streets of Roseburg over which has heretofore been routed the Pacific Highway, but which are now relieved of any such routing, there is attached hereto a map dated November 17, 1937, which for identification bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and which map by this reference is hereby made a part of this resolution. *

The Commission by unanimous vote adopted the following resolution abandoning as a part of the state highway system a portion of the Pacific Highway (old route) near Green Creek in Josephine County, which is no longer of value as a state highway, since the highway has been reconstructed on new alignment at this location:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Pacific Highway near Green Creek in Josephine County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved and used;

* Map filed in Right of Way Abandonment and Retention File - No. 51

DEC 21 1937

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Pacific Highway near Green Creek in Josephine County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Josephine County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that portion of the old Pacific Highway right of way (which is 60 feet in width) between original Engineer's Station 210+10 and original Engineer's Station 314+17, save and excepting those portions lying within the right of way acquired on revised alignment constructed in 1952.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures K. D. Lytle, Division Engineer, H.G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated the 17th day of November, 1957, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered

* Map filed in Right of Way Abandonment and Retention File - No. 52

DEC 21 1937

to the County Court of Josephine County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Josephine County and beyond any responsibility or supervision by the State Highway Commission.

The Commission had under consideration the abandonment as a unit of the Pacific Highway of the Green Springs Junction-Siskiyou Section of the said highway (old route) in Jackson County, which section has been reconstructed on new alignment. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Green Springs Junction-Siskiyou Section of the Pacific Highway, in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of land was formerly within the limits of the right of way of the Green Springs Junction-Siskiyou Section of the Pacific Highway in Jackson County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

Beginning in the center of the old Pacific Highway at Engineer's Station 69+50, M.P. 330.640, thence Southerly along the old Pacific Highway a distance of 7.379 miles to Engineer's Station 406+10, which right of way is 60 feet wide and contains 55.67 acres.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated November 15, 1937, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. That this Commission recommend to the County Court of Jackson County that the section of highway by this resolution abandoned as a part of the Pacific Highway be designated and maintained as a secondary highway and that the County Court of Jackson County be requested to cooperate with the State Highway Commission to that end and for that purpose.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said exhibit or map, and that a like copy be sent to the United States Bureau of Public Roads.

The following resolution designating the old Pacific Highway route between Ashland and Green Springs Junction as an extension of the Green Springs Highway, was adopted by the Commission by unanimous vote, upon motion of Commissioner Tou Velle, which was duly seconded by Commissioner Aldrich:

WHEREAS, the Highway Commission has relocated the Pacific Highway in Jackson County between Ashland and Siskiyou Station and has permanently constructed said highway over said route and the same is now open for public traffic; and

WHEREAS, by resolution duly and regularly adopted the Highway Commission has abandoned as a part of the state highway system the portion of the Pacific Highway lying between Green Springs Junction and Siskiyou Station; and

WHEREAS, the westerly terminus of the Green Springs Highway is now at a point known and designated as Green Springs Junction and from that point traffic using the said Green Springs Highway going north used the Pacific Highway; and

* Map filed in Right of Way Abandonment and Retention File, - No. 53

WHEREAS, by reason of the realignment and relocation of the Pacific Highway in Jackson County between Ashland and Siskiyou the section of said highway between Siskiyou Station and the point where the Green Springs Highway heretofore connected with the Pacific Highway will no longer be a part of the Pacific Highway but should become a part of the Green Springs Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively participating, as follows:

1. That the section of highway lying between Ashland and Green Springs Junction and heretofore being a part of the Pacific Highway shall be and the same hereby is designated as, and is hereby made a part of, the Green Springs Highway, thereby making the westerly terminus of the Green Springs Highway a junction with the Pacific Highway at Ashland.

2. That the said section of the Pacific Highway which by this resolution is made a part of the Green Springs Highway shall be deemed and considered a part of the state highway system and shall be constructed and maintained as such.

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the County Court of Jackson County.

4. The Engineer is instructed to erect and maintain appropriate road signs along said highway.

The Commission considered and ordered filed resolutions adopted by the Oregon Coast Highway Association at its annual meeting in Astoria on October 11, 1937.

Requests from the residents of Powers, Coos County, for improvements to Powers Secondary Highway from Hoffman Bridge to Powers, had the attention of the Commission. The Engineer advised that this is a major reconstruction project and that it would cost considerably more money than the Commission has available for the same at the present time, unless some other project of more importance is sacrificed. In view of the present financial stringency, the Commission voted unanimously to deny the requests and instructed the Secretary to so inform the petitioners and to advise them of the reason for such action.

The Commission considered and ordered filed a communication from the Salem Chamber of Commerce urging the Commission to include in its 1938 budget provision for additional improvements on the Salem-Dayton Secondary Highway.

The Commission also considered and ordered filed a letter from the Multnomah Civic Club, Portland, requesting that moneys available for arterial highway improvements within the city of Portland be expended in the most practical manner possible to relieve traffic congestion in the westside business district.

The Commission considered a letter from Giles and Dashney, lawyers, Marshfield, on behalf of Coos County residents who use the Enegren Ferry on the Coos River Secondary Highway, renewing their previous request for an extension in the hours of ferry service to include the hours from 5:00 o'clock a. m. to 1:00 o'clock a. m. the following day. The Commission confirmed its previous action on this matter, denying the request, no additional evidence having been presented that would justify the additional expense.

Reconsideration was given by the Commission to the request of the Otter Rock Water District for use of the Highway Department's pipe line at Otter Rock for a period of five years. The State Parks Superintendent, who was present, recommended the denial of this request because of the precedent that would be established and for the further reason that there is a question whether or not the Commission has legal authority to permit the use of this publicly-owned pipe line for private purposes. The Commission approved the recommendation by unanimous vote.

A letter from the Oregon State Hotel Association, urging the Commission to correct the defects in the Roseburg-Grants Pass Section of the Pacific Highway, by eliminating the curves and widening the present road, with the least possible delay, had the attention of the Commission and was ordered filed.

The Secretary presented a letter from the Acting Secretary of the United States Department of Agriculture, Washington, D. C., dated November 27, 1937, advising that the Department of Agriculture has previously approved the proposed system of federal aid highways selected and submitted by the State Highway Commission of Oregon pursuant to the provisions of Section 6 of the Federal Highway Act, and now approves certain revisions in the route descriptions for the entire 7 per cent system and the addition of one new route, being Route No. 42, described as follows: From a point on Federal Aid Road No. 3, northeast of Hubbard, to a point on Federal Aid Road No. 9, northeast of Tigard. Also, advising that with such approval the Federal Aid System for Oregon is 3,403.61 miles, exclusive of 482.11 miles within federal reservations; also, that the present permissible mileage of the system is 3,346.10 miles, consisting of the original 7 per cent of 2,927.80 miles and increments of 418.30 miles subsequently allowed, but exclusive of any mileage within federal reservations. The letter also stated that a total of 131.42 miles of unabsorbed city mileage will be a first charge against the state's next one per cent increment of permissible mileage allowable, upon submission of a showing of 90 per cent completion or provision for completion of the present permissible mileage. The Commission ordered the communication filed for future reference.

The Commission considered and ordered filed communications as follows with reference to the President's recommendation for a reduction in federal aid to the states for highway purposes: (1) Telegram from Senator Charles L. McNary stating his intention to oppose any reduction in federal aid for highway purposes; (2) Letter from Ed. W. Miller, Manager, Oregon Coast Highway Association, advising that the Oregon Coast Highway Association and the people of southwestern Oregon are not in favor of the President's recommendation for reduction in such funds.

The Commission considered and denied the request of the Paisley Common Council for the construction of a rock wall to protect the fill at the approach to the bridge on the Fremont Highway in their town which was damaged by recent high water.

A letter from Mr. L. J. Simpson, Empire, Oregon, requesting information as to the plans of the Commission for the improvement of the Cape Arago Secondary Highway in 1938, had the attention of the Commission. The State Highway Engineer was instructed to inform Mr. Simpson that the Commission has not yet adopted its program for 1938 and there is a question as to how much money, if any, can be allocated to the Cape Arago Road in view of the fact that the Commission must rebuild the Catching Slough Bridge, which will require about \$70,000 of the state's money, and there is a limit in the amount of money that the Commission can spend in this locality this year.

A letter was presented from the First National Bank of Portland inquiring as to the plans of the Commission for relocating the Oregon Coast Highway through the town of Gold Beach. The Commission approved the Engineer's letter replying to this communication. (See letter dated December 23, 1937, directed to Mr. W. F. Bushnell, Assistant Cashier, First National Bank, Portland.)

A letter was presented from Mr. Lester Sheeley, Attorney, Vernonia, thanking the Commission for the courteous treatment that was extended to the delegation from Vernonia at the last meeting of the Commission and urging the construction of that section of the Wolf Creek Highway which extends from the town of Banks to a connection with the Nehalem Secondary Highway. The Commission ordered the communication acknowledged with thanks.

A letter was presented from Adrian Voisin, San Francisco, suggesting a pioneer oxteam and wagon design for a sign to be erected along state highways as a reminder that travel was not always over the beautifully paved and maintained state highways of the present day, and offering to furnish such design, ready for bronze foundry use, for the sum of \$250.00. The Commission referred the letter to the Engineer for reply. He was instructed to inform Mr. Voisin that the Commission now has a similar sign for exclusive use along the Old Oregon Trail, but his suggestion will be taken under advisement for use on additional bridge structures.

The Commission discussed a letter from Mr. Ray Conway, Manager of the Oregon State Motor Association, with regard to the illumination of state

highways. The Commission instructed the Engineer to render a report at the next meeting of the Commission on the cost to illuminate the East Portland-Oregon City Highway between Portland and Milwaukie, the cost estimate to cover three sections,- one, from the Ross Island Bridge to 17th Street; one, from 17th Street to the Oregon Worsted Mill; and the third, from the Oregon Worsted Mill to the town of Milwaukie.

The Engineer reported that investigation reveals that the Crater Lake Highway from its junction with the Pacific Highway to the junction with the West Diamond Lake Secondary Highway, in Jackson County, is showing signs of distress due to heavy log truck traffic. He recommended that the maximum weight of loads that are hauled over this road be limited to 75 per cent of the weights authorized by statute. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

CRATER LAKE HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road; and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order;

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to wit:

CRATER LAKE HIGHWAY from its junction with the Pacific Highway to its junction with the West Diamond Lake Secondary Highway, in Jackson County

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of four hundred fifty (450) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) per cent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission;

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Clerk of Jackson County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer brought up for discussion the matter of installing "stop" and "go" signals at the Mosier Tunnel on the Upper Columbia River Highway, which were ordered by the Commission some time ago. He said that the west portal of this tunnel is directly under a cliff some 500 or 600 feet long, from which rocks are constantly falling, and if traffic is

DEC 21 1937

required to stop at this point it is certain that before long someone will be injured. He gave as his thought that the danger from the falling rocks is greater than the tunnel hazard and pointed out that the hazard might be eliminated or reduced by the construction of a shed over the highway this short distance were it not for the fact that the rocks would catapult onto the railroad tracks, which are directly beneath the highway at this point. He requested instructions. After discussion, the Commission ordered a thorough investigation of this matter and a report rendered thereon. The Engineer was also instructed to contact Mr. Sam Murray, Resident Engineer for the O.W.R. & N. Company, relative thereto, and ascertain from him whether or not the railroad company is sufficiently interested to join in the cost of constructing a suitable shed for the protection of both highway and railroad traffic. The work of installing the "stop" and "go" signals was ordered stopped pending disposal of this matter.

Mr. L. G. Apperson, City Engineer, Portland, conferred with the Commission in regard to the proposed Wilson River Highway W.P.A. project and particularly in regard to the county equipment that has been offered the state for use on this work. The State Highway Engineer advised Mr. Apperson that the Commission is considering the matter of the use of the county equipment, some of which, inspection reveals, is in good condition and some in very bad condition, and has instructed him to investigate the proposition of the state purchasing the equipment for a nominal sum. Mr. Apperson advised that, while the city of Portland owns some of this equipment, it cannot sell it without first advertising it for sale. He further advised that most of the equipment is owned jointly by the counties and the city, having been purchased by a pool of funds, and the owners are perfectly willing for the state to have the use of it on the Wilson River W.P.A. project without any thought as to what condition it may be in when it is returned.

The State Highway Engineer was instructed to contact the several county courts in regard thereto and report the results thereof at the next meeting of the Commission. Mr. Apperson was requested to again look into the possibilities of selling the equipment to the state at private sale.

The Commission considered and approved the filing of a petition with the Federal Government, under the provisions of the Recreational Act, for the purchase of 200 acres of land described as the S.E. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ and the S. $\frac{1}{2}$ of Section 20; also the N. $\frac{1}{2}$ of the N.E. $\frac{1}{4}$ of Section 29, Township 11 S., Range 26 E., W. M., at the rate of 50¢ per acre, said land being located in the famous Turtle Cove Section of the John Day Valley fossil area, and the purchase being recommended by the State Parks Superintendent.

The Commission approved loaning the notes of the survey for the road leading into the Cape Lookout District, Tillamook County, to the Tillamook County Court to enable the Court to conduct a W.P.A. clearing and grubbing project on proper alignment.

The Commission signed the following letter directed to all State Highway Department employees relative to contributing to the campaign fund

of any candidate for election to public office, and prohibiting the participation of employees in election campaigns:

Circular Letter No. 51.

TO ALL STATE HIGHWAY DEPARTMENT EMPLOYEES:

In view of the nonpartisan nature of the State Highway Department and the necessity of administering its functions on a strictly nonpolitical basis and in the interest of the state as a whole, the employees of the State Highway Department are again cautioned to refrain from all political activities.

No one is or will be authorized by the Oregon State Highway Commission to solicit contributions from state highway employees for the campaign fund of any candidate. No employee will be permitted to engage in such solicitation.

This is brought to your attention at this time in order that that there may be no misunderstanding as to the attitude of the Highway Commission in this matter, and with the view of preventing participation of employees in election campaigns.

By order of

THE OREGON STATE HIGHWAY COMMISSION

HENRY F. CABELL
As Chairman

E. B. ALDRICH
As Commissioner

F. L. TOU VELLE
As Commissioner

The Commission considered briefly the Engineer's report on the results of the State-Wide Planning Survey in so far as it pertains to the solvency of roads for construction, but deferred action on this matter until the next regular meeting.

A letter was presented from Frank H. Rogers, City Inspector, Medford, requesting the Commission's approval of two overhead flashing signals which the city desires to install at two street intersections on the route of the Pacific Highway in Medford, one being at the intersection of Main and Riverside Streets and the other at the intersection of Main and Central Streets. It appears that the signals have already been ordered by the city but they do not conform to the standard requirements of the State Highway Commission. In the discussion of this matter it was brought out that the Commission has previously refused to approve similar installations in other places because the lights to be installed did not meet with the state's

DEC 21 1937

requirements. In order to be consistent in the matter, the Commission decided not to give its approval in the present instance. The Engineer was instructed to inform Mr. Rogers of the action taken and of the state's requirements with respect to such matters. He was also instructed to prepare a form letter to be sent to all incorporated cities and towns advising them that the State Highway Commission has authority to specify the type of lights that shall be installed on highway routes through cities and towns, and asking them hereafter to secure the approval of the State Highway Commission as to the type of such installations before placing their orders for the lights.

The Commission had under consideration the following requests for extension of time within which to complete highway construction projects:

Roy L. Houck, Contract No. 1892, for grading the Butteville Road-White School Section of the Butteville Road-Hubbard Secondary Highway, in Marion County, requested an extension of time from May 31 to November 3, 1937, within which to complete this project. He alleged that his delay in completing the project within the specified time limit was due to the failure of the Southern Pacific Company to complete its portion of the work, involving the construction of a railroad structure over the highway. The Engineer advised that the reason given by the contractor for failure to complete the job within the specified time limit is correct; that the railroad company could not complete its portion of the job because strikes delayed the delivery of steel. He further advised that Mr. Houck could not do the excavating work south of the structure site until the railroad company had removed its shoofly track. In view of the circumstances and the fact that the highway contractor's delay was occasioned by no fault of his own, he recommended that the extension be granted without penalty. He submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Berke Bros., Inc., Contract No. 1909, for grading the Storm Creek-Lamb Creek Section of the Santiam Highway, in Linn County, requested an extension of time of two weeks, from October 31 to November 15, 1937, within which to complete this job. They alleged that their failure to complete the job within the specified time limit was due to bad weather conditions and to the fact that they were required to remove some slides on the adjoining section. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension requested be granted without penalty, and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Roy L. Houck, Contract No. 1983, for resurfacing the Wilson Ranch-Paradise Creek Section of the Umpqua Highway, in Douglas County, requested an extension of time from November 30 to December 21,

1957, within which to complete this job. He attributed his failure to complete the job within the specified time limit to high water conditions in the Umpqua River, which conditions were beyond his control. The Engineer advised that the reason given by the contractor for failure to complete the job within the specified time is correct. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1892, 1909, 1916, 1957, 1999, 2008, and 2011, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance.

The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1892, with Roy L. Houck, for grading and bridge construction on the Butteville Road-White School Section of the West Portland-Hubbard Highway, in Marion County. Completed November 2, 1937.

Contract No. 1909, with Berke Bros., for grading the Storm Creek-Lamb Creek Section of the Santiam Highway, in Linn County. Completed November 7, 1937.

Contract No. 1916, with Parker-Schram Company, for grading, paving, and structural work on the Ross Island Bridge-Schiller Street Section of the East Portland-Oregon City Highway, in Multnomah County. Completed October 30, 1937.

Contract No. 1957, with Warren Northwest, Inc., for grading and paving the Shedd-Halsey Section of the Pacific Highway, in Linn County. Completed November 4, 1937.

Contract No. 1999, with Saxton, Looney & Risley, for regrading, surfacing, and furnishing crushed rock for the Eagle Point-Baker Gulch Section of the Little Butte Secondary Highway, in Jackson County. Completed December 11, 1937.

Contract No. 2008, with Rogers Construction Company, for furnishing crushed rock for the Forest Boundary-Long Creek Section of the Pendleton-John Day Highway, in Grant County. Completed November 27, 1937.

DEC 21 1937

Contract No. 2011, with Frank Watt Construction Company, for construction of a frame storage building near the south city limits of Portland, in Clackamas County. Completed November 30, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Pacific Telephone and Telegraph Company with respect to the North Powder-Muddy Creek Section of the Old Oregon Trail;

Agreement with the O.W.R. & N. Company, Union Pacific Company, and Baker County, covering encroachment of the Old Oregon Trail on railroad property at Haines, Oregon;

Agreement with the Oregon-American Lumber Corporation, providing for the transportation of logs across the Wolf Creek Highway at two points in Sections 11 and 14, Township 4 North, Range 7 West, W. M., Clatsop County;

Agreement with Weyerhaeuser Timber Company extending the term of a ground lease covering a stockpile site located in the N.W. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Section 3, Township 40 S., Range 6 E., W.M., Klamath County;

Bargain and Sale Deed, conveying unto Multnomah County 0.01 acre of land situate in Sections 7 and 18, Township 2 N., Range 1 W., W.M., Multnomah County, and being adjacent to the Columbia County Line-Linton Section of the Columbia River Highway, said parcel having been acquired by the state to provide a connection between the highway and what is known as the Logie Trail Road.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

H. V. Seaman

Commissioner

DEC 21 1937

Portland, Oregon, January 5, 1938

The State Highway Commission met in regular session at 8:00 o'clock p. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on August 11 and 12 and September 13 and 14, 1937.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state and submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the recommendation and by unanimous vote adopted the following resolution relative thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Special consideration was given by the Commission to the acquisition of right of way from William Manley Currier for a revision of the Fremont Highway between Harris Creek and Chalk Cliff, in Lake County, being right of way negotiation No. 3906. The Commission considered the price quoted by Mr. Currier too high and authorized the Attorney to offer him \$2750 for his property and to condemn the same if Mr. Currier will not accept such sum. The Commission approved payment to Mr. Currier of the amounts asked for two

JAN 5 1938

additional tracts needed for right of way, being right of way negotiations Nos. 5272 and 5254, but authorized the Attorney to acquire such parcels by condemnation if necessary. He was also authorized to condemn right of way needed for the Troutdale-Multnomah Falls Section of the Columbia River Highway across the land of Fritz and Vivian Luscher, in Multnomah County. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Foster Creek-Paisley Section of the Fremont Highway
Troutdale-Multnomah Falls Section of the Columbia River Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Foster Creek-Paisley Section of the Fremont Highway
William Manley Currier and Elsie M. Currier
Troutdale-Multnomah Falls Section of the Columbia River Highway
Fritz Luscher and Vivian Luscher

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument

JAN 5 1938

or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

In regard to right of way negotiations 5271 and 3911A with Ralph C. Foster and William H. Harvey for right of way for the Harris Creek-Chalk Cliff Section of the Fremont Highway, the Commission approved the settlements effected by the right of way agent subject to the condition that the owners will construct seven-strand wire fences for which the state is paying as part consideration for such right of way.

The Commission considered and rejected the offer of Gail W. Buel to sell to the state, for the sum of \$2,011.65, 2.861 acres of land that are needed for right of way for the Sheridan-McMinnville Section of the McMinnville-Tillamook Highway, in Yamhill County, such price being considered exorbitant and the right of way being not needed at the present time.

JAN 5 1938

In the discussion of consideration to be paid property owners for right of way and for other purposes involving the moving of buildings, the Commission ordered that hereafter an estimate of cost to move the buildings shall be submitted to the Commission in each instance, for approval, along with the option to purchase the property, so that the Commission will have such information in passing on the matter.

Reconsideration was given by the Commission to the claim of Mrs. Maude Hastings Campbell for damage that she alleges occurred to her property by reason of the construction of the Union Avenue viaduct on the East Portland-Oregon City Highway, in Portland. The Attorney advised that Mrs. Campbell is demanding the sum of \$7,000 for the settlement of her claim. The Commission denied the claim by unanimous vote.

The Attorney reported results of a conference with attorneys of the Security Investment Company, Oregon City, for acquisition of right of way for the East Portland-Oregon City Highway across this company's property along the water front in Oregon City. He said that the company has now agreed to accept the sum of \$48,000 for its property, which amount is still far in excess of the value placed on the property by the state's appraisers. The Commission also considered the offer exorbitant and instructed the Attorney to so advise the owners.

Consideration was given by the Commission to the acquisition of right of way needed for a revision of the Oregon Coast Highway across property owned by J. A. and K. Sansbury, at Gleneden Beach, in Lincoln County. The Attorney reported that the Sansburys are demanding a sum of approximately \$4,000, but he does not believe the property is worth more than \$5,000 based on the following: two acres of land at \$500 per acre, \$1,000; severance damages, \$500; remodeling the house, \$1,500. The Engineer advised that the Commission does not have a project programmed for this section, so this right of way will not be needed in the near future. The Commission thereupon decided to defer the acquisition of this property and ordered the discontinuance of negotiations for right of way for the Siletz-Newport Section of the Oregon Coast Highway, except to close deals that appear to be exceptionally good.

The Commission discussed briefly the matter of acquiring right of way for a revision of the Oregon Coast Highway through the William S. Walton property at Neskowin, but deferred action thereon until its next meeting.

The Attorney reported results of a conference with Mr. Jay Bowerman, attorney for the owners of Rooster Rock on the Upper Columbia River Highway, which the Commission is purchasing for right of way and recreational purposes. He said that Mr. Bowerman is concerned about the state making payment for this property in three annual installments because of the possibility of a new highway commission being appointed in the interim which would not recognize any agreement made by the present Commission with respect to the deferred payments, and he has suggested that the state pay for the property in two annual installments of \$5,000 each, one such payment to be made immediately and the other in January of 1939. There is a question in the mind of Mr. Bowerman,

he said, as to the constitutionality of the law which makes it possible for the Highway Commission to be sued. After some discussion the Commission decided to pay for the property in two annual installments, as requested by Mr. Bowerman.

The Attorney also reported the results of a conference with Mrs. Elizabeth W. Griggs for the acquisition of 0.36 acre of her land that is needed for right of way for the Columbia River Highway across her property at Corbett, in Multnomah County. He said that he offered Mrs. Griggs \$50 for this area but she is demanding \$350 for the same. He was authorized by the Commission to raise his offer to \$100.

The Commission had under discussion the matter of securing the cooperation of the Southern Pacific Company with respect to the proposed Albany railroad grade separation project. It appears that the railroad company owns certain property that is needed for right of way for this project, but the railroad company has tenants who are railroad shippers and with whom it will be necessary to deal in connection with right of way matters. The Attorney reported that the engineering department of the Southern Pacific Company in Portland has expressed every willingness to cooperate with the state with respect to the right of way but that by reason of the exorbitant and unreasonable demands made by the tenants it was impossible to make proper settlements and suggested that the matter be taken up directly by the Commission with the Southern Pacific Company. He also reported that plans had been worked out and discussed with the Albany Seed Company and the McLaughlin Cold Pack Plant involving the providing of other sites and moving the existing buildings, but that these plans had been rejected and other settlements demanded which, in the case of the Albany Seed Company, would amount to an additional \$2,450.00 and in the case of the McLaughlin Cold Pack Plant to an additional \$6,350.00. After discussion it was decided that Chairman Cabell would take the matter up with the railroad company officials in San Francisco, explaining the situation in detail and asking their consideration and cooperation.

The Commission considered and approved the following changes suggested by the Tillamook County Court in the form of deed offered by the Weyerhaeuser Timber Company to convey unto Tillamook County certain timber strips adjacent to the Wilson River Highway, in Tillamook County.

Following the words "marketable timber", in the second paragraph, on page 1 of the deed, there were added the words "suitable for lumber"; and on page 2 of the deed, following the word "exclusively", there was taken out "and, if at any time, said lands, or any part thereof, should be abandoned for such use, or the maintenance thereof for such purpose be discontinued, the same, or the part thereof so abandoned for such use or discontinued to be maintained for such purpose, shall ipso facto revert to and be and remain the absolute property of the grantor, its successors or assigns".

In connection with this matter, the Attorney read aloud a form of agreement that he has prepared covering the deeding of this property by the company to the county in the first instance, and the transferring of title

JAN 5 1938

from the county to the state within a period of five years. The Commission approved the form of agreement by unanimous vote and instructed the Attorney to present it to the Tillamook County Court for acceptance.

The Commission had under consideration the following offers for the purchase of buildings located on property previously acquired for right of way for the proposed improvement of the Oregon Coast Highway through the Bunker Hill District south of Marshfield: (1) offer of Walter Jepson to purchase the building located on Lot 13, Block 9, Bunker Hill, for the sum of \$18, and the building located on Lot 12, Block 9, Bunker Hill, for the sum of \$32; (2) offer of George A. Blake to purchase the building located on Lot 13, Block 9, Bunker Hill, and the building located on Lot 12, Block 9, Bunker Hill, for the sum of \$15; (3) offer of Arthur L. Fitch to purchase for the sum of \$15 the building located on Lot 12, Block 9, Bunker Hill. The Attorney advised that these buildings have previously been advertised for sale but unsatisfactory bids were received. He recommended acceptance of the offer of Mr. Jepson for the purchase of the two buildings at \$50. The Commission approved the recommendation by unanimous vote.

The Engineer reported receipt of a copy of a report prepared by Mr. C. J. Buck, Regional Forester of the United States Forest Service, for submission to the State Planning Board, relative to wayside strips. He said that Mr. Buck would like to discuss this report with the Commission before he presents it to the Planning Board. He was instructed to invite Mr. Buck to be present at the February meeting of the Commission, and, in the meantime, to study the report with a view of making recommendations in regard thereto at such meeting.

The Commission adjourned at 10:30 o'clock p. m. to reconvene at 9:00 o'clock the following morning, in the Auditorium of the Public Service Building.

Portland, Oregon January 6, 1938.

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all members, the State Highway Engineer, the Attorney, and the Secretary present.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

**BAKER-UNITY HIGHWAY
GIBBS RANCH-BAKER SECTION - GRAVEL SURFACING**

O. C. Yocom	\$ 5,520.00

McNutt Bros.	48,297.00
F. C. Dillard	52,545.50

No bids were received for the purchase of the house, barn and shed located at West Portland Heights about one mile east of Tigard, Washington County, which was previously advertised for sale at this meeting.

Chairman Cabell announced that the award of contracts would be made at 2:00 o'clock p. m. in the same room.

The Engineer requested instructions in regard to the furnishing of pilot-car service to guide traffic along inundated sections of highways during periods of high water. He said that such service has been rendered at times in the past but there is a question in his mind whether or not the

JAN 6 1938

practice should be continued in view of the fact that the Commission might be held responsible and liable in the event of accidents occurring. He gave as his thought that the accommodating of traffic in this way is desirable, if it can be done without the assumption of liability on the part of the Commission, and suggested that it might be satisfactory to require the parties desiring the service to sign a statement requesting it and relieving the Commission from liability. He submitted a form of statement as follows covering the matter, for the Commission's consideration:

I, _____, the undersigned, hereby request the State Highway Commission to assign and designate an employe of the Highway Department to pilot my car through the waters which overflow and submerge the _____ Highway at or near _____, which service is requested for my own personal advantage and with full knowledge of the hazard involved, and I therefore accept full responsibility for any accident which may happen and/or any injury or damage which I or my passengers may sustain while being piloted over the said water-submerged highway.

Dated this _____ day of _____, 193—.

Witnesses:

Applicant

After discussion and upon advice from the Attorney to the effect that the signing of such statement by the party or parties requesting the accommodation would relieve the Commission from liability for damage, the Commission approved the same and authorized the Engineer to continue to furnish pilot-car service when requested so to do in writing, using a copy of this form statement for the purpose, but not to furnish such accommodation to parties who will not sign the statement.

Mr. V. Kalafate, Portland, came before the Commission at this time with an offer to purchase for the sum of \$25 the house, barn and shed that were advertised by the Commission for bids to be received at this meeting. It was the opinion of the Commission that Mr. Kalafate's proposal was received too late to be considered as a bid submitted as a result of the Commission's published notice of sale. However, the offer being satisfactory, the Commission accepted the same by unanimous vote, as a private transaction, and instructed the Secretary to enter the transaction in the record as such.

The Engineer reported on the cost to light all underpass structures located on state highway routes within the corporate limits of cities and towns throughout the state, as ordered by the Commission at a previous meeting. He said that there are seven such structures now being lighted; viz, at Ontario, Bend, Oregon City, Salem, LaGrande, and two in Portland. He

JAN 6 1938

estimated the total annual cost of electricity for lighting these structures would amount to about \$2,700 and that it would cost an additional \$500 to maintain the lamps, or a total yearly cost of approximately \$3,000. After discussion of this report, the Commission voted unanimously to assume the entire cost of lighting such underpass structures, thus relieving the cities and towns from contributing to such expense.

The Engineer also reported on the cost to maintain the abandoned section of the Oregon Coast Highway through the city of Reedsport, as was requested by Mr. Russell Hubbard at the previous meeting. He said that this section is 0.8 mile in length and that it would cost about \$500 per year to maintain the same. He recommended that the request be denied because, in his estimation, if the Commission assumed this responsibility, it would not be keeping faith with the S. P. Railroad Company and the Public Utilities Commissioner with respect to the railroad grade crossing which is involved. The Commission approved the recommendation by unanimous vote.

The matter of constructing a wooden sidewalk on the Winchester Bridge over the Umpqua River on the Pacific Highway north of Roseburg, as has been requested by the Roseburg Chamber of Commerce, had the attention of the Commission. The Engineer estimated that it would cost about \$7,650 to construct a wooden sidewalk three feet six inches wide on each side of the bridge. The Commission decided that such expense is not justified at the present time and thereupon denied the request.

The Commission had under consideration the matter of constructing a cattle pass under and across the Coos River Secondary Highway, about five miles above Enegren Ferry, in Coos County, for the benefit of Mrs. Lillian M. Curtis-Piper. The Engineer advised that Coos County acquired the right of way for this highway, and as part payment for the same constructed numerous cattle passes for farmers who own property adjacent thereto; but, according to Mrs. Piper, no provision was made for a cattle pass for her, presumably because several members of the Piper family were quite ill when the negotiations were being carried on and very little attention was paid to the details and no thought was given to a cattle pass at that time. He further stated that, according to Mrs. Piper, the Piper family donated the right of way for the road across their property and in view thereof are of the belief that they are as much entitled to a cattle pass as are the other farmers in the district. He estimated that such cattle pass would cost about \$925 and that it would cost an additional \$75 to construct a certain approach road that Mrs. Piper also wants. He gave as his thought that the obligation, if one exists, to construct the cattle pass and the approach road is the county's, and recommended denial of the request. The Commission approved the recommendation by unanimous vote, and ordered that Mrs. Piper be referred to the county court for the settlement of her claim.

Reconsideration was given by the Commission to the matter of constructing a sidewalk along the Pacific Highway West for a distance of about two miles south of Corvallis. The Engineer submitted a cost report in connection therewith, action on which was deferred by the Commission until

JAN 6 1938

the next meeting pending the securing of additional information by the Engineer regarding an existing sidewalk.

The Secretary presented a report on arrests that have been made by officers of the State Police Department since July 1, 1937, of logging equipment that has been found to be loaded in excess of the weights allowed by law. The report indicates that there has been a decided decrease in the number of violations for overloading since the Commission adopted its new rules and regulations relative to penalties for infractions of the law in this respect. The Commission ordered the report filed.

The Commission had under consideration the Engineer's report on the matter of constructing a new connection of the Hillsboro-Woodburn Secondary Highway with the Pacific Highway at Woodburn, involving the extension of Young Street, Woodburn, easterly a distance of about 600 feet, and the elimination of two turns in the present route. The Engineer recommended that the change be not made, it being his thought that the hazard of a direct crossing of a main trunk highway is much greater than an indirect crossing, as now exists.. After discussion the Commission decided not to do anything with the matter at the present time because funds are lacking with which to finance construction of the same.

The Engineer presented two alternate plans for the separation of vehicular traffic at the intersection of Denver Avenue and Union Avenue (Pacific Highway) in Portland, one of which is described as a circle arrangement and the other as a clover leaf or oval arrangement of traffic lanes. He estimated that to construct the traffic circle lanes would cost about \$182,000, including right of way, and to construct the clover leaf plan would cost about \$172,000, including right of way. He recommended the adoption of the clover leaf or oval plan and requested authority to secure options from the various property owners for right of way needed for the same and to negotiate with the officials of the Peninsula Golf Club, which is involved, with respect to right of way and the rearrangement of the golf club facilities. After considerable discussion and careful study of the alternate plans, the Commission by unanimous vote tentatively adopted the plan recommended by the Engineer (clover leaf or oval plan) subject to approval by the Bureau of Public Roads. The Engineer was instructed to present the plans to the Bureau of Public Roads officials, together with the Commission's recommendation. The Engineer was authorized to secure options from the property owners for the needed right of way and to negotiate with the officials of the Peninsula Golf Club for right of way across the Golf Club property and for the rearrangement of the golfing facilities.

Mrs. Nina I. Belt, Newport, came before the Commission at this time in regard to her property at the mouth of Fogarty Creek on the Oregon Coast Highway, in Lincoln County, a portion of which property is needed by the state for right of way for a revision of the highway at this location. It appears that there are some twelve acres of land involved in this transaction, including right of way and property lying easterly thereof and extending up to the existing highway, which the Commission desires to purchase.

Mrs. Belt stated that she refused an offer of \$18,000 for her property two years ago and that the value of the same will be cut in half if the highway is constructed through it, as planned. She offered to sell the twelve acres needed by the state for the sum of \$9,000. Chairman Cabell gave as his opinion that a fair basis for a determination of the price to be paid to Mrs. Belt for the land to be taken from her by the state is the difference between the present-day value of her entire holdings and the value of the portion remaining after the 12-acre tract has been taken away for highway purposes. He advised that the Commission does not plan to reconstruct this highway in the near future because of shortage of funds to finance the work, so there is no particular hurry about closing the right of way deals now pending, including Mrs. Belt's, and there is a possibility that the Commission will order all such negotiations to be discontinued; however, if the Commission decides to complete the purchase of Mrs. Belt's property, then several new appraisals of the same will be made on which to base a reasonable offer. He agreed to let Mrs. Belt know within a reasonable time the decision of the Commission in regard thereto.

A delegation from the town of Culver and vicinity, Jefferson County, consisting of W. V. Merchant, George Rodman, W. C. Barber and E. C. Beckwith of Culver and S. E. Lochrie of Metolius came before the Commission and protested the reconstruction of The Dalles-California Highway on alignment south of Madras that would bypass the towns of Culver and Metolius. Mr. Merchant was spokesman for the group. They gave as their thought that the highway is satisfactorily located now and that the Commission should spend its funds to improve the present road rather than to construct an entirely new one. They alleged that great harm would come to the towns of Culver and Metolius and that it would result in serious detriment to those towns if the highway were taken away. The Engineer advised that he was ordered by the State Highway Commission to make a survey for a permanent location of the highway between Madras and Terrebonne to fit in with the irrigation project which is proposed for this district, it being the Commission's thought that if the plans for the irrigation district and the highway were correlated, the cost of constructing the highway would be kept to a minimum; whereas, if this were not done, it would undoubtedly cost the state a considerable sum later to make alterations in the irrigation facilities to fit the highway plans. He further stated that there are two or three alternate plans under consideration and that the location surveys are now under way to determine which route is the best from an engineering standpoint. Chairman Cabell advised that the Commission does not represent any particular group, and, in determining the proposed location for a highway, must consider the interests of the general public against local interests. The decision of the Commission, he said, rests upon such basis. If it appears that the interests of the general public are greater than the local interests, then the latter must be sacrificed; but, if the local interests appear to outweigh the interests of the general public, then it is the policy of the Commission to decide in favor of the local interests. He further stated that the Commission is not in a position to make any definite statements today in regard to this proposed change south of Madras and will not be in a position to do so until the surveys are completed and the results thereof studied. He assured the delegation that it would be given an opportunity to discuss the matter further with the Commission

JAN 6 1938

before the Commission takes definite action in regard to relocating this road. It was agreed that the Commission will notify the people of Culver and Madras through Mr. Merchant when the surveys are completed and the Commission is ready to confer with them, the place for the conference to be decided later.

Contractor E. H. Itschner came before the Commission at this time in regard to a bid that he submitted at the morning session for grading, surfacing and oiling, and furnishing crushed rock in stock piles on the Forest Boundary-Elgin Section of the Weston-Elgin Secondary Highway, in Union County. Mr. Itschner stated that he made an error of more than \$12,000 in his calculations with respect to the cost of doing the work and as a consequence he is the low bidder for this job. He asked the privilege of withdrawing his bid on account of such error. The Engineer advised that he has investigated Mr. Itschner's bid and is unable to find any particular item that can be called an error, but it is apparent that Mr. Itschner bid uniformly low on each item. He suggested, in view of the circumstances, that Mr. Itschner's request to withdraw his bid be denied. The Commission concurred in the viewpoint of the Engineer and so ordered.

The Engineer reported on the inspection of the county-owned equipment which the counties of Tillamook, Washington, Multnomah, and the city of Portland have offered to turn over to the state for use on the Wilson River Highway W.P.A. project; also, on the results of his contact with the several counties and the city of Portland relative to the purchase of such equipment by the state. He said that the counties and the city have agreed to accept a lump sum of \$15,000 for the following equipment:

- 15 light dump trucks, 1936 models
- 1 1½-yard P & H shovel
- 1 1½-yard Loraine shovel
- 1 3/8-yard Universal shovel
- 5 caterpillar tractors
- 3 bulldozers
- 2 logging drums
- 2 graders

The ownership of this equipment, he said, is rather involved, some of it being owned outright by the counties and some by all of them together, having been purchased by a pool of funds, so it has been arranged that the counties will transfer their interest in the equipment to Tillamook County, which in turn will transfer title to the state and give the state a bill of sale for the same. The \$15,000 payment by the state, he said, is to be made in two or three payments and it was understood and agreed that the equipment thus sold to the state would be retained on the Wilson River Highway W.P.A. project only and would be maintained by the state in excellent operating condition until the W.P.A. project is completed on this highway or until the equipment is worn out. The Engineer read aloud the report of Maintenance Engineer J. N. Bishop on this subject, same being dated January 5, 1938. After some discussion the Commission approved the purchase of the above list of

JAN 6 1938

equipment on the basis of the method outlined in Mr. Bishop's letter and as reported by the Engineer. The Attorney was instructed to prepare a form of agreement with Tillamook County covering the matter. The Commission thereupon by unanimous vote authorized the Engineer to sign up for a W.P.A. project, costing \$751,482.00, on the Wilson River Highway, when the agreement covering the matter of equipment has been fully executed. The state's share of this cost is estimated at \$200,000.00; the county's share at \$20,000; the balance to be paid with W.P.A. funds.

The Commission discussed briefly the matter of the appointment of a committee to study conditions affecting tourist travel in Oregon, as has been recommended by the Advisory Committee of the Travel and Information Department. Several names were considered but definite action thereon was deferred until a future date.

The Commission considered and referred to the Engineer for investigation and report, a letter from Mr. J. C. Joy, Chairman of the State Industrial Accident Commission, regarding a hazardous condition which he alleges exists at the west end of the Mosier Tunnel on the Upper Columbia River Highway, in Hood River County, caused by the continuous falling of rocks from the cliff on the upper side of this highway. The Engineer was also instructed to discuss this matter with Mr. Joy and to inform him of the Commission's plans with respect to the elimination of this hazard.

Reconsideration was given by the Commission to the approval of the claim of the Union Pacific Railroad Company for reimbursement by the state of one-half of the cost of damages that resulted from the derailment of one of its trains in the Columbia Gorge as a result of an accumulation of snow on the railroad tracks during February, 1936. The Commission indicated that it would approve the payment of this claim if the explanation on the bill is changed to show that the depositing of snow on the railroad company's tracks by state highway forces is an allegation on the part of the railroad company and not a fact of admission by the State Highway Commission. The Attorney was instructed to revise the bill accordingly and pass it for payment.

The Commission approved the purchase of the following equipment and supplies, upon request and recommendation of the Engineer:

- 10 electric clocks for use in radio rooms. Estimated total cost, \$80;
- 3 radio receiving sets for the maintenance stations at Corvallis and Redmond and for the Maintenance Engineer's office in Salem. Estimated total cost installed, \$406;
- 1 paving plant complete, consisting of 1 plant, 2 asphalt kettles, 1 6-ton roller and 6 trucks. Estimated total cost, \$12,000;
- 2 6-ton paving plant rollers and trade-in of 2 old rollers as part purchase price. Estimated net total cost, \$6,000;

JAN 6 1938

- 1 graphic planometer complete with trailer, for use in connection with concrete pavement construction. Estimated cost \$600;

Miscellaneous equipment for use in connection with geophysical prospecting. Estimated total cost \$110;

- 42,000 gallons of traffic line lacquer, estimated requirements for 1938 traffic line painting. Estimated cost \$50,400;

Metal signs and reflector buttons for 1938 requirements. Estimated cost \$20,000 and \$18,000, respectively.

The Commission had under consideration a letter from Chester Embree, Newport, inquiring whether or not the Commission wants to sell or dispose of some of the old timber trestle bridges constructed by the United States Spruce Production Corporation on its railroad between Newport and Otter Rock, in Lincoln County, the right of way for which the Commission recently acquired from the Atlantic Western Company. The Engineer advised that there are only three structures remaining on the right of way acquired from the Atlantic Western Company, the others having either been burned or removed for salvage purposes. He further advised that there are about 22,000 lineal feet of piling in the structures, 35 to 40 per cent of which is decayed and is of no value except for fuel; in fact, the decayed piling has no value for any purpose whatsoever; and 240 MFBM lumber and timber which is of value only as fuel. He recommended the sale of the timber and lumber at the rate of 50¢ per MFBM, or a total of \$120, provided that the purchaser will also dispose of all of the piling and will clean up the premises to the satisfaction of the Commission. After some discussion the Commission authorized the Engineer to dispose of this material in the best manner possible in accordance with his recommendation. He was instructed to use his own discretion in the matter of bringing the sale to the attention of prospective purchasers.

The Commission considered, but deferred until a future date, action on the matter of constructing maintenance headquarters buildings at a place known as Brothers on the Central Oregon Highway, Deschutes County, and at a place known as Okerman Ranch, near the intersection of the Central Oregon and Lakeview-Burns Highways, in Harney County, each of which headquarters buildings the Engineer estimated would cost about \$8,000.

The matter of encroachment of an advertising sign on the Columbia River Highway (Sandy Boulevard) just outside of the city limits of Portland, had the attention of the Commission. It appears that a man by the name of W. B. Herron has installed a large neon electric sign in front of his service station and garage on this highway and that the said sign illegally encroaches approximately eleven feet onto the highway right of way. Further, that Mr. Herron has been ordered to move his sign back onto private property but he absolutely refuses to do so and states that he will stand suit before removing it from its present location. The Attorney advised that the matter has been brought to the attention of the sheriff of Multnomah County but no

JAN 6 1938

satisfaction has been secured thereby. He requested instructions from the Commission as to what to do in view of the circumstances. He was instructed by the Commission to again order Mr. Herron to remove the sign, and if he persists in disregarding the orders, to have the sign removed by due process of law.

The Engineer requested instructions whether or not to include in the 1938 minor betterment program the oiling of the shoulders of the pavement through the town of Monroe, Benton County, estimated to cost \$750, and the installation of fog posts for the protection of pedestrian traffic along the Nehalem Secondary Highway in the town of Vernonia, Washington County, estimated to cost \$150. The Commission by unanimous vote authorized the installation of the fog posts at Vernonia but disapproved the oiling work in the town of Monroe. The Engineer was instructed to keep the Monroe oiling project in mind for future consideration.

The Engineer reported to the Commission that Julius Gunnell, to whom the Commission awarded the contract for providing ferry service across Coos River at a place known as Enegren Ferry, in Coos County, desires to assign his interests in this contract to a Mr. Andrew Stambuck, and to be relieved of further obligation in connection therewith. He requested instructions in regard thereto. The Attorney advised that there is no legal barrier to the Commission authorizing the assignment of this contract if it so desires. In view of the Attorney's advice, the Commission approved the assignment of this contract by Mr. Gunnell to Mr. Stambuck, subject to the condition that investigation reveals that Mr. Stambuck is reliable and responsible and will render the services called for in the contract in a satisfactory manner. The Commission referred the matter to the Engineer to make such investigation.

The Commission considered the matter of ordering a reduction in the maximum load limits on the Willamette Highway, the Siuslaw Highway, and the Siletz Secondary Highway, which roads the Engineer advised are showing signs of distress because of concentrated log hauling traffic. The Commission ordered a reduction in the maximum load limits to 75 per cent of those specified by statute. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to wit:

WILLAMETTE HIGHWAY
SIUSLAW HIGHWAY
SILETZ SECONDARY HIGHWAY

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a

JAN 6 1938

kind and character of traffic which is damaging and injuring the said highways, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said roads shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads and the Commission having found upon due investigation that it will be for the best interest of the said state highways that the maximum total weight of load and vehicle which shall be permitted upon said roads shall be reduced so as to conform to the requirements fixed in this order,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to wit:

WILLAMETTE HIGHWAY from the junction with the Pacific Highway at Goshen to Oakridge, in Lane County;

STUSLAW HIGHWAY from the junction with the Pacific Highway near Junction City to Florence, in Lane County;

SILETZ SECONDARY HIGHWAY from the junction with the Oregon Coast Highway near Kernville to the junction with the Corvallis-Newport Highway near Toledo, in Lincoln County,

shall be restricted to the following weights: the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed the product of four hundred fifty (450) multiplied by the sum in inches of the tire width of the wheels of

JAN 6 1938

such axle; but in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) per cent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of each of the above-named highways and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

In this connection the Commission instructed the Engineer to post these roads for loads weighing 50 per cent of the limit specified by law if he considers that advisable after giving the other a fair trial, and particularly when the frost commences to leave the ground in the spring of the year. He was further instructed to send a circular letter to the logging operators in the early summer, giving them notice of the roads on which the Commission will probably order reduced load limits so they can make provision to discontinue operations on such roads if they so desire during the period when the reduced load limits are in force.

The Commission had under discussion the matter of providing additional signs and other protective devices at points where school children are obliged to cross the highway daily in going to and from school. The Engineer advised that he is constantly receiving letters asking that something more be done to protect the school children at these crossings and he is now of the opinion that the matter is of sufficient importance to receive special attention by the Commission. He suggested the adoption of a standard sign about 2 feet by 4 feet in dimension, bearing the words "School Zone" and that the signs be distributed to the various schools free of cost, with the absolute understanding that they are to be used only during school hours in connection with the activities of the schoolboy patrols. He also suggested that it would be a good idea to encourage the organization of schoolboy patrols and to furnish the necessary equipment to be worn by the patrol members, such equipment to consist of a Sam Brown belt costing about \$1.00 each and a small metal badge costing about 50¢ each. It was his thought that the schoolboy patrol activities should be under the supervision of some state department

preferably the Department of State Police, which should have authority to organize and supervise them. He estimated that for an expenditure of about \$2,500 a very good start could be made in the organization of the schoolboy patrols in accordance with his ideas, including the purchase of signs, belts and badges. Traffic Engineer John Beakey, who was present, expressed himself as absolutely certain that the suggestions made by the State Highway Engineer would prove satisfactory in handling this matter. After some discussion the Commission by unanimous vote adopted as standard the sign recommended by the Engineer for use hereafter in connection with the activities of schoolboy patrols. The Commission also approved the furnishing of equipment for the use of schoolboy patrol members, at state expense, and authorized an immediate expenditure of \$2,500 for the purchase of signs, belts and badges. The Engineer was instructed to confer with Mr. Charles P. Pray, Superintendent of the Department of State Police, with respect to the matter of organizing and supervising the schoolboy patrols, and to report the results thereof at the next meeting of the Commission.

The Engineer reported that in connection with the Klamath Falls undercrossing project, involving the elimination of the grade crossing of the Southern Pacific Company's tracks on Main Street in Klamath Falls, there will be certain items of engineering expense, estimated at \$1,000, that the Bureau of Public Roads will probably rule non-reimbursable by the Government. He pointed out that this project is on a city street within the city limits of Klamath Falls and that the state is not particularly interested in the same except that it is being financed with federal funds that are required to be expended for the elimination of railroad grade crossings under the supervision of the State Highway Department. He inquired, in view of the circumstances, whether the Commission wished to assume this expense under the implied authority of the law which authorizes the Commission to provide engineering supervision in connection with county bridge construction, or to require that such expense be assumed by the city of Klamath Falls along with other non-reimbursable costs. After some discussion the Commission approved the payment of such non-reimbursable engineering items with state highway funds, if that can be done legally. If it is determined that the state cannot pay such costs, then provision shall be made in the agreement with the city of Klamath Falls covering this project for the city to pay such expense. The Commission authorized the Engineer to advance the payment of these costs with state funds, provided the city of Klamath Falls will deposit with the Commission, in advance, its certified check in the amount of the estimated total cost of the same.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he awarded, on December 27, 1937, the contract for the construction of the Smith Point-Young's Bay Bridge Project in Astoria to the Mountain States Construction Company, Eugene, which submitted the low bid therefor in the amount of \$43,975.00 on November 30, 1937, the conditions of the award having been satisfied. The Commission by unanimous vote confirmed the award of the contract as made by the Engineer.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all members, the State Highway Engineer, the Attorney and the Secretary present.

JAN 6 1938

Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Gibbs Ranch-Baker Section of the Baker-Unity Highway, in Baker County. 4.13 miles gravel surfacing. The low bid was submitted by O. C. Yocom, Portland, at \$6,320.00. The next low bid was that submitted by Leonard & Slate, Multnomah, at \$7,610.00. There were 11 higher bidders. The Commission has awarded this contract to the low bidder, O. C. Yocom, at his bid price of \$6,320.00.

"North Unit, Missouri Flat Section, of the Medical Springs Secondary Highway, in Baker County. 3.02 miles gravel surfacing. The low bidder for this project is O. C. Yocom, Portland, at \$5,750.00. The next low bidder is Van Cleave & Van Cleave, The Dalles, at \$4,450.00. There were 11 higher bidders. The Commission has deferred the award of this contract and has referred the bids received therefor to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clackamas, Hood River and Wasco Counties. Furnish 12,400 cu. yds. crushed rock in stock piles. The low bidder for this project is Saxton, Looney & Risley, Portland, at \$21,060.00. The next low bidder is A. S. Wallace, Roseburg, at \$21,620.00. There were 10 higher bidders. The Commission has deferred the award of this contract and has referred the bids received therefor to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Shuttler Flat-Condon Section of the John Day Highway, in Gilliam County. Furnish 6,000 cu. yds. crushed rock in stock piles. The Commission received 9 bids for this project, the low one being that submitted by Schmeer, Williams & Gentemann, Portland, at \$8,710.00. The next low bid was that submitted by Jones-Scott Company, Walla Walla, Washington, at \$9,650.00. The Commission has awarded the contract to Schmeer, Williams & Gentemann, the low bidders, at their bid price of \$8,710.00.

"Ross Station-Arvard Section of the Pacific Highway, in Lane County. 2.0 miles Portland cement concrete pavement. The low bid for this project was submitted by Harold Blake, Portland, at \$49,087.00. The next low bid was that of Jacobsen-Jensen Company, Portland, at \$50,379.50. There were three higher bidders. The Commission has awarded this contract to the low bidder, Harold Blake, at his bid price of \$49,087.00.

"Forest Boundary-Elgin Section of the Weston-Elgin Secondary Highway, in Union County. 3.22 miles grading, surfacing and oiling; also, furnishing 1,500 cu. yds. crushed rock in stock piles. E. H. Itschner, Molalla, submitted the low bid for this project at

\$43,408.00. The next low bid was submitted by Leonard & Slate, Multnomah, at \$55,909.00. There were three higher bidders. The Commission has awarded the contract to the low bidder, E. H. Itschner, at his bid price of \$43,408.00.

"Butte Creek Section of the John Day Highway, in Wheeler County. 2.75 miles grading, surfacing and oiling; also furnishing 1,000 cu. yds. crushed rock in stock piles. The low bid submitted was that of Leonard & Slate, Multnomah, at \$39,094.50. The next low bid was that of Fisher Bros., Oregon City, at \$40,264.00. There were five higher bidders. The Commission has awarded the contract to the low bidder, Leonard & Slate, at their bid price of \$39,094.50."

The County Court of Jackson County, consisting of Judge Earl B. Day and County Commissioners L. O. Caster and Ralph Billings, and County Engineer Paul B. Rynning, was present and discussed with the Commission matters pertaining to the abandonment of the Green Springs Junction-Siskiyou Section of the Pacific Highway (old route), in Jackson County, and the selection of roads to be included in the Federal Aid Secondary Highway System. Judge Day gave as the Court's understanding that the Commission has abandoned in favor of Jackson County the section of the old Pacific Highway between Green Springs Junction and Siskiyou Station since the reconstruction of the highway on new alignment south of Ashland. It is the belief of the County Court, he said, that this section should be retained on the state highway system, at least as a secondary state highway, inasmuch as it provides the only direct connection between the Green Springs Highway and points south, and most of the traffic that uses it is state highway traffic. He further stated that the road does not fit in with the county road system and it would be very inconvenient for the county to maintain it, especially to keep it open for travel during the winter season, because it would necessitate the moving of the county's snow removal equipment all the way from Medford for just a few hours' work; whereas, snow removal operations could be performed with state equipment located nearby, without very great inconvenience to the state. The county, he added, could not possibly keep the road open for travel during the snow period, and traffic desiring to go to California points from the Green Springs Highway would have to travel in a roundabout way into Ashland and back over the new Pacific Highway, or about 15 miles farther than if the old road south of the Green Springs Junction were kept open. After discussion, the Commission decided unanimously to place this road on the secondary highway system upon receipt of a formal request from the County Court so to do. The Attorney was instructed to prepare appropriate resolutions covering the matter.

The Commission then discussed with the County Court the matter of abandoning a section of the Tiller-Trail Secondary Highway between the Douglas County line and Trail Creek, in Jackson County, which is no longer of value as a state highway since the road has been reconstructed on other alignment. The County Court agreed that it would be proper for the state to abandon the old road inasmuch as the new road is now available for traffic. The following resolution abandoning the old road was thereupon adopted by the

JAN 6 1938

Commission by unanimous vote, upon motion of Commissioner Tou Velle, which was duly seconded by Commissioner Aldrich:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate the Douglas County Line-Trail Creek Section of the Tiller-Trail Secondary Highway, in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Douglas County Line-Trail Creek Section of the Tiller-Trail Secondary Highway, in Jackson County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Jackson County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that portion of the 60-foot right of way of the Tiller-Trail Secondary Highway (as originally established by resolution) between the Jackson-Douglas County Line and a point on said highway approximately 800 feet north of the south line of Section 17, Township 33 South, Range 1 West, W. M., lying outside of the limits of the right of way as established on the revised alignment of said highway subsequent to 1930.

JAN 6 1938

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated December 23, 1937, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in orange. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County and beyond any responsibility or supervision by the State Highway Commission.

Matters pertaining to the selection of roads for the Federal Aid Secondary Highway System were then discussed. Chairman Cabell explained the federal requirements in regard thereto and particularly pointed out that, in so far as the requirements apply to the State of Oregon, approximately 50 per cent of the moneys available for Federal Aid Secondary Highways must be spent on strictly county roads and the balance on other roads that are not on the Federal Aid Primary Highway System. He further explained that the State Highway Department has just completed a state-wide planning survey in connection with which an exhaustive study has been made with respect to the economics of all the public roads in the state, and it appears from the information gathered that, in Jackson County, the county road known as Table Rock Road is the one that most nearly meets the requirements for improvement in the Federal Aid Secondary Program, having a solvency quotient of 1.3 and a composite quotient of 3.32; whereas, the county road known as the Butte Falls

* Map filed in Right of Way Abandonment and Retention File - No. 54

Road shows a solvency quotient of 0.56 and a composite quotient of 1.61. The County Court expressed a preference for the Butte Falls Road because, they said, it is the most important from the county's standpoint and will relieve the county more than any other. They pointed out that the Table Rock Road is now in pretty fair condition and will not need a great amount of improvement for a number of years. After further discussion, Chairman Cabell thanked the County Court for its appearance and advised that the Commission will give due consideration to the county's request in the formulation of the Federal Aid Secondary Highway Program.

A delegation from Taft, Lincoln County, consisting of former County Judge Fred Robison, H. A. Hostettler, and J. W. Lundin, came before the Commission in regard to a proposed park site containing about 120 acres of land and situate adjacent to the Oregon Coast Highway a short distance north of the town of Nelscott. Mr. Robison headed the group. He said that the area lies between the highway and the Pacific Ocean and a part of the property is covered with a good growth of timber; furthermore, an excellent view of the ocean may be obtained from the tract. He also said that this district is rapidly building up, and, no doubt, in a short time the area under discussion will be cut up into small tracts, which they object to because of the value of the property as a state park. He gave as his thought that the property could be purchased from the owners, Nelscott Land Company and Mr. E. W. Chandler, for the sum of about \$21,000, and recommended that the Commission give the matter some consideration. The Commission referred the matter to the State Parks Superintendent, Mr. S. H. Boardman, for investigation and recommendation. The Commission also agreed to inspect the property the next time it is in that vicinity.

A delegation headed by Mr. Roy Meyers, Eagle Creek, Oregon, representing the Chambers of Commerce of the towns of Sandy and Estacada, and the Foothills Boulevard Association, came before the Highway Commission in the interests of the Eagle Creek-Sandy Section of the Woodburn-Mt. Hood Secondary State Highway. Others in the delegation were R. S. Smith, Ivan A. Barker, R. P. Collins, L. J. Gierke, Roy Wilcox, Charles Sharnke, Paul Dillon, Keith LeRoy, Wm. Widmer, Victor Lundein, M. Suckow, and M. Zog, all of Sandy; also, Carl Rehberg, of Eagle Creek; R. Suckow and Helen Suckow, of Boring; Frieda Lange, of Boring; and Gus Sengre, Fred Lohman, and Will Bell, all of Fenger.

They asked the Commission to improve this road on its present alignment rather than on the new location, which, they understood, the Commission is considering, so that the people now residing along this road will not be left without a good highway. It was their thought that the present road could be improved satisfactorily by widening and surfacing and they stated that they would be satisfied with an improvement similar to that which the Commission undertook on this road east of Beaver Creek a couple of years ago. Mr. Meyers stated that the people do not want a road that will encourage fast driving but simply a good road from their farms to the market. He also said that the farmers have stated their willingness to be very fair in right of way settlements.

Chairman Cabell advised that there is a scarcity of funds available to finance projects of this kind and that a study of the data assembled from

the state-wide planning survey that has just been completed indicates that there are a number of county roads in this class which are in need of improvement more than the road under discussion and should be given preference. However, the Commission will be pleased to give this project due consideration in the formulation of its construction program, but cannot make any promises or commitments in regard thereto at the present time.

Mr. Barker, President of the Chamber of Commerce, asked the Commission to rearrange the traffic signs in the town of Sandy so as to eliminate the confusion that now obtains by reason of the existing signs. The matter was referred by the Commission to the Engineer for investigation.

Mr. Meyers asked the Commission for better drainage facilities at the point where Goose Creek crosses the Woodburn-Mt. Hood Loop Secondary Highway, near Eagle Creek. He said that ordinarily the stream carries only a small amount of water and the two pipe culverts that were installed some time ago, to replace a small bridge, are adequate except during periods of heavy rainfall, when the water backs up onto his land, rendering it useless; and, furthermore, the water flows over the highway so that a pilot car is required for traffic safety. The Commission referred the matter to the Engineer for investigation and report.

A delegation representing the Parkrose Water District, just east of Portland, and consisting of Paul Jarrett, Fire Chief; Harry Pearce, Chairman, School Board District No. 3; and J. C. Strudgeon, Superintendent, Parkrose Water District, came before the Commission and asked for the construction of concrete curbs along Sandy Boulevard (Columbia River Highway) from the end of the present curb at 108th Avenue, to 122nd Avenue, which, they said, would complete construction of such facilities through the populated portion of their district and would afford a better drainage for flood water and would provide better protection for their fire hydrants, sidewalks, and footpaths along Sandy Boulevard. They filed petitions bearing the names of 258 residents of the Parkrose Water District, requesting such improvement. They were informed by Chairman Cabell that the Commission appreciates that this is a desirable improvement but it does not appear now that the Commission can undertake it because of the scarcity of funds. Chairman Cabell stated further that the Commission will be glad to reconsider the matter in the event additional state funds become available which could be used to match the Federal Government's W.P.A. money, but present indications are that the Commission will not have the money to spare.

Mr. Pearce brought up for discussion a drainage problem in front of their grade school at 106th Avenue. He said that the district has a drainage pipe under Brainard Street to carry off the water that accumulates on the school grounds, but evidently this pipe is not large enough, and as a result water has been backing up onto private property to the detriment of the property owners. He inquired whether or not the Commission would have any objections to the district connecting its drainage system with the state's drain on Sandy Boulevard. The Commission referred this matter to the Engineer for investigation and report.

JAN 6 1938

Mr. C. A. Bigelow, representing the Board of County Commissioners of Multnomah County, and Mr. George W. Buck, County Roadmaster, were present and recommended the following projects for the Federal Aid Secondary Highway System in Multnomah County: (1) widening of Base Line Road from the end of the present widened section, near 162nd Avenue, easterly to what is known as 12-mile Road; (2) construction of Section Line and Hosner Road from the Troutdale Road to the Lusted Road, approximately $4\frac{1}{2}$ miles; (3) construction of Thompson Road from Skyline Boulevard to the Columbia County Line; (4) construction of the Laidlaw Road from Thompson Road to the Columbia County Line; (5) construction of Northeast Fremont Street from 105th Avenue to 112th Avenue; (6) 105th Avenue from Prescott Street to Fremont Street; (7) 112th Avenue from Sandy Boulevard to Fremont Street; (8) Extend 112th Avenue to Marx Avenue, north of the railroad, and Marx Avenue from 105th Avenue to 112th Avenue; (9) construct Skyline Boulevard from Barnes Road to Cornelius Pass Road, a distance of 11 miles.

They were informed that the Base Line Road cannot qualify as a Federal Aid Secondary Highway. After discussion, it was finally agreed that the improvement of the Section Line-Hosner Road and the Thompson Road should be given first consideration in the program. Estimates of cost of construction are to be prepared and furnished the county commissioners, who will then advise the Commission as to which of the two projects is to be given preference. Chairman Cabell advised that the moneys available for Federal Aid Secondary Highways is limited and that Multnomah County cannot expect to obtain as much of these funds as it did of the previous federal relief moneys. Mr. Bigelow asked that the record show that there are now between 30,000 and 40,000 registered unemployed in Multnomah County.

County Judge Nelson B. Higgs of Harney County was present in regard to the Federal Aid Secondary Highway Program. He expressed a preference for the improvement of the Crane-Buchanan Ranch County Road in such program if that could be accomplished without decreasing the allotment of other highway funds to Harney County. Commissioner Aldrich advised that the Commission apportions its available funds to the respective districts of the state on a certain basis, irrespective of the class of funds; and, if the Commission should allocate an amount of the Federal Aid Secondary funds for the Crane-Buchanan Ranch Road, it would decrease the allocation of other funds for the Central Oregon Highway. He inquired, in view of this fact, which project the County Court preferred. Judge Higgs expressed a decided preference for continuation of the oiling work on the Central Oregon Highway, regardless of the fact that it might mean that Harney County would not share in the distribution of Federal Aid Secondary moneys.

A delegation from Albany and Lebanon, headed by Mr. Claude H. Murphy, President of the Albany Chamber of Commerce, and including County Judge J. J. Barrett and County Commissioners Harry W. Cooley and H. A. Renninger, County Engineer W. W. Larsen, all of Albany; also Carl Curlier and Mayor C. R. Ashton of Albany, and the following persons from Lebanon and Sweet Home: T. W. Munyan, Walter Scott, Dr. Joel C. Booth, Harry Miller, Harold Irvin, Harry Howe, Senator S. M. Garland, Ted Musgrave, M. J. Nye, E. W. Williams, F. A. Cornell,

and Harry Palmer, came before the Commission with an urgent plea for the completion of the Santiam Highway. Speaking on behalf of the delegation were Senator Garland; Ed. W. Miller, Manager of the Oregon Coast Highway Association, and Mr. Murphy. They urged the Commission to allocate sufficient funds to this road to insure its completion during the 1938 season. Mr. Murphy presented the following communications in support of their oral requests: telegrams from Clyde Williamson and Cliff Knodll, Albany; letter from the Corvallis Chamber of Commerce; letter from the Greater Willamette Valley Association; telegram from the County Court of Lincoln County; letter from the County Court of Benton County; letter from the South Santiam Highway Association.

Chairman Cabell advised that, while the Commission cannot make any promises or commitments at the present time, it is reasonable to assume that if the Federal Aid and Forest Highway moneys are appropriated by Congress as in the past, the closing of the gap in this highway will be accomplished within a reasonable length of time.

The County Court of Linn County then conferred with the Commission in regard to the selection of roads to be included in the Federal Aid Secondary Highway System in Linn County. Judge Barrett suggested the improvement of the Albany-Corvallis Secondary Highway. He was informed by the Engineer that this is too costly a project to undertake in this program. The Engineer also advised that the Commission is more or less obligated to perform some work on the Halsey-Sweet Home Highway, and, at least, to construct a connection to the new county bridge at Brownsville. County Engineer Larsen gave as his thought that the County's choice, in so far as county roads are concerned, would be the Lane County Line-Harrisburg-Corvallis Road, particularly the Harrisburg-Peoria Section thereof. After discussion of a general nature the County Court expressed a desire to confer among themselves before making any definite recommendations. The request was granted and the County Court again came before the Commission on the next day, when the following projects were mutually agreed upon: (1) construction of a section of the Halsey-Sweet Home Secondary Highway to provide a connection with the new county bridge at Brownsville; (2) improvement of the county road extending from Lane County Line through Harrisburg to Corvallis; (3) the county road between Lebanon and Crabtree. Judge Barrett said that the County Court prefers that all of the available moneys be expended for the improvement of county roads rather than state secondary highways, with the exception of the short section of the Halsey-Sweet Home Secondary Highway at Brownsville to provide a connection with the new county bridge at that place.

The County Court of Yamhill County, consisting of County Judge William O. Powell and County Commissioners Thomas Bockes and Frank C. Campbell, conferred with the Commission with regard to the selection of roads to be included in the Federal Aid Secondary Highway System. The State Highway Engineer suggested a continuation of the improvement of the Salem-Dayton Secondary State Highway as the first project, particularly the construction of the section known as the Spaulding Line Change. The County Court said they would have no objection to this project but they would also like the Commission to consider the improvement of county roads and offered the following projects:

JAN 6 1938

(1) improvement of the county road extending from Sheridan southeasterly to the Polk County Line; (2) improvement of the county road extending from the junction of Secondary Highway No. 154 to a connection with Secondary Highway No. 150; (3) county road extending from the Pacific Highway West, south of Newberg, easterly to the Clackamas County Line, known as the Springbrook-Wilsonville Road.

Chairman Cabell advised that the Spaulding Line Change on the Salem-Dayton Secondary Highway and the improvement of the county road extending southeast from Sheridan to the Polk County Line are about the only projects that the Commission will be able to consider on account of shortage of funds. The County Court expressed its approval of these two projects for the program under discussion.

County Judge J. B. Wilkerson and County Commissioners J. T. Graham and Wm. Pringle, Sr., representing the County Court of Columbia County, were present regarding the selection of roads for the Federal Aid Secondary Highway System. Judge Wilkerson said that their most important secondary highway project is the improvement of the Nehalem Highway between Mist and Birkenfeld but they would prefer that the moneys available be expended for county-road improvements. Chairman Cabell advised that in the estimation of the State Highway Commission the Mist-Clatskanie Secondary Highway fits the state's requirements best, especially in view of the fact that there are some bridges on this road that should be rebuilt. The County Court approved the selection of this project and recommended in addition thereto the following county-road projects: (1) improvement of the upper Nehalem county road, extending from the Vernonia Golf Course, near Treharne, southwesterly toward the town of Timber; (2) improvement of the Allstons Corner-Mayger-Quincey Road; (3) the county road known as the Dutch Canyon Road. Commissioner Graham explained that the Allstons Corner - Mayger-Quincey Road is an important project because it provides the only detour for Columbia River Highway traffic when slides occur on this highway between these points.

Chairman Cabell advised that the Commission will give the county's suggestions due consideration in the formulation of the program for the funds under discussion.

A delegation from Clackamas County, consisting of County Judge W. O. Vaughan, County Commissioners B. Schoenburg and L. L. McFarlane; Wallace R. Telford, Chairman, Clackamas County Planning Board; County Engineer John I. Roberts, Sandy; R. S. Milln, West Linn; and John Raicy, of Sherwood, came before the Commission in regard to the selection of projects for the Federal Aid Secondary Highway System. Chairman Cabell explained the requirements for such system and inquired which roads the Clackamas County Court desires to have included therein. Judge Vaughan replied that the Court is not in a position today to make any definite recommendations in regard thereto and requested additional time to give the matter more thorough study. He inquired how much money would be available for expenditure in Clackamas County and was informed by Chairman Cabell that the Commission has not apportioned the funds as yet; but, for estimating purposes, the Court could consider a figure of approximately \$50,000.

Judge Vaughan advised that there is a possibility that the County Court can contribute county funds to enlarge on the projects that the Commission might select for this program. After discussion it was agreed that the Commission would furnish the county, as soon as possible, a definite figure as to how much of the Federal Aid Secondary money would be spent in Clackamas County this year, and, upon receipt of such information, the County Court will advise the Commission about how much money it can spend in co-operation therewith. A definite selection of projects is to be made at that time.

Mr. Telford inquired as to the possibilities of securing the designation as a state secondary highway of the county road which extends westerly from the Mt. Hood Highway, near Boring, through the town of Boring to Oregon City, thence westerly through the town of Tualatin to a connection with the Pacific Highway West. He was informed by Chairman Cabell that, while the road appears satisfactory for a secondary highway, the Commission is not in a position to so designate it at the present time.

Mr. Telford then inquired as to the possibilities of securing the construction of the proposed connection between 82nd Street Highway and the East Portland-Oregon City Highway at Gladstone. Chairman Cabell advised that surveys have been completed of alternate routes for this connection but the Commission has not yet adopted a route because of objections that have been filed to the proposed change. He further advised that there is no possible chance for construction this year but the Commission will be glad to discuss details of the project with the Clackamas County Planning Board at some convenient date in the future if the Board so desires.

The Commission adjourned at 6:00 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the same room.

Portland, Oregon, January 7, 1938.

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

OLD OREGON TRAIL	
BAKER-DURKEE SECTION - CRUSHED ROCK IN STOCK PILES	
Homer G. Johnson	\$15,250.00
Quinn-Robbins Company, Inc.	19,000.00
NEHALEM SECONDARY HIGHWAY	
MILE BRIDGE SECTION - GRADE, SURFACE, OIL; TIMBER, STEEL AND CONCRETE	
BRIDGE	
Warren Northwest, Inc.	\$39,791.50
Mountain States Construction Company	40,019.50

(Continued on next page)

JAN 6 1938

(Mile Bridge Section, continued)

Leonard & Slate	\$42,468.00
F. C. Humber Company	45,051.00
Dolan Construction Company	46,362.50
Joplin & Eldon	46,696.50

PACIFIC HIGHWAY
BEAR CANYON SECTION - GRADING

Harold Blake	\$92,614.00
Berke Bros.	94,641.00
M. L. O'Neil & Son	101,553.00
Colonial Construction Company	106,802.00
Leonard & Slate	107,980.00
E. C. Hall Company	113,958.00
E. L. Gates	114,111.00
Jacobsen-Jensen Company	115,295.00
McNutt Bros.	115,647.00
Clifford A. Dunn	117,698.00
K. L. Goulter	126,915.00
Kern & Kibbe	132,625.00
A. C. Greenwood, Inc.	142,665.00
Diesel Oil Sales Company	143,620.00
Williams & Douglas	143,695.00

CALAPOOYA RIVER AT BROWNSVILLE
STEEL SPAN ON CONCRETE PIERS AND CONCRETE SLAB SPAN
(Bids received for and in behalf of County Court of Linn County)

Tom Lillebo	\$25,045.00
Leonard & Slate	25,730.00
Mountain States Construction Company	26,355.00
F. C. Humber Company	27,008.00
Barham Bros.	28,080.00
J. F. Johnston	28,350.00
Joplin & Eldon	29,088.00
Warren Northwest, Inc.	30,430.00
Portland Bridge Company	32,120.00
Frank Watt Construction Company	32,864.00

COLUMBIA RIVER HIGHWAY
DILLON-JOHN DAY RIVER SECTION - CRUSHED ROCK IN STOCK PILES

H. L. Rice	\$10,200.00
Fisher Bros.	11,250.00
Rogers Construction Company	11,550.00
A. S. Wallace	12,225.00
Saxton, Looney & Risley	12,671.00
Schmeer, Williams & Gentemann	13,537.00

(Continued on next page)

(Dillon-John Day River Section, continued)

Warren Northwest, Inc.	\$13,725.00
Clifford A. Dunn	13,772.50
Edwin C. Gerber	14,250.00
R. O. Dail & Warren Bros., Inc.	14,550.00
Homer G. Johnson	18,180.00

COVE SECONDARY HIGHWAY

GRANDE RONDE RIVER-NOYES RANCH SECTION - GRADING, SURFACING, OILING

Warren Northwest, Inc.	\$19,251.00
Babler Bros.	20,817.00
Van Cleave & Van Cleave	20,871.65
Edwin C. Gerber	22,983.00
Harold Blake	24,739.00
Homer G. Johnson	26,988.00

NEHALEM SECONDARY HIGHWAY

WEST FORK, DAIRY CREEK SECTION

GRADING AND SURFACING AND COMPOSITE PILE TRESTLE

J. F. Johnston	\$ 8,330.00
Leonard & Slate	8,622.50
Mountain States Construction Company	8,715.00
Warren Northwest, Inc.	8,760.00
E. F. & W. F. Philpott	8,790.00
F. C. Humber Company	10,290.00
Shattuck & Neland	10,910.00

Chairman Cabell announced that the awards of contracts would be made at 2:00 o'clock p. m. in the same room. He also announced that the bids received for the Hermiston-Columbia School project in Umatilla County will not be opened for the reason that the Commission plans to revise this project and extend the same to include additional work and will probably take new bids at the next meeting. He stated that the bidders on this job could reclaim their bids unopened by calling for the same at the desk.

The Commission had under discussion a letter from the City Recorder of Newport, Oregon, advising that the City Council at its meeting on December 20 voted down the ordinance providing for parallel parking on the Oregon Coast Highway through their city. The Engineer requested instructions relative thereto, and suggested that the Commission take action to enforce the parallel parking rule at this place. After discussion, the Commission instructed the Attorney to ascertain whether or not the Commission has authority to enforce the parallel parking ruling in cities and towns, and instructed the Engineer to request the assistance of the Department of State Police to enforce such method of parking, in the event the Attorney advises that the Commission has such authority.

The Engineer reported receipt of a complaint in regard to the condition of the surfacing on the Silatz Secondary Highway, in Lincoln County. He advised that a contract is now under way for the placing of surfacing materials on this road, but it seems that the nature of the subgrade is such that the rock is disappearing about as fast as it can be applied, due to heavy log-hauling traffic. He requested authority to increase the amount of rock called for in the contract in order to secure a more stable surface. The Commission authorized the Engineer to use his own judgment in this matter.

The Commission considered and ordered filed a copy of a letter from the Hon. H. A. Wallace, Secretary of the United States Department of Agriculture, directed to Governor Martin, advising the apportionments of the fiscal year 1939 federal moneys to the several states to finance construction of Federal Aid highways and the elimination of railroad grade crossings, and requesting that the submission of projects under this apportionment be deferred until Congress has further considered the President's recommendation for the cancellation of such funds.

A letter was presented from Dr. Joseph H. Adler, Coroner, Klamath Falls, transmitting a report of the coroner's jury sitting for the consideration of a fatal accident that occurred on The Dalles-California Highway south of Klamath Falls, in which the jury recommends that the Highway Commission order a reduction in the speed limit on this highway from the city limits of Klamath Falls to the junction with the Klamath Falls-Lakeview Highway. The Engineer advised that this location would be an ideal place for the establishment of a 25-mile-per-hour speed limit if the Commission has legal authority to impose such regulation, and he recommended that the Commission order such speed limit for this section if the houses are close enough together to satisfy the requirements of the law. The Commission approved the recommendation by unanimous vote. The Attorney was instructed to prepare a bill for presentation to the next legislature, clarifying the law on this subject and definitely authorizing the Highway Commission to order reduced speed limits where necessary.

The Commission had under consideration the matter of acquiring a quarry site from a Mr. Byron Vandecar for use in connection with the surfacing of the north unit of the Missouri Flat Section of the Medical Springs Secondary Highway, in Baker County, for which bids were taken on the previous day. It appears that the Commission has a lease on this property which will expire shortly, and there is a question whether or not the contractor will be able to complete his job before the lease expires. After discussion, the Commission approved settlement with the owner upon the royalty basis and authorized the payment of 3¢ per cubic yard for materials taken, provided the contractor will agree to such arrangement.

The Commission considered and ordered filed a letter from the Vale Chamber of Commerce urging that provision be made in the Commission's budget for the completion of the Central Oregon Highway between Vale and Albany during the season of 1938.

A letter was presented from Archie McGowan, Burns, requesting that a marker be erected at the intersection of the Central Oregon Highway and the Harney Market Road, approximately 13 miles east of Burns, pointing out the old, historic Fort Harney, and containing thereon a brief history of its origin and its service to the pioneers who settled the Harney Valley; also, requesting that the concrete bridge on the Central Oregon Highway, about four miles east of Burns, be named "Susan's Bridge" in honor of Susan Dixon Whiting, a pioneer of this district. The Commission approved the erection of the marker pointing out the location of old Fort Harney but referred to Lewis A. McArthur, Secretary of the Oregon Historical Society, the matter of dedicating the bridge in honor of Mrs. Whiting. The Secretary was instructed to communicate with Mr. McArthur relative thereto.

A letter was presented from Mr. R. Y. Neely, proprietor of the Neely Planing Mill, Willamina, Oregon, expressing his appreciation of the efforts of the State Highway Department to protect life and property. The Commission ordered the communication acknowledged with an appropriate answer.

A letter from Mr. J. W. Raynard, Hillsboro, Oregon, requesting the oiling of the secondary state highway between Hillsboro and Newberg during 1938, had the attention of the Commission. The Commission referred this matter to the Engineer for investigation and report.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has ordered a number of surveys since the last meeting of the Commission. He presented a list of such surveys and asked the Commission to confirm the action. After due consideration, Commissioner Tou Velle moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Landscape	-	36-2815	-	McMinnville-Newberg Section, Pacific Highway West, Yamhill County.	1st authorization - \$150.00
Bridge	- - - -	135-2807	-	Little Shoofly Creek Bridge, Service Creek-Mitchell, Wheeler County.	1st authorization - \$300.00
Location	- - -	20-2808	-	Oak Hill-Veneta Section, Route "F", Lane County	3rd authorization - \$325.00
(Vicinity Map)					Total to date \$5,325.00
Location	- - -	4-2817	-	Wolf Creek-Hamlet Junction - Wolf Creek Highway, Clatsop County.	1st authorization - \$150.00
(Sect. Cor.)					
Location	- - -	122-2808	-	Brownsville-Crawfordsville, Halsey-Sweet Home Sec. Hwy., Linn County.	2nd authorization, \$2,000.00
					Total to date \$4,000.00.

JAN 7 1938

Location - - - 22-2805 - Halsey-Harrisburg Section, Pacific Hwy. East,
Linn County. 2nd authorization - \$2,360.00
Total to date \$4,860.00.

Location - - - 22-2809 - Albany Section, Pacific Hwy. East, Linn County.
2nd authorization - \$12,000.00
Total to date \$15,000.00.

Prepare Plans - 5-2810 - St. Helens-Multnomah Co. Line, Columbia River Hwy.
Columbia County. 1st authorization - \$2,000.00

Right of Way - 121-2819 - Kernville Section, Siletz Secondary Highway, Lin-
coln County. 1st authorization - \$200.00

Right of Way - 21-2812 - Otis-Siletz Section, Oregon Coast Hwy., Lincoln
County. 2nd authorization - \$500.00
Total to date \$570.00.

Prepare Plans - 10-2819 - Rice Hill-Turkey Hill Section, Pacific Hwy.,
Douglas County. 1st authorization - \$550.00

Scale Site - - 21-2820 - Toledo-Newport Section, Corvallis-Newport Hwy.,
Lincoln County. 1st authorization - \$100.00

Right of Way - 27-1202 - Buell-Mill Creek Section, Dallas-Coast Sec. Hwy.,
Polk County. 1st authorization - \$75.00

Location - - - 6-2809 - North Bend-Marshfield Section, Oregon Coast Hwy.,
Coos County. 4th authorization - \$250.00
Total to date \$5,000.00.

Location - - - 6-2810 - Marshfield-Coquille Section, Oregon Coast Hwy.,
Coos County. 3rd authorization - \$1,000.00
Total to date \$17,300.00.

Location - - - 18-2815 - Crooked Creek-Modoc Point Section, The Dalles-Calif.
Hwy., Klamath Co. 3rd authorization - \$350.00
Total to date \$7,625.00.

Prospect for - 19-2813 - Horse Ranch Section, Fremont Highway, Lake County
Materials 1st authorization - \$660.00

Prepare Plans - 14-2806 - Warren Creek-Perham Creek Section, Columbia River
Hwy., Hood River Co. 2nd authorization-\$100.00
Total to date \$400.00.

Prepare Plans - 23-2813 - Jamieson-Landcaster Sec., John Day Hwy., Malheur
County. 1st authorization-\$800.00

Location - - - 136-2817 - Hopewell Intersection, Bellevue-Hopewell Sec.Hwy.,
Yamhill County. 1st authorization - \$200.00

Location - - - 34-2817 - Sunset Camp-Buften Section, Wolf Creek Highway,
Washington Co. 2nd authorization - \$720.00

Prepare Plans - 1-2811 - Baker-Flagstaff Hill Section, Baker-Homestead Hwy.,
Baker County. 1st authorization - \$1,400.00

Prepare Plans - 26-2832 - Sandy Blvd. Section, Columbia River Hwy., Mult-
nomah County. 1st authorization \$1,000.00

Location - - - 107-2804 - City of Prineville Section, Warm Springs Highway,
Crook County. 1st authorization \$200.00

Location - - - 4-2803 - Astor St. in Astoria, Columbia River and Oregon
Coast, Clatsop Co. 4th authorization \$1,500.00

Location - - - 12-2811 - John Day Section, John Day Highway, Grant County.
1st authorization \$600.00

Right of Way - 20-2827 - South of Bob Creek, Oregon Coast Highway, Lane Co.
1st authorization \$40.00

Quarry and - - 28-2805 - Moro-Kent Section, Sherman Highway, Sherman Co.
Stock Pile Sites 1st authorization \$200.00

Gravel Sites - 6-2814 - Coquille-Winston Section, Coos Bay-Roseburg Hwy.,
Coos County. 1st authorization \$1,250.00

The motion was duly seconded by Commissioner Aldrich and was declared by
Chairman Cabell to have carried by the unanimous vote of the Commission.

The Commission had under consideration the following requests for
extensions of time within which to complete highway construction projects:

McNutt Bros., Contract No. 1917, for grading the Wall Creek-
Siskiyou Section of the Pacific Highway, in Jackson County, re-
quested an extension of time from August 18 to August 23, 1937,
within which to complete this project. They gave no reason for
failure to complete the job within the specified time limit. The
Engineer advised that the excavation quantities on this project
were greatly increased due to slides, and in view thereof it was
his recommendation that the extension requested be granted with-
out penalty. He presented a letter from the Bureau of Public
Roads concurring therein. The Commission approved the recommen-
dation by unanimous vote.

Warren Northwest, Inc., Contract No. 1936, for grading and sur-
facing the Gap Ranch-Silver Creek Section of the Central Oregon High-
way, in Harney County, requested an extension of time from August 31
to October 7, 1937, within which to complete this project. They al-
leged that their failure to complete the project within the speci-
fied time limit was due to bad weather conditions. The Engineer
advised that bids for this project were taken by the Commission on

November 5, 1936, but the contract was not awarded until November 28, 1936. He further advised that there were no unusual road or traffic conditions during the progress of the work; also, that weather conditions were not particularly bad and the only apparent reason that could be given for the failure of the contractor to complete the job within the specified time limit is that the contractor had too many jobs under way at the same time. The traveling public, he said, was not inconvenienced by the delay because the contractor applied a prime coating of oil on this section early in the year and the road was kept in excellent condition during the summer months, but the road mix material was not applied until late in the season; consequently, the job was not as satisfactory as if this part of the work had been done during the warm weather. He also said that a check of the quantities of this contract reveals an overrun of approximately 5 per cent and gave as his thought that the contractor is entitled to an extension of time comparable to the overrun in contract quantities. Accordingly, he recommended the granting of the extension of time requested subject to the condition that the contractor be assessed the engineering costs for such period as remains after making allowance for the extension due by reason of the overrun of the contract amount. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Corvallis Sand and Gravel Company, Contract No. 1950, for furnishing crushed material in stock pile for the Port Orford-Euchre Creek and Cape Sebastian-Whaleshead Creek Sections of the Oregon Coast Highway, in Curry County, requested an extension of time of 60 days, from October 31 to December 31, 1937, within which to complete this project. They attributed their failure to complete this project within the specified time limit to unprecedentedly bad weather conditions and an excessive quantity of rejection material encountered at the Pistol River setup. The Engineer advised that the unusually late spring and early winter weather was chiefly responsible for the delay. No inconvenience to the traveling public was occasioned by the delay, he said, but the state did incur some additional engineering expense. He gave as his thought that the reasons given by the contractor for the delay are sufficient to justify extending the contract, as requested, without penalty, and he so recommended. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, Contract No. 1985, for the construction of bridges over Jordan Creek on the I.O.N. Highway, near Jordan Valley, in Malheur County, requested an extension of time of 45 days, from October 31 to December 15, 1937, within which to complete this job. He attributed his failure to complete the contract within the specified time limit to the fact that the contract was not awarded to him for 30 days after the bids were opened and the fact that he was required to use longer piling on this job than was originally anticipated. The Engineer advised that bids for this

project were taken by the Commission on April 28, 1937, but the contract was not awarded until June 1, 1937, due to right of way difficulties. He further advised that during the progress of the work it became necessary to change the length of the treated piling for one of the bridges, necessitating re-ordering such material. Work on this job, he said, was completed on December 11, 1937, or 41 days after the date of completion specified in the contract. He recommended that an extension of time of 41 days be granted without penalty, and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

E. F. and W. F. Philpott, Contract No 1990, for the construction of a bridge over Short Sand Beach Creek, on the Oregon Coast Highway, near Nehalem, in Tillamook County, requested an extension of time from October 31 to December 4, 1937, within which to complete this project. They gave no reason for their failure to complete the job within the specified time limit. The Engineer advised that the contractors allege that the new grade leading up to this bridge was not completed in sufficient time to enable them to deliver materials to their job, and accordingly they were unable to complete it within the specified time limit. He further advised that the specifications under which this contract was let did not contemplate the use of the new grade, but, on the other hand, specified that the bridge should be completed so that the grading contractor could complete his work. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged an amount equal to the cost of maintaining the necessary force of engineers and inspectors on the work during the extra time required. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

A letter was presented from Jacobsen-Jensen Company requesting the Commission to reconsider its action, taken on November 17, 1937, penalizing them for failure to complete their contract, No. 1968, for the grading and paving of the Turkey Hill-Chenoweth Park Section of the Pacific Highway, in Douglas County, within the specified time limit. They pointed out that the Commission took bids for this job on March 25, 1937, but the contract was not awarded to them until 20 days had elapsed, and gave as their thought that they are entitled to at least 20 days' extension of time without penalty, in view of this fact. They further stated that their pay roll shows that they did not have any men working on this job after the 26th day of October, which would indicate that the job was either accepted or ready for acceptance on that date, leaving a period of six days which could be considered as an actual overrun of time limit and for which the Commission could charge a penalty if it so desired. They also stated that they did everything possible to complete the project within the specified time limit but were unable to do so for reasons beyond their control. The Engineer recommended that the contractor be allowed a 10-day extension without penalty on account of the delay in the award of the contract, but that the contractor be required to reimburse

JAN 7 1938

the state for the cost of engineering supervision incurred on this job subsequent to that time. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1890, 1917, 1936, 1950, 1985, 1990, and 2003, for the construction of state highway projects and for the furnishing of steel for the S.P. Undercrossing at Whiteson, Yamhill County, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1890, with McNutt Bros., for grading Unit No. 3, McCallister Section of the Little Butte Secondary Highway, in Jackson County. Completed August 11, 1937.

Contract No. 1917, with McNutt Bros., for grading the Wall Creek-Siskiyou Section of the Pacific Highway, in Jackson County. Completed August 23, 1937.

Contract No. 1936, with Warren Northwest, Inc., for grading, surfacing, and oiling the Gap Ranch-Silver Creek Section of the Central Oregon Highway, in Harney County. Completed October 7, 1937.

Contract No. 1950, with Corvallis Sand & Gravel Company, for furnishing crushed gravel in stock pile for the Port Orford-Euchre Creek and Cape Sebastian-Whaleshead Creek Sections of the Oregon Coast Highway, in Curry County. Completed December 11, 1937.

Contract No. 1985, with J. F. Johnston, for construction of bridges and culverts on the East Unit of the Jordan Creek Section of the I.O.N. Highway, in Malheur County. Completed December 11, 1937.

Contract No. 1990, with E. F. & W. F. Philpott, for bridge construction over Short Sand Beach Creek on the Short Sand Beach Creek Section of the Oregon Coast Highway, in Tillamook County. Completed December 4, 1937.

Contract No. 2003, with Minneapolis Moline Power Implement Company, for furnishing structural steel for Southern Pacific Undercrossing on the Pacific Highway West, near Whiteson, in Yamhill County. Delivered December 25, 1937.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with W. G. Brown, Crystal, Oregon, providing for snow removal on the Klamath Lake Secondary Highway between Crystal Schoolhouse and the Rogue River National Forest Boundary, during the 1937-38 winter season.

Application directed to the Secretary of the Interior for the purchase of additional right of way for the Columbia River Highway between Viento and Memaloose Park, in Hood River County, being a portion of the Katie Koons Indian Allotment.

The Engineer brought up for discussion the matter of constructing the proposed line change through the town of Brookings, in Curry County. He suggested that the Commission approve this project for construction in 1939, if possible, unless the cost of moving the buildings is too high. The Commission deferred a decision in this matter pending a full report by the Engineer on the total cost of the project.

The Engineer reported on the cost to illuminate the East Portland-Oregon City Highway between Portland and Milwaukie, as ordered by the Commission at the previous meeting. He estimated that it would cost about \$8,500 to light the section between the Ross Island Bridge and 17th Avenue, Portland, a distance of 1.297 miles; and about \$9,550 to light the section between 17th Avenue and the south city limits of Portland, near the Oregon Worsted Mill, a distance of 1.79 miles; and about \$6,275 to light the section from the south city limits of Portland to Milwaukie, a distance of 1.075 miles; or a total of about \$24,325 annually for the entire section. He also estimated that it would cost approximately \$3,750 annually for maintenance.

In this connection a letter was presented from the Traffic Engineer of the city of Portland urging, if the Commission intends to experiment with the illumination of highways, consideration of the lighting of 82nd Avenue within the city limits of Portland. A letter was also presented from the town of Beaverton urging the Commission to consider in this program the installation of sodium lights along the Tualatin Valley Highway between the city of Portland and the town of Beaverton. The Commission considered that

JAN 7 1938

82nd Avenue does not meet the requirements with respect to illumination, and accordingly denied the request to conduct an experiment on this road. The Commission decided to study further the matter of lighting the Tualatin Valley Highway between Portland and Beaverton, it being the thought of the Commission that such section might meet the requirements of the experiment if the city of Portland will cooperate to the extent of installing similar lights along the Canyon Road portion of this highway within the city limits of Portland. The Engineer was instructed to contact the city of Portland officials relative thereto. A definite decision in this lighting matter was accordingly deferred by the Commission until the next meeting.

Chairman Cabell brought up the matter of installing a suitable light at the intersection of Barbur Boulevard and Sheridan Street in Portland, being the intersection of the Pacific Highway West and the Pacific Highway East, for the protection of traffic at this point. The Commission by unanimous vote ordered the installation of a traffic light at this point at the earliest possible time.

The Commission had under consideration the selection of projects on which to receive bids at the next regular meeting. The Engineer submitted a list of eligible projects from which the Commission selected the following:

<u>Name of Project</u>	<u>Estimated Cost</u>
Lake Lytle Bridge	\$ 10,000
Hill Creek Bridge	20,000
Paradise Creek-Drain Rock Production Project	19,000
Hood River Rock Production Project	14,000
Crescent-Beaver Marsh Rock Production Project	10,000
Bandon-Port Orford Rock Production Project	24,000
Mystic Creek-Brockway Rock Production Project	14,000
Gold Hill Rock Production Project	<u>13,000</u>
TOTAL	\$124,000

The Engineer was authorized and instructed to prepare the plans and specifications for these projects and to advertise as many of them as possible for bids to be received at the next meeting.

Reconsideration was given by the Commission to the request of contractor L. H. Hoffman that he be allowed payment for the structural steel that he has on hand for use in connection with his contract for the construction of the Quartz Creek Bridge on the Wolf Creek Highway. The Engineer advised that the steel has already been fabricated and is being held in storage at the fabricator's shop at Vancouver, Washington, but cannot be delivered to the job at the present time because of unfavorable road conditions. He further stated that Mr. Hoffman is willing, in order to obtain payment for this material, to give the state a bill of sale for the same and to pay the cost of storage and have the material insured. In fact, he will do anything that the

JAN 7 1938

Commission desires in order that his money will not be tied up until next spring. He gave as his thought that Mr. Hoffman's request is reasonable and recommended acceptance of the same. The Commission approved the recommendation by unanimous vote, but ordered that the matter be covered by appropriate agreement.

The Commission reconsidered the matter of paying for right of way that is being acquired for the proposed Albany railroad grade separation project. It was decided not to pay out any money for such right of way until the Public Utilities Commissioner's hearing on this subject has been held, except in cases where deeds have already been received.

The Commission also reconsidered the request of the city of Medford for approval of two traffic light installations on Main Street (Pacific Highway route) in Medford, which lights do not conform to the state's requirements. It was reported that the city has already installed the lights. The question arose as to what action should be taken against the city in regard thereto. After discussion the Commission ordered that the Traffic Engineer, Mr. John Beekey, and Division Engineer K. D. Lytle be instructed to contact the city officials and arrange a settlement of the matter in the most satisfactory manner possible.

The Commission considered, and referred to the Director of the Travel and Information Department, a letter from City Commissioner R. E. Riley, Portland, suggesting that Mr. Marvin K. Hedge, who is the world's champion all-round fly caster and is now on a tour of the United States, be authorized to display advertising material of Oregon in the booths that he will maintain at each of his stops.

The Commission considered a letter from Mr. Lester Shesley, Chairman of the Roads and Highways Committee of the Vernonia Chamber of Commerce, urging the construction of the Banks-Burton Section of the Wolf Creek Highway. The Secretary was instructed to acknowledge receipt of this letter and to inform Mr. Shesley that the Commission feels that it must complete the construction of the 17-mile section between Elsie and Summit Camp before it starts the construction of any other section of this road.

The Attorney brought up for discussion the matter of the pending suit against Baker County, brought by the Sumpter Valley Railroad Company, arising out of encroachment of the Sumpter Valley Secondary Highway on property owned by the company. He said that the railroad company has started suit against the county, and the state, as an agent for the county, and that the county has asked that he be permitted to assist in this suit. He suggested that the Commission authorize him to aid the county in this matter but not as a representative of the State Highway Commission. The Commission approved the suggestion by unanimous vote.

In this connection, the Commission decided that hereafter, before any county road is designated as a secondary state highway, a thorough investigation shall be made to ascertain what obligations, if any, the state will assume by so designating such road and bringing it under the state's

jurisdiction, and if the investigation reveals that the state would assume any undesirable obligations, then a thorough understanding and agreement relative thereto shall be had with the county concerned before the road is placed on the Secondary Highway System.

The County Court of Klamath County, consisting of County Judge George D. Grizzle, and County Commissioners Roy Taber and Wm. F. B. Chase, appeared before the Commission regarding the selection of roads for the Federal Aid Secondary Highway System. Also present were Frank Z. Howard, County Engineer, and Earl Reynolds, Secretary of the Klamath County Chamber of Commerce. Chairman Cabell explained the requirements for Federal Aid Secondary Highways and inquired which roads in Klamath County the County Court preferred to have improved in the Federal Aid Secondary Highway Program. The County Court asked that the funds available be expended for the improvement of county roads, and suggested the following: (1) the road that extends from Malin northerly to the junction with the Klamath Falls-Lakeview Highway, via Poe Valley and Bonanza, particularly the 6-mile section thereof commencing about 3 miles north of Malin and extending northerly to a point in Poe Valley about 2 miles south of Bonanza; (2) the Whitney Bridge road from its junction with The Dalles-California Highway to the California State line; (3) Langell Valley Road. Their first choice of state secondary highways was the improvement of the Midland and Lower Klamath Secondary State Highways, and for their second choice they named the Klamath Lake Secondary Highway. The Commission agreed to send the County Court a statement as to the amount of federal secondary funds that will be allocated to Klamath County, as soon as that has been determined.

A delegation from Douglas County, representing the Douglas County Court and the Roseburg Chamber of Commerce, consisting of County Commissioner H. B. Roadman; A. C. Marsters; W. C. Harding, Secretary of the Chamber of Commerce; Senator C. W. Clark; Harold B. McKay; Harris Ellsworth, all of Roseburg; and Bob Blakely, of Glide, came before the Commission relative to the selection of Federal Aid Secondary Highways in Douglas County. Mr. Roadman said that the County Court is very much in favor of the improvement of the North Umpqua Highway between Roseburg and Glide and recommends that all of Douglas County's share of the Federal Aid Secondary Highway Funds be expended for construction on this road. He said that this is the county's first and only choice. His remarks were endorsed by the other members of the delegation.

Mr. Harding urged, on behalf of the County Judge, George K. Quins, who was unable to be present, the reconstruction of the Roseburg-Rock Creek Section as the first unit. Mr. Marsters asked the Commission to spend its money on permanent location. After further discussion, the delegation left it with the Commission to decide which section should be improved first.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Baker-Durkee Section of the Old Oregon Trail, in Baker County. Furnish 5,000 cu. yds. crushed rock in stock pile. The Commission received two bids for this job, being those of Homer G. Johnson, Portland, at \$15,250.00, and Quinn-Robbins, Inc., Boise, Idaho, at \$19,000.00. Neither of these bids is satisfactory to the Commission and they have both been rejected and the project has been ordered readvertised.

"Mile Bridge Section of the Nehalem Secondary Highway, in Columbia County. 0.20 mile grading, surfacing and oiling and construction of a bridge. The low bid is that submitted by Warren Northwest, Inc., Portland, at \$39,791.50. The next low bid is that submitted by the Mountain States Construction Company, Eugene, at \$40,019.50. There are four higher bidders. The Commission awards this contract to the low bidder, Warren Northwest, Inc., at their bid of \$39,791.50.

"Bear Canyon Section of the Pacific Highway, in Jackson County. 0.73 mile grading. Harold Blake, Portland, submitted the low bid for this job at \$92,614.00. The next low bid was submitted by Berke Bros., Inc., Portland, at \$94,641.00. There were 13 higher bidders. The Commission awards this contract to Harold Blake, the low bidder, at his bid of \$92,614.00.

"Construction of a bridge over the Calapooya River on a county road at Brownsville, Linn County. The low bidder was Tom Lillebo, Reedsport, at his bid of \$25,045.00. The next low bidder was Leonard & Slate, Multnomah, at \$25,730.00. There were 8 higher bidders. This is a county bridge project and the bids for the same were received by the Commission on behalf of the County Court of Linn County, which has full jurisdiction over the same and which is paying for the work with county funds. All of the bids, therefore, are being referred to the County Court of Linn County for further disposal.

"Dillon-John Day River Section of the Columbia River Highway, in Sherman and Wasco Counties. Furnish 7,500 cu. yds. crushed rock in stock pile. The Commission received 11 bids for this job, the low one being that of H. L. Rice, Portland, at \$10,200.00. The next low bid was that of Fisher Bros., Oregon City, at \$11,250.00. The Commission has deferred the award of this contract and has referred the bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Grande Ronde River-Noyes Ranch Section of the Cove Secondary Highway, in Union County. 2.66 miles grading, surfacing and oiling.

Warren Northwest, Inc., Portland, submitted the low bid for this job at \$19,251.00. The bid submitted by Babler Bros., Portland, in the amount of \$20,817.00, was the second low bid received. There were 4 higher bidders. The Commission has awarded the contract to the low bidder, Warren Northwest, Inc., at their bid of \$19,251.00.

"West Fork Dairy Creek Section of the Nehalem Secondary Highway, in Washington County. 0.11 mile grading and surfacing, and construction of an 87-ft. composite pile trestle. J. F. Johnston, Newberg, submitted the low bid for this project at \$8,330.00. Leonard & Slate, Multnomah, submitted the next low bid at \$8,622.50. There were 5 higher bidders. The Commission has awarded this contract to the low bidder, J. F. Johnston, at his bid of \$8,330.00."

The Commission had under consideration the award of the contract for the surfacing of the North Unit of the Missouri Flat Section of the Medical Springs Secondary Highway, in Baker County, for which bids were taken on the previous day. The Engineer advised that the conditions of the award of this contract have been fulfilled and it is now his recommendation that the contract be awarded to the low bidder, O. C. Yocom, at his bid of \$3,750.00. The Commission approved the recommendation by unanimous vote, and so ordered.

County Commissioners Harry O. Harmon and Floyd W. Hammack, and County Engineer Glen Jacob, of Wallowa County, came before the Commission in regard to the selection of roads to be included in the Federal Aid Secondary Highway System. Chairman Cabell explained the requirements and inquired which roads the county court wants given first consideration in the program. The Court mentioned, as its first project, the county road which extends from Enterprise to Joseph, up what is known as Hurricane Creek. Their second choice was the county road which extends from Flora to Troy; and their third choice was the county road extending from Wallowa to Evans. They expressed their preference for the expenditure of the funds available for the improvement of county roads rather than for state secondary highways and advised that the logical place to spend this money is on the Hurricane Creek Road between Enterprise and Joseph.

The County Court of Umatilla County appeared before the Commission with regard to Federal Aid Secondary Highway matters. Present were County Judge Carl W. Chambers and County Commissioners Sam Ingle and Wm. R. Meiners. Chairman Cabell explained the requirements for Federal Aid Secondary roads and asked the County Court which roads it prefers be improved under the Federal Aid Secondary Highway program. Judge Chambers said that the County Court prefers that the funds available be expended for improvements on the State Secondary Highway System. Mention was also made of the following county roads: Milton-Couse Creek Road, particularly a 1-mile section thereof starting near the town of Milton and extending southeasterly toward a connection with the Weston-Elgin Secondary Highway; the Walla Walla River Road, extending from Milton up the Walla Walla River, a distance of about 6 miles; and the Sunquist Road, extending from a point about 3 miles east of Umpine to the Washington State Line, a distance of about 2½ miles.

The County Court was undecided as to its choice of the county roads, whereupon it was agreed that the Court would again discuss the matter with the Commission at its next meeting. The Engineer was instructed to investigate and secure full information on the roads mentioned so that the Commission will be informed when the matter again comes up for discussion.

County Commissioner Clyde Myers, representing the County Court of Union County, conferred with the Commission in regard to the selection of roads in Union County to be improved as federal aid secondary highways. Mr. Myers expressed a preference for the following projects: (1) Sanderson Springs-Phillips Creek County Road, particularly the Imbler-Phillips Creek Section thereof; (2) North Powder County Road from North Powder to the North Powder River; (3) Anthony Creek Road, being an extension of the North Powder-North Powder River Road; (4) Island City-Cove-Union State Secondary Highway; (5) Medical Springs State Secondary Highway. He was informed that the Highway Commission will give these projects due consideration in the selection of the Federal Aid Secondary Highway Program.

The County Court of Wasco County, represented by County Judge G. G. Shults and County Commissioners Angus H. McLeod and Mace Fulton, was present in the interests of the selection of roads for the Federal Aid Secondary Highway Program. The Court expressed a preference for construction of a road from Tygh Valley to Wamic and continuing to a connection with the Wapinitia Highway, being an extension of the Sherar's Bridge-Tygh Valley Secondary State Highway. They were informed that this road could not qualify as a Federal Aid Secondary Highway.

They then asked that this road be placed on the State Secondary Highway System and suggested the following roads for improvement on the Federal Aid Secondary System: (1) Roberts-Kuykendahl County Road known as the Tygh Ridge Road; (2) Chenoweth County Road; (3) Fifteen Mile Creek Road. The Shaniko-Fossil Secondary Highway No. 291 was their choice of projects on the state secondary highway system but they stated a preference for the county road improvements.

County Judge A. R. Bowman and County Commissioner Charles T. Brown, representing the County Court of Crook County, were present. They advised that the Crook County Court prefers that the Federal Aid Secondary Highway moneys be expended for the improvement of the Warm Springs State Secondary Highway, that being their first and only choice. Judge Bowman gave as his opinion that the State Highway Commission is obligated to improve such highway between Prineville and Madras.

The County Court of Coos County, represented by County Judge Hugh McLain and County Commissioner Thos. H. Thompson, was present and recommended the improvement of the following county road projects in the Federal Aid Secondary Highway Program: (1) Coos River Wagon Road; (2) Allegany Road beyond the terminus of the state secondary highway. They stated that they preferred that the available funds be expended for county road construction exclusively.

The County Court was informed that the replacement of the Catching Slough Bridge, on the Coos River Secondary Highway, is an absolute necessity and it does not appear now that the Commission will be able to finance any more than just this one job; however, the Commission will give the County Court's request due consideration in the formulation of the Federal Aid Secondary Highway Program.

The County Court of Lane County, consisting of County Judge Fred Fisk and County Commissioners Walter J. Holland and C. M. Young; also County Engineer P. M. Morse, discussed with the Commission matters pertaining to the selection of roads to be included in the Federal Aid Secondary Highway System in Lane County. Judge Fisk presented a letter recommending the following county roads, in the order mentioned; for consideration in such program: (1) road extending from Eugene to Veneta (Route "F"), particularly the grading and surfacing of the 6-mile section from a place known as Nielson's to Veneta; (2) road extending from Eugene northerly, through Coburg, to the Linn County line, particularly the revision and oiling of the same; (3) road extending from Eugene to the Linn County line, via Springfield and Marcola, including the surfacing of the same north of Mabel, and the oiling of the entire section, 25 miles in length; (4) the road extending from Jasper to Lowell, a distance of 11 miles.

The County Court's first choice of state secondary highways to be improved on this program was the Territorial Road south from Veneta. Chairman Cabell advised that the Commission will give the Court's request due consideration in the formulation of the Federal Aid Secondary Highway program.

County Engineer Morse inquired whether or not the Commission would sell to the county the rock stored in one of the Commission's maintenance stock piles located near a place known as Horton, west of Junction City. He said that the state has 5 piles of maintenance rock at this place that are not being used, because, as he understood it, the rock is quite soft and is not particularly good for highway purposes. He advised that this rock could be used to good advantage by the county on county roads in this vicinity, and the Court would like to buy it, if possible, at least one pile containing about 300 cu. yds. He offered to pay cash for the rock or replace it with other rock from the county's supply at Lorraine, as the Commission preferred. The State Highway Engineer stated that he would not approve the sale of rock as a general policy but in this particular instance he would recommend letting the county have the rock, if, after investigation, it is found that that could be done without causing any interference with the state's activities. The Commission thereupon referred the matter to the State Highway Engineer with full power to act.

The Commission then discussed with the county courts of Lane County and Klamath County matters pertaining to the Willamette Highway. Representing Klamath County in this discussion were County Judge George D. Grizzle and County Commissioners Roy Taber and Wm. F. B. Chase; County Engineer Frank Z. Howard, and Earl Reynolds, Secretary of the Klamath County Chamber of Commerce. Representing Lane County were County Judge Fred Fisk, County Commissioners Walter J. Holland and C. M. Young, County Engineer P. M. Morse, and Ed Turnbull, Eugene.

The State Highway Engineer advised that the Commission has under consideration the postponement of the opening of this highway for general public use for a period of about one year, or in the fall of 1940, rather than in 1939, in order to provide greater safety to the traveling public which will use the road. He explained that heretofore the Commission has concentrated its funds for grading work with a view in mind of opening the road throughout for general public use at the earliest possible time, the idea being to let the public have the use of the road during the time that the road is being surfaced; however, the question now arises whether or not that would be advisable in view of the dust hazard that undoubtedly will obtain if the road is open to the public before the surfacing is applied. He predicted that the road would carry a large volume of traffic just as soon as it is opened to the public and that numerous accidents would occur because of this dust condition. He explained that it was with the thought in mind of reducing the number of accidents, as well as facilitating construction work, that the Commission has been considering the advisability of keeping the road closed to the general public until a sufficient amount of surfacing materials has been placed to permit travel with safety; but, before taking definite action on the matter, the Commission wanted to discuss it with the people of Lane and Klamath Counties because of a previous understanding in regard to the time that the road would be opened to travel. He called attention to the type of soil of which the highway grade is constructed, particularly on the section east of Cascade Summit, being a pumiceous material which arises in clouds of dust when a vehicle passes over it, resulting in poor visibility and unsafe traveling conditions. He also pointed out the necessity to line the tunnel at the summit of the Cascade Range, and advised that in any event it would be necessary to close the highway to travel during the time that such lining is being constructed. He requested expressions from the members of the delegation in regard to this matter.

Judge Fisk of Lane County stated that public opinion in Lane County favors opening the road for travel as soon as possible, regardless of whether or not the road has been surfaced. He suggested that the application of a light oil treatment on the section east of Odell Lake, where the dust condition is the worst, would eliminate the dust hazard and safeguard travel from that standpoint. The State Highway Engineer advised that oiling experiments have been conducted on pumiceous soils and it has been found that a light oil treatment such as suggested by Judge Fisk will not hold up under the conditions that obtain east of Odell Lake; furthermore, that it would cost about \$3,000 a mile to apply such oil treatment, which is considered exorbitant in view of the mileage to be covered and the fact that it would serve only a temporary purpose. He added that if the oiling work could be done for about \$600 a mile, that would be a different matter and he would recommend it.

Judge Grizzle stated that the people in Klamath County prefer that the road be opened for general public use during 1938. They want the use of the road without delay, he said, and they would prefer to use the grade in its dusty condition rather than have to wait until the surfacing is constructed.

Chairman Cabell advised that the members of the Highway Commission and the officials of the Bureau of Public Roads, who have the responsibility for this road, are convinced that a real danger will be created if the road is opened for general use before the surfacing is applied. He added that such responsibility cannot be passed on to the counties. He further advised that the deferment of the opening of the road for a year will have no bearing whatsoever on the amount of money that is to be spent for construction purposes but it would simply mean that when the road is opened the public will have a very good road to travel on; whereas, if it is turned over to the public before the surfacing is applied, travel conditions will be very poor.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, was present. He pointed out that it would be necessary in any event to close the road to public use when the tunnel is being lined. He predicted that the Highway Commission and the Bureau of Public Roads would be severely criticized by the general public if the road were opened early and left in a dusty condition.

The State Highway Engineer explained the plans for completion of the project, which include the application of the lightest oil treatment possible to permit travel at the earliest possible time, and the construction of a standard surfacing later. It was his thought that practically all of the construction work would be completed and a dustless road turned over to the public by the fall of 1940, dependent upon the continuation of federal appropriations by Congress.

Chairman Cabell concluded the conference by stating that the Commission is particularly desirous that the people of Lane and Klamath Counties know the situation confronting the Commission and the Bureau of Public Roads with regard to the opening of this road, and it was for that reason that the county courts were invited to be present at this meeting to discuss the matter. The final decision of the matter, he added, is in the hands of the State Highway Commission, which must assume the responsibility, and the Commission will make its decision in accordance with its best judgment after giving due thought and consideration to the desires of the people of Lane and Klamath Counties, as expressed at this meeting.

Judge Fisk inquired into the possibilities of securing state aid in maintaining the detour road along Salt Creek pending the opening of the highway. The Commission took the matter under advisement.

The County Court of Benton County, represented by County Judge H. C. Herron and County Commissioners T. A. Logsdon and W. H. Malone, came before the Commission in regard to the selection of Federal Aid Secondary Highways. They suggested the following: (1) North Albany-Wells county road; (2) Alpine-Glenbrook county road; (3) North Albany-Buena Vista county road; (4) Kings Valley State Secondary Highway; (5) Territorial State Secondary Highway. It was agreed by all that the road of greatest importance is the North Albany-Wells county road, particularly a 3-mile section thereof, at the

Albany end, and that the available money should be expended for the improvement of the same. It was also agreed that any surpluses remaining from Benton County's share of these funds should be spent, perhaps, for the improvement of the Kings Valley State Secondary Highway.

Judge Herron then asked the Commission to take over the maintenance of the Willamette Bridge at Corvallis, which is on the route of the Albany-Corvallis State Secondary Highway. He said that the present state secondary highway terminates at the east end of this bridge and that the west end of this bridge is only one block from the Albany-Corvallis primary state highway. He gave as his thought that, in view of the circumstances, the state should assume the responsibility of maintaining the bridge. The Commission took the matter under advisement.

The County Court of Marion County, represented by County Judge J. C. Siegmund and County Commissioner Roy S. Nelson and County Engineer Nathan C. Hubbs, conferred with the Commission in regard to Federal Aid Secondary Highways. They expressed a preference for the following county roads: (1) Salem-Silverton road; (2) South River Road, between Salem and Independence; (3) North River Road from Salem to McNary's Corner. They said that the county would contribute county funds as cooperation with the state in the improvement of the South River Road between Salem and Independence. After discussion, it was agreed that approximately 50% of the Federal Aid Secondary Highway moneys available for Marion County should be expended on the Salem-Silverton County Road, and the balance on the Salem-Independence Road. The State Highway Engineer was instructed to obtain information for a suitable project on the Salem-Independence road for financing with joint state and county funds.

A delegation from Tigard, Oregon, consisting of O. L. Moore, W. E. Upshaw, E. Johnson, Dr. Bissett, A. Hoffaboer, W. M. Evans, J. M. Keister, and Messrs. Lewis and Doriot, came before the Commission in regard to the improvement of the Pacific Highway west into Tigard for four lanes of traffic. Also present were Thomas Tongue, Hillsboro, Attorney for the delegation, and County Judge Donald T. Templeton and County Commissioner H. D. Kerkman, of Washington County. Mr. Tongue was spokesman for the group. He urged the improvement as a traffic necessity requiring immediate action, and suggested that if the Commission found it impossible to reconstruct the highway on the existing route through Tigard, the most feasible route and the one that would be the least costly to construct and would be the least harmful to the town is the one that leaves the present highway near the intersection of the county road that leads to Beaverton and extends in a northwesterly direction to a connection with the present highway near the Catholic school in Tigard.

Chairman Cabell advised that the town of Tigard is the logical stopping place for a 4-lane highway, but such project depends, to a large extent, upon the revision through the town of Tigard; in fact, the two projects have to be worked up together, and the Commission is not able at this time to state when the work will be done because of the uncertainty of the federal moneys with which the project will be financed. He explained that there is a question as to where the highway should be located through the town of Tigard in

view of the fact that it involves a crossing of the Southern Pacific Company's tracks. The Bureau of Public Roads, he said, will not approve the expenditure of government money for an improvement that involves the crossing of a railroad track at grade; therefore, the adoption by the Commission of the existing route on Main Street through Tigard would necessitate the construction of an overhead structure, which would be detrimental to the best interests of the town and would be highly undesirable from the standpoint of the local people. The alternative, he added, is to reroute the highway.

The policy of the Commission, he said, is to locate highways where they will be of the most benefit to the general traveling public, notwithstanding that such location may be harmful to the local interests. However, there are exceptions to this policy, and, in this instance, it appears, from information available, that the route suggested by Mr. Tongue is the most desirable, although surveys are not yet completed and the Commission is not in a position to make a definite decision at this time.

Judge Templeton said that the Washington County Court feels that there is a necessity for this improvement and that it should be undertaken at the earliest possible time. He further stated that, in his estimation, the route to the north of Tigard, which was suggested by Mr. Tongue, is the Court's choice.

Mr. Upshaw said that sentiment in Tigard is getting very tense because this improvement does not go forward. He urged the Commission to expedite it as much as possible so that the people can proceed with improvement of their properties.

The Engineer stated that he has looked over the several routes at Tigard and his first impression is that the line suggested by Mr. Tongue is the proper one, although he will not be in a position to make a recommendation in regard thereto until the surveys, now under way, are completed, which will probably be in about a month. Chairman Cabell concluded the conference by stating that the Commission will make its decision relative to the route after a study of the Engineer's report on the survey.

The Commission then discussed with the members of the Washington County Court matters pertaining to the selection of roads for the Federal Aid Secondary Highway System. Judge Templeton advised that the County Court prefers that Federal Aid Secondary moneys be spent for county road improvements, and recommended the following: (1) Hillsboro-Orengo-West Union (Cornelius Pass) Road; (2) Gales Creek Road between Balm Grove and Glenwood; (3) county road from Cornelius south to Bloomington. The following roads were the Court's choices for the state secondary highways: (1) Buxton-Wolf Creek Section of the Nehalem Secondary Highway; (2) Farmington State Secondary Highway No. 142.

Chairman Cabell advised that the recommendations would be given due consideration in the formulation of the program for the funds under discussion.

JAN 7 1938

The Engineer reported receipt of an invitation from the Pacific Coast Branch of the Associated General Contractors of America to address this association at its 12th annual convention in Seattle, on January 28. The Commission authorized him to attend such meeting at state expense provided it meets with the approval of Governor Martin.

The Engineer requested authority for Assistant State Highway Engineer C. B. McCullough and Construction Engineer H. G. Smith to inspect concrete pavements in the State of Washington, at state expense, with a view to securing needed information in regard to the construction of joints in such type of pavement, there being many good examples of such work in that state. The Commission approved the request by unanimous vote, subject to further approval by Governor Martin.

The Commission had under consideration the setting of a date for its next regular meeting to receive bids for highway construction. It was decided to hold such meeting on Thursday and Friday, February 17 and 18, 1938, in Portland. The Secretary was instructed to arrange to hold this meeting in the auditorium of the Public Service Building, if possible, in accordance with the usual practice.

The Secretary was also instructed to invite to such meeting the county courts of the several counties which have not been heard relative to the selection of roads to be included in the Federal Aid Secondary Highway System.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

 State Highway Engineer	 Chairman
 Secretary	 Commissioner
	 Commissioner

JAN 7 1938

Madras, Oregon, February 15, 1938.

At 3:30 o'clock p. m. on this day State Highway Commissioner E. B. Aldrich, in behalf of the State Highway Commission, conducted a special meeting in the Jefferson County Courthouse at Madras for the purpose of giving the people of this vicinity an opportunity to express their wishes relative to the proposed rerouting of The Dalles-California Highway between Madras and the Crooked River Bridge. Present, in addition to Commissioner Aldrich, were the following: R. H. Baldock, State Highway Engineer; H. B. Glaisyer, Secretary; H. G. Smith, Construction Engineer; T. M. Davis, Highway Engineer, United States Bureau of Public Roads; and sixteen local citizens, including Lewis H. Irving, representing the Madras Chamber of Commerce; Cecil Porter, Secretary of the Jefferson County Conservancy District; County Judge W. R. Cook; W. V. Merchant, store owner, Culver; George L. Rodman, farmer, Culver; and S. E. Lochrie, Metolius.

Commissioner Aldrich opened the meeting by explaining its purpose. He then invited those present to express themselves in regard to the proposed highway improvement. Mr. Irving, as spokesman for the local people, presented a resolution adopted by the Madras Luncheon Club, in which the State Highway Commission was urged to give careful and conscientious consideration to the adoption of a permanent route for this highway which would not bypass the towns of Culver and Metolius. He suggested a new location south from Madras for a distance of about $1\frac{1}{2}$ miles, eliminating numerous sharp curves in the present route, thence following along the present route through Metolius to Culver, thence southerly along the west side of a place known as Juniper Butte to a connection with the present highway at or near the Crooked River Bridge. He declared that such proposed change would place the highway in the heart of the district that is soon to be placed under irrigation by the United States Government and for that reason would be far more desirable when the irrigation system is an accomplished fact than any proposed route to the east thereof. He also declared that the adoption of a route to the east of Juniper Butte would eliminate the necessity for traffic to climb over what is known as Keeney Hill, which, in his estimation, is an advantage, and during the winter season would eliminate much of the snow, ice, and fog hazard that obtains on the Keeney Hill route.

Mr. Porter stated that he has heard numerous objections to the building of the highway along the lower elevations because of the fear that the irrigation waters would saturate the road and keep it in disrepair. He advocated the route suggested by Mr. Irving and said that he did not believe that a road constructed in such location would be affected at all by the irrigation waters. The remarks of Mr. Irving and Mr. Porter were indorsed by Mr. Merchant, Mr. Rodman, and Mr. Lochrie.

Judge Cook asked the Commission to consider the matter from the standpoint of the county as a whole. He indorsed the resolution of the Madras Luncheon Club but gave as his personal opinion that if the highway is to be changed, it should be reconstructed at a location east of Keeney Hill where it could serve also as a section of the Warm Springs Highway between

Madras and Prineville, thus eliminating the necessity to build the Madras-Prineville road into Madras.

Commissioner Aldrich pointed out that the funds with which the Commission proposes to finance this project are federal funds, so the plans must be prepared in conformance with the requirements of the Federal Bureau of Public Roads. He also explained the procedure the Commission is now following in determining the priority and justification of projects, whereby guesswork in arriving at decisions is eliminated. He called upon the State Highway Engineer for further remarks.

The Engineer explained that it is his function to present facts as he finds them to the Commission, which then adopts the policies of the State Highway Department, including the making of final decisions in regard to the selection of routes for highways. He explained that the present road between Madras and the Crooked River Bridge is about 2 miles longer than the direct location between these points, passing over Keeney Hill, and the route proposed by Mr. Irving to the east of Juniper Butte would be about a mile or a mile and a half longer than the present route. Predicting that eventually a thousand cars would pass over this highway daily, and estimating the cost of operating the average motor vehicle at 6¢ per mile, he pointed out that the 2 miles that the highway would be shortened by the adoption of the direct route over Keeney Hill would save to the motorists who use this road about \$45,000 annually; whereas, such motorists would be penalized proportionately by the adoption of any other route because of the longer distance to travel. He further advised that the Oregon Highway Department has gone very thoroughly into the matter of the effect of rise and fall on the cost of operating automobiles, and has found that rise and fall has a very insignificant effect on the cost of automobile operation but that the shortening of the distance to be traveled is the larger feature to be considered, hence no material benefits would accrue by the adoption of the line around the west side of Juniper Butte as has been suggested, but on the other hand the public would be penalized. He also pointed out that a primary state highway is for the use and benefit of the general traveling public and not alone for the benefit of local communities, which fact the State Highway Commission must consider in the selection and adoption of state highway routes.

Judge Cook inquired what would become of the old highway when the new one is built. He was informed by Commissioner Aldrich that the disposition of the old road would depend considerably on the attitude of the county court in regard thereto, but the probabilities are that the road will be turned back to the county to maintain as a county road, although sometimes, if conditions warrant, the Commission designates such a road as a secondary state highway.

After further discussion of a general nature the Commission adjourned at 4:00 o'clock p. m.

State Highway Engineer

Secretary

Commissioner

FEB 15 1938

Portland, Oregon, February 16, 1938.

The State Highway Commission met at 9:00 o'clock a. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on August 26, August 31 and September 1, October 21 and 22, and November 17, 1937. The minutes of the meeting held on September 13 were previously approved by the Commission on January 5, 1938.

The Engineer reported on the meeting conducted by Commissioner Aldrich in the Jefferson County Courthouse, Madras, on the previous day, which meeting was arranged for the purpose of giving the citizens of Jefferson County an opportunity to express their wishes relative to the proposed rerouting of The Dalles-California Highway south from Madras to the Crooked River Bridge crossing at the Deschutes County Line. (See minute entry for details of this meeting.)

He said that a study of the data secured from preliminary investigations indicates that the most direct route between Madras and the Crooked River Bridge, which route bypasses Metolius and Culver and passes over Keeney Hill, is the best from all standpoints, and requested authority to make a definite location survey for a permanent highway along such route. After discussion the Commission granted the request by unanimous vote. The Commission also decided to conduct a formal hearing in Madras as required by law, when such survey is completed.

The Secretary reported the death, on February 15, 1938, of former State Highway Commissioner Charles K. Spaulding of Salem, and also the death, on October 13, 1937, of former State Highway Commissioner W. B. Barratt of Portland. The Commission by unanimous vote adopted the following resolutions in regard thereto upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle, as expressions of sympathy to the bereaved families of the deceased:

WHEREAS, Senator Charles K. Spaulding died at his home in Salem on February 15, 1938; and

WHEREAS, Senator Spaulding served as a member of the Oregon State Highway Commission from March 11, 1931, to February 16, 1932, during which membership he gave generously of his time, his counsel, and his business judgment to the promotion of the Oregon state highway system; and

FEB 16 1938

WHEREAS, it is fitting and appropriate that this Commission acknowledge his service as a former member of the Commission;

THEREFORE, BE IT RESOLVED by the Oregon State Highway Commission in regular session assembled:

That we recognize and acknowledge the contributions made by Senator Spaulding to the Oregon highway system, and thus his contributions to the development of his State;

That we extend to the widow and the family our sincere sympathy in their hour of sadness;

That this resolution be made a part of our permanent records and an engrossed copy presented to the family of Senator Charles K. Spaulding.

WHEREAS, W. B. BARRATT, who was a former member of the Oregon State Highway Commission, died at his home in Portland on the 13th day of October, 1937; and

WHEREAS, Mr. Barratt served as a member of the Highway Commission from January 8, 1921, to March 27, 1923, during which time he gave to the State of Oregon the same calm, conscientious, and deliberate judgment and concern that he gave to his own personal affairs and thereby contributed greatly to highway development and highway financing; and

WHEREAS, it is eminently appropriate that such faithful public service be acknowledged by this Commission.

THEREFORE, BE IT RESOLVED by the Oregon State Highway Commission at regular session assembled:

That we acknowledge with due regard and sincere appreciation the faithful, efficient, and constructive service performed by W. B. Barratt while serving as a member of the Oregon State Highway Commission;

That we extend to the widow and the family our sincere condolence in their great loss and sorrow;

That this resolution be made a part of the permanent records of the Commission and an engrossed copy be presented to the family of W. B. Barratt.

FEB 16 1938

The Secretary was instructed to prepare an engrossed copy of each resolution for presentation to the Spaulding family and the Barratt family.

The Commission had under consideration a letter from Thomas E. Rilea, Chairman of the committee in charge of the State Unemployment Relief Fund, which fund was created through donations by state employes, to be used for relief purposes. Mr. Rilea advised that there remains in this fund the sum of \$3,122.06, which the committee is contemplating turning over to the "Battleship Oregon Fund", in the event that can be done legally and the donors offer no objections thereto. The Attorney advised that it would be illegal for the committee to dispose of the fund in such manner regardless of the personal feelings of the state employes involved. Furthermore, it is his understanding that the Attorney General is so advising Mr. Rilea. The State Highway Engineer suggested that the money should be disbursed to needy state employes who contributed the same, particularly to the families of former state employes who have died since the fund was created, provided that the families of such former employes are in need of financial assistance. The Commission approved the suggestion and authorized the Engineer to offer it to the committee in charge of the fund in question.

In this connection the Engineer brought up for discussion the matter of circularizing state highway department employes for contributions to the "Battleship Oregon Fund" which is being raised by a committee appointed by Governor Martin for the dedication of a memorial to a notable event in the nation's history. It was the thought of the Commission that the cause is a worthy one and that each highway department employe should be given an opportunity to contribute to the same. It was decided, therefore, that a circular notice should be sent to each highway department employe that such fund is being raised and that contributions of \$1.00 or less to the same would be cheerfully received; also, that such circular notice should contain information to the effect that the contribution is in no way compulsory but is to be made voluntarily by the employe in the spirit of patriotic citizenship. It was also decided that such notice should be sent to the department employes by someone other than one of the officials of the department so that it would not appear that contributing is mandatory. In view of the fact that this matter is not a function of the State Highway Commission, the Commission decided that the cost of sending out this notice should not be paid with state highway funds. Chairman Cabell then very kindly offered to personally assume such expense, including postage, which it was thought would amount to approximately \$25.00.

The Engineer reported on the cost of resurfacing and oiling the Lexington-Sand Hollow Section of the Lexington-Echo Secondary State Highway by state forces as compared with the low bid received by the Commission on May 22, 1936, when the work was advertised to be done by contract. The report indicates that state force work cost approximately \$25,000, whereas, if the work had been done by contract, it would have cost at least \$38,000, which was the amount of the low bid received. In other words, the state made a saving of 33 per cent by doing the work with state forces. The Commission approved the report and ordered it filed.

A letter was presented from the Clackamas County Planning Board, recommending what is known as the LR-2 alignment for the proposed revision of the 82nd Street (Cascade) Highway north of Oregon City, in Clackamas County. In this connection the Commission also considered a written report from the Engineer on this subject, dated February 1, 1938, in which he advises that there is very little difference between the LR-2 line and the LR-4 line but he is inclined to believe that the LR-4 line is the better of the two. After discussion, the Commission indicated a preference for the alignment recommended by the Engineer and ordered that Clackamas County Planning Board be so informed. The Commission also ordered that the reaction of the Board thereto be ascertained and that the Board be requested to state its objections to the LR-4 line.

The Engineer brought up for discussion the matter of adopting a permanent location for the Pacific Highway at the Oregon-California state line. He advised that the location originally proposed connected with the existing highway in the State of California at the state line with a sharp curve of large central angle; also, that the existing highway in California has very poor alignment and contains grades as high as 7 per cent, so that the location previously considered for the highway in Oregon would not fit in with the improvement of the California section when such section is reconstructed to modern standards, and it would practically force the building of the California section on an inferior location. Further studies of this matter have been made by both Oregon and California engineers, he said, with the result that another location has been tentatively selected which would meet the requirements of both states but it would involve greater expense to construct, although the sharp curvature at the state line would be eliminated. He recommended the adoption of such new location, notwithstanding that construction expense would be greater. After discussion, the Commission approved the recommendation by unanimous vote, subject to the condition that such location meet with the approval of the California highway authorities and that the California authorities will enter into a binding agreement with the State of Oregon providing for the construction of the California portion of this highway on such alignment. The Engineer was authorized and instructed to take the matter up with the California authorities at once.

A report was rendered by the Engineer on the cost to widen and improve the 16-mile detour on the Willamette Highway as was requested by Lane County Court at the previous meeting. He said that investigation has been made and it has been found that very little benefit would be gained by an expenditure of less than \$1,000 per mile for such improvement. He questioned the advisability of such expenditure because, undoubtedly, it would result in more travel over the road and would encourage speeding, which would render the road more hazardous than it is at present. It was his thought that such improvement would not be advisable from the safety standpoint and suggested that satisfactory results would be obtained by doing a little more maintenance work on the present road. The Commission concurred in the viewpoint of the Engineer and so ordered. The Secretary was instructed to convey such information to the Lane County Court.

The Engineer reported orally on the cost to construct a nonskid wearing surface on Sherman Avenue, in North Bend, the route of the Oregon Coast Highway through this town. He estimated that temporary surfacing 30 feet wide, leaving an 8-foot parking strip on each side, would cost about \$5,000 and would alleviate the slippery condition of this strip when wet and would reduce the probability of accidents occurring on such account. He requested authority to do this work as soon as weather conditions will permit. The Commission indicated a favorable attitude toward the project but deferred a definite decision until later in the session. This matter was reconsidered later, at which time the Engineer was authorized to proceed with the project on the basis outlined by him.

The Commission reconsidered the matter of approving the assignment by Julius Gunnell of his contract for furnishing ferry service across Coos River, in Coos County, at a place known as Enegran Ferry, to Mr. Andrew Stambuck. The Engineer reported receipt of several letters from responsible citizens of Coos County recommending Mr. Stambuck very highly, and recommended approval of the assignment provided the surety on the bond furnished by Mr. Gunnell consents thereto without prejudice to the bond; and provided, further, that Mr. Stambuck will furnish proper insurance coverage. After discussion, the Commission approved the recommendation by unanimous vote and ordered that Mr. Gunnell and Mr. Stambuck be so informed.

A letter was presented from Mr. Carle Abrams, Salem, one of a number of persons who own cottages along the beach at a place known as Roads End Beach, in Lincoln County, complaining that large quantities of rocks and boulders are being removed from the beach area for private purposes, and, as a result, their properties are no longer protected from wave action as heretofore. Mr. Abrams gave as his thought that this area is under the jurisdiction of the State Highway Commission, and, such being the case, the Commission should take some action to prevent the removal of the rocks and boulders. The Engineer advised that investigation was made of this matter and it was found that rock has been taken quite frequently from this place and some beach gravel has also been taken, but no great amount of damage has been done as far as can be ascertained; however, inasmuch as it is contrary to the policy of the Commission to permit the taking of materials from the beach area under its control, it would be proper for the Commission to take steps as may be necessary to prevent the removal of additional materials. He recommended the erection of appropriate signs at points of access to the beach from the roadway, calling the attention of the public to the fact that the beach area is state property and that the removal of rock, gravel, et cetera, therefrom is prohibited. The Commission approved the recommendation by unanimous vote.

The Commission discussed briefly the Engineer's report on the cost to illuminate a section of state highway in the city of Portland, as an experiment, but deferred action thereon until the next meeting.

The Commission also discussed the Engineer's report on the cost to illuminate bridges and overpasses that are located on state highway routes within the corporate limits of cities and towns. The Engineer advised that there are about 35 such structures at present and that it would cost about

FEB 16 1938

\$12,000 annually to illuminate them. The Commission decided, in view of the present financial stringency, not to light such structures for the time being but to limit its lighting program to the illumination of underpasses, which was heretofore approved.

The Attorney reported the results of his investigation of the claim of Mr. Frank Triska for the loss of a horse which he alleges was injured while crossing a cattle guard installed on a roadway leading from one of the state's gravel pits to a state highway, with the result that the horse had to be killed. He said that such investigation reveals that the price paid for the gravel pit was determined upon consideration of the gravel only and that the installation of the cattle guard was simply a precaution taken against injuries and loss that might be sustained. Furthermore, it appears that the precautionary measure did not work as was expected, and, as a result, Mr. Triska sustained a loss that was not provided for in the compensation paid for the gravel pit. He recommended, in view of the facts, that the Commission pay the claim, which amounts to \$100. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer reported that, in conformance with authority previously granted him by the Commission, he has awarded the following contracts, bids for which were referred to him by the Commission to award the contract to the low bidder in each instance when certain conditions had been satisfied:

Contract for furnishing 12,400 cu.yds. crushed rock for the Mt. Hood Rock Production Project. Bids taken January 6, contract awarded January 22, 1938, to Saxton, Looney & Risley, Portland, who submitted the low bid therefor;

Contract for furnishing crushed rock for the Dillon-John Day River Section of the Columbia River Highway in Sherman and Wasco Counties. Bids taken January 7, contract awarded January 31, 1938, to H. L. Rice, Portland, who submitted the low bid therefor.

The Commission, by unanimous vote, approved the award of these contracts as made by the Engineer.

The Engineer reported the need for an additional authorization of \$5,000 to finance completion of the concrete investigations now in progress, including the purchase of a freezing unit. He advised that investigation to date shows promise of establishing the primary cause of disintegration of concrete structures in Eastern Oregon and gave as his thought that data obtained from the investigation will be worth many times the cost of conducting the same. The Commission approved the request by unanimous vote.

The Commission also by unanimous vote authorized the purchase of the following equipment:

FEB 16 1938

- 6 truck scales for installation at strategic locations throughout the state, estimated to cost \$15,000;
- 20 light-weight type trucks of the Ford or Chevrolet class to replace 20 wornout trucks of the same type which are to be traded in as part purchase price on the new equipment - estimated total net cost \$16,000. (The Engineer advised that these trucks are needed to carry on the paving plant work during the coming summer);
- 12 asphalt heaters, estimated to cost \$6,600, which are needed to properly maintain the increased mileage of oiled road;
- 15 mowing machines, estimated to cost a total of \$2,025, to provide for an increase in mowing operations on pavement shoulders thus reducing blading operations in a corresponding amount.

The Engineer brought up for discussion the matter of inspecting the road extending from the Columbia River Highway to the Maryhill ferry landing with a view to determining whether or not this road should be taken over by the state and maintained as a part of U. S. Route No. 97, as has been requested by proponents of same. The Engineer advised that numerous requests have been made for the state to take over this road, the most recent of which is that of Honorable Earl Snell, Secretary of State; further, that at one time the Commission signified its willingness to inspect the road in company with members of the Moro Commercial Club, but such inspection has never taken place. He requested instructions. The Commission decided to inspect the road the next time it is in that vicinity and ordered that Mr. Snell be so informed. The Engineer was instructed to ascertain the policy of the State of Washington highway officials with respect to this matter in so far as it pertains to the connection on the Washington State side of the river.

The Commission considered and signed a voucher in favor of Laura Hotchkiss, assigned to Carson & Carson, Salem, calling for payment of \$59.97, which is one-half of the cost incident to the appeal of the case of Bank of California, et al, versus Scott, et al, involving a state highway contract. The Attorney advised that a vital question is involved in this case inasmuch as the trial court held that the State Highway Commission could not condition an assignment of funds due a contractor so that the funds would be subject to the state's prior rights with respect thereto, but that the contractor could make an assignment of money on a contract and place that money beyond the reach and control of the State Highway Commission. The creditor concerned in this case, he said, has appealed for the purpose of challenging the trial court's decision. He asked the Commission to permit him to appear before the Supreme Court as an amicus curiae to assist in the case. Such authority was granted by the Commission by unanimous vote.

The Engineer reported the need to place reduced load limits on certain highways and requested authority to post them for 50 per cent reduced

loads with the exception of the Oregon Coast Highway between Marshfield and Port Orford, where he recommended a 25 per cent reduction. The Commission approved the Engineer's request and by unanimous vote adopted the following resolutions in regard thereto, with instructions that the reduced load limits shall not be put into effect until absolutely necessary:

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to wit:

SHERMAN HIGHWAY
MT. HOOD HIGHWAY
HOOD RIVER SECONDARY HIGHWAY
McKENZIE HIGHWAY
McKENZIE-BEND HIGHWAY
OCHOCO HIGHWAY
FREMONT HIGHWAY
CENTRAL OREGON HIGHWAY

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highways, and, in order to protect said highways against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said roads shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads, and the Commission having found upon due investigation that it will be for the best interest of the said state highways that the maximum total weight of load and vehicle which shall be permitted upon said roads shall be reduced so as to conform to the requirements fixed in this order,

FEB 16 1938

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed:

The maximum weights which shall apply to the following highways, to wit:

SHERMAN HIGHWAY from its junction with the Columbia River Highway, in Sherman County, to its junction with The Dalles-California Highway, in Wasco County;

MT. HOOD HIGHWAY from Cooper's Spur to its junction with the Columbia River Highway, in Hood River County;

HOOD RIVER SECONDARY HIGHWAY from its junction with the Mt. Hood Highway northerly to Tucker's Bridge, in Hood River County;

McKENZIE HIGHWAY between Sisters and Redmond, in Deschutes County;

McKENZIE-BEND HIGHWAY from Sisters to the junction with The Dalles-California Highway near Bend, in Deschutes County;

OCHOCO HIGHWAY between Redmond, in Deschutes County, and a point 6 miles east of Prineville, in Crook County;

FREMONT HIGHWAY between Silver Lake and Lakeview, in Lake County;

CENTRAL OREGON HIGHWAY between Bend, in Deschutes County, and Burns, in Harney County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in

FEB 16 1938

full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways and at important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any part of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to wit:

THE DALLES-CALIFORNIA HIGHWAY
KLAMATH FALLS-LAKEVIEW HIGHWAY
PENDLETON-JOHN DAY HIGHWAY
JOHN DAY HIGHWAY

AND WHEREAS, the said above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highways, and, in order to protect said highways against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said roads shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads, and the Commission having found upon due

FEB 16 1938

investigation that it will be for the best interest of the said state highways that the maximum total weight of load and vehicle which shall be permitted upon said roads shall be reduced so as to conform to the requirements fixed in this order,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to wit:

THE DALLES-CALIFORNIA HIGHWAY between Maupin, in Wasco County, and Terrebonne, in Deschutes County;

THE DALLES-CALIFORNIA HIGHWAY between Bend, in Deschutes County, and Klamath Falls, in Klamath County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway near Klamath Falls, in Klamath County, to Lakeview, in Lake County;

PENDLETON-JOHN DAY HIGHWAY between its junction with the Oregon-Washington Highway, at Nye, and Ukiah, in Umatilla County;

JOHN DAY HIGHWAY between Prairie City, in Grant County, and Unity, in Baker County

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways

FEB 16 1938

and at important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any part of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

OREGON COAST HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

FEB 16 1938

The maximum weights which shall apply to the following highway, to wit:

OREGON COAST HIGHWAY from Marshfield in Coos County to
Port Orford in Curry County

shall be restricted to the following weights: the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed the product of four hundred fifty (450) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) per cent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above named highway and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any portion of said highway is located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

In this connection the Engineer reported receipt of numerous "Reports of Arrest" from the State Police Department covering loading violations in Coos County, which indicate that the Justice of the Peace at Coquille is not cooperating in the Commission's efforts to keep loads within the weights specified by law; and it appears that when offenders are brought before him the Justice imposes a fine but immediately remits the same so that the spirit and intent of the law in regard to such matters is being defeated. He requested instructions in regard thereto. It was the thought of the Commission that the placing of a reduced load limit on the Oregon Coast Highway and the carrying out of the procedure heretofore outlined for disposing of cases of this kind, which involves the revocation of the permits of the offenders, would remedy the situation.

The Commission had under consideration at this time the matter of adopting a permanent route for the Pacific Highway between Ashland and the California State Line, in Jackson County. The following resolution in regard

FEB 16 1938

thereto was adopted by the unanimous vote of the Commission, upon recommendation of the Engineer:

WHEREAS, for the purpose of accomplishing a better alignment, the elimination of unsafe and dangerous curves and the reduction of steep grades the Commission directed the Engineer to make a new survey of the section of the Pacific Highway between Ashland and the Oregon-California state line in Jackson County; and

WHEREAS, said survey has been completed and a map thereof made and the field notes and other engineering data have been filed in the office of the State Highway Commission in Salem, Oregon;* and

WHEREAS, after due consideration of said map and records it is the judgment of the Commission that said map, survey, field notes and other engineering data should be approved and adopted by the Commission and the location and route between said termini be made the location and route of the Pacific Highway between said points.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the survey, field notes, map and other engineering data with respect to the Pacific Highway between the City of Ashland and the Oregon-California state line in Jackson County be and the same in their entirety hereby are approved and adopted as the survey, field notes, map and engineering data supporting and disclosing the route of the highway between the said termini, and the Engineer hereby is directed to file all of said data and information and to preserve the same in the records and files of the State Highway Commission at Salem, Oregon.

2. That the route of the Pacific Highway in Jackson County between Ashland and the Oregon-California state line hereby is changed and modified and said highway between said termini hereby is located as follows, to wit:

Beginning at the intersection of Boulevard Street (being the present Pacific Highway) and Ashland Street in South Ashland, thence southeasterly to a point in the Northwest quarter of the Northwest quarter of Section 24, Township 39 South, Range 1 East, W.M., which is approximately opposite and westerly from the S. P. Railroad Station named "Clausen", thence continuing in a southeasterly direction to a point near the west one-quarter section corner of Section 25, Township 39 South, Range 1 East; thence continuing southerly and southeasterly to a point of crossing with the S. P. Railway Company's line in the

* Map filed with Resolutions Adopting State Highway Routes - No. 1.

Southwest quarter of the Northeast quarter of the Northeast quarter of Section 17, Township 40 South, Range 2 East; thence continuing southerly and southwesterly to a junction with the present constructed Pacific Highway at Siskiyou Station, said point being in the southeast one-quarter of Section 20, Township 40 South, Range 2 East, W.M.; thence continuing southerly, crossing the summit of the Siskiyou Mountains near the northeast corner of Section 32, Township 40 South, Range 2 East, W.M., to a point on the Oregon-California state line in the Northwest quarter of Section 17, Township 41 South, Range 2 East, W.M.

3. That said map for identification bears thereon the signature of R. H. Baldock, State Highway Engineer, and is dated the 10th day of January, 1938, the original of which said map has been placed in the files and records of the Highway Commission at Salem, Oregon, and a copy of which is attached hereto.

4. That the State Highway Engineer hereby is instructed and directed to physically locate and mark with proper monuments or markers on the ground the said route and highway between said termini, and the Engineer is further instructed to prepare the said section of said highway for proper and adequate improvement as a part of the section of the Pacific Highway in Jackson County between said termini.

5. That this resolution be entered in the records and minutes of the State Highway Commission and that a duly certified copy thereof be mailed to the County Court of Jackson County and the United States Bureau of Public Roads at Portland, Oregon.

The Commission also had under consideration a resolution adopted by the Jackson County Court requesting the selection and designation as a secondary state highway of that portion of the Pacific Highway (old route) which extends from the Green Springs Highway junction southerly to a connection with the new route of the Pacific Highway near a place known as Siskiyou Station, a distance of approximately 7.48 miles. It appeared to the Commission that this request is in accordance with previous understanding with the Jackson County Court and that it should be approved. The Commission thereupon adopted the following resolution in regard thereto by unanimous vote, upon motion of Commissioner Tou Velle, which was duly seconded by Commissioner Aldrich:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Jackson County Court of the State of Oregon, has selected the highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following named market road, county road, highway, route, or location of a highway in Jackson County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted, and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Siskiyou Secondary Highway No. 273:

Beginning at the former junction of the Green Springs Highway with the old route of the Pacific Highway at a point approximately 1,680 feet west and 110 feet south of the quarter section corner between Sections 29 and 32, T. 39 S., R. 2 E., W. M.; thence in a southerly direction via the old route of the Pacific Highway to the junction of the old route of the Pacific Highway with the relocated and constructed route of the Pacific Highway near Siskiyou Station at a point approximately 1,540 feet north and 1,320 feet west of the section corner common to Sections 20, 21, 28, and 29, T. 40 S., R. 2 E., W. M., a distance of 7.48 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The following resolution abandoning as a part of the state highway system a portion of the Pringle Creek-Illahe School Section of the Pacific Highway south of Salem, in Marion County, was adopted by the Commission by unanimous vote, upon motion of Commissioner Tou Velle, which was duly seconded by Commissioner Aldrich, it appearing to the Commission that this particular section of road is no longer of value as a state highway inasmuch as the highway has been reconstructed on new alignment at this location:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Pringle Creek-Illahe School Section of the Pacific Highway in Marion County; and

FEB 16 1938

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Pringle Creek-Illaha School Section of the Pacific Highway in Marion County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Marion County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that portion of the Old Pacific Highway lying westerly of the westerly right of way line of the reconstructed Pacific Highway as relocated between terminal points in Section 10, Township 8 South, Range 3 West, and Section 2, Township 9 South, Range 3 West, and more particularly described as beginning at Station 104+00 and ending at Station 359+00 of the said relocated Pacific Highway, said old Pacific Highway being a strip of land 60 feet in width.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit 'A'", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and bears date of January 19, 1938, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

* Map filed in Right of Way Abandonment and Retention File - No. 55.

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Marion County, together with a copy of said exhibit or map, for such action as the County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Marion County and beyond any responsibility or supervision by the State Highway Commission.

The Commission had under discussion the matter of permitting the Dayton City Council to maintain mileage and direction signs at each end of the Amity-Dayton Secondary State Highway, directing traffic over this road rather than along the Pacific Highway West through McMinnville. It appears that the signs in question are located on private property and that they contain information directing traffic, which is contrary to state law; also, that the City Council has been asked to remove the signs but has indicated an unwillingness to do so regardless of the legal status. The Engineer gave as his thought that the Commission should take legal action, if necessary, to effect the removal of the signs, because, if they are allowed to remain in place, it will be necessary to permit the installation of similar signs in other locations throughout the state where like conditions obtain, and the highways of this state would soon be cluttered up with all manner of mileage and direction signs. The Commission indicated concurrence in the Engineer's viewpoint but deferred action pending investigation of the law by the Attorney and a study of his written opinion as to the Commission's authority to control such signs. This matter was reconsidered by the Commission later in the session, at which time the Commission went on record as being opposed to the maintenance of such signs regardless of whether they are on the highway right of way or on private property, and decided that it would do everything within its power to have the signs removed. It was also decided that State Highway Department standard mileage and direction signs should be erected at each end of this secondary highway for the benefit of the traveling public, which would eliminate any necessity for the signs now being maintained by the Dayton City Council.

The Attorney reported receipt of information from the City Council of Newport to the effect that the Council has adopted an ordinance requiring

FEB 16 1938

the parallel parking of cars along the state highway route through Newport and that such ordinance also provides for one-hour parking privilege and contains an emergency clause making the ordinance effective immediately. He also advised that the city has requested that appropriate stripes be painted on the highway at once so that the provisions of the ordinance can be enforced. The Commission instructed the Engineer to see that the traffic stripes are painted just as soon as weather conditions will permit, and to inform the City Council of the action taken on their request. In this connection, the question arose whether or not the state should assume the expense of painting these stripes, including the cross-stripes to mark off the parking areas next to the curb. The Commission decided unanimously to pay such expense with state funds.

The Commission had under consideration a letter from the Bureau of Public Roads pointing out that a serious traffic hazard exists on the Salmon River Highway by reason of the fact that mud is being deposited on the surface of the road by log-hauling equipment, and asking the Commission to take action as may be necessary to alleviate this condition. The Commission decided that all logging operators should be required to clean the mud off their equipment before entering the state highway. The following letter in regard thereto was approved by the Commission by unanimous vote and the Secretary was instructed to see that a copy of this letter is sent to each operator engaged in the truck-hauling of logs on this road:

To All Persons Engaged in Truck Hauling
of Logs on the Salmon River Highway:

Recent inspection of the Salmon River Highway reveals that, in certain locations, large quantities of mud have been deposited on the surface of the pavement by logging trucks upon entering the highway from private logging roads. This mud causes a slippery condition which is conducive to traffic accidents and will not permit the general public use of the highway with safety.

The remedy of this condition is to require logging operators to clean the mud off their equipment before entering the highway. The State Highway Commission is asking you, as an operator of one or more logging trucks on this highway, to do this in so far as it involves the equipment under your control to the end that this highway, which is heavily traveled, may be maintained in the best possible manner from the traffic safety standpoint.

I am instructed to inform you that, unless the Commission is able to secure your full cooperation in this regard, it will be necessary for the Commission, in the interests of public safety, to order the revocation of all permits that have been issued for the trucking of logs on this highway, at least for the period that the dangerous condition exists. The Commission prefers not to take such drastic action and trusts that you will comply with its request, thus eliminating the necessity for the same.

FEB 16 1938

The Commission considered and signed a joint letter with W. H. Lynch, District Engineer, Bureau of Public Roads, and C. J. Buck, Regional Forester, U. S. Forest Service, directed to the Chief of the Forest Service and the Chief of the Bureau of Public Roads, Washington, D. C., recommending the following program of national forest highway construction for the State of Oregon for the fiscal year 1939 Forest Highway Funds:

Funds Available:

F. Y. 1939 Authorization..... \$1,254,044

Deduct:

Admin. & Equipment - 10% (approx.).... -125,044

Available for Program.. \$1,129,000

Recommended Program: (Major Projects)

<u>Proj. No.</u>	<u>Proj.</u>	<u>Length</u>	<u>Allocation</u>	<u>Remarks</u>
16-G4,H2,I2,J2	Tiller-Trail	7.0	\$ 85,000	Surf. & Bit. Surf.

	Location Surveys		25,000	
	Maintenance		39,000	
Total.....			\$1,129,000	

FEB 16 1938

The Commission also signed the following joint letter with Mr. Lynch and Mr. Buck, directed to the Chief, Forest Service, and Chief, Bureau of Public Roads, Washington, D. C., recommending an additional allocation of \$25,000 from the State Contingent Fund to the Maintenance Fund to finance additional maintenance of forest highway projects necessitated by reason of the fact that an unusually snow-free winter has caused a greater mileage of forest highways to be maintained during this winter than was originally anticipated:

"In the Forest Highway program letter for the State of Oregon, approved by the Secretary on February 24, 1937, there was included an item of \$30,000 for maintenance of projects for which the Federal Government was obligated under the terms of the various cooperative agreements. Due to an unusually snow-free winter, it has been necessary to maintain a considerably greater mileage during the winter than was anticipated. Several large slides have also developed, the removal and correction of which will require additional funds.

"It is, therefore, recommended that an additional allocation from the State contingent to lump fund maintenance of \$25,000 be approved."

The Engineer requested instructions in regard to the disposal of some 14 tons of structural steel which is being salvaged from the overcrossing project now under construction over Sullivan's Gulch, in Portland. He said that he has had a number of offers for the purchase of this material, ranging from \$4.00 per ton to \$8.55 per ton, but there is a question whether these offers should be considered or the material advertised for sale. The Commission decided that the material should be advertised for sale in the regular manner.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The following members of the World's Fair Commission, appointed by Governor Martin, were present and discussed with the Commission matters pertaining to the financing of exhibits at the World's Fairs which are to be held in San Francisco and New York during the year 1939: C. T. Haas, Chairman; T. F. Gunn, Vice-Chairman; C. C. Carlson, Executive Secretary; Federal Judge Claude McCulloch; and Tom Livesley. Also present were Governor Charles H. Martin, Assistant Attorney General Ralph J. Moody, and Lew Wallace, State Game Commissioner. Mr. Haas outlined briefly the tentative plans for exhibits at both fairs and advised that it would cost about \$230,000 to finance the same, \$50,000 of which has already been appropriated by the legislature, \$20,000 to be expended at the New York Fair, and \$30,000 at the San Francisco Fair. He gave as his thought that the State Highway Commission and the State Game Commission should be sufficiently interested in the matter to contribute at least a portion of the remaining funds and suggested a minimum of \$100,000

from the State Highway Department and \$50,000 from the State Game Commission. Others speaking in behalf of the projects as outlined by Mr. Haas were Mr. Gunn, Mr. Livesley, and Judge McCulloch.

Governor Martin inquired as to the legality of the State Highway Commission spending state highway funds for such purposes. In reply thereto Attorney Devers gave as his opinion that the State Highway Commission cannot legally turn over state highway funds for disbursement by some other agency, although the Commission does have the authority to spend its funds for publicity, provided the disbursements are made through the State Highway Department direct in the same manner in which disbursements are made for other purposes. The extent of the Highway Commission's contribution, he added, is subject to the pleasure of the Governor.

Chairman Cabell stated that, as an individual citizen, he considers that expenditures for maintenance of exhibits at these fairs is wise because of the benefits that the state would receive therefrom; but, as a member of the State Highway Commission, he has to look at it from a different standpoint. The position of the Commission, he said, is as that of a trustee for the disbursement of a certain class of funds, which funds are paid by one class of people; namely, the motorists, and should be spent for the benefit of that class. He also said that the legislature intended, when it provided the highway funds, that they should be expended for the benefit of the highway users, and, if they are spent for some other purpose, the probabilities are that it would be called a diversion of funds and the state would then be in a disadvantageous position in the securing of Federal Aid moneys for road construction. He gave as his thought that a fair participation by the State Highway Commission at these fairs would be the maintenance of an exhibit to promote tourist travel, and that, so far as benefits are concerned, the state would derive much more good from the San Francisco Fair than it would from the New York Fair. He said that the Commission is confronted by two questions; namely, the amount of its contribution, and the nature of the expenditure, with respect to which the Commission must depend largely upon the recommendation of Mr. Harold B. Say, Manager of the Highway Department's Travel and Information Department.

Governor Martin stated that an expenditure of state highway funds for this purpose met with his approval and he asked the Commission to be as liberal as possible in the matter. After further discussion, Mr. Haas suggested the appointment of a committee to study the matter in detail. Governor Martin concurred in the suggestion, as did also Chairman Cabell.

Mr. Wallace stated that the State Game Commission is confronted with the same problem as is the State Highway Commission with respect to the diversion of funds in the securing of Federal Aid. He gave as his thought that the advertising of the state as proposed would be a fine thing for the state and would result in much good; but, in his estimation, all of the state departments should contribute to the cost thereof rather than the State Highway Commission and the State Game Commission alone. The State Game Commission, he said, could not possibly give \$50,000 for such purpose.

Commissioner Aldrich suggested that the officials of the State of Washington should be contacted in regard to the matter inasmuch as the cause is common to both states. Chairman Cabell concluded the conference by stating that the Commission is not in a position today to make a decision but will give the matter serious thought and will discuss the matter again in detail with the committee of interested persons.

Mr. J. A. McLean of Eugene, Chairman, and Dr. E. C. Dalton of St. Helens, member, Capitol Reconstruction Commission, were present and discussed with the Highway Commission matters pertaining to the landscaping of the new capitol grounds in Salem and the improvement of city streets approaching thereto. Governor Martin was also present and entered into the discussion of this matter.

Dr. Dalton advised that the Capitol Reconstruction Commission lacks the necessary funds with which to finance the landscaping of the new capitol grounds and is wondering whether or not it would be possible for the State Highway Commission to help defray such expense, and particularly the expense of rebuilding the North Summer Street approach to fit in with the landscaping plans. As a matter of information, he said that the Capitol Reconstruction Commission realized a saving of approximately \$160,000 in the contracting of the new library building but it would not be possible to use this money for the landscaping and street work because of federal prohibitions, it being a requirement that the federal moneys be spent for building construction purposes only. He also said that the plans include the rerouting of the Pacific Highway from Capitol Street to Summer Street and that the reconstruction of about 4 blocks of city streets would be required to provide a proper approach to the Capitol Building from the north.

This matter was discussed in considerable detail but no definite conclusion was reached.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration, the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said

reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission discussed briefly matters pertaining to the proposed Interstate Avenue project in Portland. It was pointed out that the Portland City Commission has not yet adopted its ordinance providing for the center parking strip on this street, in view of which the Commission decided not to proceed with the construction of this project until the city has adopted such ordinance. The Commission instructed the Engineer to notify the Portland city officials to that effect.

Reconsideration was given by the Commission to the matter of closing right of way settlements in connection with the Albany overcrossing project. The Attorney advised that the hearing before the Public Utilities Commissioner has been held and that the findings of fact and form of order have been approved; and, while the order has not yet been written by the Public Utilities Commissioner, it is his understanding that such order will be issued shortly. In view of the Attorney's report the Commission authorized him to proceed with the closing of right of way transactions in connection with this project.

The Attorney brought up for discussion the matter of settlement of the George Stonefield controversy regarding a small tract of land located in Government Lot 3 of Section 22, Township 15 South, Range 12 West, W. M., Lane County, which tract Mr. Stonefield alleges was inadvertently deeded to the county along with right of way for the Oregon Coast Highway, whereas he intended to retain possession of the tract for a building site. The Attorney recommended that the state deed to Mr. Stonefield the small area in question upon payment of \$125, of which amount \$35.60 represents the cost of a special survey that was necessary in order to prepare a metes and bounds description, and the balance represents the reasonable market value of the area. The Commission by unanimous vote approved settlement with Mr. Stonefield on such basis.

The Attorney also brought up for discussion the matter of acquiring a maintenance headquarters site along the Wolf Creek Highway near its junction with the Oregon Coast Highway in Clatsop County. He advised that the

Commission originally authorized the payment of \$1,000 to the State Land Board for this site, which contains 120 acres of land, which deal was not consummated because the title of the Land Board failed by reason of a decision rendered by the Supreme Court on January 18, 1938, in the matter of the estate of Olaf Ohlsen, deceased, in the case of the State Land Board vs. Ransom, and now the property is to be advertised for Administrator's Sale. He advised that there are two dwellings located on the property and two springs which are of value to the state, and that Division Engineer F. D. Eason recommends that the state bid as high as \$1,200, if necessary, at the Administrator's Sale, in order to secure this property. The Commission thereupon, by unanimous vote, authorized the Attorney to bid a maximum of \$1,200 for this property.

The matter of acquiring an addition to the state park located at Depoe Bay, being more particularly described as the Christenson property in Lot 4 of Section 22, Township 8 South, Range 11 West, W. M., Lincoln County, had the attention of the Commission. The Attorney reported an offer from the owner to sell the property for \$2,600. The Commission considered the offer exorbitant and refused the same by unanimous vote.

The Attorney reported that the County Court of Hood River County is about to sell at tax sale certain property that is needed by the Highway Department as a maintenance headquarters site, and requested authority from the Commission to submit a bid for the same when the sale takes place. The Commission deferred action on this matter pending consultation with the Hood River County Court which is to appear before the Commission on the following day. It was understood that if the County Court would not convey the property to the state free of cost, then the Attorney would be authorized to submit a bid for the same at the tax sale, the amount thereof to be decided later. (The Engineer advised later in the session that it would not be necessary to acquire this tract because another site, which better meets the state's requirements, has been found.)

The Commission had under consideration an offer from Mr. Lee Ragan, Roseburg, to purchase for the sum of 5¢ per sq.ft. a portion of Lot 5 of Block 9, and a portion of Lot 65 of Block 10, in Florence, same being located outside of the standard width right of way of the Oregon Coast Highway and being located near the end of the new Siuslaw River Bridge. The Commission decided unanimously not to sell this property in view of its proximity to the bridge and the fact that it is being landscaped as a highway beautification project.

The Attorney brought up for discussion matters pertaining to the acquisition of right of way for the Northeast Portland Secondary Highway project in Portland. He said that Multnomah County is buying some of this right of way, but, in his estimation, negotiations for the same should be carried on by the state so as to avoid difficulties in closing the deals for the state's portion, which would probably occur if the county made offers higher than the state's basic rate of 2¢ per sq. ft. The Commission decided that the best way to handle the matter would be to ask the county officials to defer the acquisition of the county's right of way until after the state has completed its negotiations. However, the Attorney was authorized to carry on the

negotiations for the county in the event the Board of County Commissioners requests that the matter be handled that way.

The matter of the acquisition of a quarry site from Emil Enquist on the Drews Valley Section of the Klamath Falls-Lakeview Highway, in Lake County, had the attention of the Commission. It appears that surfacing materials were taken from Mr. Enquist's land by a contractor, for use in connection with a forest highway contract under the supervision of the U. S. Bureau of Public Roads, which erroneously assumed that the state had previously made arrangements with Mr. Enquist for such materials. It also appears that Mr. Enquist is demanding \$1,000 for the quarry site, which contains about 13 acres of land and is valued by the state at \$500, but is willing to deed to the state the entire 40-acre tract on which the quarry is located for the same price. The Engineer advised that the quarry in question is a good one and will be used for a long time to come. He recommended the purchase of same for \$500, if possible. After discussion, the Commission approved the Engineer's recommendation by unanimous vote. The Attorney was instructed to see Mr. Enquist personally and attempt to settle the matter on such basis. He was authorized to offer Mr. Enquist \$1,000 for his property if absolutely necessary to do so, but with the understanding that if the state has to pay such sum it will demand a deed to the entire 40 acres.

The Attorney presented for the consideration of the Commission the following list of properties on which it has not been possible to reach satisfactory settlements:

After due consideration the Commission by unanimous vote adopted the following resolutions authorizing condemnation of the said properties if satisfactory settlements cannot be reached otherwise:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Hermiston-Columbia School Section of the Hermiston Highway
Warren Creek Section of the Columbia River Highway
Lombard Street-Killingsworth St. Section of the Northeast
Portland Highway
Troutdale-Multnomah Falls Section of the Columbia River
Highway
Marshfield-Bay Park Section of the Oregon Coast Highway
Albany Overcrossing Section of the Pacific Highway East

land and property owned by or in possession of the following parties and/or persons, to wit:

Hermiston-Columbia School Section of the Hermiston Highway
Roy C. Rogers - Mrs. Mary Woodworth

(Continued on next page)

(List continued from last page)

Warren Creek Section of the Columbia River Highway

 Highway
 J. H. Gilbaugh
 Marshfield-Bay Park Section of the Oregon Coast Highway
 H. W. Osborne
 Albany Overcrossing Section of the Pacific Highway East
 Gladys V. Holloway
 Charles Childs and William Eagles
 Aroline O. Rankin

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which description may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby

FEB 16 1938

requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Perham Creek Section of the Columbia River Highway
Viento-Mamaloose Park Section of the Columbia River Highway
Drews Valley Section of the Klamath Falls-Lakeview Highway

land and property owned by or in the possession of the following parties and/or persons, to wit:

Perham Creek Section of the Columbia River Highway
W. D. Tenney

(Continued on next page)

(List continued from last page)

Viento-Memaloose Park Section of the Columbia River Highway
J. M. Culbertson et al
Drews Valley Section of the Klamath Falls-Lakeview Highway
Emil Enquist

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire

FEB 16 1938

title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

Special consideration was given by the Commission to the G. E. Everson property, transaction No. 5505, for the acquisition of right of way for the Hill Creek Bridge Section of the Pacific Highway in Lane County. The Attorney advised that Mr. Everson is demanding \$100 for his property, whereas he estimates the value at \$50. He inquired whether or not he should pay the price demanded or acquire the property by condemnation. In view of the likelihood that the cost of condemnation proceedings would amount to more than the difference between the appraised value and the amount demanded, the Commission decided that it would be advisable to settle with Mr. Everson out of court, if possible, and accordingly authorized the Attorney to make him an offer of \$100.

The Commission adjourned at 5:45 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the Auditorium of the Public Service Building.

Portland, Oregon, February 17, 1938

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for the construction of a number of highway projects were opened and read in conformance with previously published notice:

COOS BAY-ROSEBURG HIGHWAY
MYSTIC CREEK-BROCKWAY SECTION - CRUSHED GRAVEL IN STOCK PILES

D. L. Ashton	\$ 11,571.00
Saxton, Looney & Risley	11,770.50
R. O. Dail & Warren Bros., Inc.	11,837.00
A. S. Wallace	11,903.50
Homer G. Johnson	13,632.50

JOHN DAY HIGHWAY
SERVICE CREEK-BRANSON CREEK SECTION - LIGHT OIL TREATMENT

Harold Blake	\$ 18,482.75
Warren Northwest, Inc.	19,504.00

(Continued on next page)

FEB 16 1938

(Service Creek-Branson Creek Section, continued)

McNutt Bros.	\$ 19,627.00
Babler Bros.	21,442.50
Diesel Oil Sales Company	22,054.00
Clifford A. Dunn	22,415.50
R. O. Dail & Warren Bros., Inc.	22,996.25
J. C. Compton	23,393.00
Edwin C. Gerber	29,181.00
Joplin & Eldon	29,969.50

CENTRAL OREGON HIGHWAY

LAKE COUNTY LINE-GAP RANCH SECTION - OIL MAT SURFACE TREATMENT

A. Milne	\$ 18,902.00
Babler Bros.	20,625.00
Clifford A. Dunn	20,657.00
J. C. Compton	21,216.00
Edwin C. Gerber	22,249.00
R. O. Dail & Warren Bros., Inc.	22,995.50
Warren Northwest., Inc.	23,038.50
McNutt Bros.	23,176.00
Harold Blake	24,770.00

COLUMBIA RIVER AND MT. HOOD HIGHWAYS
HOOD RIVER ROCK PRODUCTION PROJECT

Schmeer, Williams & Gentemann	\$ 12,467.40
Fisher Bros.	12,524.00
John J. Dann Company, Inc.	12,977.60
A. C. Greenwood Company, Inc.	14,140.00
J. S. Johns & Company	14,140.00
O. C. Yocom	14,544.00
H. L. Rice	14,544.00
Saxton, Looney & Risley	14,978.00
A. S. Wallace	15,150.00

Makele Construction Company	12,848.00
Shattuck & Neland	15,262.00
Frank Watt Construction Company	16,937.50

Chairman Cabell announced that the award of contracts would be made at 4:00 o'clock p. m. in the same room.

The County Court of Sherman County, represented by County Judge

FEB 16 1938

George A. Potter and County Commissioners A. A. Dunlap and David Reid, came before the Commission in regard to the selection of roads for the Federal Aid Secondary Highway Program. Chairman Cabell explained the requirements for such roads and asked the County Court for an expression of its preferences. Judge Potter stated that they preferred the improvement of county roads rather than state secondary highways and expressed a preference for the following: (1) County road extending from Moro to Erskine, 4 miles in length; (2) County road extending from Rufus to Klondike, particularly the section extending from Rufus south about 3 miles to the top of the Klondike grade; (3) County road extending easterly from a point on the Sherman highway, about $1\frac{1}{2}$ miles north of Moro, to a connection with the Wasco-Heppner Secondary Highway at Hay Canyon, a distance of about 8 miles. He also said that the Court has no choice as to state secondary highway improvements but would be satisfied with the improvement of either the Sherars Bridge Secondary Highway or the Wasco-Heppner Secondary Highway.

Judge Potter then inquired as to the plans of the Commission with respect to the road extending from the Columbia River Highway to the Maryhill ferry landing. He said that this road is a county road but is being maintained by the ferry operator, and gave as his thought that it should be placed on the state highway system inasmuch as it is the connecting link between the Oregon and Washington sections of U. S. Highway No. 97. He was informed by Chairman Cabell that the Commission will inspect this road the next time it is in that vicinity and will then make its decision.

The County Court of Jefferson County, represented by County Judge W. R. Cook and County Commissioner F. E. Stangland, was present regarding Federal Aid secondary highway matters. Mr. Haney, owner of a resort at Camp Sherman, on the Metolius River, was also present. They expressed a preference for the following projects in the Federal Aid Secondary Highway Program: (1) Improvement of the county road extending from Suttle Lake to Camp Sherman, a distance of about $7\frac{1}{2}$ miles, said road being known as the Metolius River Road, connecting with the Santiam Highway at a point about $1\frac{1}{2}$ miles east of Suttle Lake; (2) Surfacing of the Warm Springs Secondary Highway between Madras and Warm Springs Agency.

In reply to inquiry made by Chairman Cabell, Judge Cook said that they want the Warm Springs Highway grading work completed by all means before the other improvements that they have requested at this meeting, but they prefer that the federal funds for county road improvements be spent on the Camp Sherman Road.

The County Court of Deschutes County, represented by County Judge C. E. Lyon and County Commissioners Wm. Baer and Millard T. Triplett, was present in regard to the selection of roads for the Federal Aid Secondary Highway System in Deschutes County. They expressed a preference for the following county roads: (1) Butler Market Road from Bend to a connection with the Powell Butte Secondary Highway; (2) Alfalfa Road extending from the Powell Butte Secondary Highway to Alfalfa; (3) Terrebonne Lower Bridge Road. Their first and only choice of state secondary highways was the Powell Butte Secondary Highway No. 371, particularly the section between its junction with the Central Oregon Highway and its junction with the Butler Road.

Judge Lyon suggested the following revision in the Powell Butte State Secondary Highway: Elimination of that portion of this road extending southerly from the Butler Road junction to the Central Oregon Highway and substitution therefor of the Butler Road from said junction into Bend. The Commission deferred a decision in this matter pending investigation of the road and report thereon by the Engineer.

Judge Lyon inquired as to the plans of the Commission with respect to the completion of the South Santiam Highway and was informed by Chairman Cabell that the Commission hopes to be able to allocate a sufficient amount of funds to complete this project soon. Judge Lyon then brought up for discussion the matter of the county's indebtedness to the state for road construction purposes. The suggestion was made that it might be possible to undertake a joint project to be financed with the moneys that the county owes the state and with the secondary highway funds that have accumulated in the State Highway Fund for expenditure in Deschutes County. The Engineer was instructed by the Commission to look into the matter and to render a report thereon at the next meeting.

The County Court of Polk County, consisting of County Judge Herman Van Well and Commissioners Fred Gibson and Harrison H. Brant, came before the Commission with regard to Federal Aid Secondary Highways. County Engineer E. J. Himes was also present. The County Court expressed a preference for the improvement of the following county roads in such system: (1) Lewisville-Airlie Road; (2) Independence-Buena Vista Road; (3) Falls City Market Road, from the Dallas-Kings Valley Secondary Highway to Falls City. Their first choice of state secondary highways was the improvement of the Kings Valley Secondary Highway No. 190, although they expressed a preference for the improvement of county roads with the funds available.

The matter of the county's indebtedness to the state for road construction purposes was discussed briefly. The Court expressed a willingness and desire to compromise the settlement of this claim on amicable terms but advised that there are numerous Polk County citizens who are opposed to the county's payment of said debt, and they are, therefore, having some difficulty in disposing of the matter. Chairman Cabell said that he believed the Commission would make a generous settlement with the county and would let the county pay the debt over a period of years, if necessary, through an order on the Secretary of State. The Court agreed to give the matter further thought.

The County Court of Baker County, represented by County Judge Chas. E. Baird and County Commissioners Claude Holman and R. M. Phipps, was present in regard to the selection of roads for the Federal Aid Secondary Highway System. County Engineer D. W. C. Nelson was also present. They expressed a preference for the improvement of the Baker-Homestead Highway in such program, the order of the improvements to be as follows: (1) Baker-Middle Bridge Section; (2) Middle Bridge-Richland Section; (3) Richland-Halfway Section. Their choices for county road improvements were the following: (1) County road extending from Baker to Rock Creek, via Pocohontas; (2) Baker-Wingville Road from the Old Oregon Trail to the Wingville School; (3) Halfway-Cornucopia Road from Halfway to the forest boundary; (4) Richland-Newbridge Road. The

following were the Court's choices for state secondary highway improvements: (1) Sumpter Valley Secondary Highway No. 410; (2) Medical Springs Secondary Highway No. 340; (3) Robinette-Homestead Secondary Highway No. 412 westerly from Robinette to a connection with the Baker-Homestead Highway, a distance of about 4 miles.

County Judge A. H. Boice, representing the County Court of Curry County, was present in regard to Federal Aid Secondary Highway matters. He expressed a preference for the improvement of the Squaw Creek Road in such program, if possible. As a second choice he mentioned the South Bank Road extending from the Oregon Coast Highway to the old ferry landing along the south side of the Rogue River. His first choice for state secondary highway improvements was the Cape Blanco Secondary Highway No. 250, particularly the Lighthouse section thereof, about 2 miles in length. Judge Boice then inquired as to the plans of the Commission in regard to the improvement of the Oregon Coast Highway through the town of Gold Beach. He said that the indecision of the Commission in this matter is holding up developments in that town and they would like to have the matter settled as soon as possible. The Engineer advised that the Commission is handicapped in undertaking this project by reason of right of way difficulties. He offered the suggestion that the people of Gold Beach donate the extra right of way needed and that the state assume the expense of removing the buildings therefrom. After discussion, the Commission approved this suggestion by unanimous vote and instructed the Engineer to so inform the Curry County Court, by letter, and to furnish the Court with a map of the proposed layout.

The County Court of Morrow County, consisting of County Judge Bert Johnson and County Commissioners Roy Neill and George N. Peck, was present in regard to the selection of roads for the Federal Aid Secondary Highway System in Morrow County. Also present was County Engineer H. Tamblin. They expressed a preference for the improvement of the Heppner-Rhea Creek Section of the Wasco-Heppner State Secondary Highway No. 300. Their second choice was for the improvement of the Hardman Hill Section of the Heppner-Spray State Secondary Highway No. 321. Their first choice of county road projects was the improvement of the Little Butter Creek Road from its junction with the Lexington-Echo Secondary Highway to Pine City, a distance of about 5 miles.

The County Court inquired as to the plans of the Commission for the oiling of the Lexington-Echo State Secondary Highway in Morrow County. Chairman Cabell advised that the Commission proposes to put this road in a dustless condition this year if funds are available to finance it.

Mayor Elisha Large of Eugene, and City Engineer W. C. Clubb, were present in regard to the installation of flashing traffic signals in their town. Mayor Large advised that the city is short of funds, and they are wondering whether or not the state would be willing to help finance the project, in view of the fact that all but two of the signals provided for in the plan are located on state highway routes. He said that the city has \$5,000 budgeted for this purpose, but that is insufficient to pay the cost, so the installation will have to be delayed unless the state will help finance the proposition, which is estimated to cost from \$7,000 to \$10,000, according to whether a connective system is decided upon.

Chairman Cabell advised that there are two reasons why the State Highway Commission hesitates to start on a program of this kind, the first being that the Commission is short of funds, and the second being that there are other cities in the state where traffic signals are justified, and if the state furnishes signals in one city, then that would establish a precedent and other cities and towns all over the state would want the same service, which it would be impossible for the state to finance. The decision of the Commission in regard to the installation of traffic signals in Eugene, he added, means the adoption of a state-wide policy. Mayor Large then inquired whether or not the Commission would cooperate to the extent of paying 50 per cent of the cost. The Commission deferred a decision in this regard pending a survey of the entire state, to ascertain how much it would cost, approximately, to cooperate in the installation of similar signals in all the cities and towns requiring them. A report on this matter is to be rendered by the Engineer at the next meeting of the Commission and Mayor Large is then to be given an answer to his request.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

County Judge John R. Heckman and County Commissioner W. P. Vernon, representing the County Court of Lake County, also County Clerk Carl W. Pendleton, were present in regard to Federal Aid Secondary Highway matters. They expressed a preference for the improvement of county road projects and recommended a project on the Goose Lake County Road extending along the west side of Goose Lake. They also recommended an expenditure for the oiling of the Klamath Falls-Lakeview Highway westerly from Lakeview, in the event that such project is eligible for the funds under discussion. After consideration, it was agreed that, if the funds allocated to Lake County amount to more than \$15,000, such funds shall be expended for the oiling of the Klamath-Falls-Lakeview Highway west of Lakeview; but if the amount allocated to this county is less than \$15,000, it shall be applied to the improvement of the Goose Lake Road.

County Judge David F. Graham of Malheur County, representing Malheur County Court, was present in regard to Federal Aid Secondary Highway matters. He stated a preference for the following improvements in the program for Federal Aid Secondary Highway Funds: (1) Improvement of the Sucker Creek Section of the Homedale-Malloy Ranch Road, commonly called the Jordan Valley Road; (2) Improvement of Lytle Boulevard, extending from Vale to a point on the Jordan Valley State Secondary Highway, about 3 miles north of Adrian. Judge Graham's first choice of state secondary highway projects was the improvement of Graham Boulevard (Vale-West Secondary Highway No. 451). He urged the Commission not to improve the state secondary highway north and west of the town of Jordan Valley under this program, because, in his estimation, the state is obligated to improve these sections anyway. He also asked the Commission to replace on the State Secondary Highway System the Homedale Spur-Malloy Ranch Section of the Jordan Valley Road which was recently removed from such system. He also asked the Commission to designate as a state secondary highway the county road extending from Vale southeasterly

to a connection with the Jordan Valley Secondary Highway, commonly known as Lytle Boulevard. He said that the settlers in the Owyhee and Vale irrigation districts feel that they are entitled to these roads, and are demanding their improvement as state secondary highways. Judge Graham presented a letter in support of his request and was informed by the Commission that his arguments would be given due consideration.

The County Court of Grant County, consisting of County Judge J. H. Allen and County Commissioners F. B. French and John Porter, was present in regard to the selection of projects for the Federal Aid Secondary Highway Program. Also present was L. E. Lucas, County Engineer. They offered the following county road projects for consideration by the Commission in the selection of roads to be improved under such program: (1) Road extending from Prairie City to Blue Mountain Springs along the north side of the John Day River; (2) Road extending from Prairie City to Blue Mountain Springs along the south side of the John Day River; (3) Road extending from the Pendleton-John Day Highway to Ritter Springs; (4) Bear Valley-Poison Springs Road; (5) County road extending westerly from Long Creek to Monument. They asked the Commission to designate as a state secondary highway the county road extending from Monument to Long Creek, but urged the Commission to improve the Monument Secondary Highway between Kimberly and Monument before rebuilding the Monument-Long Creek Road.

Chairman Cabell advised that the Commission is reluctant to take on any more secondary highways at the present time due to shortage of funds with which to construct and maintain them, and until some of the other roads now on such system have been improved. However, the Commission will consider their request and will have the Engineer inspect the Monument-Long Creek Road and render a report thereon. The Engineer was thereupon instructed to make such investigation and render such report at the next meeting.

A delegation from Grant County, consisting of Mr. Gabler and Mr. Crouch, of Monument, and State Representative E. R. Fatland, of Condon, was present in the interests of the Kimberly-Monument Secondary State Highway No. 402. The Grant County Court also appeared with this delegation. Representative Fatland was spokesman for the group. He stated that this road has never been built to state highway standards and is in very bad condition; further, that the people of this district feel that they have received unfair treatment in regard thereto and now want the road reconstructed to proper standards at the earliest possible time. Mr. Gabler urged the Commission to make a start, at least, on the project, with the view in mind of completing it as fast as funds can be found to finance the work. County Judge Allen advised that this is a very important road and is entitled to the Commission's serious consideration. He urged the Commission to make a start now by improving the lower end thereof easterly from Kimberly, and offered, on behalf of the County Court, to contribute \$1,000 of county funds toward the cost of the project, if the State Highway Commission would contribute a like amount. The Commission by unanimous vote accepted the offer and instructed the Engineer to proceed with the improvement, upon receipt of the county's warrant in the amount of \$1,000.

The County Court of Wheeler County, composed of County Judge S. J. Howard and County Commissioners Charles R. Jackson and L. A. Gochenour, came before the Commission in regard to the selection of roads for the Federal Aid Secondary Highway System. They recommended that Wheeler County's share of such funds be concentrated on the improvement of the Kinsua Road, particularly the $1\frac{1}{2}$ -mile section thereof commencing at the junction with the John Day Highway.

The County Court of Gilliam County, consisting of County Judge James D. Burns and County Commissioners Glen L. Richards and Earl P. Hoag, conferred with the Commission in regard to the selection of roads for the Federal Aid Secondary Highway System. They stated a preference for the construction of the Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary State Highway No. 300, 3 miles in length. They pointed out that the county has already constructed the road up to Rock Creek and alleged, if this 3-mile section is built, the road could be traveled practically the year round between Condon and Heppner.

Josephine County Court, composed of County Judge Grant Matthews and County Commissioners H. S. Morgan and George W. Thrasher, was present in regard to the selection of roads for the Federal Aid Secondary Highway System. Also present were H. B. Brown, County Engineer, and C. H. Demeray, President of the Grants Pass Chamber of Commerce. The County Court expressed a preference for the improvement of the following county roads in the Federal Aid Secondary Program: (1) Waldo Road, particularly the Illinois River Section thereof, east of Waldo, about 2 miles in length; (2) Murphy-Wilderville Road; (3) Merlin-Robertson Bridge Road.

Mr. Demeray asked the Commission to authorize a survey to determine a permanent location for the Pacific Highway just out of Grants Pass so as to provide for the elimination of numerous curves in the present road. He said that the people of this district are particularly desirous of knowing where the road is to be built eventually, because they want to improve their properties by construction of buildings, etc., but cannot do so until the state has determined upon a permanent line for the highway. The Engineer advised that the present highway is not in the proper location and that to eliminate the curves referred to by Mr. Demeray would require a revision about 2 miles in length. After some discussion, the Commission by unanimous vote authorized the Engineer to make a location survey of this section at his convenience.

Clatsop County Court, consisting of County Judge Guy Boyington and County Commissioners James Elliott and William Larson, was present and discussed with the Commission matters pertaining to the selection of roads for the Federal Aid Secondary Highway System. Also present with this delegation were Messrs. A. F. Danielson, County Engineer; A. C. Barlow, City Manager of Warrenton; and James O. Convill, City Manager of Astoria. Judge Boyington asked the Commission to consider the following county roads: (1) Road extending from Warrenton to Fort Stephens; and (2) Road extending from the Oregon Coast Highway to the Tongue Point Naval Base. He also asked the Commission to consider in such program the oiling of the Jewell-Birkenfeld Section

of the Nehalem State Secondary Highway, and advised that such project is the county's first choice. Their second choice, he said, is the improvement of the Warrenton-Fort Stephens County Road.

Judge Boyington offered the Commission the use of a county quarry in connection with the Nehalem Secondary Highway project, provided the contractor will keep the road leading from the quarry to the highway in a good state of repair.

The Engineer pointed out that the Commission does not have funds available to finance all of the projects mentioned by the County Court, and expressed a doubt that the Commission could do any more than construct the Walluski River Bridge, which is in need of replacement, and do some work on the Jewell-Mist Section of the Nehalem Highway. The County Court signified that it would be satisfied with such improvements.

In reply to an inquiry concerning the possibility of securing the oiling of the west end of the Wolf Creek Highway, Chairman Cabell advised that the Commission has such project in mind but it does not appear likely that the work can be done early enough so it can be used by traffic this year.

Mr. Convill asked the Commission to loan the city of Astoria the services of Traffic Engineer John Beakey for a day or so, to assist the city in the formulation of rules and regulations for the control of traffic. The Commission granted this request.

At 4:00 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Mystic Creek-Brockway Section of the Coos Bay-Roseburg Highway, in Douglas County. Furnish 6,650 cu. yds. of crushed gravel in stock pile. The low bid received for this project was that of D. L. Ashton, Lebanon, at \$11,571.00. The next low bid was that of Saxton, Looney & Risley, Portland, at \$11,770.50. There were 3 higher bidders. The Commission has referred all bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Service Creek-Branson Creek Section of the John Day Highway, in Grant and Wheeler Counties. 27.77 miles light oil treatment. Harold Blake, Portland, submitted the low bid for this project at \$18,482.75. The next low bid submitted was that of Warren-Northwest, Inc., Portland, at \$19,504.00. There were 8 higher bidders. The Commission has awarded this contract to Harold Blake, the low bidder, at his price of \$18,482.75.

"Lake County Line-Cap Ranch Section of the Central Oregon Highway, in Harney County. 7.61 miles oil mat surface treatment. A. Milne, Portland, submitted the low bid at \$18,902.00. Babler Bros.,

Portland, were the next low bidders at \$20,625.00. There were 7 higher bids received. This contract is awarded to A. Milne at his low bid of \$18,902.00.

"Hood River Rock Production Project on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties. Furnish 10,000 cu. yds. crushed rock in stock pile. The low bid received for this project is that of Schmeer, Williams & Gentemann, Portland, at \$12,467.40. The next low bid is that of Fisher Bros., Oregon City, at \$12,524.00. There are 14 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Eagle Point-Baker Gulch Section of the Little Butte Secondary Highway, in Jackson County. 3.20 miles oil mat surface treatment. Clifford A. Dunn of Klamath Falls submitted the low bid for this project at \$8,935.00. Babler Bros., Portland, submitted the next low bid at \$9,122.00. There were 2 higher bidders. This contract has been awarded to Clifford A. Dunn, the low bidder, at his bid of \$8,935.00.

"Gold Hill Rock Production Project on the Pacific Highway and Sams Valley Secondary Highway, in Jackson County. Furnish 7,100 cu. yds. crushed gravel in stock pile. The low bid received for this project was that of A. S. Wallace, Roseburg, at \$8,905.00. The next low bid was that received from D. L. Ashton, Lebanon, at \$10,097.00. There were 5 higher bidders. The Commission has referred all bids for this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Hill Creek Bridge Section of the Pacific Highway, in Lane County. 0.20 mile grading and paving and construction of a 75-foot frame trestle bridge with concrete roadway. Edlefsen-Weygandt Company, Portland, submitted the low bid for this project at \$16,137.50. The only other bid received was that of the Mountain States Construction Company, Eugene, at \$16,667.50. The Commission has referred these bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Mohler-Kilchis River Section of the Oregon Coast Highway, in Tillamook County. Furnish 8,000 cu. yds. crushed rock in stock piles. Mountain States Construction Company of Eugene, with its bid of \$10,400.00, was the low bidder on this project. The next low bidder was Dolan Construction Company of Tillamook with its bid of \$12,608.00. 8 higher bids were received on this project. The Commission has awarded the contract to the Mountain States Construction Company at its low bid of \$10,400.00.

"Lake Lytle Outlet Bridge Section of the Oregon Coast Highway in Tillamook County. Construction of a 153-foot pile trestle with concrete roadway. The low bid received was that of the Mountain States Construction Company, Eugene, at \$11,090.00. The next low bid was that of L. H. Hoffman, Portland, at \$11,187.00. There were 8 higher bidders. The Commission has awarded this contract to the Mountain States Construction Company at its low bid of \$11,090.00.

Messrs. Preston Williams, Metzger, Durr, and Hunt, representing the Tillamook Drainage District, came before the Commission in regard to the relocation of the Oregon Coast Highway just south of Tillamook. Mr. Williams was spokesman for the group. He said that the highway, as now constructed, is located on property belonging to the drainage district and is immediately adjacent to their drainage ditch, and that rocks are continually falling from the highway into the ditch, damaging the same and blocking the drainage. He also said that the District has plans to improve the ditch on a permanent basis, and suggested that the Highway Commission reconstruct the highway on permanent alignment so they can proceed with their plans.

The State Highway Engineer pointed out that the reconstruction of the highway at this point involves the expenditure of a large sum of money, which is not available to the Commission at the present time unless work is stopped on the Neahkahnie Mountain Project. He added that if the present highway is not being properly maintained, he would see that that is done and would also see that the rocks that have been deposited in the drainage ditch are removed. Chairman Cabell confirmed the Engineer's remarks regarding reconstruction of this section and instructed the Engineer to make an investigation at once of the damage being done by falling rocks. The Engineer was also authorized and instructed by the Commission to make a survey for the permanent location of the highway at this place.

The County Court of Tillamook County, represented by County Judge H. H. Rosenberg and County Commissioners E. H. Lindsey and E. G. Anderson, was present and conferred with the Commission in regard to the Federal Aid Secondary Highway Program in so far as it affects Tillamook County. They recommended the following projects: (1) Construction of the 2-mile section of the Tillamook-Netarts-Oceanside county road extending westerly from the summit towards Netarts, on the new grade constructed by the county last year; (2) Improvement of the Fairview-Clemens Corner county road; (3) Improvement of the Fairgrounds-Coast Highway Section of the Wilson River Loop county road. They also asked the Commission to place these roads on the State Secondary Highway System. A decision with regard to these matters was deferred by the Commission until the allocation of funds is made.

Judge Rosenberg brought up for discussion a proposed change in the deed from the Weyerhaeuser Timber Company conveying unto the county certain timber strips along the Wilson River Highway, and particularly the reservation therein relative to merchantable timber. He said that it is the opinion of the Court that the wording of the second paragraph on page 1 of the proposed deed, under "Exceptions", should be changed from "all marketable timber now standing or being on said land", to read "all marketable timber

suitable for lumber now standing or being on said land". He also asked the Commission's approval to delete from the proposed deed the portion which reads as follows: "and, if at any time, said lands, or any part thereof, should be abandoned for such use, or the maintenance thereof for such purposes be discontinued, the same, or the part thereof so abandoned for such use or discontinued to be maintained for such purpose, shall ipso facto revert to and be and remain the absolute property of the grantor, its successors or assigns". It was his belief that it would be much better to leave such wording out of the deed in order to avoid future misunderstanding, particularly in view of the possibility that the Weyerhaeuser Timber Company would be all through with the land when it removes its timber on or before 1942, as provided in the deed, and it would then not want nor expect this land to revert to them in case the county or the state did not maintain the land as a park. After discussion, the Commission approved such modifications by unanimous vote.

Commissioner Lindsey asked the Commission to construct a minor line-change in the road connecting the town of Nehalem with the Neahkahnie Mountain Section of the Oregon Coast Highway, which road is now being used by state highway traffic pending construction of the permanent highway and is being maintained by the state. He said that a certain bridge and cattle pass on this road, just west of Nehalem, are now being repaired by the state and it was his thought that the Commission should give consideration to the rebuilding of a short section of the highway at this location so as to eliminate two sharp curves; which, in his estimation, is a desirable improvement and would provide greater safety for the traveling public. He also said that the county would donate the use of a power shovel in connection therewith, if the Commission so desired. The Engineer was instructed by the Commission to have Division Engineer F. D. Eason investigate this matter in company with Mr. Lindsey.

The County Court of Hood River County, represented by County Commissioners J. D. Smullin and R. W. Perry, conferred with the Commission with regard to Federal Aid Secondary Highway matters. Also present was County Engineer C. M. Hurlburt. They expressed a preference for the continuation of construction of the Hood River Secondary Highway northerly as far as possible from the end of the section completed last year. As a second-choice project they requested the improvement of the county road extending from the Mt. Hood Highway east of Odell, through a place known as Summit, to a connection with the Hood River Secondary Highway. They also asked that this latter road be designated as a secondary state highway in lieu of the Interstate Bridge Secondary Highway, which was recently removed from the state secondary highway system. The Commission deferred a decision in this matter pending investigation and report by the Engineer as to what it would cost to improve this road to proper standards. Such report is to be rendered at the next meeting of the Commission, and the Hood River County Court is then to be advised of the Commission's decision.

Mr. Ray Gill, Master, Oregon State Grange, was present in regard to the allocation of Federal Aid Secondary Highway Funds. He said that the State Grange is particularly desirous of securing a greater allocation of

such funds for the betterment of unimproved school bus and post roads and he urged such consideration by the Commission as a community service proposition rather than as a service to individual farmers. Mr. Gill was informed fully of the requirements governing the expenditure of the Federal Aid moneys and the reasons why the Commission cannot allocate these funds in the manner suggested. Mr. Gill appeared to be satisfied with the explanation but urged the Commission to bear such unimproved roads in mind and to do the best it possibly can for them. It was his thought that it would be a good idea for someone representing the State Highway Commission to explain the situation to members of the Grange at their annual meeting, which is to be held during the early part of June; and, accordingly, it was decided that Chairman Cabell would talk to the Grange members at such meeting on highway matters if it is possible for him to be present at that time. The Commission adjourned at 6:00 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the same room.

Portland, Oregon, February 18, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for the construction of highway projects and for the purchase of buildings at Marshfield were opened and read in conformance with previously published notice:

OLD OREGON TRAIL HIGHWAY

BAKER-DURKEE SECTION - CRUSHED ROCK IN STOCK PILES

Rogers Construction Company	\$ 9,400.00
Babler Bros.	14,050.00
Schmeer, Williams & Gentemann	14,750.00
Homer G. Johnson	15,250.00

OREGON COAST HIGHWAY

BANDON-PORT ORFORD SECTION - CRUSHED ROCK IN STOCK PILES

Homer G. Johnson	\$ 24,210.00
Corvallis Sand & Gravel Company	24,467.00
A. S. Wallace	25,317.50

PACIFIC AND UMPQUA HIGHWAYS DRAIN ROCK PRODUCTION PROJECT

Eugene Sand & Gravel Company	\$ 11,948.00
Homer G. Johnson	13,630.00
Inter City Sand & Gravel Company	13,920.00
A. S. Wallace	14,500.00
Umpqua River & Navigation Company	14,732.00

FEB 16 1938

UMPQUA HIGHWAY
WILSON RANCH-SCOTTSBURG SECTION - LIGHT OIL TREATMENT

	<u>Using Road Oil</u>	<u>Using Tar</u>
Babler Bros.		\$ 14,862.50
J. C. Compton		15,320.00
R.O.Dail & Warren Bros., Inc.	15,509.60	15,558.00
Warren Northwest, Inc.		16,298.50

FREMONT HIGHWAY
WEST FOREST BOUNDARY-HORSE RANCH SECTION - LIGHT OIL TREATMENT

J. C. Compton	\$ 13,091.60
Warren Northwest, Inc.	13,786.00
McNutt Bros.	14,729.00
Harold Blake	15,695.00
Babler Bros.	16,410.00
Clifford A. Dunn	16,528.00
A. Milne	17,026.00
Edwin C. Gerber	17,068.00
Diesel Oil Sales Company	20,179.40

CENTRAL OREGON HIGHWAY
JUNTURA-HARPER SECTION - LIGHT OIL TREATMENT

J. C. Compton	\$ 23,334.20
Harold Blake	24,902.00
Warren Northwest, Inc.	25,691.00

W. E. Foote and F. J. Miller (first choice)	37.50
J. S. Chambers	20.00

FEB 18 1938

Chairman Cabell announced that awards would be made at 4:00 o'clock p. m. in the same room.

The County Court of Umatilla County, consisting of County Judge Carl W. Chambers and County Commissioners Sam Ingle and Wm. R. Meiners, was present and discussed with the Commission matters pertaining to the selection of roads for the Federal Aid Secondary Highway System. They stated their preference for the improvement of the Sunnyside-Umapine Secondary State Highway No. 332, and mentioned, as their second choice, the improvement of the Walla Walla River Road, a county road project.

County Judge Nelson B. Higgs of Harney County, and Mr. O'Connell, President of the Burns Chamber of Commerce, were present. Judge Higgs asked for better maintenance of the Frenchglen State Secondary Highway and of the Diamond Valley State Secondary Highway between Princeton and Waverly. He said that these roads have not been kept in very good condition, and school buses and mail-delivery trucks are able to use them only with difficulty. The Engineer advised that these roads are now in as good condition as they were when they were turned over to the state by the county; nevertheless, he would have them inspected. Mr. O'Connell urged improvements to the Central Oregon Highway.

Mr. C. T. Gates, Portland, came before the Commission relative to the proposed construction of the East Portland-Oregon City Highway in front of his property located at the northwest corner of Fifth and Main Streets, in Oregon City. He objected strenuously to the Commission prohibiting the parking of cars along the north side of Fifth Street because, he said, it would be objectionable from the standpoint of his tenants and would decrease the value of his property, which is his only source of income. He also objected to the narrowing of the sidewalk at this point from 10 feet to 6 feet, as is proposed in order to provide for four lanes of traffic on this important road. The necessity for prohibiting the parking of cars at this point and for the narrowing of the sidewalk was explained to Mr. Gates fully by Chairman Cabell and the Engineer. Mr. Gates was very much dissatisfied with the explanation and demanded a set of the plans for the proposed improvement. The Engineer was instructed by the Commission to furnish Mr. Gates with such plans in detail and to have one of the engineers show Mr. Gates, on the ground, just how these plans will affect his property.

Mr. N. E. Schooling, Portland, came before the Commission and requested permission to move a large building across 82nd Street (Cascade Secondary Highway, near the Multnomah-Clackamas County Line). He said that he was refused such permit at the Salem office of the Commission because of the size of the building, it being 30 feet wide and 80 feet long, so he cut the building in half, and now wants permission to move the two sections directly across the highway. He gave as his thought that it would not take more than one hour to move each section. He further advised that it would be necessary to detour traffic during the movement, but offered to provide flagmen to direct traffic over a convenient paved detour which is available.

In the discussion of this matter, it was brought out that the

FEB 18 1938

Commission has denied two similar requests for moving buildings across the 82nd Street Highway in approximately the same location, in view of which the Commission decided to secure the recommendation of Division Engineer E. A. Collier before passing on this matter. The Engineer was instructed to have Mr. Collier present during the afternoon session of the Commission to express his ideas on this subject. Mr. Collier appeared later in the session and recommended the granting of the permit subject to the condition that the movement of each section be undertaken during the early morning hours, starting at daybreak, and that the road be not blocked for a period longer than one hour at any time; and provided, further, that Mr. Schooling furnish flagmen as may be required, and also have the movement covered by insurance and bond, in accordance with the established policy of the Commission.

In view of Mr. Collier's report, and after further discussion, the Commission voted unanimously to grant Mr. Schooling's request subject to the conditions outlined by Mr. Collier. The matter was referred to Division Engineer Collier and the Secretary to work out the details.

A delegation, representing the Lower Columbia Highway Association, and headed by Mr. Tom Cunning, Secretary, Astoria, was present in the interest of additional improvements on the Lower Columbia River Highway. The other members of this delegation were J. D. Perry, President of the Association; Fred Ransom, Director of the Astoria Chamber of Commerce; Joe Korcarnik of Scappoose; John L. Foote, of St. Helens; Messrs. Abrit and Bloomstat, of Rainier; Tilden Graham, of Clatskanie; and G. C. Barlow, of Warrenton.

They asked the Commission to give special consideration to the following improvements on this highway where hazardous conditions exist and where many accidents occur, if the Commission cannot find it possible to finance a major project: (1) Elimination of sharp curve at the trestle crossing at Big Creek, between Mile Post 89 and Mile Post 90, just south of Knappa; (2) Reconstruction of the sharp curves a short distance south of Scappoose at a place known as Johnson's Landing, pending reconstruction of the highway on the proposed new alignment which parallels the railroad and passes through the cemetery at this location.

Mr. Foote, attorney, of St. Helens, made an urgent plea for the latter project and suggested the temporary flattening of the curves on the east side of the road rather than on the west side. The Engineer was instructed to investigate both of these projects and report his findings at the next meeting of the Commission.

A delegation from Wasco and Sherman Counties, headed by former County Judge F. L. Phipps of Wasco County, came before the Commission and asked for the extension of Sherars Bridge Secondary Highway No. 290 in Wasco County westerly through Wamic and thence to a connection with the Wapinitia Highway at a place known as Bear Paw Rock Quarry. The delegation consisted of the following: County Commissioners Angus H. McLeod and Mace Fulton, of Wasco County; County Judge George A. Potter and County Commissioners A. A. Dunlap and David Reid, of Sherman County; Guy Harvey, J. E. Kennedy, W. E. Woodcock, A. F. Bernhagen, Albert Gish, Willis Driver, Tom Driver, and Percy Driver, all

of Wamic; Paul Muller and George Lofton, both of Tygh Valley; C. G. Schneider, W. C. Carroll, and W. A. Hessell, of Gresham; J. E. Norton and Jerry Wilson, of Kent; Theodore Justesen and H. R. Kaiser, of Maupin; and L. M. Lepper, of Portland.

Mr. Phipps alleged that Wasco County is entitled to this road in view of the fact that it now has only 35 miles of secondary highways in the county. He stated further that the present Sherars Bridge Secondary Highway is hardly justified but it could be made worthy of existence if it were extended to a connection with the Wapinitia Highway, because it would then afford a much shorter route to Portland for the people of the northeastern counties of the state, and would make it possible to market the ripe timber from the forests of Wasco County, which at present has no outlet. He said that they are not asking for a high-class road but simply one that can be used the year round. He gave as his thought that the road is eligible for forest highway funds and urged the Commission to inspect it jointly with officials of the U. S. Bureau of Public Roads and the U.S. Forest Service.

Chairman Cabell advised that the Commission has given this matter some study and it appears to the Commission that the road is not justified as a state highway because it parallels so closely the Wapinitia Highway. Commissioner Aldrich gave as his thought that this is a forest development project in which the State Highway Commission is not particularly concerned. He suggested, nevertheless, that the road be inspected. Mr. Phipps reiterated that all that these people want is a travelable road.

Judge Potter of Sherman County endorsed the project, as did also Commissioner McLeod of Wasco County.

Mr. Schneider, of Gresham, said that the people of Gresham have studied this matter and feel that the road would be of great value to the people on the west side of the mountain.

Mr. Lepper concluded the presentation of arguments by urging this project from the commercial standpoint. He filed with the Commission numerous petitions signed by residents of Wamic, Tygh Valley, and the trade areas contiguous thereto, urging the construction and development of the old Barlow Road from a point near Wamic to its intersection with the Wapinitia Highway.

Mr. C. W. White, Grand Ronde, came before the Commission in regard to his permit for the trucking of logs on the Salmon River Highway, which permit was recently revoked by the Public Utilities Commissioner, upon recommendation of the State Highway Commission, because one of Mr. White's truck drivers was arrested for transporting a load weighing in excess of the limits prescribed by law and he refused to deliver his P.U.C. plates when requested so to do by the state police officer making the arrest. Mr. White stated that his truck driver was not familiar with the most recent rules and regulations promulgated by the State Highway Commission with regard to such matters and was under the impression that the plates would be taken up by a representative of the State Highway Commission, which was his reason for refusing to deliver them to the state police officer. He further stated that this was an honest mistake and that, if his driver had fully understood the

rules and regulations, he certainly would have delivered the plates of this particular truck, because, naturally, he would not have taken a chance on having his permit revoked, which would take all of his trucks out of service.

In view of Mr. White's explanation, the Commission by unanimous vote decided that the reinstatement of this permit is in order, particularly in view of the fact that Mr. White's truck has been out of service for several weeks; and accordingly instructed the Secretary to so recommend to the Public Utilities Commissioner.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Mrs. Zelda Ploeger, of Portland, was present and inquired as to the plans of the Commission for relocating the Pacific Highway West at Tigard, particularly in so far as it affects property which she owns at that place. She said that she has it in mind to improve her property, including the planting of numerous shrubs, et cetera, but there is a question in her mind whether or not she should go to this expense in view of the possibility of the state taking some of her property for right of way. Chairman Cabell advised that, while a number of alternate routes have been investigated for this proposed revision, the Commission has not yet decided on any one of them and will not do so at least until the next meeting of the Commission, when the Engineer's report on the subject will be discussed. He further stated that present indications are that the new highway will not take any of Mrs. Ploeger's land and he suggested that she proceed with her improvements and plantings with the understanding that the state will compensate her in the event the route adopted passes through her land and causes her additional expense in replacing such improvements. He also informed Mrs. Ploeger that as soon as the Commission adopts the permanent route she will be advised. Mrs. Ploeger indicated that such disposal of the matter was satisfactory.

A delegation from the towns of Mist and Jewell, headed by County Commissioner Wm. Pringle of Columbia County, was present and requested the oiling of the Nehalem Highway between Mist and Jewell. Other members of this delegation were County Commissioner J. T. Graham of Columbia County, W. H. Bridges, Chas. Sundland, and J. O. Libel, all of Mist; Edwin Meier and Frank Wooden, of Jewell; C. W. Laughlin of Astoria, and T. M. Hopkins, R. H. McCaffery, G. E. Bellingham, and Tom Riggle, all of Birkenfeld. They alleged that the road in its present condition is dangerous to travel, being very dusty; in fact, is entirely worn out between Mist and Birkenfeld and should have immediate attention.

Mr. Bridges told the Commission that they preferred this construction to the improvement of the Mist-Clatskanie Secondary State Highway which was previously recommended by the County Court, inasmuch as there is now a good rock surfacing on the Mist-Clatskanie road. County Commissioner Pringle concurred in the statements of Mr. Bridges and advised that he has changed his mind on the subject since appearing before the Highway Commission at the previous meeting, when the Mist-Clatskanie road was recommended. Chairman

Cabell advised that the Commission appreciates that this is a desirable project and has no arguments to present to minimize its importance, but there is a question as to the availability of funds to finance the work, especially in view of the fact that there is some grading work to do in connection therewith. He also said that the Commission has the project under consideration for the fiscal year 1939 Federal Aid Secondary Highway Funds, but there is still an uncertainty with respect to these moneys and a question whether or not the work could be done this year.

Mr. Charles Castner, Portland, came before the Commission and urged the improvement of the Little Nestucca Secondary State Highway, 3 miles of which, he said, are absolutely impassable during the winter months because of their muddy condition and the fact that there are two bridges that need replacement. He advised that four families reside along this road and it is impossible for them to get out to the main highway because of the condition of the road. He particularly asked for the surfacing of the $1\frac{1}{2}$ -mile section west from Dolph, which was graded about two years ago. He was informed by Chairman Cabell that this road is in the same category as many other roads throughout the state; that the Commission has it in mind and will build it when it can spare the funds to finance the work, but the Commission cannot spend its money for such purpose at the present time on the basis of accommodating only a very few people. He expressed regrets that the Commission cannot improve the road in the near future.

Messrs. George Foster, F. W. Withee, and Wade Hartman, of Dayton, conferred briefly with the Commission in regard to the Commission's plans for improvement of the Salem-Dayton Secondary Highway. They were informed by Chairman Cabell that the Commission has this project in mind and is giving it due consideration with the idea in mind to construct a portion of it this year. He added, however, that the plans are only tentative and cannot be decided definitely until the uncertainties regarding funds have been settled.

Messrs. A. H. Hinkson and Fred Lengacher, Eugene, came before the Commission in regard to carrying on logging operations on a particularly wide section of the McKenzie Highway at a place known as Finn Rock, in Lane County. It appears that Mr. Lengacher has purchased timber on the property adjacent to the highway and the only suitable place for loading logs onto his trucks is this section of the highway. It also appears that he has already prepared one spar tree on the highway property, 8 feet from the right of way line, to facilitate the loading operations, and a loading pole, also on the highway, this having been done without the knowledge that he was encroaching upon the right of way; but he has discontinued operations pending authority from the State Highway Commission to proceed.

Mr. Hinkson advised that their application in the Salem office of the Highway Commission for a permit to conduct logging operations on this area was denied, but they asked the privilege of appearing before the Commission in regard to the matter because some 21 families are dependent upon these operations for a livelihood and there is absolutely no way to get the logs out except over this area.

Mr. Lengacher advised that he owns quite a bit of timber along the highway in this vicinity and it is his intention to purchase additional timber adjacent to the highway. He stated his willingness to donate to the state the timber growing adjacent to the highway at the top of the bluff if the Highway Commission will grant him the privilege of operating on the area under discussion.

The question arose whether or not Mr. Lengacher owns the land on which the timber is located. He advised that he does not own the land but there is a possibility that the owner would donate a strip to the state inasmuch as it consists of a steep side hill which is of no particular value except for the timber thereon. The State Parks Superintendent, Mr. S. H. Boardman, was present and advised that he inspected the timber referred to by Mr. Lengacher and ascertained that it would fit in satisfactorily with the state park idea, although it is of no particular value or advantage if the state has to pay for it or the land on which it is located. He added that he did not think it advisable to purchase the land for the preservation of the timber; but if the land were donated, then it would be acceptable.

Chairman Cabell advised that if the Commission allows Mr. Lengacher to conduct loading operations on the highway right of way at this point, it would establish a precedent that would be difficult to avoid in passing on similar requests in the future and the only justification that the Commission would have for permitting such operations would be the consideration of this timber strip in exchange for the use of the highway right of way. The State Highway Engineer advised that he would offer no objections to the granting of this privilege to Mr. Lengacher at this particular point, provided there is a definite consideration, which in this instance would be the deeding to the state of the timber and land located on the bluff above the highway; and provided, further, that such matter is covered by written agreement specifying the distance from the traveled portion of the highway on which the logging operations would be confined. It was his thought that such arrangement would not be establishing a precedent because the state would be getting something of value in exchange for the use of the highway right of way. He suggested that Mr. Lengacher purchase the land on which the timber is located and deed it to the state, at which time the agreement could be prepared and executed. His suggestion was approved by the Commission.

This matter was reconsidered by the Commission later in the session when Mr. Eugene Walsh, Portland, representing Brown & Brown, Inc., Forest Engineers, Portland, appeared in behalf of Mr. Lengacher. Mr. Walsh stated that Mr. Morton, the owner of the land on which the timber purchased by Mr. Lengacher is located, donated the highway right of way to the state with the understanding that he would be allowed to carry on logging operations on the property.

Chairman Cabell advised that if such was the understanding, then the Commission would permit Mr. Lengacher to proceed with his operations. He explained that the Commission is simply trying to avoid establishing a precedent in the matter, and if it can be proved that such right of way was donated with such understanding, that would satisfy the Commission.

After further discussion it was agreed that the record should be investigated, and if it is found that Mr. Walsh's allegation is correct, then Mr. Lengacher will be allowed to conduct logging operations on this wide section of highway but not nearer than 50 feet from the traveled roadway. It was also decided that if the records do not show that the deed contains a logging reservation, but that the land for the right of way was deeded to the state without cost, then Mr. Lengacher would be allowed to operate on this area; but, if the records disclose that the right of way was purchased from the owner, then the Commission will not allow Mr. Lengacher the use of the highway right of way unless he will give to the state the timber heretofore referred to and the land on which it stands.

Mr. V. B. Stanbery, of Portland, Consultant for the State Planning Board, was present and inquired when it would be convenient for the Commission to confer with him and Mr. C. J. Buck, Regional Forester, in regard to Mr. Buck's report on roadside timber preservation. He was informed that the Commission has not had time to discuss this report but will do so in the near future and will be pleased to confer with Mr. Stanbery and Mr. Buck at the next regular meeting of the Commission, which will probably be held during the latter part of March.

State Parks Superintendent S. H. Boardman was present and reported on the following matters:

Removal of the remains of Chief Tag-On-Ecia of the Quah-To-Mah Tribe, known among his fellows as "Whiskers, English Chops", from the present place of interment on the Sixes River to Battle Rock State Park at Port Orford:- Mr. Boardman advised that Mr. Frank B. Tichenor of Port Orford has written to Governor Martin in regard to this matter and has stated that the Port Orford Chamber of Commerce will have the remains moved to the park if the state will authorize interment in the park and will mark the grave with a suitable monument. He requested instructions. The Commission deferred a decision in the matter pending a recommendation from Mr. Lewis A. McArthur, President of the Oregon Historical Society. The Secretary was instructed to secure such recommendation.

Acquisition of C. Dethman property located on the Upper Columbia River Highway near Mile Post No. 56:- The Parks Superintendent advised that Mr. Dethman has offered to sell 54 acres of land at this location for the sum of \$4,000; also, that there are three other holdings adjacent thereto, containing 26 acres of land, which are needed to fit in with the picture, making a total of 80 acres in all. The owners of this extra property, he added, are asking \$3,250 for the same, and, at such rate, the entire 80 acres would cost the state approximately \$10,000. He gave as his thought that it would be inadvisable to purchase this property in view of the fact that the state already owns the adjoining tract known as Starvation Falls State Park, and he recommended that the offer be declined. The Commission approved the recommendation by unanimous vote.

Concession house for Bradley Park:- The Parks Superintendent advised that Mr. Lindeman, who previously had the concession at Bradley Park, has stated his desire to renew the concession for four months of the current year and has indicated his willingness to pay a monthly rental of \$100 for such privilege. He further advised that, in accordance with authority previously granted him by the Commission, he is now maintaining a caretaker in this park who is living in the building formerly used as the concession house; so, if the Commission accepts Mr. Lindeman's proposition, it will be necessary to construct a new building for the concession. He estimated that such building would cost about \$1,200, and requested instructions in regard thereto. The Commission decided unanimously not to construct this building and accordingly declined Mr. Lindeman's offer.

Renewal of option taken from Messrs. Pratt and Williams for acquisition of proposed park along the Oregon Coast Highway south of Cape Perpetua:- The Parks Superintendent advised that this proposed park property has an ocean frontage of $2\frac{1}{2}$ miles, beginning just south of Cape Perpetua and terminating at Bob Creek, and contains 357 acres, which the owners have listed for sale at \$170 per acre. The state's option to purchase this property, he said, terminates on March 7, 1938, and he requested instructions whether or not to have it extended. He recommended that it be extended, in view of the fact that Mr. J. C. Merriam, President of the Carnegie Institute at Washington, D. C., is particularly interested in the tract and has indicated his willingness to arrange for funds to pay one-half of the cost thereof, amounting to about \$70,000, but he has not been able to make such arrangement up to the present time, although he has hopes of fulfilling his part of the transaction during the coming summer. In view of the report, the Commission authorized the Parks Superintendent, by unanimous vote, to have the option extended for another 6 months, if possible.

Acquisition of beach area known as Nehalem Bay Sand Spit:- The Parks Superintendent advised that Tillamook County has taken over for unpaid or delinquent taxes the major portion of the Nehalem Sand Spit, which is located across Nehalem Bay from the place known as Fisher Point, a short distance north of Brighton Beach, and that the property includes all of the area between the bay and the ocean, except for a few lots in private ownership. He recommended acquisition of the same because of its future potential value from a recreational standpoint. He was instructed by the Commission to contact the Tillamook County Court relative thereto.

The Attorney reported the status of acquisition of real property owned by Fred Volz, et al, at Silver Creek Falls, in Marion County, which property is needed to fill out the state park area at this location. He said that Mr. Volz is demanding \$10,000 for his property and that the State Highway Commission, in addition thereto, satisfy the demands of his tenants on

the property. He further stated that he offered Mr. Volz \$8,500 for the property, which offer was refused. The Commission considered Mr. Volz's demands exorbitant and refused to settle with him on such basis.

The Commission had under consideration the offer of Mr. William S. Walton to deed to the state for right of way purposes land owned by him at Neskowin, in Tillamook County, same being required for a proposed revision of the Oregon Coast Highway at this location. Mr. Walton places a value of about \$12,000 on his property, which the Commission thought too high to consider at this time, in view of the present stringency of funds and for the reason that it is not absolutely necessary to construct this revision in the immediate future. The purchase of the property was accordingly deferred for the time being.

The Commission had under discussion the acquisition of certain parcels of land that were acquired by Multnomah County in connection with the acquisition of right of way for the Barbur Boulevard Section of the Pacific Highway West in Multnomah County. The Engineer recalled that the State Highway Commission at its meeting on November 17, 1937, authorized acquisition of certain small parcels situate outside of the standard width right of way but refused to pay the county for certain other parcels because of the price demanded for the same. He further advised that subsequent inspection and study of the agreement between the Commission, Multnomah County, City of Portland, and Civic Emergency Committee of Portland, which agreement is dated November 2, 1932, reveals that the state is justly entitled to the properties in question; in fact, is entitled to all of the properties acquired in connection with such right of way purchases, and that the position of the county with regard to the properties now under discussion is not properly taken. He suggested that this be brought to the attention of the Board of County Commissioners and that the county be requested to deed such parcels to the state without cost. He read aloud a letter directed to the Board of County Commissioners of Multnomah County relative thereto, which letter the Commission approved by unanimous vote.

At 4:00 o'clock p. m. Chairman Cabell announced the following awards of contracts and sale of buildings in Marshfield, bids for which were taken at the morning session, the awards and sales having been previously approved by the Commission by unanimous vote:

"Baker-Durkee Section of the Old Oregon Trail, in Baker County. Furnish 5,000 cu. yds. crushed rock in stock piles. The low bidder for this project is Rogers Construction Company, Dayton, Washington, at \$9,400.00. The next low bidder is Babler Bros, Portland, at \$14,050.00. There were 2 higher bidders. The Commission has awarded the contract to Rogers Construction Company, the low bidder, at its bid price of \$9,400.00.

"Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties. Furnish 9,450 cu. yds. crushed rock in stock piles. 3 bids were submitted on this project, all of which the Commission considers too high, and accordingly has rejected

them and has ordered the project readvertised for bids to be received at the next meeting.

"Drain Rock Production Project on the Pacific and Umpqua Highways, in Douglas County. Furnish 5,800 cu. yds. crushed rock in stock piles. The Commission received 5 bids for this project, the low one being that submitted by the Eugene Sand & Gravel Company, Eugene, at \$11,948.00. The next low bid was that submitted by Homer G. Johnson, Portland, at \$13,630.00. The Commission has awarded the contract to the Eugene Sand & Gravel Company, the low bidder, at its bid price of \$11,948.00.

"Wilson Ranch-Scottsburg Section of the Umpqua Highway, in Douglas County. 7.81 miles light oil treatment. The low bid submitted was that of Babler Bros., Portland, at \$14,862.50, based on the use of tar. They did not submit a bid based on the use of road oil. The next low bid submitted was that of J. C. Compton, McMinnville, at \$15,320.00, based on the use of tar. He did not submit a bid based on the use of road oil. There were 2 higher bidders. The Commission has awarded the contract to Babler Bros. at their bid price, of \$14,862.50, based on the use of tar.

"West Forest Boundary-Horse Ranch Section of the Fremont Highway, in Klamath and Lake Counties. 16.24 miles light oil treatment. The Commission received 9 bids for this project, the low one being that of J. C. Compton, McMinnville, at \$13,091.60. The next low bid was that submitted by Warren Northwest, Inc., Portland, at \$13,786.00. The Commission has awarded this contract to the low bidder, J. C. Compton, at his bid price of \$13,091.60.

"Juntura-Harper Section of the Central Oregon Highway, in Malheur County. 34.52 miles light oil treatment. The low bid was submitted by J. C. Compton, McMinnville, at \$23,334.20. The next low bid was that submitted by Harold Blake, Portland, at \$24,902.00. There were 5 higher bidders. The Commission has awarded this contract to the low bidder, J. C. Compton, at his bid price of \$23,334.20.

"Hermiston-Cold Springs Section of the Hermiston Secondary Highway, in Umatilla County. 1.53 miles surfacing and 6.55 miles oiling; also furnish 1,600 cu. yds. crushed rock in stock piles. The Commission received 7 bids for this project, the low one being that of Rogers Construction Company, Dayton, Washington, at \$21,342.50. The next low bid was that of Edwin C. Gerber, Oregon City, at \$22,591.00. The Commission has awarded the contract to the low bidder, Rogers Construction Company, at its bid price of \$21,342.50.

 "Building No. 5085-1 formerly owned by Robert Downer. The Commission received 5 bids for this building, the high one being

FEB 18 1939

that of Anton Monson, Marshfield, at \$101.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Monson at his high bid of \$101.00.

"Building No. 5085-2 formerly owned by Robert Downer. The Commission received 5 bids for this building, the high one being that of Anton Monson, Marshfield, at \$101.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Monson at his high bid of \$101.00.

"Building No. 5084 formerly owned by D. M. Root. The Commission received 3 bids for this building, the high one being that of Dixie Root, Marshfield, at \$126.00. The Commission considers this offer satisfactory and therefore has sold the building to Dixie Root at her high bid of \$126.00.

"Building No. 5095 formerly owned by E. A. Porter and known as the Porter Apartments. The Commission received 2 bids for this building, the high one being that of John Lorsung, Marshfield, at \$130.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Lorsung at his high bid of \$130.00.

"Building No. 5105 formerly owned by I. B. Tilson. No bids were received by the Commission for the purchase of this building.

"Building No. 5103 formerly owned by M. G. Hoffman. The Commission received 2 bids for this building, being those of J. S. Chambers, Marshfield, at \$25.00, and W. E. Foote and F. J. Miller, Coquille, at \$27.50. The Commission has rejected both of these offers.

"Building No. 5104 formerly owned by the World War Veterans' State Aid Commission. The Commission received 4 bids for this building, the high one being that of Carl Barnes and Esther Vincamp, Marshfield, at \$41.00. The Commission considers this offer satisfactory and therefore has sold the building to them at their high bid of \$41.00.

"Building No. 5107-1 formerly owned by H. Emelia Weikel. The Commission received 1 bid for this building, being that of W. E. Foote and F. J. Miller, Coquille, at \$32.50. The Commission has rejected this bid.

"Building No. 5107-2 formerly owned by H. Emelia Weikel. The Commission received 2 bids for this building, the high one being that of Roy A. Miller, Marshfield, at \$30.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Miller at his high bid of \$30.00.

"Building No. 5107-3 formerly owned by H. Emelia Weikel. The

Commission received 4 bids for this building, the high bid being that of Roy A. Miller, Marshfield, at \$30.00. The next high bid was that submitted by W.E. Foote and F. G. Miller, Coquille, at \$21.50. Inasmuch as Mr. Miller desired to purchase only one building and submitted the high bid for Building No. 5107-2, which was sold to him, the Commission has awarded the sale of this building to W. E. Foote and F. J. Miller at their offer of \$21.50.

"Building No. 5107-4 formerly owned by H. Emelia Weikel. The Commission received 2 bids for this building, the high one being that of Sigurd Sundquist, Marshfield, at \$15.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Sundquist at his high bid of \$15.00.

"Building No. 5107-5 formerly owned by H. Emelia Weikel. The Commission received 2 bids for this building, the high one being that of Sigurd Sundquist, Marshfield, at \$15.00 and the second bid that of Henry Hauerkamp, Marshfield, at \$11.00. Inasmuch as Mr. Sundquist desired to purchase only one building and submitted the high bid for Building No. 5107-4, which was sold to him, the Commission has awarded the sale of this building to Henry Hauerkamp at his bid of \$11.00.

"Building No. 5109 formerly owned by Manilo Camilo. No bids were received for the purchase of this building.

"Building No. 5108 formerly owned by F. F. Dobbyn. The Commission received 2 bids for this building, the high one being that of J. S. Chambers, Marshfield, at \$15.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Chambers at his high bid of \$15.00.

"Building No. 4768 formerly owned by Godfrey A. Quick. No bids were received for the purchase of this building.

"Building No. 4769 formerly owned by Jennie Rourke. The Commission received 2 bids for this building, the high one being that of Neil Harding, Marshfield, at \$25.50. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Harding at his high bid of \$25.50.

"Building No. 4770 formerly owned by Dell Saunders. The Commission received 2 bids for this building, the high one being that of Asbjorn Moen, Marshfield. The Commission accepted the offer of Mr. Moen and has sold the building to him at his high bid of \$20.00.

"Building No. 4771 formerly owned by John Pruitt. The Commission received only 2 bids for this building, the high one being that of P. J. Pruett, Marshfield, at \$75.00. The Commission has accepted the offer of Mr. Pruett and has sold the building to him at his high bid of \$75.00.

"Building No. 5112 formerly owned by H. P. Thomas. The Commission received three bids for this building, the high one being that of Tom Georgen, Marshfield, at \$102.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Georgen at his high bid of \$102.00."

The Attorney requested instructions whether or not to proceed with the acquisition of right of way needed for the proposed revision of the Pacific Highway through Cottage Grove, in Lane County. He said that the people of this town are extremely anxious to know whether or not the state intends to buy the right of way soon because certain improvements are contemplated and they cannot proceed with the same until they know about the plans for the highway. The Commission decided, in view of the present stringency of funds, not to acquire right of way at Cottage Grove this year.

The Commission by unanimous vote authorized the acquisition of 1.54 acres of land owned by Hood River County, at a cost of \$35.00, said property being described as a portion of land lying in the S.E. $\frac{1}{4}$ of the N. W. $\frac{1}{4}$ of Sec. 18, T. 1 N., R. 10 E., W. M., and being needed as a site on which to store maintenance materials.

The Commission had under consideration the offer of Mr. William H. Galvani to sell to the state 20.01 acres of land adjacent to the Sunset-Tunnel-Buxton Section of the Wolf Creek Highway, in Washington County, which property is needed by the state for right of way purposes. The Attorney advised that Mr. Galvani is asking \$20.00 per acre for his land and \$100.00 additional severance damage. He said that the price asked for the land is satisfactory but he could see no justification for paying Mr. Galvani the extra \$100.00 for severance, and he recommended condemnation in the event Mr. Galvani will not accept the sum of \$400.20 as full and complete satisfaction. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion the claim of Ralph Chambers for damage that occurred to his crop located adjacent to the Burns-Buchanan Section of the Central Oregon Highway, in Harney County. It appears that Mr. Chambers has some 21 acres in crop and that the same is fenced in, but someone left the gate open at a time when the highway was under construction, allowing cattle to enter the field, and as a result a large portion of the crop was destroyed. Mr. Chambers alleges that he is damaged to the extent of \$400.00 and asks reimbursement in such amount. The Attorney advised that, from information that he has received, the damage did not amount to more than \$150.00, and that he believes that Mr. Chambers will settle for such amount if the Commission is willing to pay it. It was his thought that, if the Commission will not pay that sum, it will result in litigation. He recommended the payment of \$150.00 in the event that further investigation reveals that the state is responsible for the damage. After some discussion, the Commission approved the recommendation by unanimous vote, subject to the condition that further investigation by the Engineer reveals that the state is responsible for the gate having been left open.

FEB 18 1938

Mr. C. W. Parker, right of way agent, reported to the Commission the results of a conference with officials of the City of Portland relative to acquisition of right of way for the new Columbia River Highway through city property located at Multnomah Falls. He said that complications have arisen due to the death of Mr. Frank S. Grant, former City Attorney, and that objections have been offered by Mr. C. P. Keyser, City Park Superintendent, to the city deeding the right of way to the state unless the state will build a certain connecting road between the old and the new highways; also, that City Commissioner R. E. Riley is willing for the city to deed the right of way to the state on the condition that the state will take over the entire park and will also take over the Vista House located at Crown Point, and the city's park at Latourell Falls. He further stated that Mr. Keyser will withdraw his objections in the event the state will accept the proposition outlined by Mr. Riley. It is Mr. Riley's suggestion, he added, that the state ask the city, in writing, for the right of way alone and for the right of way and the city's property north of the railroad track. The Commission questioned the advisability of acquiring all of the city's holdings as suggested by Mr. Riley, and accordingly deferred definite action thereon pending a report from the State Parks Superintendent relative thereto. However, inasmuch as the Commission is interested in acquiring the right of way and city property north of the railroad at Multnomah Falls, it authorized the Attorney to direct a letter to the City of Portland asking for such areas.

The Attorney requested instructions relative to acquisition of the Emma Kramien property, which is needed for right of way for the Pacific Highway West, in Yamhill County. He advised that his original offer to Mrs. Kramien was \$400, which is \$250 less than the amount that Mrs. Kramien demanded, but he has since received a letter from Mrs. Kramien's attorney to the effect that Mrs. Kramien is willing now to settle for \$525. The Attorney recommended settlement on such basis in order to avoid the expense of a lawsuit. The Commission authorized the payment of such amount if the property cannot be purchased at a lesser figure.

The Commission adjourned at 5:00 o'clock p. m., to reconvene on the following morning in the Benson Hotel.

Portland, Oregon, February 19, 1938

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in Room 801, Benson Hotel, with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The matter of increasing the amount of the Commission's forgery bond had the attention of the Commission. Present, and entering into the discussion of this matter, was Mr. Jack Godfrey, General Agent of the Forgery-Fraud Bond Department of the National Surety Corporation, which wrote the Commission's previous forgery bond of \$5,000 coverage. The Engineer gave as his thought that, in view of the recent defalcations of W. L. Moorman, former employe of the Highway Department, the amount of the bond should be increased.

FEB 18 1938

The Commission concurred and the matter was referred to Chairman Cabell, the State Highway Engineer, and the Attorney, to order a forgery bond in the amount of \$100,000 in the event that is considered advisable, after giving the matter further study. The Commission authorized Mr. Godfrey to furnish a bond in the amount of \$100,000 to protect the Commission in the event of loss occurring before a definite decision has been made. Mr. Godfrey agreed to write such bond for a 3-year period, the premium for which, he said, would be \$632.40, with the understanding that, should it be decided later to reduce the amount of the bond, then he would make no premium charge for the excess amount, provided the decision is made within the next ten or fifteen days; but if the reduction is made after a longer time, the premium to be paid for the \$100,000 bond would be prorated and the regular premium charged for the time that it is in force. This arrangement was agreeable to the Commission.

In connection with this matter, the Engineer requested authority to secure the services of a competent auditor not connected with any state department to investigate the Highway Department's method of accounting, for the purpose of ascertaining whether or not there are any loop holes or blind spots in the accounting system that is now being used whereby it would be possible for an employe to cause the state loss by defalcations. The Commission approved the request by unanimous vote.

The Commission had under consideration at this time the selection of projects for the 1938 and 1939 construction programs, the approximate amounts available for such programs being estimated as follows:

Classes of Federal Funds	Approximate Amounts Available (Including Amts. Previously Programmed) for the Respective Classes of Funds		
	Federal	State	Total
1938 Regular Federal Aid	\$2,092,368	\$1,457,632	\$3,550,000
1938 Feeder Road Projects on State Hwys.	209,237	150,763	360,000
1938 " " " " County Roads	209,237	150,763	360,000
1938-39 Grade Separation Projects	1,154,221	185,779	1,340,000
1939 Regular Federal Aid	2,048,413	1,551,587	3,600,000
1939 Feeder Road Projects on State Hwys.	204,842	155,158	360,000
1939 " " " " County Roads	204,841	155,159	360,000
1938 Federal Lands Highways	168,367	71,633	240,000
1939 " " " "	165,000	75,000	240,000
1938 State Projects on Primary Highways	- - - -	180,000	180,000
1938 " " " " Secondary "	- - - -	200,000	200,000

Accumulated Balances as follows:

1935 NRM Funds	15,000	10,000	25,000
1936 WPGS Funds	33,000	22,000	55,000
1937 Federal Aid Funds	33,000	21,750	54,750

The Engineer submitted a list of projects that are eligible for such programs, from which the Commission, by unanimous vote, upon motion of Commissioner Aldrich which was seconded by Commissioner Tou Velle, tentatively selected the following for inclusion therein, it being understood that the programs would be revised later in the event of alteration in the amounts of anticipated federal funds.

1938 REGULAR FEDERAL AID PROGRAM

<u>Highway</u>	<u>Project</u>	<u>Original Allocation</u>	<u>Revised Allocation</u>
<u>DIVISIONS NOS. 1 & 2</u>			
Pacific	Oregon City (11th to 5th & Main Sts.) Paving & Bridge	\$ 160,000	\$ 160,000
Columbia River	St. Helens-Multnomah Co. Line, Grad- ing & Paving	100,000	100,000
West Side Pac.	Middleton-Votaw, Grading & Paving	80,000	58,868 c
West Side Pac.	Lafayette, Paving	30,000	26,138 c
West Side Pac.	South Yamhill River Section, Grading, Paving & Bridge	- - - -	166,629 c
Oregon Coast	Astoria Line Change and Pavement, Grad- ing & Paving (2 Units)	50,000	48,370 c
Oregon Coast	Short Sand Beach Creek, Grad. & Bridge	100,000	117,810 c
Oregon Coast	Arch Cape-Beach Creek, Clearing	- - - -	27,445 c
Oregon Coast	Lake Lytle Bridge	10,000	12,200 c
Santiam	Lamb Creek-Glissade Creek, Grading	115,000	105,540 c
McMinn.-Till.	Bellevue-Pringle Corner, Grad. & Pav.	150,000	116,520 c
Wolf Creek	Wolf Creek Bridges (3 small bridges)	50,000	50,000

The Commission by unanimous vote authorized the Engineer to submit to the Bureau of Public Roads for approval the 1938-1939 Grade Separation Program, and the projects marked with a double asterisk in the above programs; namely, 1939 Regular Federal Aid Funds, 1939 Federal Secondary Projects on State Highways, and 1939 Federal Secondary Projects on County Roads.

The Engineer was authorized by the unanimous vote of the Commission to make surveys as may be necessary for all projects included in these programs.

The Engineer was also authorized by the Commission, by unanimous vote, to change the amounts set up for individual projects as may be necessary to check the totals available.

The matter of financing the state's portion of the construction program had the attention of the Commission. In the discussion of this matter it was brought out that the financing of the 1938 program will result in a temporary shortage of state funds during the period from July to December, in view of which the Commission decided, by unanimous vote, to borrow \$750,000 for a period of six months to eight months, as conditions may require, commencing about July 1, 1938, and ordered that all necessary arrangements be made to effect such loan.

The Attorney reported the status of acquisition of right of way for the East Portland-Oregon City Highway across the property of the Security and Investment Company at Oregon City. He said that he has been approached by Mr. Jack Latourette, attorney representing the company, who has suggested that the matter be disposed of by a board of arbitration consisting of three members. He recommended against such procedure. The Commission approved his

FEB 19 1938

recommendation by unanimous vote. The Commission also, by unanimous vote, authorized and instructed the Attorney to secure a declaratory judgment with respect to the street ends affected by the proposed Oregon City improvement, it being the allegation of the Security and Investment Company that such street ends belong to them, which opinion is not shared by the Commission's Attorney. The Engineer was instructed by the Commission to defer the advertising of the Oregon City project, or any portion thereof, pending settlement of the right of way matters and a definite determination as to just how much the state will be required to pay for such right of way.

Landscape Engineer Mr. George Otten was present and reported on the following matters:

Monument for Talbot State Park:— The Landscape Engineer advised that a committee of representative businessmen of Portland desires to erect a monument, consisting of a large boulder and a bronze plaque, in this park, honoring the donors of the park, Mr. and Mrs. Guy Talbot, and have asked the privilege of erecting the same in a location which meets with the approval of the Highway Commission. He said that the Parks Superintendent and he have selected a suitable site but that is about as far as they can go until such site has been approved by the committee, which, he anticipates, will pass on the matter shortly. The Commission approved the report.

Erection of a monument on the Woodburn-Mount Hood Loop Secondary Highway, near Estacada, in Clackamas County:— The Landscape Engineer advised that a Mr. W. M. Wade has requested, in behalf of the Currin-Wade Clan, permission to erect a stone marker with a bronze plaque on this highway at the dividing line between the Currin and Wade donation land claims, which is approximately at the Currinsville Store, 2 miles north of Estacada. The marker will be placed on the west side of the road, he said, and will be approximately 25 feet from the center line and will be outside of the highway drainage ditch. He gave as his thought that this marker would have a specific local interest and would in no way harm the best interests of the Highway Department. He recommended that the request be granted. After due consideration, the Commission approved his recommendation by unanimous vote, subject to the condition that the monument be erected in a location which meets with the approval of the State Highway Engineer, and that the sponsors of the monument will pay all of the costs incident to the erection and maintenance of the same.

There was presented to the Commission a letter from Wm. A. Carter, transmitting a copy of his letter directed to the Portland City Council, with respect to the claim of Joseph Terresi for damages he alleges he suffered by reason of the construction of the Union Avenue viaduct on the East Portland-Oregon City Highway, in East Portland. Mr. Terresi alleges that his property was damaged because of a change in grade of the intersecting city street but the claim was heretofore denied by the State Highway Commission. The Commission at this time decided not to change its previous decision and accordingly ordered the communication filed.

A letter was presented from C. G. Gustafson, McMinnville, in which the State Highway Commission was urged to change its plans for the relocation of the Pacific Highway West, near the St. Joe Undercrossing, a short distance north of McMinnville, so as to eliminate the need to take any of his property. The Engineer advised that it is not contemplated to reconstruct this section of the highway in the near future, and recommended that the acquisition of the right of way be deferred until such time as it is needed. The Commission approved the recommendation and ordered that Mr. Gustafson be so informed.

The Commission had under discussion the matter of acquiring from the city of Portland the north 10 feet of lots 5, 6, 7, 8, and 9, of Block 2, Eastover, and a small portion of Lot 6, Block 88, Irvington Park, which property is needed for right of way for the Northeast Portland Secondary Highway, particularly the Lombard-Killingsworth Section thereof. The attorney advised that the city wants the state to purchase all of the lots rather than just the 10-foot strip, and is asking 40 cents per square foot for the property, whereas the state is now paying only 2 cents per square foot for adjoining property. The Commission decided that it could not deal with the city of Portland on any different basis than it does others from whom it is buying right of way for this road, but authorized the Attorney to pay as much as 5 cents per square foot, if necessary. The Attorney was instructed by the Commission to negotiate for the acquisition of this property along with the city property at Multnomah Falls.

The Attorney presented a counter offer from William Manley Currier, a portion of whose property is being acquired by the state for right of way for the revision of the Fremont Highway in Lake County. He said that Mr. Currier prefers not to go to court over this matter and has offered to sell the three parcels of land that the state needs for the sum of \$6,900. He recommended settlement on such basis to avoid condemnation. The State Highway Engineer concurred therein. The Commission approved the recommendation by unanimous vote.

In connection with this matter, the Attorney advised that Mr. Currier would like to have the use of the old road when the new highway is constructed and has stated his willingness to deed to the state other land for the storage of maintenance materials if the state will allow the old road to be turned over to him. The Commission approved such arrangement.

The Attorney also reported on the status of acquisition of land that is needed for right of way for the Columbia River Highway across property owned by Mrs. Elizabeth W. Griggs. He said that Mrs. Griggs originally demanded \$350 for her property, which is \$250 more than the state's offer, but she has finally agreed to accept \$125 for the same. He recommended settlement on such basis. The Commission approved the recommendation unanimously.

The Attorney discussed with the Commission matters pertaining to the Robertson controversy arising out of the construction of the Pacific Highway (new route) in the Siskiyou Mountains, Jackson County. He said that the Robertsons have delivered a deed for the 11 acres of land contained in the slide area and have agreed to accept the sum of \$2,850 as settlement in full.

for their damage, but they also want the state to deed to them a 50'x 100' tract adjacent to the highway so that they will have a direct connection to the highway from a new tract of land that they are buying from another party. The Commission decided that the payment of \$2,850 to the Robertsons is sufficient to pay for the damages that they have suffered and accordingly denied the request.

The Engineer reported results of a traffic survey that has been conducted in the city of Eugene for the purpose of ascertaining whether or not the installation of automatic traffic signals is required for public safety, and in this connection the Commission reconsidered the request of the city that the state pay one-half the cost of such installation. A decision in this matter was deferred by the Commission pending a report from the Engineer on the cost to furnish and install similar signals in all the cities and towns throughout the state. Such report is to be rendered at the next meeting of the Commission.

The Engineer also reported the results of the traffic survey that has been conducted in The Dalles to determine whether or not the installation of automatic flashing signals is justified in this town. The report indicated that there is not sufficient cross-traffic on the highway route to justify the expense, and the Commission ordered that the city officials be so informed.

The Engineer also reported the results of a conference with the Medford City Council with respect to the traffic signals that the city has installed on the route of the state highway through this town, which traffic signals do not conform to the state's requirements. He said that the city has purchased two overhead colored signals, one of which has already been installed at the intersection of Main and Central Streets, and it was the intention of the city officials to install the other one at Main and Riverside Streets, but they deferred making the installation pending approval of the Commission for such installations. He further stated that the city officials allege that the city is financially unable to purchase the corner type signals and wishes to know if the Commission will pay the cost of installing a standard type signal at Main and Riverside Streets, estimated at \$1,300, provided the city will install a similar signal at the intersection of Main and Central Streets; and they also want to know whether or not the Commission will grant a temporary permit for the operation of the signals that they now have in the event that the state will not pay a portion of the cost of the standard signals. After discussion the Commission decided that it could not approve any signal installation that does not conform to the type adopted by the Commission, even for a temporary installation, because of the confusion that would result. The Engineer was instructed to so inform the city officials and to request the discontinuance of the signals that they now have. The Commission also decided to defer its decision with regard to contributing toward the cost of installation of the standard type signal pending the report of the Engineer on the cost to install such signals in the other cities and towns of the state.

The Engineer requested instructions in regard to the continuation

FEB 19 1938

of snow removal operations on the North Santiam Highway, in view of the large snowslide that occurred during a recent storm, blocking the highway for about a quarter of a mile just west of Hogg Pass with 10 feet of snow. He questioned the advisability of continuing snow-removal operations on this road during the balance of the winter in view of the high cost thereof, and the fact that the road carries very little travel. A decision in this matter was deferred pending personal inspection of this road by Chairman Cabell and the Engineer, who were authorized by the Commission to take final action on the matter.

The question of the liability of the Commission for accidents that occur on state highways by reason of rocks falling on the highway from adjacent slopes had the attention of the Commission. It appears that a court in one of the eastern states recently ruled that the Highway Department of that state is responsible and liable for injuries or damage that occur by reason of rocks falling on the highway, regardless of what may have caused the rocks to be dislodged. The Engineer advised that there are several places along state highways in Oregon where rocks are continually falling, and particularly mentioned two points on the Columbia River Highway, one at the portal of the Mosier tunnel, and the other between Troutdale and the Automobile Club bridge. He gave as his thought, in view of the court's ruling, that it would be a good idea to comb the slopes above the highway at these locations and at other locations where similar conditions obtain, so as to minimize the chances of accidents occurring. The Commission concurred in the viewpoint of the Engineer and instructed him to see that the slopes at such locations are combed thoroughly and that all necessary precautions are taken to safeguard the traveling public.

The Commission set Thursday, March 24, 1938, as the date for its next regular meeting for the receiving of bids, and instructed the Secretary to make the usual arrangements to hold such meeting in the Auditorium of the Public Service Building, Portland, if possible.

Chairman Cabell left the meeting at 12:15 o'clock p. m.

The following communications and petitions had the attention of the Commission:

Petition signed by 282 citizens of Baker County, residing within what is known as the Lower Powder Section, and who travel portions of the Baker-Homestead Highway, requesting that this highway be rerouted as follows: leaving the present highway at or near the junction with the Keating Market Road and following said market road to or near the Merton Bennett farm; thence in an easterly direction, intersecting the present highway at a point near the Montgomery farm. The petition was ordered filed.

Letter from Coos River Grange, Marshfield, requesting the oiling of the Eastside-Allegany Ferry Section of the Coos River Secondary State Highway. Letter ordered filed.

FEB 19 1938

Letter from Lane County Court inquiring as to the plans of the Commission to construct, this year, a portion of the Christner Gap-Veneta Section of the so-called Route "F" Highway between Eugene and Florence. The Court has options for the needed right of way, which options expire on April 1, 1938, and wants to close the options immediately in the event the Commission proposes to construct this section soon. The Commission ordered that the Court be informed that it is proposed to construct a portion of the Oak Hill-Veneta Section this year as a Federal Aid Secondary Highway Project, in the event that the federal moneys are released, and that the Commission has tentatively budgeted \$30,000 for such purpose. Furthermore, that the Commission has set up in its tentative program for 1939 construction \$25,000 of Federal Aid Secondary Highway Funds for the grading of an additional section of this road between Oak Hill and Veneta.

Resolutions from the City Council of Lakeview and the 20-30 Club of Lakeview, urging the installation of traffic lights on the Klamath Falls-Lakeview Highway at its crossing with the Southern Pacific Company's tracks at the west city limits of Lakeview, for the benefit and safety of the traveling public. The Commission ordered that the petitioners be informed that the Commission is financially unable to eliminate this traffic hazard at the present time but will keep the project in mind for future consideration.

Resolutions from the Sherman County Pomona Grange urging the designation as a secondary state highway of the county road extending from a point on the Sherman Highway, about $\frac{1}{2}$ mile north of the town of Moro, easterly about 8 miles to a connection with the Wasco-Heppner Secondary State Highway; also, urging the State Highway Commission to build the uncompleted portion of a proposed highway extending from Heppner through Condon, Kent, and Wamic, to a connection with the Mt. Hood Highway. The Commission ordered the communications filed.

Petition signed by 785 residents and inhabitants of the Broadbent-Powers districts in Coos County, urging the improvement of the Powers Secondary Highway. The Commission ordered that the petitioners be informed that funds are not available to finance such improvement at the present time but the project will be kept in mind for future consideration.

Letter from Coos Bay Aerie No. 538, F.O.E., urging the construction of a nonskid wearing surface on Sherman Avenue, North Bend, the route of the Oregon Coast Highway, so as to prevent accidents occurring on this street when the pavement is wet or frosty. The Commission ordered that the lodge be informed that the Commission has approved an expenditure of state highway funds to improve the condition of this street and that such work will be done as soon as weather conditions are satisfactory.

FEB 19 1938

Resolutions from Winema Grange, Birkenfeld, Oregon, and Nehalem Valley Grange, Vine Maple, Oregon, urging the oiling of the Nehalem Secondary Highway between Mist and the Oregon Coast Highway junction. The Commission ordered the communications filed.

Resolution from the Mid-Columbia Chamber of Commerce urging the construction of a water-grade highway through the Columbia Gorge. Ordered filed without action.

Resolution from Pomona Grange No. 33, Ontario, Oregon, asking the Commission to designate as a secondary state highway that portion of the Nyssa-Jordan Valley Road between Homedale Junction and Malloy Ranch, which section was recently removed from the Secondary Highway System by joint action of the Malheur County Court and the Commission. The Commission denied the request.

Letters from Mrs. D. L. Stevens, Prescott, Oregon, relative to reconstruction of the Columbia River Highway between Goble and Rainier, in Columbia County. The Commission ordered the communications filed.

Letter from James J. Schivary, Portland, urging the Commission to alleviate a traffic hazard which, he alleges, exists at the junction of Columbia Boulevard with Sandy Boulevard (Columbia River Highway), in Portland. The Engineer advised that this matter was investigated and additional signs erected, which apparently is satisfactory to Mr. Schivary.

Letter from former State Highway Commissioner, Carl G. Washburne, Eugene, giving as his understanding that Linn County was to be relieved of its obligation to contribute 25 per cent of the cost of constructing the Santiam Highway when that highway was placed on the Federal Aid System. The Commission ordered the communication filed for consideration when the matter of Linn County's indebtedness is again brought up for discussion.

Letter from Grants Pass Chamber of Commerce, in which the Commission was asked to assist in securing a special allocation of funds by Congress to finance reconstruction of the Pacific Highway from Grants Pass to Roseburg and to complete reconstruction of this highway through the Siskiyou Mountains. The Commission decided that the time is not propitious to ask Congress for such appropriation and accordingly denied the request.

Letter from O. Henry Olen, State Representative, St. Helens, expressing the hope that the State Highway Commission will continue the straightening and widening of the Lower Columbia River Highway. The Commission ordered the letter filed.

Petition signed by 65 residents of Monument and Kimberly, Grant County, urging the reconstruction of the Kimberly-Monument State Highway at the earliest possible time. The Commission ordered the

petition filed inasmuch as this matter was disposed of earlier in the session when a delegation from Grant County conferred with the Commission and it was decided to construct a \$2,000 project at the westerly end of this road, 50 per cent of the cost to be paid by the state and 50 per cent by the county.

Letter from County Judge Earl B. Day, of Jackson County, with respect to the construction of a cattle guard across the Crater Lake Highway, in Jackson County. The Commission ordered the communication filed.

Letter from Edgar A. Ricker, Grants Pass, urging the improvement of the Riverbanks Market Road west from Applegate Bridge. The Commission ordered the communication filed.

Letter from the Women's Christian Temperance Union of Oregon requesting permission to erect signs on state highway rights of way bearing slogans relative to motorists indulging in alcoholic liquors. The Commission denied the request as a matter of policy.

Letter from Coos County Planning Board urging the Commission to rebuild the Marshfield-Coquille Section of the Oregon Coast Highway at the earliest possible time. It was the Commission's decision that this project is too costly to undertake at the present time and that the funds available for construction in the vicinity of Marshfield should be expended for the reconstruction of this highway through the Bunker Hill District and for nonskidding Sherman Avenue in North Bend before other projects are undertaken.

Letter from the Curry County Court advising that it is financially unable to acquire right of way for the proposed Squaw Creek Road improvement, for which improvement the Commission heretofore allocated \$10,000 of U. S. Works Program Highway Funds. In view of this letter the Commission decided to delete this project from the construction program.

Letter from V. H. Todd, Resident Engineer, W.P.A., Eugene, advising that the Lane County Court proposes to construct, as a W.P.A. project, 2 miles of crushed rock sidewalk along the Junction City-Eugene Secondary Highway (old route of the Pacific Highway), north and south of a place known as Santa Clara, and inquiring whether or not the State Highway Commission will assume the responsibility for the maintenance of this sidewalk after it is constructed. The Commission refused to assume such responsibility and ordered that Mr. Todd be so informed.

Letter from A. Zundel, County Agent, Clatsop County, requesting the privilege of maintaining special signs on state highway rights of way at the points where such highways enter Clatsop County, directing homeseekers to his office. The Commission denied the request as a matter of policy.

FEB 19 1938

Resolution from the Klamath Falls City Council whereby the Council goes on record as being opposed to any reduction by Congress of the fiscal year 1939 Federal Aid Funds. The Commission ordered the communication filed.

Letter from Robert W. Sawyer, Bend, with respect to a proposed Third Avenue railroad grade separation project in Bend. The Secretary was instructed to inform Judge Sawyer that this project is in the Commission's tentative program for construction this year and that a contract will be awarded next fall for the construction of the same unless unforeseen difficulties arise in the meantime.

Letter from Senator F. M. Franciscovich, Astoria, requesting the oiling of the Wolf Creek Highway between Elsie and Necanicum. The Engineer was instructed to inform Senator Franciscovich that the Commission has budgeted this year an amount for surfacing and the construction of bituminous macadam on this highway between Necanicum Junction and Elsie, provided the 1939 Federal Aid Funds are released by Congress; but, due to shortage of state funds with which to match the federal funds, it is not likely that the contracting of the work can be done until fall.

Letter from E. E. Wilson, State Game Commissioner, relative to the erection and maintenance of a sign on the right of way of the Pacific Highway West, at its junction with the road leading to the State Game Farm a short distance north of Corvallis. The Engineer advised that Mr. Wilson has in mind to erect a large sign containing a lot of detailed information with respect to the game farm. Such sign, he said, would not be in accordance with the Commission's policy with respect to sign matters and he suggested that the request be denied but that there be erected on the highway, in lieu thereof, one of the Highway Department's standard 30"x 5½" finger-board signs, directing traffic to the Game Farm. The Commission approved the Engineer's recommendation and ordered that Mr. Wilson be advised accordingly.

Letter from C. W. E. Jennings, Valley Falls, requesting the aid of the State Highway Commission in securing the continuation of the Burns-Valley Falls mail route, which, he said, will probably be discontinued unless protest is made to the U. S. Post Office Department. It appeared to the Commission that this mail service is of no particular value to the State Highway Department or to the state as a whole; hence the request was denied.

Letter from Allison Dean & Company, realtors, Portland, asking the Commission to construct a shelter shed on the Canyon Road Section of the Tualatin Valley Highway for the benefit of school children who are required to wait for school buses, and for the benefit of prospective real property purchasers and people who use the buses going to and from the Westhills Golf Course. The Commission denied the request as a matter of policy.

Letter from Mayor Charles H. Huggins, Marshfield, urging the Commission to adopt a route for the Oregon Coast Highway through Marshfield at the earliest possible time so as to allow the undertaking of contemplated improvements by the city on some of its property that may not be needed for right of way. The Commission decided that such funds as are available for expenditure in Marshfield and North Bend should be confined to improvement of the Bunker Hill Section and the nonskidding of Sherman Avenue in North Bend, and until these projects are completed it would not be advisable to select a route through Marshfield, particularly in view of the high cost of this project. The Engineer was instructed to so inform Mayor Huggins.

Petition signed by 101 residents of Nashville, Oregon, and vicinity, requesting the improvement of the Eddyville-Blodgett Secondary State Highway, said petition having been presented by the Corvallis Chamber of Commerce. The Commission ordered that the Chamber of Commerce be informed that the Commission must deal with the county courts of the respective counties in the selection of projects on secondary highways, and that the construction program of the counties concerned in this improvement has already been agreed upon by the Highway Commission and the county courts.

Letter from J. W. Raynard, Hillsboro, requesting the oiling of the Hillsboro-Newberg Section of Secondary Highway No. 140. The Secretary was instructed to inform Mr. Raynard that the Commission's finances are at a low ebb at the present time and that the Commission regrets that it does not have the money to spare to undertake this project this year.

Resolutions from Natal Grange No. 302, Mist, Oregon, and Vernonia Grange, Vernonia, Oregon, requesting the surfacing and oiling of the Nehalem Secondary Highway between Mist and the Oregon Coast Highway junction. The Commission ordered the communications filed.

Letter from Margaret P. Lamb, Regent, Eulalia Chapter, Daughters of the American Revolution, requesting permission to erect a monument on the Crater Lake Highway at its junction with The Dalles-California Highway, marking the site of old Fort Klamath. The matter was referred to the Engineer with power to act.

Request of Mr. A. C. Anderson, Salem, for permission to transport a donkey-engine sled, dismantled, having an overall length of 73 feet, over the Oregon Coast Highway from Agate Beach to Mohler. The Commission denied the request, it appearing to the Commission that the transportation of such a long piece of equipment over this highway, which contains numerous sharp curves, would create too great a hazard to the general traveling public.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has ordered a number of surveys since

the last meeting of the Commission. He presented a list of such surveys and asked the Commission to confirm the action. After due consideration, motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditure, are as follows:

Location - - - - -	7-2803 - Mill Creek-Marks Creek Sect., Ochoco Highway, Crook County.	6th authorization - \$750.00 Total to date \$ 7,400.00.
Location - - - - -	16-2806 - Terrebonne-Madras Sect., The Dalles-California Highway, Jefferson County.	1st authorization \$12,600.00
Quarry & Stock Pile - - - - -	14-2812 - Parkdale Section, Mt. Hood Highway, Hood River County.	1st authorization - \$350.00
Raise Grade Line - - - - -	29-2824 - Kilchis River-Cloverdale School, Wilson River Highway, Tillamook County.	1st authorization - \$ 80.00
Right of Way - - - - -	8-2809 - Azalea Park Road, Oregon Coast Highway, Curry County.	1st authorization - \$300.00
Location - - - - -	35-2806 - Kinzua Junction-Butte Creek Ranch, John Day Hwy. Wheeler County.	2nd authorization - \$150.00 Total to date \$ 1,650.00.
Location - - - - -	9-2816 - Bend-Lava Butte Section, The Dalles-California Highway, Deschutes County.	1st authorization - \$400.00
Prepare Plans - - - - -	18-2822 - Bly Mountain-Beatty Section, Klamath Falls-Lakeview Hwy., Klamath County.	1st authorization \$3,000.00
Prepare Plans - - - - -	9-2812 - Brothers-Gap Ranch Sect., Central Oregon Hwy., Deschutes County.	2nd authorization \$2,025.00 Total to date \$ 4,450.00.
Quarry & Stock Pile - - - - -	23-2814 - Juntura-Cario Junction Sect., Central Oregon Hwy. Malheur County.	1st authorization - \$720.00
Quarry & Stock Pile - - - - -	12-2812 - Flat Creek-John Day Sect., John Day Highway, Grant County.	1st authorization - \$320.00
Stock Pile Site - - - - -	121-2812 - Siletz Section, Siletz Secondary Highway, Lincoln County.	1st authorization - \$175.00
Reconnaissance - - - - -	4-2818 - Cannon Beach Junction-Cannon Beach, Oregon Coast Highway, Clatsop County.	1st authorization \$1,200.00

FEB 19 1938

Foot Path - - - 2-2812 - Marys River-Lincoln School, Pacific West, Benton
County. 1st authorization - \$150.00

Location - - 210-2811 - Lorane-Anlauf Sect. County Road, Douglas County.
2nd authorization - \$700.00
Total to date \$ 7,500.00.

Location - - - 22-2809 - Albany Grade Separation, Pacific Highway East, Linn
County. 4th authorization - \$2,000.00
Total to date \$17,000.00.

Location - - 224-2816 - Salem-Independence Sect., Halls Ferry County Road,
Marion County. 1st authorization - \$4,200.00

Quarry - - - - 12-2813 - Dixie Summit-Deer Flat Sect., John Day Highway,
Grant County. 1st authorization - \$750.00

Location - - 226-2830 - Lombard-Sandy Sect., N.E. Portland Highway, Multno-
mah County. 6th authorization - \$500.00
Total to date \$6,000.00

Location - - - 26-2828 - Union-Denver Ave. Sect., Pacific Highway East & West
Multnomah County. 4th authorization - \$2,500.00
Total to date \$5,000.00

Location - - - 24-280 - Salem-Pringle Creek Sect., Pacific Highway East,
Marion County. 3rd authorization - \$700.00
Total to date \$3,500.00

Relocation - 123-2812 - Owyhee River-Blue Mountain Pass Sect., I.O.N. Hwy.
Malheur County. 2nd authorization - \$1,500.00
Total to date \$3,500.00

Prospect for - 18-2823 - Walker Mountain-Gold Lake Trail Sect., Willamette
Materials Hwy., Klamath County. 1st authorization - \$1,000.00

The motion was duly seconded by Commissioner Aldrich and was declared to have carried.

The Commission had under consideration a request from the Consolidated Highway Company, Inc., for an extension of time of 11 days, from August 31 to September 11, 1937, within which to complete their contract No. 1958 for the construction of the Pendleton-Myttinger Section of the Old Oregon Trail, in Umatilla County. They attributed their failure to complete the project within the specified time limit to an increase in quantities over those contemplated in the original estimate. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is substantially correct. He further advised that the traveling public has not been inconvenienced by the delay and the state has not incurred any extra expense for engineering supervision. He recommended

FEB 19 1938

that the extension of time requested be granted without penalty and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1915, 1958, 1967, 1998, and 2010 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1915, with Hoffman Construction Company, for construction of an undercrossing to carry Milwaukee Avenue over the East Portland-Oregon City Highway, in Portland, Multnomah County. Completed August 28, 1937.

Contract No. 1958, with Consolidated Highway Company, Inc., for grading, surfacing, and oiling the Pendleton-Mytinger Section of the Old Oregon Trail Highway, in Umatilla County. Completed September 11, 1937.

Contract No. 1967, with E. C. Hall, for furnishing crushed rock for the Bend-Crescent Section of The Dalles-California Highway, in Deschutes County. Completed October 4, 1937.

Contract No. 1998, with Babler Bros., for grading and surfacing the Lake County Line-Gap Ranch Section of the Central Oregon Highway, in Harney County. Completed January 12, 1938.

Contract No. 2010, with Frank Watt Construction Company, for the construction of a timber bulkhead on the Mt. Hood Highway, in the town of Gresham, in Multnomah County. Completed January 31, 1938.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

FEB 19 1938

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Tillamook County relative to the purchase of county-owned equipment for use on the Wilson River Highway W.P.A. Project.

Agreement with Erickson and Schmidt Logging Company relative to the transportation of logs across state property adjacent to the Salmon River Highway, in Tillamook County.

Agreement with Contractor L. H. Hoffman, providing for the advance payment to Mr. Hoffman for structural steel purchased for use in connection with the construction of the Quartz Creek Bridge on the Wolf Creek Highway.

Agreement with the State of Oregon Department of Agriculture with respect to the vacation of certain rooms by the Highway Department in the Agricultural Building, Salem, and with respect to the purchase of certain facilities left in certain rooms for the benefit of the State Department of Agriculture.

Agreement with Tillamook County Court covering the subject of acquisition of a timber strip along the Wilson River Highway, in Tillamook County, from the Weyerhaeuser Timber Company.

Agreement with Mr. Shirley Kingsbury, providing for payment to Mr. Kingsbury of the sum of \$500 in lieu of reconstructing his pipe line on the Medical Springs Secondary Highway, in Union County.

Agreement with the city of Hood River relative to lighting the Hood River Bridge on the Columbia River Highway at Hood River.

Agreement with Schmeer, Williams & Gentemann, contractors for the furnishing of rock for the Shuttler Flat-Condon Section of the John Day Highway, contract No. 2034, providing for a change in the quarry site to be used in connection with this job.

Agreement with the Columbia River Packers' Association relative to the purchase of property known as Rooster Rock adjacent to the Upper Columbia River Highway, in Multnomah County.

Agreement with the Oregon American Lumber Corporation providing that the state shall retain title to certain steel girders that are to be used by the corporation in the construction of its railroad over the Wolf Creek Highway at or near highway engineer's station 1042 + 99.8.

Agreement with E. W. Williamson et al, providing for payment to Mr. Williamson for damage that occurred to his property by

FEB 19 1938

reason of the construction of the Ontario Grade Separation Project, in Ontario, Malheur County.

Agreement with the City of Klamath Falls relative to the reconstruction of Main Street, Klamath Falls, under the tracks of the Southern Pacific Company.

Agreement with the Oregon-Washington Railway and Navigation Company, Union Pacific Railway Company, County of Multnomah, and County of Hood River, whereby the railroad companies grant an easement to the state to reconstruct the Columbia River Highway partially on railroad company property between Eagle Creek and Cascade Locks.

Bargain and sale deed conveying unto Julia S. O'Brien and Bert O'Brien 0.11 acre of land situate in Government Lot 4, Section 32, T. 10 S., R. 11 W., W. M., Lincoln County, Oregon, being outside of the standard width highway right of way.

Bargain and sale deed conveying unto George B. Campbell and Dorothy Campbell 0.90 acre of land situate in Government Lot 1, Section 32, T. 10 S., R. 11 W., W. M., Lincoln County, and being outside of the standard width highway right of way.

Bargain and sale deed conveying unto R. B. Johnson 12,471 square feet of land in Lot 3 of Block G, city of John Day, Oregon, and lying outside of the standard width highway right of way.

Quitclaim deed conveying unto the Southern Pacific Company a parcel of land containing 5,607 square feet adjacent to S.E. 13th Avenue, Portland, pursuant to previous agreement and understanding.

Quitclaim deed conveying unto the Southern Pacific Company a small tract of land containing approximately 1,300 square feet along the Oregon Coast Highway north of Coos Bay.

Quitclaim deed conveying unto Ernest Koble 0.13 acre of land located in the N.E. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ of Sec. 17, T. 40 S., R. 2 E., W.M., Jackson County, being a 50 x 100-foot area on the west side of the Pacific Highway (new route) south of Ashland. Conveyance is pursuant to an agreement between the Commission and Mr. Koble dated October 22, 1937.

There being no further business to come before the Commission at this time, the meeting was adjourned at 1:00 o'clock p. m.

FEB 19 1938

Portland, Oregon, March 23, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meetings held on November 29, 30, and December 1, and on December 21, 1937.

The Commission had under discussion matters pertaining to the indebtedness of Linn County to the state for construction of the South Santiam Highway, in Linn County, and in connection therewith a letter from Mr. Carl G. Washburne, former State Highway Commissioner, in which Mr. Washburne states that, as he recalls it, when he was State Highway Commissioner an understanding was had with the Linn County Court that the county would be relieved of the customary 25 per cent county participation for the construction of this road after it had been designated a federal aid highway. A decision on the matter was deferred by the Commission pending further investigation. The Engineer was instructed to consult Mr. Leslie M. Scott, former chairman of the State Highway Commission, and ascertain in writing whether or not he recalls any such understanding.

Consideration was given by the Commission to the matter of securing a forgery bond to protect the state against loss in the event of defalcations by state highway department employes or others. Chairman Cabell advised that, pursuant to authority granted him by the Commission at the previous meeting, and after giving the matter serious thought he has authorized the purchase of a forgery bond in the amount of \$100,000. Commissioners Aldrich and Tou Velle confirmed the action taken by Chairman Cabell in this matter. The invoice of the National Surety Corporation, amounting to \$605, for a \$100,000 bond, running for a period of three years from February 19, 1938, was thereupon approved by the Commission for payment.

The Commission then discussed the matter of purchasing a blanket fidelity bond covering highway department employes who are engaged in occupations that require them to be bonded, and in connection therewith considered the offer of the National Surety Corporation to furnish such bond at a reduced rate. The Commission decided that it would be advantageous to have the blanket bond if a savings in premium could be made and if the office routine in handling the bonds could be reduced. However, it was the thought of the Commission that all bonding companies authorized to do business in the State of Oregon should be given an opportunity to furnish such bond. Accordingly it was decided that the matter of furnishing such bond should be advertised for bids to be received at the next regular meeting of the Commission. The matter was referred to the Engineer, the Attorney, and the Secretary, to work up the details.

MAR 23 1938

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties and prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

Whereas, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Pacific Highway-Yale Ranch Section - McKenzie Highway</u>				
5712-Riggs, Nellie	Stock Pile	0.84	Lump Sum, \$175 State to fence	J.G.Toole
<u>Gold Hill-Dodge Bridge Section - Sams Valley Highway</u>				
5552-Potter, Ford	Stock Pile	1.0	Lump Sum, \$100	Collins
<u>Hermiston-Columbia School Section - Hermiston Highway</u>				
5544-McGilva, C. T.	R/W	0.23	\$100 per a. plus \$61	Wells
<u>Meadow Brook Section - Starkey Highway</u>				
5757-Plunkett, Jesse	R/W	4.18	\$10 per a. plus \$329	Wells

The Commission had under consideration the adoption of a policy with respect to deferring the acquisition of right of way for highway projects until such time as the right of way is actually needed for construction. A decision in the matter was deferred until the next regular meeting of the Commission.

The Attorney presented for the consideration of the Commission the following properties on which it has not been possible to reach satisfactory settlements:

MAR 23 1938

After due consideration the Commission by unanimous vote adopted the following resolutions authorizing condemnation of the said properties if satisfactory settlement at the prices recommended cannot be reached otherwise:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Lombard-Killingsworth Section of Northeast Portland Highway
Lakeview Junction Section of The Dalles-California Highway
Williamson River-Modoc Point Section of The Dalles-California Highway
Albany Overcrossing Section of the Pacific Highway East
Mile Bridge Section of Nehalem Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Lombard-Killingsworth Section of Northeast Portland Highway:
F. B. Williams; Rudolph Schneider Estate; R. A. Hafner.
Lakeview Junction Section of The Dalles-California Highway:
R. A. Sutton and W. C. Fixley.
Williamson River-Modoc Point Section of The Dalles-California Highway: Richard Melhase; Richard Melhase and heirs of Joseph Ball, deceased; Lamm Lumber Company; Lloyd M. Dont; Clara Baker.
Albany Overcrossing Section of the Pacific Highway East:
Chris A. Vandran; S. J. Brown and Jerusha Brown; Amy Eagles and William Eagles; Melissa J. Kitchen; S. C. Jordan and Ella M. Jordan.
Mile Bridge Section of Nehalem Highway:
L. H. Roberson and Grace Roberson.

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of

advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. VanWinkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, including

MAR 23 1938

both primary and secondary state highways, and said Commission is further authorized to acquire lands and rights of way therefor and to declare the necessity and need for the acquisition of the same and the advantages to be gained thereby; and

WHEREAS, the Highway Commission is authorized to acquire all of the rights of way for state highways both primary and secondary, including the rights of way for those portions of the state highways or secondary state highways located within the corporate limits of incorporated cities and towns; and

WHEREAS, the Highway Commission is authorized and required whenever a state highway or a secondary highway passes through the corporate limits of a city or town, to select and designate the street or streets over which to route such highway or highways; and

WHEREAS, the Pacific Highway East, extending from Multnomah County through Oswego, Salem and Albany to a junction with the Pacific Highway at Junction City, is a state highway and as such passes through the corporate limits of the City of Albany; and

WHEREAS, the Highway Commission has selected and designated the street or streets of the City of Albany over which to route said highway and has otherwise selected and designated the route of the highway through said City; and

WHEREAS, in connection with the permanent improvement and construction of said highway through said City of Albany, a portion of which said improvement contemplates and involves a grade separation of highway and railroad by which highway traffic will be carried over the tracks of the Southern Pacific Company, it has been found necessary to acquire additional rights of way, a portion of which rights of way will be needed and used for highway purposes and a portion will be required for the purpose of moving and relocating certain spurs and certain tracks owned and operated by the Southern Pacific Company;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that it is and will be necessary and of advantage to the State of Oregon and does hereby declare the need that exists for the acquisition of real properties hereinafter defined, such real properties to be used as rights of way for the construction of said highway and the rearrangement of tracks of the Southern Pacific Company and for the construction of an overhead crossing over the tracks of the Southern Pacific Company, and does hereby declare that without the acquisition of said real properties the said highway and street improvement can not be constructed, the said grade crossing which has been ordered

and authorized by an order of the Public Utilities Commissioner can not be accomplished, and the public can not adequately be served with adequate and safe highway and street facilities.

2. The Highway Commission does further declare and find that the properties hereinafter described are needed and are necessary as rights of way for use in connection with the said proposed project of highway and street improvement.

3. The properties which are required for such purpose are owned by the persons hereinafter named and are located in the lots and blocks hereinafter designated:

File 5160, Thomas E. Riley and Nellie M. Scott—land in Lots 5, 6, 7, and 8, Block 46, Hackleman's Second Addition to Albany;

File 5558, A. C. Jensen and Pearl Jensen—land in Lots 2 and 3 of Block 39, Hackleman's Second Addition to Albany;

File 5710, George E. Rhodes and Audra Rhodes—land in Lot 7 of Block 39, Hackleman's Second Addition to the City of Albany;

File 5158, E. R. Huston, C. D. Huston, Annie M. Safley, and/or Edward Sears—land in Lot 8 of Block 38, Hackleman's Second Addition to the City of Albany;

File 5159, J. A. Fox and Elva Fox—land in Lot 5 of Block 34, Hackleman's Second Addition to the City of Albany.

4. This Commission does further declare and find that the said above described properties or portions of the same are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon in order to make it possible for the Highway Commission to properly locate, construct and maintain the said highway through the City of Albany, and in order to make possible the construction of an overhead crossing by which highway traffic may be carried over the tracks of the Southern Pacific Company, and in order to provide adequate ground and accommodations for the removal of certain spur tracks owned and operated by the Southern Pacific Company and now occupying area needed and required for said highway and street improvement and in particular the spur tracks extending from the intersection of Sixth Street and Railroad Street in the City of Albany southerly along said Railroad Street to and including a portion of Block 8 of Hackleman's Second Addition to Albany, and said real property or portions thereof are needed and required for the purpose of making other and additional track changes in order to make available for said highway and street improvement other areas occupied by the Southern Pacific Company.

5. That some of said properties are required so that the State Highway Commission may exchange the same with the Southern Pacific Company for property which the Southern Pacific Company now owns and which is needed by the State in connection with said project and the construction of said overhead crossing.

6. That the State Highway Engineer be and he hereby is instructed to properly survey said parcels of land herein referred to and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds and other instruments necessary to accomplish the acquisition of said property or properties or which descriptions may be used in the preparation of complaints in the event that condemnation proceedings are necessary.

7. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J.M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

8. That this resolution be entered in full in the minutes are records of this Commission.

The Engineer reported the need for maintenance headquarters buildings at Forest Grove, Suntex, Brothers, Drewsey, and Medford. He estimated the cost of the Forest Grove building at \$8,142 and advised that it is planned to construct this building as a W.P.A. project, the labor cost, estimated at \$3,185, to be paid from W.P.A. funds, leaving a balance of \$4,957 to be paid from state funds. He estimated that the buildings at Suntex, consisting of a maintenance building, two patrolmen's houses with garage, et cetera, would cost about \$12,688.50; that the buildings at Brothers would cost about \$11,643.50; and those at Drewsey would cost about \$12,919.50. He advised that the proposed building at Medford would be of a temporary type which could be built for about \$1,500. After discussion and in view of the apparent need for the buildings, the Commission by unanimous vote approved construction of those located at Forest Grove, Suntex, Brothers, and Medford, at the respective costs estimated by the Engineer. The Commission approved construction of the Forest Grove Building as a W.P.A. project and the Medford

building by state forces. The buildings at Suntex and Brothers are to be constructed under contract. The Commission's approval of this expense was contingent upon there being no increase in the amount of the maintenance budget for this year, it being understood that the funds required to finance the same would be transferred from other maintenance accounts.

The Commission had under discussion the matter of allowing claims for damages to properties in Albany that are affected by changes in the grade line of city streets resulting from the construction of the Albany grade separation project. The Attorney pointed out that in some instances properties will be seriously affected by such street grade changes and the owners will undoubtedly submit claims for damages, and it is quite likely that claims will also be filed by other property owners whose property is located near the highway improvement but is not affected thereby. The question arose whether or not all of the property owners affected should be contacted relative to their claims. It was the decision of the Commission that such contacts should be limited to those whose properties the Attorney conscientiously considers will be damaged by reason of the highway improvement.

The matter of compensation to be paid to Minnie T. Reed for right of way for a proposed revision of the Upper Columbia River Highway, in Multnomah County, had the attention of the Commission. The Attorney advised that Mrs. Reed has received a bona fide offer of \$15,000 for her property, but there is a possibility that she will sell to the state for \$12,000. He recommended settlement with Mrs. Reed for \$12,000 if possible. After full consideration of the facts in the case, the Commission approved the recommendation by unanimous vote.

The Attorney brought up for discussion the matter of acquiring right of way for a revision of the Oregon Coast Highway through the property of William S. Walton, at Neskowin. He advised that Mr. Walton is now negotiating the sale of all of his holdings at this place but would like to have this right of way matter disposed of first, if possible, and accordingly has agreed to reduce his price for the same to \$5,000 with no obligation on the part of the state to take possession of the property or to pay for it until it is actually needed for construction, although he would want to retain for the purchasers of the rest of the property the right to let the buildings located thereon remain in their present location until such time as the reconstruction of the highway is undertaken. The Commission decided, in view of the fact that present plans do not provide for the reconstruction of this highway for several years, that it would be inadvisable to tie up state funds for right of way for such a long period of time. The Attorney was instructed to inform Mr. Walton that the Commission appreciates his offer but cannot accept it now.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

Acquisition of Multnomah Falls and Wahkeena Falls properties from the City of Portland:- The Parks Superintendent advised that the United States Forest Service has a recreational

area adjacent to these parks and gave as his thought that it would be advisable for the Forest Service to have supervision and control over the two parks under discussion, particularly in view of the fact that the Forest Service is endeavoring to obtain watershed property as an addition to its present holdings. The addition of the Wahkeena Falls and Multnomah Falls watersheds to the Forest Service recreational area, he said, would make a desirable and compact unit, and he recommended that the City of Portland deed these properties to the Forest Service rather than to the state. The State Highway Engineer concurred in the recommendation in so far as it pertains to the area south of the O.W.R. & N. Railroad but gave as his thought that the property north of the railroad should be owned by the state. The Commission by unanimous vote approved the Engineer's suggestion and authorized negotiations with the officials of the City of Portland to such end.

Acquisition of 360 acres of land belonging to Viola Lee Pratt and Adelaide G. Williams along the Oregon Coast Highway, in Lane and Lincoln Counties:- The Parks Superintendent advised that he has contacted the owners of this property relative to securing renewal of an option to purchase the same for the sum of \$60,000, and that they have agreed to renew the option for a period of six months on the following basis: that the state will agree to pay them \$5,000 at the time the new option is signed, which amount shall apply on the purchase price of the property; and that six months from the date of the signing of the option the state will pay to them an additional amount of \$15,000, and will within twelve months of such payment, pay an additional sum of \$20,000, and will pay the final \$20,000 within two years from the date of expiration of the new six-months' option. They also agreed, he said, not to charge interest on the deferred payments. He pointed out that John C. Merriam, President of Carnegie Institute, Washington, D. C., is particularly interested in the matter and is extremely anxious that the state acquire this property, and has stated his willingness to secure, if possible, a \$30,000 donation to pay one-half the cost thereof. He strongly recommended the acquisition of this property even if Dr. Merriam is unsuccessful in his attempts to secure the donation and the state is required to pay the entire cost. After considerable discussion, the Commission voted unanimously in favor of the purchase of the property on the basis of the offer outlined above, regardless of whether or not Dr. Merriam is successful in finding a public-spirited citizen who is willing to pay half of the cost.

Beach frontage on the Pacific Ocean at Gearhart:- The Parks Superintendent advised that the Gearhart Park Company, represented by Mr. James L. Conley, Portland, has offered to sell to the state for the sum of \$30,000, one-half mile of ocean beach frontage, containing about 30 acres of land, extending northerly from the Necanicum River, near Seaside. He recommended that the offer be declined. The Commission approved the recommendation unanimously.

Naming of a state park in honor of David Douglas, for whom the

MAR 23 1938

Douglas fir is named:- Mr. Boardman advised that there already exists a park named for Mr. Douglas, consisting of an 80-acre tract located adjacent to the Wolf Creek Highway about $3\frac{1}{2}$ miles east of its junction with the Oregon Coast Highway, in Clatsop County, same having been dedicated by Clatsop County. It was the thought of the Commission that it would be inappropriate to name another park in honor of Mr. Douglas and instructed the Secretary to so inform Mr. Robert W. Sawyer of Bend, who is interested in the matter. The Commission also ordered that the Clatsop County Court be requested to erect a suitable monument in the park for the information of the general public.

Removal of remains of Indian Chief Tag-On-Ecia (Whiskers) from the present place of interment on the Sixes River to Port Orford State Park:- In this connection the Secretary presented a letter from Lewis A. McArthur, President of the Oregon Historical Society, stating that he knows nothing about the historical facts of this matter but suggesting that the Commission grant the request of the Port Orford Chamber of Commerce for the re-interment of the remains in Battle Rock Park. It was the thought of the Parks Superintendent that to grant this request would be establishing a precedent that would be difficult to avoid in the future. He stated that, in his opinion, the remains should not be moved unless descendants or kin of Chief Tag-On-Ecia gave their full consent for the same. The Commission concurred in the viewpoint of the Parks Superintendent and accordingly denied the request.

Request of Reverend William Wallace Youngson, Tillamook, that crosses and benches be erected in all state parks for the convenience of people who desire to gather and worship:- The Parks Superintendent advised that he contacted Reverend Youngson and explained to him the undesirable features of maintaining crosses in the state parks, and apparently satisfied him that such crosses should not be permitted. The Commission approved the report but instructed the Parks Superintendent to follow the suggestion of Reverend Youngson with respect to the benches.

Construction of a memorial building at Otter Crest:- The Parks Superintendent advised that a request has been made by Mrs. Helen M. Warren, Oceanlake, through Governor Martin, for a memorial building to be erected at Otter Crest for the preservation of historical relics. The Commission voted unanimously to deny the request, it being the thought of the Commission that historical relics, et cetera, should be concentrated in a more historical place, such as Champoege Park.

Acquisition of area from S. C. Armitage containing about 33 acres located adjacent to the Coburg county road about 5 miles north of Eugene:- The Parks Superintendent stated that he has again been contacted by Mr. Armitage, who is extremely desirous of donating this tract to the state for park purposes. He said that

the park does not fit into the state park picture because it is not on a state highway route and is located in such close proximity to the city of Eugene, and should properly be a city park. He further stated that Mr. Armitage refuses to donate the land to either the city of Eugene or to the University of Oregon but wants the State Highway Commission to have charge of it. He requested instructions in regard thereto. The Commission discussed this matter but deferred action thereon.

Acquisition of 120 acres of land located between the Oregon Coast Highway and the Pacific Ocean about one mile north of Nelscott, in Lincoln County:- The Parks Superintendent advised that this property is owned jointly by the Nelscott Land Company and a Mr. E. W. Chandler, who want \$21,000 for the property. The Commission deferred a decision in the matter pending an inspection of the property by Chairman Cabell, who agreed to make such inspection the next time he is in that vicinity.

Request of the United States Army Engineers for flowage easements on four state parks and two units of the Columbia River Highway east of the Bonneville Dam:- The Parks Superintendent advised that he has inspected these properties and has no objections to the granting of such easements to the Government. The Commission deferred a decision in this matter pending a conference with Major A. E. McKennett of the United States War Department who has been invited to confer with the Commission relative thereto on the following day.

The Commission considered and signed bargain and sale deeds as follows:

Right of way transaction No. 3105. Deed conveying unto Sarah E. Mulkey a parcel of land containing 2.25 acres situate in the S.W. $\frac{1}{4}$, Section 11, T. 28 S., R. 6 W., W.M., Douglas County.

Right of way transactions Nos. 2232 and 2218. Deed conveying unto Fred H. Brown and Mary Ann Brown 0.331 acre of land situate in the Solomon Zumwalt Donation Land Claim No. 41, T. 17 S., R. 4 W., W. M., Lane County.

Right of way transaction No. 4812. Deed conveying unto George P. Stonefield 0.53 acre of land situate in Government Lot 3, Section 22, T. 15 S., R. 12 W., W.M., Lane County.

Right of way transaction No. 3413. Deed conveying unto Walter A. Sumner and Lottie E. Sumner 1.66 acres of land situate in the N. $\frac{1}{2}$ of the S.E. $\frac{1}{4}$ of Section 8, T. 33 S., R. 1 W., W.M., Jackson County.

The Commission also signed an agreement with the Albany Seed Company providing for settlement with the company for right of way needed for the Albany Overcrossing Project.

MAR 23 1938

The Commission adjourned at 12:00 o'clock midnight, to reconvene the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, March 24, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Bids as follows for highway construction projects, purchase of buildings, and purchase of scrap bridge steel were opened and read, in conformance with previously published notice:

BAKER-HOMESTEAD HIGHWAY
MIDDLE BRIDGE-BLACK BRIDGE SECTION - OIL MAT SURFACE TREATMENT

Babler Bros.	\$18,991.00

Simon's, Inc.	240.60
Alaska Junk Company	217.80
Milton E. Potter	216.00

Chairman Cabell announced that the award of contracts and sale of buildings and steel would be made at 2:00 o'clock p. m. in the same room.

MAR 24 1938

Mr. Lundstrom, representing the Pratt Truck Service, Portland, was present and requested permission to transport an old street car over state highways from Portland to Wilsonville. He said that the load would be slightly under 15 feet in height overall, which is in excess of the statutory limits, but it does not exceed the statutory limits in any other respect. He further stated that the route that he proposes to use is over state highways with the exception of about 3 miles of county road and that at no point are there any overhead structures with impaired clearances. The Engineer advised that the practice for some time has been to refuse to grant permits for movements over state roads of loads exceeding 14 feet in height, but in this particular instance he would recommend granting the permit in view of the fact that there are no impaired clearances involved. The Commission approved the recommendation by unanimous vote.

In this connection the Commission considered it advisable to adopt a standard policy with respect to the movement of loads over state highways, the overall height of which loads is in excess of the legal height limits. The Commission thereupon adopted as its standard policy, to be followed hereafter, that the issuance of permits for overheight movements shall be limited to those not exceeding 15 feet from the surface of the pavement to the top of the load and only then in case there are no impaired clearances involved. Further, in cases of movements over sections of highways where overhead structures exist, permits shall be limited to those movements where the clearance between the top of the load and the lowest point in the overhead structure is not less than 12 inches.

Mr. C. I. Scoffin was present and inquired as to the plans of the Commission with regard to the proposed revision of the Pacific Highway West through Tigard. He was informed that the Commission has not yet adopted a definite route for this revision but expects to consider the Engineer's report thereon the following day. The Secretary was instructed to advise Mr. Scoffin of the action taken by the Commission on this report.

The following persons were present and discussed with the Commission the matter of opening East Court Street, Pendleton, which street was ordered closed by the Public Utilities Commissioner upon completion of the East Pendleton Grade Separation structure: Mayor C. L. Lieuallen, Pendleton; Fred Bets, Attorney, and Hal Roberts, Engineer, for the Union Pacific Railway Company; and T. O. Russell, Chief Engineer, representing the Public Utilities Commissioner.

Mayor Lieuallen stated that the closing of East Court Street is working a hardship on a good many Pendleton people, including doctors who find it very inconvenient to take the present roundabout way to reach the hospital, which is located just east of the railroad tracks. He advised that the city of Pendleton has filed a petition with the Public Utilities Commissioner requesting the reopening of this street and is now asking the Highway Commission to help in the matter, at least to make a commitment one way or the other.

Mr. Bets gave as his thought that the railroad company would not consent to the opening of this street under any consideration. He referred

to the agreement that was executed at the time the grade separation project was first discussed, wherein it was mutually agreed and furthermore was ordered by the Public Utilities Commissioner that East Court Street at this particular location would be perpetually closed when the overhead crossing structure was completed and opened for travel. He declared that this feature was a material consideration in the agreement and that the railroad company has fulfilled its part thereof and accordingly must oppose any efforts that are now made to reopen the street.

Chairman Cabell advised that in his personal opinion this is a matter that does not particularly concern the Highway Commission inasmuch as the matter was fully covered by the agreement mentioned by Mr. Betz, and it would be very difficult for the Commission to reverse its stand now. He declared that the stand of the Commission is neutral in the matter and to him it appears to be a problem for the city to work out with the railroad company. Commissioner Aldrich concurred.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, who was present, pointed out that the closing of East Court Street at this point was one of the considerations that justified expenditure of government money for the construction of the overcrossing. The State Highway Engineer pointed out that the Old Oregon Trail has been rerouted since the construction of the overcrossing and no longer follows East Court Street at this point, hence the Highway Commission would have no jurisdiction thereover.

After further discussion Mayor Lieuellen asked the Commission for a letter stating its position in the matter and advising whether or not it will oppose the city's petition.

Mr. Betz suggested, if the Commission should write such a letter, that it show that the Commission is taking no side whatsoever in this controversy, but is neutral; further, that the letter point out that East Court Street, in this particular location, is not a state highway route, so the Commission has no jurisdiction over the same. The Commission approved Mr. Betz's suggestion and instructed the Engineer to write such letter to the Pendleton City Council.

A delegation from Hood River, representing the Hood River Chamber of Commerce and consisting of the following members: Rory A. Collins; Rodrick McRae, President; P. A. Galluzzo; D. Baldwin; Herman Kresse; Larry Boyd; Earl Weber; and James Stranahan, came before the Commission in regard to snow removal on the Mt. Hood Highway so as to permit travel over this highway throughout its entire length earlier this year than heretofore. Mr. Collins headed the group.

Speaking in behalf of the project were Messrs. Collins, McRae, Kresse, and Weber. They urged the project from the commercial standpoint and declared that it means a \$40,000 tourist trade to the people of the Hood River Valley, and pointed out that the opening of the highway would make it possible for sightseers who want to take in both Timberline Lodge and Bonneville Dam to do so in one trip, whereas, under present conditions, that cannot be

done. They also urged the opening for the benefit of winter snow enthusiasts of the Hood River Valley who desire to enjoy the winter sports facilities at Government Camp and Timberline Lodge, which people now have to go many miles in a roundabout way to reach. Mr. McRae filed a petition signed by 263 citizens of Hood River County urging the Highway Commission to take immediate action to open that portion of the Mt. Hood Highway that is now closed by snow.

Chairman Cabell advised that there is danger of rupture of the pavement if the highway is opened to traffic too soon, due to the freezing and thawing conditions, and that it might result in excessive costs for repair work.

The Engineer estimated that it would cost about \$4,000 to open the highway, starting about the first of April, and that it would cost about \$3,000 if the work were started about May first; whereas, if such work were deferred until the first of June, the expense would be reduced to about \$1,000. He pointed out that the Commission made no provision in its budget for such expense.

Mr. McRae gave as his thought that the road is important enough to justify the expense and urged the Commission to at least try it out this year.

After further discussion the Commission decided to open the highway about a month earlier this year than last year, if possible. Accordingly, the Engineer was authorized and instructed to start snow removal operations about the first of May with two snow plows, one working from each end of the closed section. He was further instructed to keep the road closed for about a week after the snow has been removed so as to give the road an opportunity to dry out before it is subjected to traffic, thus reducing the probabilities of damage occurring.

A delegation from Roseburg, representing the Chamber of Commerce and consisting of the following members: W. C. Harding, Secretary; Senator A. C. Marsters; George Smith; and Harris Ellsworth, was present. They inquired as to the plans of the Highway Commission for construction work on the North Umpqua Highway this year. They were informed by Chairman Cabell that the Commission has included in its tentative program for 1938 federal aid secondary highway moneys an amount of \$35,000 for the North Umpqua road. He also advised that the Commission has included in its tentative program for 1939 regular federal aid funds an amount for the construction of the Roseburg-Shady Point Section of the Pacific Highway.

Mr. Harding then inquired as to the possibilities of securing the elimination of the Southern Pacific grade crossing on the Pacific Highway just south of Wilbur. He gave as his understanding that the Commission at one time appropriated \$125,000 for such purpose, but found it necessary to reallocate the funds. He suggested this project for construction in the railroad grade crossing elimination program. He was informed that the railroad grade separation program for 1938 and 1939 federal funds has already been prepared and it was not found possible to include the Wilbur project therein. Furthermore, there is no possible chance now to make any change; however, this project will

be given serious consideration in the formulation of the next grade separation program.

Mr. Harding then asked the Commission to make provision for the reconstruction of the Rice Hill-Turkey Hill Section of the Pacific Highway so as to provide for a standard improvement between the two sections that have already been reconstructed. He was informed by Chairman Cabell that the Commission has this project in mind and that the outlook is favorable for the same if Congress authorizes an appropriation of federal aid moneys for 1940 and 1941.

Mr. Denton G. Burdick, Portland, came before the Commission in regard to a claim of the North Canal Company for right of way that was taken by the state for a revision of The Dalles-California Highway, about two miles south of Redmond, and being more particularly located in the N.W. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ of Section 29, T. 15 S., R. 13 E., W.M., Deschutes County. It appears that this 40-acre tract was unentered Carey Act land when the highway was built and it was not possible to secure title to the right of way at that time; nevertheless the highway was constructed across the property with approval of the State Engineer, with the idea that payment for the right of way would be effected later. Mr. Burdick now claims title as assignee of the earned water lien from the North Canal Company and is asking the State Highway Commission to pay him \$758.50 for the 3.7 acres included in the highway right of way, said amount being made up as follows: 2 acres at \$100 per acre; 1.7 acres at \$5.00 per acre; and \$550 reimbursement as damages for top soil taken for the highway fill, rendering such land valueless from the crop production standpoint. He agreed to assign the water lease on the entire 40 acres to the state for such consideration, provided the state will reconvey it to him should there be in the future a bona fide entry made for the balance of the 40-acre tract outside of the standard width highway right of way. After considerable discussion of this matter, the Commission indicated that the price demanded by Mr. Burdick is reasonable and satisfactory; however, the question arose as to how a transfer of title is to be made. A decision in the matter was therefore deferred until the following day, and the Attorney was instructed in the meantime to make further investigations with regard thereto. This matter was reconsidered by the Commission later in the session at which time the Attorney reported results of such further investigation and recommended the securing of a declaratory judgment in the circuit court to clear title. The Commission approved the recommendation by unanimous vote and authorized the Attorney to pay Mr. Burdick \$758.50 if the court decides that he is entitled to it.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Commissioner Aldrich announced the following award of contracts, sale of buildings, and sale of scrap bridge steel for which bids were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

MAR 24 1938

"Middle Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County. 18.15 miles oil mat surface treatment. The low bid submitted for this project was that of Babler Bros., at \$18,991.00. The next low bid submitted was that of Warren Northwest, Inc., Portland, at \$19,209.00. There were 6 higher bidders. The Commission has awarded the contract to Babler Bros., the low bidder, at their bid price of \$18,991.00.

"Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties. Furnish 9,450 cu. yds. crushed rock in stock piles. R. I. Stuart & Sons, Medford, submitted the low bid for this project at \$22,550.00. Fisher Bros., Oregon City, were the next low bidders at \$23,711.00. There were 2 higher bidders. The Commission has referred all bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Little Nestucca River Bridge Section of the Oregon Coast Highway, in Tillamook County. Construction of a 320-ft. pile trestle and steel I beam bridge. Mountain States Construction Company, Eugene, with its bid of \$13,736.00, was the low bidder on this project. The next low bidder was L. H. Hoffman, Portland, at \$14,525.00. 8 higher bids were received on this project. The Commission has awarded the contract to the Mountain States Construction Company, the low bidder, at its bid price of \$13,736.00."

Buildings in Albany:

"Building No. 5178, formerly owned by Augusta Otto. No bids were received by the Commission for the purchase of this building. The Commission ordered that the building be readvertised.

"Building No. 4978, formerly owned by Gertrude S. Duncan. The Commission received 1 bid for this building, being that of Wm. Eagles, Albany, at \$301.00. The Commission considers this offer satisfactory and has sold the building to Mr. Eagles at his bid of \$301.00.

"Building No. 4967, formerly owned by John Schlehuber. The Commission received 1 bid for this building, being that of Wm. Eagles, Albany, at \$25.00. The Commission has rejected this bid.

"Building No. 4969, formerly owned by J. C. Allphin. No bids were received by the Commission for the purchase of this building. The Commission ordered that the building be readvertised.

"Building No. 4971, formerly owned by C. F. Forney. Charles Childs, Albany, submitted the only bid for this building, at \$151.00. The Commission considers this offer satisfactory and accordingly has sold the building to Mr. Childs for \$151.00.

"Building No. 4957, formerly owned by Barbara Kinney. The only bid received for this building was that submitted by Wm. Eagles, Albany, at \$30.00. The Commission has rejected this offer and has ordered the building readvertised.

"Building No. 4954, formerly owned by A. A. Miller. Wm. Eagles, Albany, submitted the only bid for this building at \$301.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Eagles at his bid of \$301.00."

Buildings in Marshfield:

"Building No. 5105, formerly owned by I. B. Tilson. The Commission received 3 bids for this building, the high one being that of B. C. Grove, North Bend, at \$30.00. G. T. Smith, Bunker Hill, submitted the second high bid at \$26.50. The Commission has rejected all offers for this building and has ordered it readvertised.

"Building No. 5103, formerly owned by M. G. Hoffman. The Commission received 11 bids for this building, the high one being that of George F. Gunnell, Marshfield, at \$102.00. The Commission considers this offer satisfactory and therefore has sold the building to Mr. Gunnell at his bid of \$102.00.

"Building No. 5107-1, formerly owned by H. Emelia Weikel. The Commission received 5 bids for this building. B. C. Grove, North Bend, submitted the high bid at \$60.00. Considering this offer satisfactory, the Commission has sold the building to Mr. Grove at his bid price of \$60.00.

"Building No. 5109, formerly owned by Manilo Camilo. No bids were received for the purchase of this building. The Commission has ordered the building readvertised.

"Building No. 4768, formerly owned by Godfrey A. Quick. The Commission received 6 bids for this building, the high one being that of Irene E. Harrison, Marshfield, at \$32.00. The Commission considers this offer satisfactory and has therefore sold the building to her at \$32.00."

Building in Orient:

"Building formerly owned by Jewel Takaki et al. Sullivan Wrecking Company, Portland, submitted the only bid for this building at \$1.00. The Commission has accepted the offer of \$1.00 and has declared the building sold to the Sullivan Wrecking Company."

Buildings in West Portland:

"Building No. 5046, formerly owned by Wm. Dervoe. The Commission received 2 bids for this building, the high one being that

of Mrs. Bertha Dervoe, Portland, at \$20.00. The Commission has accepted the offer and has sold the building to Mrs. Dervoe at her bid of \$20.00.

"Building No. 4589, formerly owned by John G. Maycock. Only 1 bid was received for the purchase of this building, being that of Sullivan Wrecking Company, Portland, at \$3.00. The Commission has rejected this offer and has ordered the building readvertised."

Scrap Bridge Steel:

"Sale of scrap bridge steel from Sullivan Gulch Overcrossing on Union Avenue, in Portland. The Commission received 6 bids for the purchase of this steel, the high one being that of H. Maizels, Portland, at \$270.60. The Commission considers this offer satisfactory and has sold the material to H. Maizels at his bid price of \$270.60."

Mayor Charles H. Huggins and City Attorney J. W. McInturff, Marshfield, came before the Commission in regard to the improvement of the Oregon Coast Highway between North Bend and Marshfield. They asked the Commission to designate a route for this improvement because the people of Marshfield want to improve and develop their properties but cannot do so until they know just where the highway is going to be located. Furthermore, the city owns property along the proposed route which it wants to dispose of, so it would help a lot if the Commission could adopt a route at the earliest possible time. The Engineer advised that there are two routes under consideration, one of which is along Broadway and the other along Front Street, in Marshfield. The Broadway route, he estimated, would cost about \$384,000 and the Front Street route \$407,000, a difference of about \$23,000 in favor of the Broadway route. He explained that these estimates do not include the cost of right of way; which to date has not been appraised. He was instructed by the Commission to prepare revised estimates, including the cost of right of way, for consideration by the Commission at its next meeting.

The Engineer advised that there is no controversy regarding the location of the highway between North Bend and Marshfield, but the only section about which there is a question is right in Marshfield, south of Greenwood Avenue. He gave as his thought that the reconstruction of the highway through the Bunker Hill district should be given first consideration for monies available for expenditure in the vicinity of Marshfield and North Bend, and that, as a second project, the Commission should reconstruct the highway between North Bend and Marshfield, leaving the controversial section in Marshfield for construction at a later date. Mayor Huggins and Mr. McInturff concurred in the Engineer's viewpoint.

Chairman Cabell advised that the adoption of a route by the Commission would not solve the problem from the Commission's standpoint unless it proceeded with construction soon thereafter, because some future Commission might see fit to change it. He also advised that the Commission does not

have funds available to finance the construction of the same at the present time and cannot spare the money to purchase the right of way because funds available to the Commission now are needed to meet the Government's requirements for the matching of federal aid funds. He gave as his thought that, in view of the circumstances, it would be unfair to handicap the next State Highway Commission by the adoption of a route and the acquisition of right of way until the project is ready for construction.

Concerning the Bunker Hill project, he advised that the Commission has included in its tentative program for 1938 Federal Aid Funds an amount for the construction of this section, but there is a possibility that the budget will have to be changed and such funds re-allocated for improving the dike section between Coquille and Bandon, which has been blocked a number of times this winter by high water. After further discussion the conference was concluded by the Commission instructing the Engineer to submit a revised report at the next meeting on the cost of constructing the alternate routes between Marshfield and North Bend, including the right of way costs. He was also instructed to send a copy of this report to Mayor Huggins.

A delegation from Polk and Benton Counties, headed by County Judge Herman Van Well of Polk County, conferred with the Commission in regard to the Kings Valley Secondary State Highway No. 190. Others in the delegation, which consisted of about 20 members, were W. A. Barnum, H. H. Brant, M. M. Fulmer, Grant Byers, F. B. Scofield, all of Independence; G. A. Nyman, Kings Valley; W. I. Van Den Bosch, R. D. Van Den Bosch, H. J. Leverman, P. M. Ritner, C. L. Calbreath, Ira E. Ray, Mr. and Mrs. Jesse V. Johnson, Mr. and Mrs. Ralph Dodson, Frank W. Loughary, and R. D. Elliott, all of Monmouth; and Fred Gibson of West Salem. They alleged that this road is in very poor condition, is crooked and narrow, that the rock surfacing is worn out, and that some bridges need rebuilding. They urged immediate reconstruction and repairs and the construction of an oiled surface to allay the dust nuisance, which they declare is extremely bad. Mr. Nyman declared that children of the Pedee district are now obliged to go to school in Philomath because the road is in such bad condition that they cannot get to their own school.

Mr. Dodson asked for a survey so that when the Commission has money to spare for this road it can be spent on the proper alignment. He alleged that the road at one time was the main road leading to Newport and Toledo and that it still carries a large volume of coast traffic because it provides a short cut to the coast country from Willamette Valley points. He urged the improvement from such standpoint.

Mr. Ritner gave as his understanding that the Commission has already promised the people of Benton County to improve this road from Wren to Kings Valley and he urged the Commission to extend the improvement into Polk County in view of the fact that it is the only outlet for people in the Lewisville and Pedee districts. He said that it made no difference where a start was made so long as the Commission proceeded with construction on a consistent, progressive program.

Representatives of the Independence and Monmouth Chambers of

MAR 24 1938

Commerce spoke in behalf of the improvement and particularly urged surveys so when funds are available they can be spent on proper alignment.

The Engineer explained, in order to clear up the misunderstanding, that the Highway Commission has not budgeted funds for the improvement of the Benton County section of this road in 1938 but has included in its tentative budget for the fiscal year 1939 Federal Aid Secondary Highway moneys an amount for the improvement of such section.

Chairman Cabell explained the status of the Commission's finances and particularly the requirements for the expenditure of federal aid secondary moneys. He advised that the amount of such funds provided by the Federal Government is so small that it cannot be spread out over the entire state to any advantage but must be spent for fair-sized projects in order to provide for economical construction. He promised to inspect the road in the near future and agreed to study the Commission's finances to ascertain whether or not funds can be spared to pay for a survey at the present time.

Mayor C. R. Ashton, Albany, came before the Commission relative to some state property in Albany described as the North Half of Block 17, Hackleman's Second Addition to Albany, which the city wishes to acquire as a site for a public swimming pool. He said that the city is prepared to pay 7½¢ per square foot for this area, which is the price that the Highway Commission paid for it, although they would naturally like to secure it at less cost, if possible. The Attorney advised that this property was acquired by the state in connection with negotiations with the Southern Pacific Company for right of way for the Albany grade separation project, and, according to the agreement with the railroad company, the state is obligated to deed it to the company at a fixed price, in view of which there is a question whether or not the company will agree to the relinquishment of its claim to the same and will accept other property in lieu thereof. Mayor Ashton stated that the city must know within the next two weeks whether or not it can have the property, because they wish to proceed at once with the construction of their swimming pool so as to make certain that it will be ready for use this summer. After discussion, the Commission agreed to sell the property to the city at 7½¢ per square foot provided the railroad company will relinquish its claim on the same. The Attorney was instructed to take the matter up with the railroad company officials at once and to advise Mayor Ashton of the outcome.

A delegation from Clackamas County, consisting of members of the county court and about 10 residents of the town of Gladstone, was present and urged the Commission to adopt Arlington Street, Gladstone, as the route of a state highway connection between the East Portland-Oregon City Highway and the 82nd Street Highway (Cascade Secondary Highway). The delegation was headed by Mr. Charles Legler and consisted of the following: County Judge W. O. Vaughn; County Commissioners B. Schoenburg and L. L. McFarlane; Messrs. Trahus, Johnson, and Gallogly; Miss Marie Luenburger, Mrs. Patrick, and Mrs. Hahulach. Also present were J. I. Roberts, County Engineer, and Ralph Milen, Assistant County Engineer. Mr. Legler said that Arlington Street is in very bad condition and the city does not have funds available to finance repairs. He alleged that most of the traffic using this street is state highway traffic

MAR 24 1938

and they are of the opinion, in view thereof, that the street should be designated as a state secondary highway and should be maintained as such by the state. Chairman Cabell advised that the Highway Commission is very reluctant to designate any additional secondary highways at the present time and is not in a position today to state definitely just what it will do about the matter because of the effect that it would have on the permanent routing of the 82nd Street Highway, which is now being studied. He agreed to inspect the road soon and stated that the Commission would make its decision at its next meeting. The Engineer was instructed to prepare an estimate of cost to reconstruct Arlington Street to state highway standards and to report the same at such meeting.

A delegation representing the Clackamas Community Club, Clackamas, Oregon, was present in regard to the proposed rerouting of the 82nd Street Highway. Mr. Trahue headed this group. They urged the retention of the highway in its present location between the top of Pope's Hill and Henneman Corner, from the standpoint of providing greater safety for school children. Mr. Trahue said that of the 131 school children who now attend the Clackamas school, only 9 now reside east of the 82nd Street Highway; whereas, if the highway is relocated about 1,000 feet west of its present location, 40 per cent of the children who attend this school will have to cross the highway and be subjected to the dangers of highway traffic. Further, if the highway is relocated farther west, more than one-half of the student body will have to cross the highway. He asked the Commission to give this feature due consideration in its deliberations on this subject. The Commission took the matter under advisement. The delegation asked the opportunity to be heard when the Commission holds its public hearing in Oregon City on the subject of changing the entrance of 82nd Street into Oregon City. In this connection the Secretary presented a letter from the Sunnyside Grange, Sunnyside, Oregon, endorsing the request of the Clackamas Community Club.

Mr. Lee Ragan, Eugene, came before the Commission in regard to acquiring from the Commission two small parcels of state-owned land adjacent to the Oregon Coast Highway near the north end of the Siuslaw Bridge at Florence, being more particularly described as Lot 5, Block 9, and a portion of Lot 65, Block 10, Florence, outside of the standard width highway right of way. He offered to pay 5¢ per square foot for such property, which he said is needed in connection with his plans for the erection of a hotel and eating house on adjacent property. He offered to landscape the area to the satisfaction of the State Highway Commission so that the site would not detract from the bridge head. He exhibited a plan of the building that he proposes to construct. After considerable discussion, the Commission voted unanimously to sell to Mr. Ragan for the sum of 5¢ per square foot the two parcels of land that he wants, subject to the condition that Mr. Ragan will landscape the premises in conformance with plans approved by the Landscape Engineer, Mr. Otten.

Messrs. Lowell Mundorf and A. W. Davis, representing the St. Johns Businessmen's Association, Portland, came before the Commission in regard to the elimination of a bad turn in the state highway route in St. Johns, particularly at the southeast corner of Jersey Street and Philadelphia Street.

They advised that the United States National Bank of Portland, which owns the property at this corner, plans to erect a new bank building thereon, and gave as their thought that the State Highway Commission should arrange now for the improvement of the highway before the plans for the new bank building are too far advanced. They urged the widening of Jersey Street some 20 feet along the south side between Philadelphia Street and Charleston Street, and the cutting off of the bank corner a sufficient amount to eliminate the bad turn at the Philadelphia Street-Jersey Street intersection. They pointed out that this is an important intersection in view of the fact that Philadelphia Street leads to the St. Johns Bridge and that Jersey Street carries a large volume of state highway traffic from Lombard Street and Columbia Boulevard. They presented a map on which was shown in color the plan that they have in mind. In a discussion of this matter the question arose whether or not Jersey Street is the proper location for the highway route. The Engineer pointed out the possibilities of using Ivanhoe Street, one block west of Jersey Street. It was his thought that right of way could be acquired much more cheaply along Ivanhoe Street than along Jersey Street, which is the main business street of this district. Mr. Mundorf pointed out that an extension of Columbia Boulevard to Ivanhoe Street would pass directly through the Pacific Telephone & Telegraph Company's exchange building, which is a concrete structure built for permanency. Chairman Cabell advised that it is reasonable to assume that the Highway Commission would construct this change if someone would furnish the right of way for the same. He gave as his thought that local people should pay a substantial portion of the cost of such right of way and inquired as to what the Commission could expect along that line. Mr. Davis said that he did not believe that local people would contribute funds for such purpose.

After further discussion Chairman Cabell concluded the conference by advising that the Commission would look into this matter from the standpoint of continuing the highway along the present route and also along Ivanhoe Street, although there is no possible chance for construction to be undertaken in the near future. The Engineer was instructed to investigate the project and report thereon at the next meeting. He was also instructed to secure from the city of Portland appraisals of the property along Ivanhoe Street.

A delegation from Oceanlake and vicinity came before the Commission in regard to the removal of rock and sand from the beach area between Oceanlake and Roads End, in Lincoln County. The delegation consisted of the following members, representing two factions, one of which urged the Commission to permit the taking of rock and sand from the beach area, and the other of property owners who opposed the same: Messrs. John D. Williams, Arthur Zerbee, Hendricks, Buntin; Mr. and Mrs. Clarke, Miss Cline, Miss Summerfield; County Commissioner E. G. Calkins, of Lincoln County; former County Judge F. C. Robison; and Mr. Alfred T. Walker, Manager of the Dorchester House at Nelscott. Mr. Williams headed the group in favor of taking the sand and gravel, and Mr. Zerbee headed the group opposed to the same. Mr. Williams stated that the order recently issued by the State Highway Commission prohibiting the taking of sand and gravel from the beach area is interfering greatly with the development of the Oceanlake District, due to the fact that no other source of sand and gravel is available and it is too costly to ship such

materials in from the Willamette Valley, which would be necessary if the use of the beach materials is prohibited. Mr. Zerbee opposed the taking of materials from the beach, particularly boulders, which, he said, are needed in order to protect private property from ocean wave action.

Chairman Cabell pointed out that the State Highway Commission has no jurisdiction above the high-water line and that if the boulders are being taken from locations above the high-water line, the people taking them are trespassing on private property and can be prosecuted by the property owners.

County Commissioner Calkins urged the modification of the Commission's previous order from the standpoint of the county as a whole so that development of this district will not be held up because of inability to secure sand and gravel at reasonable cost.

Mr. Robison endorsed Mr. Calkins' remarks. He also said that, while the group wants the Commission to modify its order to permit the taking of sand and gravel from the beach area, it is not in favor of the application of such modification indiscriminately because they also are opposed to the taking of large rocks from the beach. He suggested that a satisfactory solution of the problem would be to permit the taking of sand and gravel and small rocks that do not exceed five inches in diameter. Mr. Zerbee stated his approval of Mr. Robison's suggestion.

After further discussion, and it appearing to the Commission that Mr. Robison's suggestion met with the approval of the members of both groups, the Commission ordered that the present signs be removed and that there be substituted therefor signs prohibiting the taking from this beach rocks of a size greater than five inches in diameter.

Mr. F. M. Franciscovich, attorney, Astoria, came before the Highway Commission in behalf of Clatsop County log haulers. He asked the Commission to modify its rules and regulations in regard to the procedure for disciplining log haulers who have been arrested for transporting over state highways loads weighing in excess of the statutory weight limits and the tolerance authorized by the Commission. He particularly requested that the arrested operator be given 24 hours within which to voluntarily surrender his P.U.C. plates rather than be required to surrender them at the time of his arrest, as is now the rule. He alleged that violations are not deliberate and that the surrender of the P.U.C. plates at the time of arrest would create an undue hardship on an innocent man and his crew, and it would be much appreciated by these men if they were permitted to continue with their hauling for the balance of the day on which the arrest occurred. After discussion the Commission approved Mr. Franciscovich's request and by unanimous vote adopted, subject to approval by the Department of State Police, the following modified procedure for disciplining such operators for overloading their equipment:

The statute prescribes that no weight exceeding 17,000 pounds shall be loaded on any one axle of a vehicle. When a logging truck is

weighed by a state police officer and it is found that the weight on any axle exceeds the axle limit prescribed by statute or exceeds the temporarily reduced load limit prescribed and posted by the State Highway Commission, the logging truck operator will be arrested by the said officer and shall be subject to the fines and penalties prescribed by law.

If the weight slip shows that the overload on any one axle exceeds 18,500 pounds, which is a tolerance of 1500 pounds over and above the statutory load limit, or exceeds by 1500 pounds the reduced load limit prescribed and posted by the State Highway Commission for the particular section of highway on which the overload occurred, the logging truck operator shall be subject to further discipline by the State Highway Commission. Under such circumstances the arresting officer will request the voluntary surrender of the P.U.C. plates carried on the equipment involved in the overload. Such plates may either be delivered to the arresting officer at the time of the arrest or to the Department of State Police not later than the following day at the state police headquarters designated by the arresting officer.

If the P.U.C. plates are voluntarily surrendered, the officer will retain them for a period of 10 days following the date of delivery of the plates or for such additional length of time as may be fixed by the State Highway Commission. The state police officer shall immediately notify the State Highway Commission of such arrest and shall advise this Commission of the disposition of the P.U.C. plates. In the event that the P.U.C. plates are not delivered to the arresting officer at the time of the arrest or on the following day at the place designated by such officer, then the state police officer shall immediately notify the Secretary of the State Highway Commission to that effect and said Secretary shall request the revocation of the permit of the operator by the Public Utilities Commissioner.

In the event that the overload on any one axle does not exceed the 1500-pound tolerance prescribed by the State Highway Commission, then the arrested party shall not be required or requested to surrender the P.U.C. plates carried on his equipment; provided, however, that such tolerance provision shall not be construed to in any way relieve the arrested party from the penalty fixed by law in the event such arrested party pleads guilty to the charge or is found guilty upon trial.

The Engineer was instructed to discuss the matter with the Superintendent of the Department of State Police and secure his consent thereto before putting the new order into effect.

Mr. W. F. Cary, Gleneden Beach, came before the Commission and inquired as to the Commission's plans for constructing the proposed revision

of the Oregon Coast Highway at Gleneden Beach. He made an urgent plea for the retention of the highway in its present location and alleged that if the highway is constructed on the proposed new alignment it will render his property worthless for the purpose for which he acquired it. He said that he cannot sell his property under present conditions and people who have purchased property from him under contract are canceling their obligations because of the highway change. Chairman Cabell advised that the Commission has given this matter very serious consideration and is handling the situation here the same as it has been handled in every other locality, and that when the Highway Commission rebuilds a highway the work is done on a permanent basis and on an alignment which the Commission considers will never be changed. He explained that the Commission has standards that must be followed in every instance; otherwise, there will be a hodge-podge of highway location which would cost the state large sums of money to correct in the future. He advised that he personally has inspected the proposed location and is satisfied that it is correct, and, in so far as he personally is concerned, the matter is closed. Commissioner Aldrich concurred in the remarks of Chairman Cabell.

Mr. Cary then asked the Commission, if it will not retain the highway in its present location, to construct on the new alignment now so as to permit the people who have bought property from him to develop their properties in accordance therewith. He was informed that the Commission does not have the funds available to finance such work at the present time.

Mr. C. Culver, Marshfield, and Mr. George Jenkins, County Agent of Coos County, came before the Commission in regard to the Commission's plans for the construction of a bridge across a place known as Catching Inlet. They asked the Commission to alter its plans to provide for the construction of a fill and a tidewater gate rather than the bridge so as to improve farm conditions and increase the number of acres available to farmers for cultivation. Mr. Culver stated that they propose to formulate a drainage district to be responsible for the flooding of the lands and the operation of the gates, but before doing so they want to ascertain the attitude of the State Highway Commission with respect to substitution of a fill for the bridge. The Engineer advised that the existing bridge is in very poor condition and must be replaced in the near future; further, that it is proposed to advertise the project for bids to be received in April; so, if a substitution is to be made, quick action is necessary. He estimated the cost of the bridge at \$65,000 and the cost of the fill and tidebox at \$64,000. Chairman Cabell advised that, so far as costs are concerned, the substitution is satisfactory, because the Commission wants to cooperate with local people as much as possible; but there is a question whether or not approval by the United States War Department and Congress can be secured soon enough to avoid complication in the Highway Department's plans. The Engineer suggested that it would be satisfactory to postpone the bridge project for two or three months. After further discussion the Commission decided to defer constructing the bridge construction from April until May. The Commission instructed Bridge Engineer G. S. Paxson and the Attorney, Mr. J. M. Devers, to assist Mr. Culver in securing approval of the various government agencies.

Mr. Tom Tongue, attorney, Hillsboro, came before the Commission in behalf of the claim of his client, Mr. John Prickett, pertaining to a matter of drainage of Mr. Prickett's property adjacent to the Nehalem Secondary Highway about one mile north of Banks, in Washington County. It appears that when the highway was reconstructed at this place the highway grade was constructed in such a manner as to block a drainage channel which for many years has drained Mr. Prickett's property, and Mr. Prickett is now demanding the sum of \$650 as damages, represented by the following items: two 36-foot drainage pipes, \$200; cost of digging the ditch, \$100; miscellaneous damages \$200; reconstruction of 60 rods of fence, \$250. Mr. Tongue said that Mr. Prickett, in order to dispose of this matter, is willing to release the state from further obligation upon payment to him by the state of the sum of \$500 and he will assume responsibility for doing the work, provided the state will set stakes as a guide. After considerable discussion, the Commission accepted Mr. Prickett's offer and ordered that the matter be covered by appropriate agreement.

The Commission adjourned at 5:45 o'clock p. m., to reconvene the following morning in the Benson Hotel.

Portland, Oregon, March 25, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in Room 411, Benson Hotel. Present at such meeting were the following: State Highway Commissioners E. B. Aldrich and F. L. Tou Velle; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; and H. B. Glaisyer, Secretary. Chairman Henry F. Cabell was unable to be present on account of illness.

The Secretary reported the death on September 15, 1935, of former State Highway Commissioner William Hanley, of Burns. The Commission by unanimous vote adopted the following resolution in regard thereto as an expression of sympathy to the bereaved family of the deceased:

WHEREAS, William Hanley died on the fifteenth day of September, 1935; and

WHEREAS, Mr. Hanley served as a member of the Oregon State Highway Commission from August 1, 1931, to February 16, 1932, during which time he made valuable contributions to the development of Oregon's splendid highway system; and

WHEREAS, it is deemed appropriate that this Commission in this modest manner recognize the splendid service rendered and the sage advice given by Mr. Hanley while serving his State as a member of said Commission;

THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission in regular session assembled:

That we recognize and acknowledge with due appreciation

the constructive service performed by Mr. Hanley for the State of Oregon as a member of its Highway Commission, and that we express appreciation of his genial disposition and friendly attitude to all with whom he came in contact.

That this resolution be made a part of the permanent records of this Commission and an engrossed copy thereof be presented to Mrs. William Hanley.

The Commission considered an inquiry from Orville Cox, Florence, Oregon, regarding the purchase of a portion of the north 40 feet of Block 8, Miller's Addition to Florence, outside of the standard width highway right of way, said parcel containing 864 square feet. The Engineer recommended the sale of this property for a minimum consideration of \$50. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration the adoption of a policy with respect to constructing improvements on leased property, with particular reference to the installation of a traffic truck scale on property belonging to P. and Susan Welch adjacent to the Crater Lake Highway, in Jackson County. The Commission decided not to construct improvements on property that is under lease and ordered that such action be considered as a definite policy to be followed hereafter.

The Commission had under consideration the matter of signing a lease agreement with S. H. Shaw and wife for the use of certain property in the Berryvale Addition to Medford, which said property is now being rented from the Shaws on a month to month basis. The Commission decided not to enter into such lease agreement but to continue paying the Shaws rental for their property as in the past until the state's building, which was authorized previously in this meeting, has been constructed.

The Engineer brought up for discussion the matter of maintaining a temporary trestle approach to the Pacific Highway at Harrisburg. He advised that during the construction of the Willamette River bridge at this place in 1925 a portion of the right of way was acquired from the C. L. Morris Estate, and according to the deed the estate granted to the State Highway Commission for a period of one year from August 19, 1925, the right of access to and upon the Morris property for the purpose of constructing a dike or revetment along the bank of the Willamette River. The deed also recites, he said, that "in consideration of the convenience to the State of Oregon for the purposes of highway construction across the grantors' property and the privilege of going in and upon land of the grantors for the purpose of constructing said dike and revetment, the Highway Commission by the acceptance of, does hereby agree to construct, build, and maintain for a period of 10 years a timber trestle approach suitable for vehicular and pedestrian traffic connecting the highway trestle with the premises of the grantors. Said trestle to be maintained for the use and benefit of the grantors, provided that after said lapse of ten years the grantors or their successors in interest shall have the right to maintain said timber trestle approach,

except that portion level with the Willamette River bridge which shall forever be maintained by the state."

The Engineer advised that notwithstanding the reading of the deed, the heirs to the Morris Estate refuse to assume the responsibility for the maintenance of that portion of the trestle off the highway right of way, although the Highway Maintenance Department is maintaining the portion that is located on the highway right of way. He pointed out that it is necessary from time to time to make repairs to the revetment and that the only means of access to the revetment is over the property of the Morris Estate. He requested instructions from the Commission what to do in the matter and recommended that the Commission enter into a new agreement with the Morris Estate providing for maintenance by the state of the entire timber trestle approach bridge, both on and off the highway right of way, in exchange for which the Morris Estate shall grant to the state a permanent easement over its property, allowing the Highway Department access to the revetment and dike, with equipment necessary for repairs. He advised that the heirs to the estate have signified their willingness to grant such an easement over their property. After discussion, and it appearing to the Commission that access to the dike or revetment is an absolute necessity, the Commission approved the Engineer's recommendation by unanimous vote and ordered that the matter be covered by appropriate agreement.

The Attorney brought up for discussion matters pertaining to the Vols condemnation action for the acquisition of an addition to Silver Creek Falls State Park in Marion County. He said that Mr. Vols is unwilling to sell his land for the amount offered by the state, hence it is necessary to proceed with the condemnation; also, that Mr. Vols has two tenants who are occupying the property, one of whom operates a dance hall and the other a beer parlor, but neither of these tenants has been made a party to the lawsuit, so they cannot testify as to their losses in the event the state acquires the property and evicts them. The leases, he said, expire in three years, and, if the state takes title now, it will have to be subject to the leases. He inquired as to the wishes of the Highway Commission in regard thereto. The Commission voted unanimously to proceed with condemnation, notwithstanding the leases, without including the tenants as parties to the suit.

The Commission considered a letter from V. S. Howard, lawyer, Madras, with respect to the construction of a cattle pass under the Warm Springs Highway near Madras. The Commission denied the request, it appearing that the estimated cost of constructing the cattle pass exceeds the appraised value of Mr. Howard's property; it also appearing that no cattle have been grazed on Mr. Howard's property for the past seven years, so there is no apparent need for a cattle pass.

The Commission considered and approved the form of deed whereby the Weyerhaeuser Timber Company proposes to deed to Tillamook County certain timber lands adjacent to the Wilson River Highway, in Tillamook County, it appearing to the Commission that the reservations contained therein are not of sufficient importance to require a modification of the form.

The Engineer reported on the cost to reconstruct a short section of

the Lower Columbia River Highway at a place known as Johnson's Landing south of Scappoose, to effect an improvement of the reverse curves at such location pending reconstruction of the highway on permanent alignment paralleling the railroad and passing through a cemetery. The Engineer suggested that the most practical way to improve these curves temporarily is to construct a short section of guard fence around the outside of the north curve and to widen and oil the shoulders on the east side of the south curve, if the Commission wants to do anything at all. The Commission approved the suggestion by unanimous vote and authorized the Engineer to proceed accordingly.

A letter was presented from Mr. Lacey V. Murrow, Director of Highways of the State of Washington, with respect to the rerouting of the Oregon-Washington Highway, in Umatilla County. Mr. Murrow states that a reconnaissance survey has been made of the several routes for the Washington end of this road and they have adopted the route along College Avenue through College Place and an extension thereof directly south to the Washington-Oregon State line at a point about three-fourths of a mile east of the present highway. The Engineer advised that such location will connect with the proposed relocation of this highway in the State of Oregon which passes about one-half mile east of the town of Freewater. The Commission instructed the Engineer to inform Mr. Murrow that the location that he has adopted for the Washington section meets with the approval of the Oregon State Highway Commission but there is no chance to construct the Oregon portion now because of lack of funds to finance the work; so it would be appreciated if he will defer construction of the Washington portion south of College Place until Oregon is ready to construct the Oregon section. He was also instructed to inform Mr. Murrow that the rerouting of the highway in Oregon will require a public hearing to be held in the town of Freewater and that the Commission considers it inadvisable to hold such hearing until it is ready to proceed with construction.

Major A. E. McKennett, representing the United States War Department, was present and conferred with the Commission in regard to the reconstruction of the Upper Columbia River Highway at Perham Creek and at Warren Creek above the Columbia River backwater caused by the Bonneville Dam. The State Highway Engineer inquired why the Government is willing to pay the State of Oregon only about \$12,000 for reconstructing the highway at Perham Creek and only about \$16,000 for reconstructing the highway at Warren Creek when it is paying to the Oregon-Washington Railroad and Navigation Company the sum of \$1,500,000 for the reconstruction of the railroad. Major McKennett stated that most of the money that is being paid to the railroad company is to defray the cost of constructing riprap as a protection against wave action, wind, tides, et cetera, to which the highway would not be subjected. He stated further that only a short section of the highway has to be reconstructed compared with a very long section of the railroad. It was his thought that on a comparative basis the state is receiving just as favorable consideration as the railroad company.

The question of right of way was also discussed, particularly that needed at Warren Creek, involving the acquisition of land from the railroad company or the encroachment of the highway upon railroad property. In this

regard Major McKennett referred to a letter from F. N. Finch, General Manager of the Oregon-Washington Railroad and Navigation Company, in which Mr. Finch states that the railroad company is ready and willing to let the highway encroach on the railroad property whenever the state is ready to use it. The State Highway Engineer advised that complications have arisen since Mr. Finch's letter was written and it now appears that the highway right of way will not be as easily obtainable as was first thought. After considerable discussion the matter was left to Chairman Cabell with full power to pass on the matter. The Engineer was instructed to work up the details and discuss the matter with Mr. Cabell.

Major McKennett then brought up for discussion the matter of constructing a fill with tide gates across Mill Creek on the Columbia River Highway at The Dalles as a substitute for the existing temporary timber bridge which was built by the state several years ago pending the working up of plans by the United States War Department for its proposed improvement at this point. Major McKennett explained that this fill is needed as soon as possible in order to prevent the flooding of lands by backwater from Bonneville Dam and gave as his thought that now is a good time to have the work done while the Government has a contractor working in that vicinity. He estimated that the fill would take about 5,500 cubic yards of material and pointed out that the fill slopes would have to be riprapped. The riprapping work, he said, would be paid for with government funds but the filling work could not be handled in such manner because the work is not covered in the Government's contract. He estimated that the fill would cost about 50¢ per cubic yard. He also said that the Government would construct and pay for the culvert through this fill to take care of excess water. The State Highway Engineer questioned the concern of the state in this matter, it appearing to him that the flooding of lands is a matter strictly the Government's responsibility. He pointed out that the State Highway Commission is short of funds and must watch expenditures very closely. After considerable discussion the Commission decided to refer the entire matter to Chairman Cabell and the Engineer with full power to act. The Engineer was instructed to make a joint inspection of the premises with Major McKennett and report his findings to Chairman Cabell.

The Engineer reported the results of a reconnaissance survey made by Engineer J. F. Waller on the reconstruction of the Oregon-Washington Highway between Pendleton and the Washington State line, with particular reference to the section between Pendleton and Adams (see report dated October 1936). He pointed out that the present highway is constructed in the Wild Horse Creek Canyon and is subject to overflow during periods of high water. Furthermore, it is very narrow and crooked, whereas the proposed route follows a direct line between Pendleton and Adams through the wheat fields well above water, where it can be built wide and straight. He estimated that to reconstruct the present road would cost about \$175,000 more than to build a new highway on the proposed location, and pointed out that the proposed route would be about six-tenths of a mile shorter than the existing route between common points. He also pointed out that the proposed route would eliminate the grade crossing of the Oregon-Washington Railroad and Navigation Company's tracks at Adams. However, until the highway is reconstructed throughout, it would be necessary for traffic to use the existing grade crossing on a county

road at Adams as a temporary connection between the old and new highways. The question arose whether or not it would be necessary to secure an order from the Public Utilities Commissioner in order to use this grade crossing temporarily. The Attorney was instructed to discuss the matter with the Public Utilities Commissioner and also with the railroad officials. A definite decision in regard to the improvement was deferred pending consultation with Chairman Cabell.

The Engineer reported briefly on the cost to construct the proposed revision of the Pacific Highway West through the town of Tigard along three alternate routes that are under consideration. He estimated that to construct the northwesterly line would cost about \$385,000; the center line would cost about \$342,000; and the southeasterly line about \$301,000; all estimates being inclusive of right of way and including a railroad grade separation structure over the Southern Pacific and Oregon Electric railroad tracks. He expressed his preference for the northwesterly route, which is the most expensive from the standpoint of construction as well as right of way. The Commission deferred action on this matter until the next meeting and instructed the Engineer to secure options in the meantime for right of way on each of the alternate routes for consideration at that time.

The Engineer also reported briefly on the results of a reconnaissance survey for a proposed revision of the Oregon Coast Highway in Coos County, bypassing the town of Coquille. He said that the bypass would save about 7 miles in distance between Marshfield and Bandon but would cost about \$550,000, so could not be constructed in the near future because of shortage of funds. Meantime, he added, something should be done about improving the condition of the low section of the Oregon Coast Highway, known as the dike section, just west of Coquille, which is inundated about every time there is a period of high water; in fact, was closed to traffic four or five times this winter from such cause. He said that a location survey has not been made to determine the cost to raise this section but a rough estimate indicates that it would cost about \$143,000. It was the thought of the Commissioners that something should be done to relieve conditions at this point, whereupon the Engineer was instructed to make a location survey of the section and report his findings, including costs, to the Commission at the next meeting.

The Commission had under consideration communications and petitions from L. M. Lepper, Portland, urging the designation and construction as a state highway of a road connecting The Dalles-California Highway and the Wapinitia Highway, passing through a place known as Wamic. The Engineer gave as his thought that the Commission is not justified in spending any of its funds for the construction of such road at the present time and recommended that the request be denied. The Commission approved the recommendation by unanimous vote and instructed the Engineer to so inform Mr. Lepper.

The Commission had under discussion a report from the Engineer on the advisability of designating as a state secondary highway the county road extending from the Mt. Hood Highway through the towns of Odell and Summit to

a connection with the Hood River Secondary Highway in Hood River County. The Engineer said that the road shows a reasonable solvency but he could not recommend that it be made a secondary highway at this time because there is now being spent annually for maintenance of secondary highways in Hood River County an average of \$7,500, which is about \$3,000 more than the county is entitled to. It was his thought that the present secondary highways in this county should be completed before the Commission adds any more roads to that system. The Commission concurred in the viewpoint of the Engineer and so ordered. The Engineer was instructed to convey such information to the Hood River County Court.

The Engineer also reported on the cost to construct the line change requested by the Tillamook County Court on the Nehalem-Manzanita county road which is now being maintained by the state as a state highway pending construction of the connecting link in the state highway between Manzanita and the Oregon Coast Highway, near Fisher Point. The Engineer advised that highway maintenance crews are about to rebuild two small bridges on the existing road and that the county court wants the Commission to rebuild these on alignment that will eliminate two sharp curves, and in order to secure such improvement the county will furnish the right of way and clear the same and will also provide a power shovel and do the excavation work that is needed and will load the rock for surfacing and oiling, on the condition that the state will provide the trucks to do the hauling work, and will oil the road when the surfacing is completed. He suggested that, if the plan is approved, the trucks could be taken from the Wilson River Highway at such time as the work there is slack. He estimated that it will require three trucks for a period of about ten days, and recommended approval of the project. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion the Engineer's report on the cost to regrade a section of the East Portland-Oregon City Highway in front of Dr. G. H. Huthman's property at Grand Avenue and Brooklyn Street, Portland. The Engineer estimated that such work, exclusive of revising the garages and constructing a toe wall and steps, would cost about \$3,000. Such estimate, he said, is intended merely to cover the work which might be asked of the state if Dr. Huthman's property were cut down to a level with the highway and it were a desire of the state to lower the pavement, curbs, and sidewalk, but it does not include any reconstruction on private property. After discussion the Commission authorized the Engineer by unanimous vote to proceed with such reconstruction work when and if Dr. Huthman has regraded his property, but not before.

The Engineer reported on the cost to acquire right of way for a connection between the Warm Springs Highway and the Ochoco Highway in the city of Prineville, as proposed by County Judge A. R. Bowman of Crook County. He estimated that such right of way would cost about \$32,000, and recommended, in view of the present shortage of funds, which precludes the construction of the project in the near future, that the acquisition of right of way be postponed. The Commission approved the recommendation and instructed the Engineer to so inform Judge Bowman.

The Engineer reported the results of an investigation of the Butler Market Road in Deschutes County which has been proposed by the Deschutes County Court as a substitute for the present route of the Powell Butte Secondary Highway into Bend. He said that the distance to Bend from the junction of the Butler Market Road and the Powell Butte Secondary Highway is about 8 miles by way of the present route and about 7.45 miles by way of the Butler Market Road; in other words, the route by way of the Butler Market Road is 0.55 mile shorter than the present route; however, the present route for about 5 miles is over the Central Oregon Highway, which is oiled, whereas the Butler Market Road is an unimproved road through an irrigated district, has poor alignment and grade, and would be difficult to maintain during the winter because of its exposure to the elements. He pointed out that the change in route would involve abandonment of 3 miles of secondary highway and the designation as a secondary state highway of 7.45 miles of new road. He recommended that the request be denied. The Commission approved the recommendation.

The Commission had under consideration the matter of widening the right of way of the Sunnyside-Umapine Secondary Highway, which the Commission plans to improve as a federal aid secondary highway project. The Engineer advised that the present right of way between Sunnyside and Umapine is only 40 feet wide and there is a question whether or not the Bureau of Public Roads will approve an expenditure of government funds for an improvement on a right of way of such narrow width. This question was answered by Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, who was present. Mr. Lynch stated that, if the state can construct a suitable road improvement on a 40-foot right of way and will assure the Federal Government that can be done, the Government will not require that the right of way be widened.

The Commission considered and ordered filed a report from the American Association of State Highway Officials showing the standing of the various states with respect to the 1938 Federal Aid Funds available for programmed projects. The report revealed that Oregon stands eleventh, with 67.65 per cent of such funds under contract.

The Commission considered a letter from the Attorney dated March 11, 1938, with respect to the Highway Commission's liability for injuries or death caused by rocks falling from the hillside onto a state highway. The Commission ordered the letter filed, action on such matter having been taken at the previous meeting and there being no further action needed at this time.

In this connection the Commission authorized the Engineer to spend approximately \$25,000 of state highway funds for combing the slopes adjacent to the Columbia River Highway at Mosier tunnel and for improvements in the tunnel, which improvements are to include increasing the width and the height of the same. The Commission ordered that such expense be paid from the emergency or contingent fund.

The Commission considered and ordered filed a reconnaissance survey report from the Engineer on the proposed revision of the Lower Columbia River Highway at Mile Post 89 for the elimination of sharp curves in the present

MAR 25 1938

alignment at a place known as Big Creek railroad crossing. (See report of J. F. Waller, Locating Engineer, dated March 1938, for a revision between Mile Post 88.5 and Mile Post 89.5.)

The matter of constructing a nonskid wearing surface on Sherman Avenue in North Bend, Oregon Coast Highway, had the attention of the Commission. The Engineer pointed out that the Commission, at a previous meeting, authorized an expenditure of \$5,000 to finance such work. He requested authority to increase the minor betterment budget for primary highways in such amount. The Commission approved the request by unanimous vote, which raises such budget from \$175,000 to \$180,000.

The Commission by unanimous vote authorized the purchase of the following equipment:

12 new cars of the Ford or Chevrolet type and 8 new pickup trucks of the same type. There are to be traded in as part purchase price for such equipment 12 worn-out cars and 8 worn-out pickup trucks, resulting in a net total cash outlay for the new equipment of \$13,800.00.

2 hoists for installation on 2 new trucks assigned to bridge crews, estimated total cost \$700.00.

2 traffic-actuated traffic signal controls complete with detectors, signal heads, et cetera, for future installation, estimated total cost \$5,400.00 exclusive of installation charge.

1 traffic-actuated signal for installation at the intersection of 82nd and Stark Streets, Portland, estimated total cost installed \$3,200.00. The Commission's approval of this installation was contingent upon the city of Portland paying one-half of the cost thereof.

11 dictograph station boxes to complete the dictograph installation in the Salem offices. This equipment is to be purchased from the Converse Company, Inc., Seattle, for \$3,000.00.

The Attorney brought up for discussion the question of payment of additional damages in connection with the derailment of the Union Pacific Company's train at Oneonta on February 21, 1936, and explained that he had a letter from Mr. Roy F. Shields, attorney for the Union Pacific Company, who stated that there is an opportunity to compromise the case of E. L. Sayres versus the Union Pacific Company for \$1,500. The plaintiff is asking for about \$3,000. This case was pending at the time Mr. Cabell and Mr. Finch agreed upon the compromise settlement on the basis of 50-50 and that settlement was made with the understanding that whatever the railroad company had to pay as a result of the pending case would be disposed of on the same basis. The Attorney was instructed to confer with Mr. Shields with respect to the compromise settlement and then report back to the Commission.

The Commission by unanimous vote authorized the payment of \$350.00 to the American Association of State Highway Officials for the Commission's 1938 dues for membership in such organization.

The Commission by unanimous vote authorized N. M. Finkbinder, Engineer of Materials, to go to Seattle, Washington, to view some special tests that are to be conducted on wood stave pipe culverts in the Forest Products Laboratory at the University of Washington, March 24 and 25, 1938, subject to the condition that Governor Martin will approve the out-of-state travel authorization.

The Commission also by unanimous vote authorized the Office Engineer, S. H. Probert, to attend the meeting of the Committee on Uniform Accounting of the American Association of State Highway Officials which is to be held in Chicago, Illinois, on April 11, 1938. The trip is to be made at state expense provided Governor Martin concurs in the approval.

The Commission also authorized Bridge Engineer Glenn S. Paxson to attend, at state expense, a meeting of the Bridge Committee of the American Association of State Highway Officials which is to be held in Salt Lake City May 2 to 6, 1938.

The Commission considered and denied the request of Mr. B. F. Howard, Shedd, Oregon, that the name of the locality known as Smithfield, in Lane County, be printed on future highway maps, it being considered by the Commission inadvisable to place this name on the map in view of the fact that a controversy exists among the local people as to whether or not the place should be known as Smithfield, some contending for the name Franklin.

The Commission considered the adoption of a policy with respect to the penalty which is being imposed on log haulers who have been arrested four times or more for transporting over state highways loads weighing in excess of the statutory weight limits. The Commission decided upon a penalty of 10 days' suspension of the operator's permit, in so far as it pertains to the particular equipment involved in the arrest, for each violation.

The adoption of a policy with respect to the disposal of logs which have fallen from trucks and have been left on state highway rights of way had the attention of the State Highway Commission. The Commission ordered that hereafter in instances of this kind an attempt should be made to ascertain the owner of the logs, and if the owner can be found, he is to be requested to remove the logs from the highway right of way. If he refuses to do so within a reasonable length of time, then the Public Utilities Commissioner is to be requested to cancel the permit of the offending operator, and the logs then are to be either burned or given to someone who will remove them from the highway right of way, provided the Commission has legal authority to dispose of them in such manner.

The Engineer reported that some of the highways on which reduced load limits have been in effect since the first of the year have now dried out sufficiently to withstand legal weight loads. He submitted a list of

MAR 25 1938

such highways and recommended the lifting of such reduced load limits. The Commission approved the recommendation by unanimous vote and adopted the following resolution in regard thereto:

WHEREAS, on the sixth day of January, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

SIUSLAW HIGHWAY from the junction with the Pacific Highway near Junction City to Florence, in Lane County; and

WHEREAS, on the sixteenth day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highways:

THE DALLES-CALIFORNIA HIGHWAY between Maupin, in Wasco County, and Terrebonne, in Deschutes County;

McKENZIE HIGHWAY between Sisters and Redmond, in Deschutes County;

OCHOCO HIGHWAY between Redmond, in Deschutes County, and a point six miles east of Prineville, in Crook County;

McKENZIE-BEND HIGHWAY from Sisters to the junction with The Dalles-California Highway near Bend, in Deschutes County;

CENTRAL OREGON HIGHWAY between Bend, in Deschutes County, and Burns, in Harney County;

OREGON COAST HIGHWAY from Marshfield, in Coos County, to Port Orford, in Curry County;

FREMONT HIGHWAY between Silver Lake and Lakeview, in Lake County; and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions on the said state highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

(Continued on next page)

STUSLAW HIGHWAY from the junction with the Pacific Highway near Junction City to Florence, in Lane County;

THE DALLES-CALIFORNIA HIGHWAY between Maupin, in Wasco County, and Terrebonne, in Deschutes County;

McKENZIE HIGHWAY between Sisters and Redmond, in Deschutes County;

OCHOCO HIGHWAY between Redmond, in Deschutes County, and Prineville, in Crook County; the reduced load limit from Prineville to a point six miles east thereof remains in full force and effect;

McKENZIE-BEND HIGHWAY from Sisters to the junction with The Dalles-California Highway near Bend, in Deschutes County;

CENTRAL OREGON HIGHWAY between Bend, in Deschutes County, and Burns, in Harney County;

OREGON COAST HIGHWAY from Marshfield, in Coos County, to Port Orford, in Curry County;

FREMONT HIGHWAY between Silver Lake and Lakeview, in Lake County;

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission approved the Engineer's letter directed to the Tillamook Drainage District regarding the proposed relocation of the Oregon Coast Highway just south of Tillamook, wherein the Engineer advised the district that the Commission has no funds available for the reconstruction of this section and there will probably be none until the new route of the Oregon Coast Highway around Neahkahnie Mountain, and the Wilson River Highway, are completed, so it appears that the existing highway will have to be used for some time to come.

The Engineer reported that in accordance with authority previously granted him by the Commission he has awarded several contracts for which bids were received by the Commission on February 17, 1938. He asked the Commission to confirm such awards, which are as follows:

MAR 25 1938

Contract for furnishing crushed rock in stock piles for the Mystic Creek-Brockway Section of the Coos Bay-Roseburg Highway, in Douglas County. Awarded on March 16, 1938, to D. L. Ashton, Lebanon, the low bidder, at his bid price of \$11,571.00.

Contract for furnishing crushed rock in stock pile for the Hood River Rock Production Project on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties. Awarded on March 12, 1938, to Schmeer, Williams & Gentemann, Portland, who submitted the low bid therefor at \$12,467.40.

Contract for construction of the Hill Creek Bridge Section of the Pacific Highway, in Lane County. Awarded on March 3, 1938, to Edlefsen-Weygandt Company, Portland, who submitted the low bid therefor at \$16,137.50.

Contract for the Gold Hill Rock Production Project on the Pacific Highway and Sams Valley Secondary Highway, in Jackson County. Awarded on March 8, 1938, to A. S. Wallace, Roseburg, who submitted the low bid therefor in the amount of \$8,905.00.

The Commission confirmed the award of the above contracts by unanimous vote.

The Commission considered and approved W.P.A. projects as follows:

Grading work on the Wolf Creek Highway east of Sunset Camp to Sunset Tunnel. Estimated total cost, \$389,969; state's share, \$180,480.

Construction of a maintenance patrol building at Forest Grove. Estimated total cost \$8,142.00; state's share \$4,957.00.

A petition signed by 96 residents of Marshfield, Coos River, and vicinity, requesting construction of a bridge over Coos River replacing the Enegren Ferry, had the attention of the Commission. The Engineer estimated that such bridge would cost approximately \$100,000. It was his thought that such expense is not justified, particularly in view of the fact that the state is now maintaining a free ferry at this location, and recommended that the request be denied. The Commission approved the recommendation by unanimous vote.

A letter was presented from Catching Inlet Grange No. 690, Marshfield, requesting the oiling of the Coos River Secondary Highway as far as the Enegren Ferry. The Commission denied the request, there being no funds to finance such improvement, and particularly in view of the fact that the Commission proposes to construct a bridge across Catching Inlet which will take all of the funds that the Commission has to spare for this vicinity.

A letter was presented from Philomath City Council requesting the oiling or paving of the strips between the highway pavement and curb lines on the Corvallis-Newport Highway between "F" Street and "H" Street in Philomath. The Commission denied the request on account of lack of funds. (This project was approved at meeting held on April 14th.)

Consideration was given by the Commission to a petition signed by 59 citizens of the town of Dundee, urging the paving of the Pacific Highway West full width between curbs through their town. The Engineer advised that according to present plans a section of this highway near Dundee is to be reconstructed this year. He recommended that the improvement of the highway through the town of Dundee be included in this contract. The Commission approved the recommendation by unanimous vote and so ordered.

The Commission considered and denied a request from J. W. Ostrander, Gold Beach, for state aid in financing the construction of right of way fences in front of his premises along the Oregon Coast Highway, in Curry County.

A letter was presented from H.B. Thomas, Mayor, Boardman, Oregon, requesting permission to dump garbage in an old state-owned gravel pit located about one-fourth mile west of the town of Boardman. The Commission denied the request.

A letter was presented from George G. Peil, Past President of the Waldport Chamber of Commerce, requesting the support of the Commission in ridding the Oregon Coast Highway of advertising signs and billboards. The Commission indicated approval of the sentiment expressed in the letter, which is in conformity with the Commission's established policy regarding sign matters. The Engineer was instructed to bear this feature in mind in the preparation of a circular letter with respect to the maintenance of signs along state highway rights of way.

The Commission considered and ordered filed a communication from the Neighborhood Community Club, Portland, opposing the construction of the proposed Foothills Boulevard Project in Portland.

A petition bearing 202 signatures of residents of Portland, Mt. Angel, Silverton, and vicinity, was presented, pointing out the beauties of Abiqua Falls, in Marion County, and urging the Commission to construct a road up to these falls so that they may be enjoyed by the general public. The Engineer advised that this road would be approximately 9.3 miles in length, and that to grade, surface, and oil the same and to construct necessary bridges would cost about \$196,000, and that the total annual cost for maintenance, et cetera, would amount to \$18,000. The Commission considered that the time is not propitious to place this road on the state highway system and accordingly denied the request.

The Commission considered and ordered filed a letter from Charles M. Bristol, Portland, urging the reconstruction of the Columbia River Highway (Sandy Boulevard) through Troutdale and westerly thereof, on the present alignment instead of on a new location north of the Union Pacific Railroad tracks and across the bottom lands.

The Commission also considered and ordered filed a resolution from the Klamath County Pomona Grange favoring change in the highway laws so as to give the State Highway Commission police jurisdiction over state highways for the control of speed, et cetera.

A letter was presented from the Pacific Telephone & Telegraph Company, inquiring whether or not the State Highway Commission has any objections to the company constructing a fireproof building on private property situate between the Columbia River Highway and the O.W.R. & N. railroad tracks opposite Ainsworth State Park, about one mile east of Horsetail Falls, in Multnomah County. The Engineer advised that the new location for the highway up the Columbia River is a considerable distance away from the present highway at this point and in his estimation the Highway Department would have no use for the land on which the company proposes to erect its building; further, that the building, in his estimation, will not interfere with the highway activities in the least. In view of the Engineer's report, the Secretary was instructed by the Commission to inform the company that the Highway Commission will not offer any objections to its plans in this regard.

The Commission considered and ordered filed a resolution from the City Council of Gearhart, in which suggestion was made that the Highway Commission acquire ownership to the tidelands and beach within the corporate limits of the city of Gearhart

The Commission considered and referred to the State Parks Superintendent for investigation and report a letter from Oscar Furuset, Portland, suggesting that the state should acquire ownership of a small grove situate adjacent to the Pacific Highway West, a short distance south of the town of Monmouth.

A letter was presented from Mr. William H. Baker, Principal of the Grass Valley Public Schools, Grass Valley, Oregon, requesting permission to collect an occasional wild flower specimen along the state highways in the vicinity of Grass Valley. The Commission referred this matter to the Landscape Engineer for recommendation and authorized the Secretary to issue a permit to Mr. Baker, in the event recommendation is favorable.

The Commission considered and signed a bargain and sale deed conveying unto Sarah E. Mulkey for the sum of \$207.00, 2.25 acres of land in Douglas County.

The Engineer asked the Commission to authorize certain surveys which, in accordance with authority previously given him by the Commission, he has ordered since the last meeting. He presented a list of such surveys. Motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for survey expenditures, are as follows:

Location - 6-2810 - Marshfield-Coquille Sect., Oregon Coast Highway, Coos County.	4th authorization - \$ 1,000.00
Total to date \$18,300.00	
Gravel Pit 10-2813 - Scottsburg-Drain Sect., Umpqua Highway, Douglas County	2nd authorization - \$50.00
Total to date \$250.00	

Prepare Plans - 104-2819 - Jewell-Klaaskanine Summit Sect., Nehalem Secondary Highway. 1st authorization - \$ 2,500.00
 Right of Way - - 21-2812 - Otis-Delake Sect., Oregon Coast Highway. 3rd authorization - - \$500.00
 Total to date \$1,070.00
 Quarry Site - - 121-2823 - M.P. 10 to M.P. 20, Silets Secondary Highway. 1st authorization - - \$400.00
 Quarry Site - - 121-2822 - Norton Summit Section, Eddyville-Blodgett Secondary Highway. 1st authorization - - \$400.00
 Prepare Plans - - 36-2818 - McMinnville Section, Pacific Highway West. 1st authorization - - \$350.00
 Prepare Plans - - 22-2811 - Shedd-Halsey Section, Pacific Highway East. 1st authorization - - \$200.00
 Prepare Plans - - 9-2815 - Oasis at Brothers, Bend-Burns Highway. 2nd authorization - - \$100.00
 Total to date \$800.00
 Recon. Survey - 18-2813 - Chemult-Modoc Point, The Dalles-California Highway. 2nd authorization - - \$225.00
 Total to date \$1,225.00
 Location - - - - 5-2811 - Rainier-Clatskanie Sect., Columbia River Highway. 1st authorization - - - \$50.00
 Relocation - - - 14-2813 - Mitchell Point Section, Columbia River Highway. 1st authorization - - \$2,000.00
 Survey
 Recon. Survey - - 9-2809 - Tumalo Section, McKenzie-Bend Highway. 2nd authorization - - \$150.00
 Total to date \$570.00
 Location - - - - 34-2818 - Multnomah County Line South, Pacific Highway West 2nd authorization - - \$900.00
 Total to date \$2,500.00
 Prepare Plans - - 24-2817 - Salem, Capitol & Summer Streets, Pacific Highway East. 1st authorization - - \$1,000.00
 Prepare Plans - - 227-2810 - Independence-Buena Vista Section, Polk County Road 1st authorization - - \$1,050.00
 Prepare Plans - - 236-2819 - Sheridan and S.E. Yamhill County Road 1st authorization - - \$1,050.00
 Prepare Plans - - 205-2812 - Vernonia-Golf Course, Upper Nehalem County Road. 1st authorization - - \$900.00

MAR 25 1938

Prepare Plans - -114-2809 - Jericho Lane-Odell Junction, Hood River Secondary Highway. 2nd authorization - - \$300.00
 Total to date, \$1,650.00

Location - - - - 18-2824 - Crescent-Diamond Lake Junction and Diamond Lake Junction Sections of The Dalles-California and East Diamond Lake Highways. 1st authorization - - \$400.00

Location - - - - 18-2815 - Crooked Creek-Modoc Point Sect., The Dalles-California Highway. 3rd authorization - - \$7,355.00
 Total to date \$14,630.00

Stock Pile - - - 28-1202 - Dillon-John Day River Sect., Columbia River Hwy. 1st authorization - - \$900.00

Prepare Plans - -231-2813 - North Powder-North Powder River Sect., N. Powder County Road. 1st authorization - - \$720.00

Prepare Plans - -125-2807 - Rhea Creek-Heppner Section, Wasco-Heppner Road. 1st authorization - - \$1,500.00

Prepare Plans - -232-2806 - Enterprise-Joseph Sect., Hurricane Creek County Road. 1st authorization - - \$1,170.00

Revetment - - - - 20-2828 - Harrisburg-Junction City Sect., Pacific Hwy East. 1st authorization - - \$100.00

Prepare Plans - -226-2833 - Thompson and Laidlaw Roads, Multnomah County Roads 1st authorization - - \$600.00

Prepare Plans - -203-2816 - Carver-Redland, Clackamas County Road. 1st authorization - - \$600.00

Location - - - - 226-2830 - Lombard Street-Sandy Blvd. Sect., N.E. Portland Highway. 7th authorization - - \$1,000.00
 Total to date \$7,000.00

1st authorization - - \$250.00

The motion was duly seconded by Commissioner Aldrich and was declared carried.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Orino, Birkensier & Sarnal, Contract No. 1815, for grading, and bridge and tunnel construction on the Arch Cape Tunnel Section of the Oregon Coast Highway, in Clatsop County, requested an additional extension of time, from July 1, 1937, to such date as may be established by the State Highway Department as the completion date for this contract. The Engineer advised that Feb. 28, 1937, was the date of completion specified in the contract, but this was extended to July 1, 1937, without penalty, because of a 60-day delay in securing additional treated tunnel timber and because slower progress was made in driving the tunnel through hazardous and difficult ground than was anticipated. He pointed out that the amount of work completed by the contractor far exceeds the amount anticipated when the contract was awarded, due to the necessity of constructing additional timber lining and the performance of other extra work, such as grouting behind the timbers and the reconstruction of the timbering at the south end of the tunnel. He further advised that the traveling public has not been inconvenienced by the delay in completing the contract within the specified time limit, and recommended, in view of the circumstances, that the extension of time requested be granted to February 5, 1938, the date on which the contract was completed. He submitted a letter from the Bureau of Public

MAR 25 1938

Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Roy L. Houck, Contract No. 1977, for grading the Short Sand Beach Creek Section of the Oregon Coast Highway, in Tillamook County, requested an extension of time from November 30, 1937, to March 2, 1938, within which to complete this project. He attributed his failure to complete the project within the specified time limit to slides and over-breaks, which forced the job into a period of bad weather when it was necessary to close down the operations. He also alleged that because of high-water conditions he encountered extreme difficulty in constructing a large culvert and a channel change at Station No. 372. The Engineer advised that the quantities of materials actually excavated exceed the estimated amounts by 8 per cent and on the basis of such increase the contractor should be allowed an extension of time to December 17, 1937, without penalty. He recommended that the extension of time requested be approved but that the contractor be charged an amount equal to the engineering expense incurred by the state on this job subsequent to December 17, 1937. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Andersen Construction Company, Contract No. 1989, for grading the Miller Flat-Agency Section of the Warm Springs Highway, in Jefferson County, requested an extension of time of 30 days, from November 30 to December 30, 1937, within which to complete this project. They alleged that the progress of the work was handicapped by reason of bad weather conditions. The Engineer advised that there is no particular reason why this job could not have been completed within the time limit specified in the contract; however, the cost of excavation overran the original estimate by about 30 per cent, due principally to the change in classification from common to solid rock, which fact could be considered sufficient justification for an extension of time of 18 days, to December 18, 1937, without penalty, and he so recommended. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Jacobsen-Jensen Company, Contract No. 1992, for grading and paving the Phoenix-Bear Creek Section of the Pacific Highway, in Jackson County, requested an extension of time of 40 days, from December 31, 1937, to February 9, 1938, within which to complete this project. They attributed their failure to complete the contract within the specified time limit to bad weather conditions which interfered with the progress of paving work. The Engineer advised that bids for this project were received by the Commission on June 3, 1937, but the contract was not awarded until June 19, 1937; also, that the contractor did not start operations until July 1. The failure of the contractor to complete the contract within the specified time limit, he said, has increased the state's expense for engineering and has caused

considerable inconvenience to traffic inasmuch as such traffic was compelled, during the latter part of the time that work was in progress, to detour around on a county road, the maintenance of which has cost the state additional expense. He further advised that the contract was completed on February 5, 1938. He recommended that the extension of time from December 31, 1937, to February 5, 1938, be granted, but that the contractor be charged with the extra engineering expense incurred by the state subsequent to January 16, 1938, and that the contractor also be required to reimburse the state for the cost of maintaining the detour after such date. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

Averill & Corbin, Contract No. 2002, for remodeling and widening the bridge over Sullivan Gulch on the East Portland-Oregon City Highway, in Portland, requested an extension of time from March 31 to July 1, 1938, within which to complete this contract. They alleged that they were unable to start this job until October 21, 1937, 70 days after the contract was awarded, due to difficulties in securing insurance that was acceptable to the railroad company over whose tracks the bridge was being constructed. They also alleged that they were required to do a considerable amount of extra work, increasing by six per cent the contract quantities; also, that they were further delayed by reason of bad weather conditions encountered because of the fact that they could not start the job as soon as was anticipated. The Engineer advised that the date of completion specified in the contract is March 31, 1938, but for reasons given by the contractors, which are substantially correct, the work will not be done until about the first of July. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty and submitted a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 1815, 1977, 1983, 1989, 1992, 2013, 2019, 2028, and 2032, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance:

Contract No. 1815, with Orino, Birkemeier & Saremal, for grading, and bridge and tunnel construction on the Arch Cape Tunnel Section of the Oregon Coast Highway, in Clatsop County. Completed February 5, 1938.

MAR 25 1938

Contract No. 1977, with Roy L. Houck, for grading the Short Sand Beach Creek Section of the Oregon Coast Highway, in Tillamook County. Completed March 2, 1938.

Contract No. 1983, with Roy L. Houck, for resurfacing and rock production on the Wilson Ranch-Paradise Creek Section of the Umpqua Highway, in Douglas County. Completed January 5, 1938.

Contract No. 1989, with Andersen Construction Company, for grading the Miller Flat-Agency Section of the Warm Springs Secondary Highway, in Jefferson County. Completed December 18, 1937.

Contract No. 1992, with Jacobsen-Jensen Company, for grading and paving the Phoenix-Bear Creek Section of the Pacific Highway, in Jackson County. Completed February 5, 1938.

Contract No. 2013, with E. H. Itschner, for furnishing crushed rock in stock pile for the Middle Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County. Completed March 9, 1938.

Contract No. 2019, with O. C. Yocom, for furnishing crushed rock in stock pile for the Wallowa-Enterprise Section of the Wallowa Lake Highway, in Wallowa County. Completed January 26, 1938.

Contract No. 2028, with Rogers Construction Company, for furnishing crushed rock in stock pile for the Snake River Slides-Ontario Section of the Old Oregon Trail Highway, in Malheur County. Completed March 1, 1938.

Contract No. 2032, with O. C. Yocom, for surfacing the Gibbs Ranch-Baker Section of the Baker-Unity Highway, in Baker County. Completed March 15, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission adjourned at 12:30 o'clock p. m. to reconvene at 2:00 o'clock p. m. in the same room, with Commissioners E. B. Aldrich and F. L. TouVelle present and participating. Chairman Henry F. Cabell was absent on account of illness. Also present were the State Highway Engineer, the Attorney, and the Secretary.

MAR 25 1938

Mr. Jack Latourette, Attorney, Portland, representing the Security & Investment Company of Oregon City, with whom the Commission is negotiating for right of way for the East Portland-Oregon City Highway, in Oregon City, was present and conferred with the Commission relative to such right of way. He said that the first price that was made to the state for this property, in an amount of \$72,500, was based on the income the company received from the property, but they have since had the property reappraised and are now willing to accept the sum of approximately \$48,000 which he thought was a fair figure in view of the fact that the property contains the only available dock site in Oregon City. The State Highway Engineer pointed out that the average of the appraisals made for the State Highway Commission by competent appraisers was \$17,500, which includes \$2,632.90 for street ends which the Commission believes, from information at hand, are not owned by the company. Mr. Latourette suggested reappraisal of the property, and, if there appears to be a case for condemnation, that the Commission defer the condemnation proceedings until later in the year. No definite action was taken by the Commission on this matter because of the absence of Chairman Cabell. (The matter was discussed with Mr. Cabell at his residence later in the afternoon.)

The Commission adjourned at 3:00 o'clock p. m., to reconvene immediately at Chairman Cabell's residence, all members of the Commission being present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Engineer reported to Chairman Cabell the action taken by Commissioners Aldrich and Tou Velle on matters that were discussed earlier in the day. Chairman Cabell approved the action taken by the other Commissioners on such matters, making the action of the Commission unanimous.

The Commission discussed the matter of borrowing \$750,000 to assist in the financing of highway department activities and to provide funds for the matching of federal aid allotments during the last half of the year 1938 when, it now appears, the Commission's finances will be at a low ebb. The Commission voted unanimously to borrow such sum of money for the six-months' period beginning July 1, 1938, it being intended that it will be paid off on or before January 1, 1939. The Attorney was instructed to prepare an appropriate form of resolution covering the matter for adoption by the Commission at its next regular meeting.

The Commission discussed the matter of acquisition of right of way from the Security and Investment Company of Oregon City. Commissioner Aldrich explained results of the meeting with Mr. Jack Latourette in the Benson Hotel earlier in the afternoon. The Commission authorized Chairman Cabell to secure new appraisers to reappraise this property in the event he deems that advisable. The Commission indicated that it would condemn the right of way if a satisfactory settlement cannot be reached otherwise. However, the Commission ordered that no announcement of its decision should be made public until the condemnation proceedings for the acquisition of the rest of the right of way in Oregon City have been completed.

Reconsideration was given by the Commission to the matter of conducting an experiment of highway illumination on one of the state highways in

MAR 25 1938

the vicinity of Portland. The Engineer recommended that such an experiment be tried out on the Ross Island Bridge-17th Avenue Section of the East Portland-Oregon City Highway, in Portland. He estimated that it would cost about \$8,500 to install the lights on this section, which is 1.297 miles in length, and that it would cost about \$1,170 annually for operation and maintenance. He advised that he has consulted with the city officials of Portland and with the Oregon State Motor Association in regard to this experiment and has secured the approval of both thereto. After some discussion the Commission voted unanimously in favor of the Engineer's recommendation and authorized him to proceed with the project. He was instructed to pay the cost of the installation and upkeep out of the emergency or contingent fund, in view of the fact that no funds have been budgeted for the same.

The Commission discussed the matter of contributing state highway funds to assist in paying the cost of maintaining exhibits at the World's Fairs that are to be held in 1939 in New York and San Francisco. The Commission decided, after careful consideration, that it could not participate in any advertising program at the New York World's Fair except to make available to the Oregon World's Fair Committee a reasonable amount of literature pertaining to Oregon scenic and recreational attractions for distribution at such fair. The Commission also decided that it would make available, out of its tourist promotion funds, \$20,000 during the calendar year 1938 and \$20,000 during the calendar year 1939 for expenditure at the San Francisco Fair, and in addition thereto will supply a reasonable amount of literature of the scenic and recreational features of Oregon and will furnish qualified, experienced personnel for the distribution of such literature and for the dispensation of travel information. It was also decided that the payments by the Commission shall be in the nature of reimbursements to the Fair Committee and that each voucher must be approved by the Commission's Attorney as to the legality of the expenditure. Furthermore, the moneys are to be expended only for the preparation, maintenance, and operation of such exhibits as are approved as to type by the Highway Department's Travel and Information Department and its Advisory Committee, and for a reasonable portion of the ground rental and building expense necessary to house such exhibits. The Commission definitely decided that it would bear no portion of the expense of erection, maintenance, and operation of a theatre proposed by the Fair Committee as one of the Oregon attractions. Furthermore, that state highway funds shall not be expended for any exhibit for which the public is charged admission.

The Engineer reported on the cost to install traffic signals on state highway routes within municipalities, as requested by the Commission at the previous meeting when the Commission had under consideration the matter of cooperating with the cities on a 50-50 basis in the cost of such installations. The Engineer estimated that the signals needed immediately in cities and towns outside of Portland would cost about \$41,300, installed, of which amount the state's share on a 50-50 basis would be \$22,800, considering that the overhead flashing beacons would be paid for 100 per cent by the state. He estimated that possible future installations in cities and towns outside of Portland would cost a total of \$84,200, of which the state's share would amount to \$43,100. The cost to install such signals within Portland he estimated at \$43,700, and the state's share of such expense at \$22,850. After discussion and it appearing to the Commission that it would be advisable to

cooperate with the various cities and towns in such installations on state highway routes, the Commission voted unanimously to contribute 50 per cent of the cost of the same when and if the cities and towns signify a desire to have the signals installed and a willingness to contribute the remaining funds.

The Commission had under consideration the issuance of instructions to field engineers with respect to the removal of signs and billboards that have been erected illegally upon or adjacent to state highway rights of way. The Engineer presented a letter directed to all division engineers and district maintenance superintendents (see letter dated April 1, 1938, circular letter No. 47), which letter the Commission approved by unanimous vote.

In this connection the question arose of paying the cost of removing such illegal signs in the event the owners thereof refuse to do so. The Commission authorized the payment of such costs with state funds.

The Commission discussed Linn County's indebtedness to the state for construction of the South Santiam Highway, in Linn County. The Commission indicated a willingness to discount this claim a reasonable amount and to settle with the county on the same basis as it has settled its claims against other counties. However, before taking definite action in this regard, the Commission expressed a desire for information from Mr. Leslie M. Scott, former Chairman of the State Highway Commission, as to his recollection of any understanding with the Linn County Court that the county would be relieved of any further cooperation in the cost of constructing this road when it was placed on the federal aid highway system. The Engineer was instructed to contact Mr. Scott relative thereto.

The Engineer reported the completion of the contract for the construction of the Bear Creek-Talent Section of the Pacific Highway, in Jackson County, on new alignment, and recommended that the old highway between Bear Creek and Talent be abandoned as a state highway route and turned back to Jackson County for maintenance. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto upon motion of Commissioner Tou Velle, which was duly seconded by Commissioner Aldrich:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Bear Creek-Talent Section of the Pacific Highway in Jackson County; and

WHEREAS, by reason of said relocation and the reconstruction of said section of highway there was eliminated and made unnecessary as a part of the completed highway a certain section, which is more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a

part of the Pacific Highway, and therefore as a part of the state highway system, the fragment or portion of right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of the Pacific Highway as formerly located between the said termini and as heretofore improved and used:
and

WHEREAS, in connection with the relocation of said highway there was accomplished a change in the point of entrance of the highway into the City of Talent from the south and there was likewise accomplished a rerouting of state highway traffic within the City of Talent;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment was formerly within the limits of the right of way of the Pacific Highway but which is now without the limits of the right of way as said highway has been relocated and constructed, be and said fragment of land is abandoned as a part of the right of way of said highway, and that part of said right of way so abandoned and which is outside of the corporate limits of the City of Talent is left to revert to the adjoining or abutting property owners or to the control or supervision of the County Court of Jackson County for highway and/or other public purposes, and that portion of the abandoned right of way lying inside the corporate limits of the City of Talent over which highway traffic was formerly routed before said highway was relocated is hereby abandoned as a route over which state highway traffic is directed by the State Highway Commission to move and said route hereby is relieved of any burden imposed thereon by the State Highway Commission and is left to revert to the exclusive control and jurisdiction of the municipal authorities of the City of Talent.

2. The fragment of land or right of way hereby abandoned and eliminated from the state highway system, including the route over which highway traffic formerly was routed through the City of Talent, is described as follows, to wit:

All that certain section of the old right of way of the Bear Creek-Talent Section of the Pacific Highway and lying on the westerly side of the right of way required for the reconstructed Pacific Highway and lying between Mile Post 317 and 321 of said highway. The section is outlined in red on the accompanying map, the beginning and ending points with reference to engineer's stations of the original constructed highway being Station 95+00 on the southerly end and Station 230+00 on the northerly end.

In addition to the foregoing description of said abandoned right of way there is attached hereto a print or map, marked "Exhibit 'A'", and by this reference made a part hereof, upon which map there is shown shaded in red the abandoned section of said highway, which exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bears date of March 1, 1938. *

3. In the event there remains any physical connection between any portion of the said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned section, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said exhibit, and a copy of said resolution, together with said exhibit, shall be delivered to the Mayor of the City of Talent for such action as said County Court may desire to take with respect to said fragment of land and for such action as the City of Talent may desire to take with respect to said portion of the abandoned section lying within the corporate limits of said City, and should said abandoned portion of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County and/or the municipal authorities of the City of Talent, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

The Commission also by unanimous vote adopted the following resolution abandoning a certain portion of the Nelson-Malheur County Line Section of the Old Oregon Trail and retaining certain other portions of said section, which highway has been reconstructed on new alignment at such location:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Highway Commission found it necessary to relocate portions of the Old Oregon Trail in Baker County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the

* Map filed in Right of Way Abandonment and Retention File - No. 56.

MAR 25 1938

main travelled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on a blueprint, marked "Exhibit 'A'", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while certain portions of the eliminated sections are not required for use as parts of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in red on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission its purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main travelled portion of said highway, which sections are made unnecessary as a part of the completed highway and are shown in yellow on the attached print;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the parcels of land shown shaded in red on the attached print which heretofore were within the right of way proper of the Old Oregon Trail but which by reason of the relocation or realignment of said highway are now without the area improved and used by the traveling public, but are adjacent to and abut upon the said right of way and are needed for public use, shall be preserved by the Highway Commission in connection with the construction, improvement and maintenance of said highway or the use of the same, which said parcels are described as follows:

All those certain sections of the old right of way of the Nelson-Malheur County Line Section of the Old Oregon Trail and lying on the easterly and westerly sides of the right of way required for the reconstructed Old Oregon Trail between Mile Post 365 and 390 of said highway. The sections are outlined in red on the accompanying map; the beginning and ending point with reference to the engineer's stations of the original constructed highway are as follows:

Station 1468+00 to 1504+00, on the easterly side of reconstructed line									
"	1537+00	"	1543+00,	"	"	"	"	"	"
"	1637+00	"	1647+00,	"	"	"	"	"	"
"	1648+20	"	1655+20,	"	"	westerly	"	"	"

2. That the fragments of land confined within the areas hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Old Oregon Trail, be and said fragments of land are abandoned as parts of the right of way of said highway and said fragments of right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Baker County. The fragments to be abandoned are described as follows:

All those certain sections of the old right of way of the Nelson-Malheur County Line Section of the Old Oregon Trail Highway lying on the easterly and westerly sides of the right of way required for the reconstructed Old Oregon Trail lying between Mile Post 365 and Mile Post 390 of said highway. The sections are outlined in yellow on the accompanying map, the beginning and ending points with reference to the engineer's stations of the original constructed highway are as follows:

Station 1370+50 to 1421+00, on the easterly side of reconstructed line									
"	1580+70	"	1627+00,	"	"	"	"	"	"
"	1691+50	"	1704+30,	"	"	"	"	"	"

"	358+70	" 370+50,	"	"	easterly	"	"
"	455+20	" 478+50,	"	"	"	"	"

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a blueprint marked "Exhibit 'A'", which by this reference is made a part hereof, and upon which map there is shown shaded in red the parcels of land to be preserved for public purposes, and upon which map there is shown shaded in yellow the abandoned sections of said right of way. Said exhibit for identification purposes bears the signatures of W. C. Williams, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bears date of March 1, 1938.*

4. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned sections, then the State Highway Engineer hereby is authorized and directed to erect such barricades or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

5. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Baker County, together with a copy of said exhibit for such action as the County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Old Oregon Trail be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Baker County and beyond any responsibility or supervision by the State Highway Commission.

6. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained for right of way and other purposes by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

The Secretary presented a resolution from the Umatilla County Court requesting that the Pendleton-Stanfield Section of the Old Oregon Trail (old route) be designated as a state secondary highway and be maintained as such.

* Map filed in Right of Way Abandonment and Retention File - NO. 57.

The Commission considered that such request is in conformance with previous understanding and agreement with the County Court, whereupon the request was approved. The following resolution relative thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Umatilla County Court of the State of Oregon, has selected the highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following named highway, route, or location of a highway in Umatilla County be and the said highway, location or route hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Stanfield-Pendleton Secondary Highway No. 337, described as follows:

Beginning at the junction of the reconstructed Old Oregon Trail Highway with the former route of the Old Oregon Trail Highway at a point approximately 1 mile east of Stanfield; thence in a southeasterly direction via the route formerly used as a part of the Old Oregon Trail Highway to the city limits of Pendleton, a distance of approximately 24.5 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The Commission set Thursday and Friday, April 28 and 29, 1938, as the date for its next regular meeting for the receiving of bids on highway construction projects. The Secretary was instructed to make the usual arrangements to hold such meeting in the Auditorium of the Public Service Building, Portland.

MAR 25 1938

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 o'clock p. m.

Salem, Oregon, April 14, 1938

The State Highway Commission met in special session at 11:00 o'clock a. m. in the office of the State Highway Engineer, Room 325 State Office Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such parcels, and prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

APR 14 1938

The Attorney brought up for discussion matters pertaining to the controversy with the Security & Investment Company of Oregon City relative to right of way needed for the East Portland-Oregon City Highway in Oregon City, and particularly the request of Mr. Jack Latourette, company attorney, who has asked for another appraisal of the company's property by an independent group of appraisers. After considerable discussion the Commission approved the request and instructed the Attorney to arrange for three competent men to make such appraisal, and to have them report to Chairman Cabell for instructions.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 1:45 o'clock p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Mr. Philip Chipman, attorney, Portland, came before the Commission in behalf of the Evans Products Company, Marshfield, who have a contract with N. B. Marsh, Marshfield, for delivery of logs to its plant. It appears that Mr. Marsh has a number of trucks engaged in log hauling in this vicinity and that the drivers have been arrested numerous times for transporting loads weighing in excess of the statutory weight limits and the reduced weight limits ordered by the Highway Commission; that two of his trucks are still on the suspended list, and, according to the rules and regulations of the State Highway Commission, cannot be reinstated in service until May and June, one of them having been overloaded three times and the other four times. Mr. Chipman advised that the Evans Products Company is extremely anxious to secure more material for its plant and will be very grateful if the Highway Commission will reduce the penalty heretofore imposed and allow Mr. Marsh to resume operations with all of his trucks at once. Chairman Cabell advised that the Commission has endeavored in numerous ways to secure the cooperation of the log haulers in the matter of loads, so as to preserve the highways as much as possible; but some of the log haulers pay no attention whatsoever to the Commission's requests, and it has been found that the only effective means to curb the transporting of overloads is by suspending the operation of the equipment involved. He added that, if the Commission modified the penalty imposed on Mr. Marsh in this particular instance, it would have to extend the modification to include other operators who are in the same predicament, otherwise the Commission would be placed in an embarrassing position, for which reason the Commission must deny the request. Commissioners Aldrich and Tou Velle concurred.

At 2:00 o'clock p. m. the Commission conferred with Dr. E. C. Dalton, St. Helens, and Robert W. Sawyer, Bend, members of the State Capitol Reconstruction Commission, in regard to the reconstruction of the Summer Street approach to the new state capitol building in Salem. Alton John Bassett, Secretary of this Commission, was also present. Dr. Dalton presented a certified copy of an excerpt from the minutes of the meeting of the State Capitol Reconstruction Commission held on April 11, 1938, relative to this matter, which resolution reads as follows:

WHEREAS, the landscaping scheme heretofore, adopted by the State Capitol Reconstruction Commission set forth on plot plan

APR 14 1938

"A" approved by the Commission on April 4, 1938, includes two 50 ft. wide streets between Court and Chemeketa Streets and certain sidewalks, curbs, grading and so forth; and

WHEREAS, the State Capitol Reconstruction Commission has requested an opinion from the Attorney General, on the law governing the method to be employed by the Capitol Commission in transferring title and dedicating that portion of land adjacent to Court Street, essential to the proposed widening of Court Street; and

WHEREAS, the State Capitol Reconstruction Commission adopts all of the conditions contained in a letter from the W. H. Lynch, District Engineer, from which letter the following paragraph is quoted:

"Providing the State will dedicate as a city street the areas outside the limits of Court Street (shown on the map in orange), and providing all-day parking is also prohibited in these areas, then the improvement is eligible for Federal participation. This, of course, is predicated on the assumption that their improvement is necessary to relieve congestion on Court Street."

WHEREAS, the Highway Commission has estimated the cost of this work at Fourteen thousand seven hundred (\$14,700.00) Dollars.

NOW, THEREFORE, BE IT RESOLVED, the State Capitol Reconstruction Commission does, hereby, appropriate and budget the sum of Fifteen thousand (\$15,000.00) Dollars for the above described work, and does hereby, request the State Highway Commission's co-operation when they invite bids on the work they have undertaken in widening Court Street to the end that the bids on the Summer Street project can be combined with the Court Street project in order to secure the lowest possible bids.

He said that the State Capitol Reconstruction Commission has appropriated \$15,000 of its funds to finance this work.

The State Highway Engineer advised that he has not as yet had an opportunity to study the estimate of the project and requested an opportunity to do so before the Highway Commission makes any commitments in regard thereto.

Dr. Dalton then presented a map disclosing the plan of the Capitol Reconstruction Commission with respect to such improvement and pointed out that it would require the widening of Court Street between Capitol Street and Winter Street, the vacation of Summer Street from Court Street to Chemeketa Street, and the dedication of two streets 50 feet wide to take the place of Summer Street between Court and Chemeketa Streets.

The Engineer advised that the Highway Commission has budgeted \$25,000 of federal aid funds to finance the improvement of Court Street between

APR 14 1938

Capitol Street and Winter Street but that this Commission would require the vacation of the existing Summer Street and the dedication of the other two streets before proceeding with construction. Furthermore, the Commission would require that the City of Salem reconstruct its sewer and waterpipe line and other facilities on this street before commencing the highway improvement so as to eliminate the necessity of cutting up the pavement after the highway work is completed.

Mr. Sawyer gave as his thought that it would be proper for the State Board of Control and the Salem City Council to act on such matters and advised that the City of Salem has already agreed to reconstruct its facilities that are involved. He also stated that the State Capitol Reconstruction Commission would arrange for the circulation of petitions as may be required to secure the vacation of Summer Street and the dedication of the other two streets and such other petitions as may be required to secure the reconstruction of the underground facilities of the city. He doubted that the procedure could be completed by the time that the Highway Commission would want to award its contract for the highway work in June, but suggested that bids be taken nevertheless and that the award of the contract be held pending a satisfactory conclusion of the other details. He requested the services of the Highway Commission's Attorney in preparing the petitions and the other proceedings that may be necessary, in view of the fact that the Assistant Attorney General, assigned to the Capitol Reconstruction Commission, is now in the East. He pointed out that immediate action is necessary so that the matter can come before the Salem City Council at its next meeting on Monday evening, April 18. The Highway Commission granted the request by unanimous vote.

In a further discussion of this matter it was agreed that the State Capitol Reconstruction Commission would prepare its plans for its portion of the project, would secure the right of way, and would advertise its project for bids to be received at the same time that the Highway Commission receives the bids for the construction of its portion of the project, and that the bids for both projects would be considered and contracts awarded at the same time so that the work on both can proceed simultaneously.

A letter was presented from County Judge C. E. Lyon, Deschutes County, urging that Deschutes County be listed among the first nine of the counties which are to receive benefits from the federal aid secondary highway funds. The Commission ordered that a reply to this letter be withheld until such time as the circular which the Commission proposes to send to each of the county courts relative to federal aid secondary highway matters has been prepared and approved. The Engineer was instructed to prepare such circular letter for the approval and signature of Chairman Cabell.

A petition was presented signed by 53 businessmen of Philomath protesting the "deplorable condition" of the Corvallis-Newport Highway in their town and urging the Commission to oil or pave the same the full width between curbs for at least two or three blocks in the main business section. The Engineer advised that such improvement would cost about \$2000, including the installation of drainage pipe and catch basins. He recommended approval of the

APR 14 1938

project and that it be financed with emergency funds. The Commission approved the recommendation by unanimous vote.

A letter was presented from Tillamook County Court urging the reconstruction of a bridge on the Oregon Coast Highway at the East Beaver cheese factory (Mile Post 89.53) between Hemlock and Beaver. They allege that the bridge is extremely narrow and in its present condition creates a major traffic hazard, and urged the improvement from the safety standpoint. The Engineer advised that there is no question as to the need to provide a better bridge at this location but there are many places throughout the state where worse conditions exist and the question is which one should be given first consideration. He pointed out that the bridge under discussion is not in a permanent location but is located on a section of the highway that eventually will be realigned; but this cannot be undertaken now because of the cost involved. In view of the Engineer's report the Commission voted unanimously to deny the request for the time being. The Secretary was instructed to inform the county court that the Commission regrets it does not have requisite funds to do the project now, but will bear it in mind for future consideration when its finances improve. The Engineer was authorized to make a location survey of the project at his convenience.

A petition signed by 49 property owners residing along the Wheatland-Bellevue Market Road between Howard Stephen's corner and Briedwell Station, in Yamhill County, in which the Commission is urged to make provision for the oiling of this section this year so as to alleviate the dust nuisance caused by traffic, was presented. The petition was accompanied by a statement signed by a committee of six members who discussed this matter with the State Highway Engineer in his office on April 6, in which numerous arguments were made in support of the petition. The Secretary was instructed by the Commission to inform the committee that the status of the Commission's finances will not permit it to undertake this project this year and that the funds now available to the Commission are obligated up to the limit, but the Commission will be glad to keep this project in mind for consideration when it has funds available to apply on a project of this kind.

A letter was presented from C. H. Purcell, California State Highway Engineer, advising that the plan proposed by the Oregon State Highway Commission for a connection of the Oregon and California Sections of the Pacific Highway at the state line meets with his approval and advising further that this connection will be recommended to the California Highway Commission for a commitment of funds to be expended for construction during the coming biennium (July 1, 1939, to June 30, 1941). The Commission authorized and instructed the Engineer to have this matter covered by appropriate agreement between the two commissions.

A letter was presented from Mr. Ed W. Miller, General Manager of the Oregon Coast Highway Association, inviting the members of the State Highway Commission and the Commission's staff to attend the semi-annual meeting of the Oregon Coast Highway Association, which is to be held in Reedsport on April 24 and 25, 1938, particularly the semi-annual banquet on Monday evening, April 25. The members of the Commission expressed regrets that other

APR 14 1938

engagements would not permit them to be present at such meeting. The Commission delegated Mr. R. H. Baldock, State Highway Engineer, and Mr. C. B. McGullough, Assistant State Highway Engineer, as its representatives.

The Secretary presented a letter from Mr. F. D. Mayer, City Attorney, Lebanon, Oregon, inquiring whether or not the Highway Commission has rules and regulations which would prevent the city from granting a permit authorizing a sign to be erected over the Santiam Highway within the city limits of Lebanon. He was instructed to inform Mr. Mayer that there is a question as to the authority of the Commission to control overhead signs on highway rights of way within the corporate limits of cities and towns and in view thereof the Commission hesitates to pass on the matter; although, if there were no question as to the Commission's authority, the Commission would deny the request the same as if the sign were to be erected over the highway outside of the city. He was also instructed to advise Mr. Mayer that the Commission feels that the party granting the permit for such sign would be liable for damages in the event the sign fell, causing injury to persons or damage to property, and if the City of Lebanon grants the permit in the present instance it would have to assume such responsibility and liability.

A letter was presented from Coos River Grange No. 701, Marshfield, requesting the oiling of the Coos River Secondary Highway from Eastside to the Enegren Ferry, a distance of 4.64 miles. The Engineer advised that this road carries from 250 to 300 cars daily, and that a new rock surface would have to be constructed before it could be oiled with any degree of success. He added that the only type of oiling that could be done on the road without constructing a new rock surface is a dust palliative costing approximately \$600 per mile, which would have to be repeated each year. The Commission considered that its first obligation on secondary highway improvements in Coos County is to complete the Cape Arago Secondary Highway to Charleston, which would preclude the oiling of the Coos River Secondary Highway because there is insufficient money to finance both jobs. The Secretary was instructed to so inform the Grange.

The Commission considered and denied the request of the Columbia County Court for a modification of the penalty imposed by the Commission on log haulers who have been arrested for transporting over state highways loads weighing in excess of the statutory weight limits and the tolerance heretofore authorized by the Commission. The Secretary was instructed to inform the Court that the Highway Commission is not responsible for the enactment of laws of this state, such function resting with the state legislature, and that the 1500-pound tolerance authorized by the Commission was simply ordered so as to give the operators a little leeway, which appeared necessary on account of the difference in weight of logs of the same size. Further, that the penalty imposed on log haulers for overloading their equipment was ordered simply to protect the road surface, experience having shown that other means of regulating loads are ineffective.

The Commission considered and ordered filed a copy of a letter from The Metropolitan Association, Inc., Portland, to its members, relative to the expenditure of state highway funds in Multnomah County and the city of Portland, said letter being dated March 30, 1938.

APR 14 1938

The Commission also considered and denied a request from Mr. S. M. Absten, Hood River, for the widening of certain places along the Columbia River Highway to facilitate the loading and unloading of school buses, there being no funds available to finance such work at the present time.

The Engineer reported an inquiry from Mr. D. A. Morand, Portland, as to whether or not the State Highway Commission will grant him permission to remove a portion of the handrail on the west side of the Union Avenue viaduct, Portland, for a distance of about 50 feet south of Stephens Street so as to permit construction of a driveway and an approach to the highway from property which he proposes to purchase at such location. The Attorney advised that the property in which Mr. Morand is interested is described as Lot 7 of Block 45, Stephens Addition to Portland, and that on June 22, 1937, an agreement was made providing for payment to the owner of the same an amount of \$5,300 for damages to the property by reason of the change in grade of the street, necessitated by the highway improvement, but such agreement does not contain any clause as to future restrictions of access thereto. Bridge Engineer G. S. Paxson advised that the highway at the point under discussion consists of an earth and gravel fill and a concrete pavement between retaining walls, and that the retaining walls were designed to permit trucks to pass over them at any point; so, from that standpoint, it would be all right to let Mr. Morand cut through the handrail and construct any driveway that he wishes. He further advised that the roadway in front of the property is 62 feet wide and provides a parking lane on each side of a four-lane highway. He gave as his thought, in view of the circumstances, that the Commission could not refuse access to the abutting property at this location any more than it could prevent anyone from constructing an entrance to the highway at any other point on Union Avenue. After further discussion and in view of the reports of the Attorney and the Bridge Engineer, the Commission authorized the granting of a permit to Mr. Morand to remove a section of the handrail as he requests, providing there are no legal barriers to the same. The matter was referred to the Engineer to inform Mr. Morand.

A letter was presented from Mr. J. W. Jackson, State Forester, requesting permission to construct on the right of way of the Wilson River Highway a permanent guard cabin unit, consisting of a three-room guard cabin, three-car garage and tool house, woodshed, sewage disposal system, water system and facilities, outdoor fireplaces, et cetera, for the accommodation and concentration of campers; the adjacent area to be landscaped. The matter was referred to the State Parks Superintendent for investigation and recommendation.

A letter was presented from T. R. Maxwell, Enterprise, Oregon, requesting a 30-day extension of time within which to pay the current installment of \$150 on his obligation to the state for the purchase of a state-owned building in Enterprise. The Attorney advised that this building was sold to Mr. Maxwell for \$1,800 and that he paid \$200 as the initial payment and, according to agreement, was to pay \$150 each quarter thereafter, beginning December 1, 1937. He further advised that the December 1 payment was promptly remitted but Mr. Maxwell failed to make the March 1 payment because he alleges that he is short of ready funds and accordingly has asked additional

time within which to meet this obligation. He requested instructions. After discussion the Commission voted unanimously to extend for 30 days the time for the payment of the March 1 remittance, with the understanding that the granting of this extension shall not operate or be construed as a waiver by the State Highway Commission in the making of future payments in accordance with the agreement nor shall it operate as a waiver of any rights of any nature whatsoever in connection with future defaults by Mr. Maxwell.

The Attorney reported the results of negotiations for right of way for the Salem-Dayton Secondary Highway across the property of Mrs. Lorah O. Spaulding, being right of way No. R-3974. He said that the Commission is taking 6.85 acres of land from Mrs. Spaulding, on which he places a value of \$2,500, but Mrs. Spaulding is demanding \$3,500 for the same, although there is a possibility that she will reduce her price to \$3,000 if the Highway Commission will construct a roadway from her ranch home to the new highway. The Commission considered the price exorbitant and instructed the Attorney to negotiate further with Mrs. Spaulding, and, if he cannot secure a satisfactory settlement, to acquire the property by condemnation.

The Commission discussed with the State Highway Engineer, the Landscape Engineer, and the Attorney matters pertaining to the acquisition of right of way for the proposed traffic separation structure at the intersection of Denver and Union Avenues, Portland, involving rearrangement of the golf facilities of the Peninsula Golf Course. The Attorney estimated the right of way alone would cost about \$20,000 and that it would cost about \$10,000 additional to rearrange the golf course, and \$10,000 more to move the golf clubhouse, or a total of approximately \$40,000. In the discussion of this matter it was pointed out that no particular consideration has been given to the acquisition of two or three additional parcels of land which may be of vital importance in the event that the Commission approves construction of the proposed project. Accordingly, the Commission deferred action on the matter until the next meeting on April 28. The Attorney was instructed to render a complete report at that time on the cost to purchase right of way, including the two or three extra parcels not heretofore considered, and to rearrange the golf course facilities.

The Engineer submitted a report prepared by the Attorney on the cost to acquire right of way for a revision of the Oregon Coast Highway through the town of Bandon, in Coos County. He estimated that such right of way 100 feet in width would cost about \$31,500, and that right of way 130 feet wide, which would be in accordance with the boulevard plan of the State Planning Board, would cost \$44,075. The Attorney explained that such estimates cover a section about 2 miles long through this town. The Engineer questioned the necessity of acquiring more right of way than is actually needed for the first project that the Commission proposes to construct and accordingly recommended that the purchase be limited to the right of way required between highway engineer's stations 31+00 and 65+00. He further recommended that the width of the right of way be limited to 80 feet along this section and that the city of Bandon be requested to establish a 20-foot setback line on each side of the street beyond the limits of the proposed construction where a 60-foot right of way now obtains. The Commission approved the recommendation unanimously and instructed

APR 14 1938

the Attorney to render an amended report on such basis for consideration by the Commission at its next meeting.

The Attorney brought up for discussion the matter of renewing the lease of E. N. Boylen, Pendleton, who has occupied state-owned property known as "Sunset Inn" adjacent to the Old Oregon Trail, in Umatilla County, since July 1, 1932, under agreement with the Commission whereby he was supposed to pay to the Commission \$250 for the full term of the lease, which ran for a period of 5 years and terminated on July 1, 1937. He further advised that Mr. Boylen has paid a total of \$225 but has consistently neglected and refused to pay the balance due although it has been called to his attention a number of times, and as the matter now stands Mr. Boylen owes the state \$25 on the original rental agreement and an additional \$50 for the period from July 1, 1937, to July 1, 1938, if he is permitted to occupy the premises until that time. He requested instructions as to how to proceed against Mr. Boylen under the circumstances and advised that it is the recommendation of Division Engineer Williams that the agreement be not renewed and that Mr. Boylen be ordered off the property. After some discussion the Commission voted unanimously to evict Mr. Boylen from the premises, it appearing from reports that he is an undesirable tenant.

The matter of the sale of Building No. 4589 on property heretofore purchased from John G. Maycock for right of way for the East Portland-Hubbard Highway had the attention of the Commission, being property described as Lots 21 and 22 of Block 14, Pasadena Subdivision, Portland. The Attorney reported receipt of an offer from the National Properties, Inc., Portland, to pay \$50 for this building. He recalled that the building was advertised for sale on March 24, 1938, and the only bid received for the same was in the amount of \$3.00, which was rejected. He recommended sale of the building to National Properties, Inc., for the amount of their offer. The Commission approved the sale by unanimous vote.

Reconsideration was given by the Commission to the matter of removing advertising signs on the Columbia River Highway right of way through the Parkrose District east of Portland. The Attorney advised that according to information received from Division Engineer E. A. Collier there are numerous signs that encroach upon the highway right of way at this locality but all of them are back of the concrete curbs and back of the power and telephone poles except the sign that is being maintained by a man by the name of Herron, which extends farther out into the highway and which Mr. Herron refuses to remove, as previously ordered by the Commission. He also advised that it is Mr. Collier's opinion that practically all of these people will remove their signs without argument as soon as they are requested to do so if the Commission is successful in its attempts to get Mr. Herron's sign off the highway. The Attorney said that he expects to confer with Mr. Herron's attorney shortly and hopes to be able to secure the removal of this particular sign without much trouble, in the near future. In view of the Attorney's report, the Commission decided not to take any action against the other parties until the Herron matter has been disposed of.

The Commission considered and ordered filed a letter from the

APR 14 1938

National Parks Service relative to the possibilities of acquiring lands of a sub-marginal character for purchase under Title III of the Bankhead-Jones Farm Tenant Act, the Commission having in mind no tracts that would qualify under the provisions of such act.

The Engineer reported on the cost of right of way for the alternate route of the Pacific Highway West through the town of Tigard, Washington County. He estimated the cost of the right of way on the northwest line at \$150,000; that on the center line at \$112,000; and that on the southeast line at \$66,000, and advised that there is very little difference in the estimated cost to construct each route. After discussion, the Commission ordered that 12-months' options be secured for the right of way on the northwest line and on the southeast line for consideration by the Commission at its next meeting or as soon thereafter as is possible, when the Commission proposes to adopt a route for this revision.

The Assistant Attorney reported that he has again contacted the city officials of Portland in regard to the acquisition of a small parcel of land that is needed for right of way for the Lombard-Killingsworth Section of the Northeast Portland Secondary Highway (Right of Way File No. R-5403), but these officials have indicated an unwillingness to reduce the price any lower than \$130, which is \$54 more than the value that the Highway Department's right of way men place on the property and is at a rate that is considerably more than the Commission is paying for other land in the same locality; so it appears necessary to condemn the property in the event the Commission will not pay the amount demanded. The Commission considered the city's price exorbitant and that it should not pay the city any more than it pays the other property owners, but expressed a reluctance to take the matter into court. Accordingly, it was decided that Chairman Cabell and the Attorney, Mr. Devers, should personally contact the city officials in regard thereto.

The Attorney reported receipt of numerous inquiries as to the Commission's plans for constructing the proposed revision of the Oregon Coast Highway in the vicinity of Gleneden Beach. He said that the people are particularly anxious to know whether or not the Commission intends to acquire the right of way for this proposed revision now even if the project is not constructed within the next two or three years. He was instructed to inform these people that the Commission does not intend to purchase any more right of way for the project until it is actually needed for construction, unless exceptionally good offers are presented.

The Secretary presented a letter from Robert W. Sawyer, Bend, with further reference to the naming of a state park in Oregon for David Douglas. Mr. Sawyer gave as his opinion that it would be unwise to have two parks in Oregon named for the same man and advised that, if the Clatsop County park on the Wolf Creek Highway is of sufficient importance to be named in honor of this great explorer and botanist, it might cover the matter satisfactorily; but on the other hand it would probably be more appropriate if the park named for Mr. Douglas contained sugar pine timber as well as Douglas fir timber, if that is possible, and if it were located in the district through which Mr. Douglas traveled. It was also his thought that any park that is named for

APR 14 1938

Mr. Douglas should be a state-owned park rather than one owned by the county. The Commission referred the matter to the Parks Superintendent, Mr. S. H. Boardman, with instructions to discuss it in person with Mr. Sawyer.

The Commission had under consideration the matter of granting to the United States of America flowage easements authorizing the flooding of state-owned property adjacent to the Columbia River Highway in connection with Bonneville Dam operations, particularly over three parcels of state land in Hood River County and one parcel of land in Wasco County. In this connection the Secretary presented a letter from the United States War department by Don E. Meldrum, Senior Land Appraiser, offering \$100 for such an easement over the Wasco County property, containing 4.21 acres, and being a part of Mayer State Park, and \$300 for an easement to overflow the three parcels of state land in Hood River County, containing 26.27 acres, 3.69 acres, and 1.33 acres, respectively, and further offering to pay to the state the sum of \$12,202.46 as consideration for the alteration and reconstruction of a section of the Columbia River Highway in the vicinity of Perham Creek, which will also be inundated by the backwater from this dam. After full consideration of the facts in the case and upon recommendation of the Engineer, the Commission unanimously approved the granting of such easements and thereupon signed the easements that were presented. The following resolutions pertaining thereto were offered by Commissioner Aldrich, who moved their adoption. The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission:

WHEREAS, the State of Oregon and Wasco County, a municipal corporation of the State of Oregon, are the owners of a parcel of land situate in the County of Wasco, State of Oregon, described as:

The Northeast quarter of the Southeast quarter of Section 3, Township 2 North, Range 12 East of the Willamette Meridian, Wasco County, Oregon,

which property heretofore has been acquired for highway and public park purposes; and

WHEREAS, the United States of America will require for, and there is necessary for use in connection with, the construction, operation and maintenance of the Bonneville Dam across the Columbia River, the full and perpetual right, power, privilege and easement to overflow all that portion of the above described lands lying below the 97.5-foot contour line above mean sea level, as determined by reference to the U. S. C. & G. S. datum.

The portion of said lands which will be subject to the easement to overflow contains approximately 4.21 acres, more or less; and

WHEREAS, it is and will be of inestimable value to the State of Oregon, Wasco County, and to the people of the State of

Oregon generally that the said Bonneville Dam be constructed and that the easement to overflow said portion of said lands be conveyed to the United States of America for the purposes herein stated; and

WHEREAS, under the provisions of Section 44-118, Oregon Code 1930, the State Highway Commission is granted power and authority to dispose of lands, ground, or property acquired by the State Highway Commission which are no longer needed or useful for highway or other purposes; and

WHEREAS, the right and easement required by the United States to overflow said portion of land hereinabove described will not interfere with the use by the State of Oregon of said land for highway purposes and said portion of said premises is not needed or useful for park or other purposes. The said easement to overflow can be conveyed to the United States of America without detracting from the natural beauty, utility or general value and usefulness of the balance of land which will not be subject to the right and easement to overflow.

NOW, THEREFORE, BE IT RESOLVED by the State Highway Commission, all members being present and participating, that the easement to overflow said portion of land hereinabove described, be and the same hereby is declared to be no longer needed or useful for highway, park, or other purposes.

BE IT FURTHER RESOLVED that the State of Oregon, by the State Highway Commission, join with Wasco County in conveying the said right and easement to overflow said portion of land to the United States of America, by good and sufficient flowage easement, and for and in consideration of the sum of One Hundred and 00/100 Dollars (\$100.00), which said sum will be the total consideration paid by the United States of America to the State of Oregon and Wasco County.

WHEREAS, the State of Oregon is the owner of three parcels of land, each situate in the County of Hood River, State of Oregon, more particularly hereinafter described, which property heretofore has been acquired for highway and public park purposes; and

WHEREAS, the United States of America will require for, and there is necessary for use in connection with, the construction, operation and maintenance of the Bonneville Dam across the Columbia River, the full and perpetual right, power, privilege and easement to overflow those particular respective portions of the following described lands situate in the County of Hood River (formerly and until June 23, 1908 a portion of Wasco County), State of Oregon:

APR 14 1938

Parcel No. 1

All that portion of the following described lands lying below the 95.0-foot contour line above mean sea level, as determined by reference to the U. S. C. & G. S. datum, containing 26.27 acres, more or less, which lands are described as follows, to wit:

Government Lots 1, 2, 3 and 4 in Section 36, Township 3 North, Range 9 East of the Willamette Meridian, in Hood River County, Oregon;

Excepting therefrom:

a. All rights of way of the Oregon-Washington Railroad & Navigation Company over and across the above described lands;

b. An easement and right of way for a public road and highway over and across each of the said Lots 1, 2, 3 and 4 hereinabove described;

c. An easement and right of way existing in favor of Pacific Telephone and Telegraph Company, to erect and maintain poles for telephone purposes, with the necessary wires and fixtures thereon, over and across that portion of each of said Lots 1, 2, 3 and 4 lying between the Columbia River Highway and the right of way of the Oregon-Washington Railroad & Navigation Co., which said lots are hereinabove described.

Parcel No. 2

All that portion of the following described lands lying below the 93.8-foot contour line above mean sea level, as determined by reference to the U. S. C. & G. S. datum, containing 3.69 acres, more or less, which lands are described as follows, to wit:

Government Lots 1 and 2, Section 33, Township 3 North of Range 8 East of the Willamette Meridian, Hood River County, Oregon;

Excepting therefrom:

Rights of way existing in favor of Oregon-Washington Railroad & Navigation Co., the Pacific Telephone and Telegraph Company, and right of way for a public road and highway in, over and across the next hereinabove described property.

Parcel No. 3

All that portion of the following described lands lying below the 94.6-foot contour line above mean sea level, as

determined by reference to the U. S. C. & G. S. datum, containing 1.33 acres, more or less, which lands are described as follows, to wit:

Government Lot 4, Section 3, Township 2 North
of Range 9 East of the Willamette Meridian,
Hood River County, Oregon;

Excepting therefrom:

Right of way existing in favor of Oregon-Washington
Railroad & Navigation Co., and a right of way for a
public road and highway over and across the property
next hereinabove described.

WHEREAS, it is and will be of inestimable value to the
State of Oregon and to the people of the State of Oregon generally
that the said Bonneville Dam be constructed and that the easement
to overflow said portions of said lands be conveyed to the United
States of America for the purposes herein stated; and

WHEREAS, under the provisions of Section 44-118, Oregon
Code 1930, the State Highway Commission is granted power and au-
thority to dispose of lands, ground, or property acquired by the
State Highway Commission which are no longer needed or useful for
highway or other purposes; and

WHEREAS, the granting of the right to overflow that por-
tion of the lands designated hereinabove as Parcel No. 1, will ne-
cessitate the raising of a section of the existing Columbia River
Highway over and across a portion of said Parcel No. 1, the esti-
mated cost of which has been agreed upon as the sum of \$12,202.46,
which said sum will be paid by the United States of America to the
State of Oregon as an item separate and distinct from the consid-
eration passing to the State of Oregon for the purchase of the
flowage easement herein mentioned; and

WHEREAS, the right and easement required by the United
States of America to overflow said portion of said Parcel No. 1
will not interfere with the use by the State of Oregon of said
Parcel No. 1 for highway purposes when the said section of the
Columbia River Highway is raised as herein mentioned, over and
upon said portion of said Parcel No. 1. Said Parcels No. 2 and
No. 3, hereinabove described, are not needed or useful for high-
way, park, or other purposes. The said easements to overflow can
be granted to the United States of America without detracting from
the natural beauty, utility, or general value and usefulness of
the balance of the lands which will not be subject to the rights
and easements to overflow.

NOW THEREFORE, BE IT RESOLVED by the State Highway

APR 14 1938

Commission, all members being present and participating, that the easements to overflow said portions of the lands hereinabove described be and the same are declared to be no longer needed or useful for highway, park or other purposes;

BE IT FURTHER RESOLVED that the said rights and easements to overflow said portions of lands, and each of said portions, be conveyed to the United States of America and its assigns by good and sufficient conveyance, in the name of the State of Oregon, by the State Highway Commission, for and in consideration of the sum of Three Hundred and 00/100 Dollars (\$300.00), and in further consideration of the sum of Twelve Thousand Two Hundred Two and 46/100 Dollars (\$12,202.46), to be paid by the United States of America to the State of Oregon, for the alteration and reconstruction of said section of the Columbia River Highway over and across a portion of Parcel No. 1 of the lands hereinabove described.

Action on the granting of a similar flowage easement across state property adjacent to the Columbia River Highway in the vicinity of Warren Creek and providing that consideration be paid by the Government for the alteration and reconstruction of a section of the Columbia River Highway at such location (which also will be inundated by backwaters from the Bonneville Dam) was deferred by the Commission pending satisfactory settlement of right of way and other matters pertaining thereto.

In this connection the Engineer advised that he has been requested by Major A. E. McKennett, Principal Engineer of the United States War Department, to sign an "Engineer's Estimate of cost to reconstruct to higher elevation the section of the Columbia River Highway 1,170 feet in length at Perham Creek, Hood River County, State of Oregon, overflowed by the high-water level induced by the Bonneville project". He explained that the amount of the estimate is \$12,202.46, which amount the War Department has agreed to pay to the state in accordance with the provisions of the flowage easement hereinabove approved. The Commission authorized the Engineer to sign such estimate.

The Engineer reported on his inspection with Major A. E. McKennett, of the United States War Department, of the Mill Creek Bridge on the Columbia River Highway at The Dalles, which inspection the Commission ordered at the previous meeting as a result of a conference with Major McKennett. He said that the War Department desires to replace this bridge with a fill and tide-gate so as to prevent the flooding of lands above the bridge, and that he has tentatively agreed with Major McKennett to the disposition of this matter on the following basis, subject to the Commission's approval: the United States War Department is to construct a fill which will be 46 feet wide on top, at an estimated cost of \$2,750; that the War Department will riprap the slope on the upper side of this fill and will construct a one-inch gravel surface on top of the fill, estimated to cost \$300; furthermore, the War Department will remove the old bridge structure and will install in lieu thereof a suitable culvert. The state's cooperation, he said, will consist of the following: contribution of \$1,400 cash as cooperation in the work that is to be

APR 14 1938

performed by the War Department, and to pay for the cost of constructing a pavement roadway on the fill. He estimated that by such arrangement the state will save approximately \$5,000 over the cost of constructing a new concrete bridge at this location, as was heretofore proposed. After some discussion the Commission approved by unanimous vote the arrangement as outlined by the Engineer and instructed the Attorney to prepare an appropriate agreement to cover the matter.

The Engineer requested authority to purchase the following equipment:

- 1 gasoline-driven, 250-watt, 12-volt generator for use at Government Camp headquarters to charge radio batteries and batteries of trucks and cars operated out of this station, estimated cost \$50.25;
- 2 pavement breakers at \$200 each, total cost \$400.00;
- 6 vibrating bells for use on certain highway bridges, estimated cost \$18.50 each, total cost \$111.00;
- 1 tube tester, estimated cost \$51.33; and 1 modulation monitor, estimated cost \$24.83, for checking radio transmitter operations.

The Commission approved the request by unanimous vote and ordered that the purchases be made through the State Purchasing Agent in accordance with the usual practice.

The Commission had under consideration the offer of the Manufacturers Sales Company of Seattle to furnish to the state for a 90-day free trial a traffic-actuated signal manufactured by the Automatic Traffic Control Corporation and consisting of the following:

1	traffigo, valued at	\$475.00
1	relay and switch box, valued at	15.00
2	3-foot magnetic detectors, valued at	200.00
4	pedestrian buttons, valued at	60.00
1	relay, valued at	75.00
Total Value		\$825.00

The Engineer advised that in connection with this trial the state would have to furnish the signal heads and pedestals and would have to pay the cost of installing the signals. He estimated the installation cost at \$500 and the cost of signal heads and pedestals at \$525, or a total of \$1,025 to be paid by the state, and explained that this expense would not all be lost because the signal heads and pedestals could be used elsewhere in the event the Commission decided not to retain the signals after the trial period has expired. He recommended acceptance of the company's offer. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration a letter from F. N. Finch, General Manager, Oregon-Washington Railway and Navigation Company and the Union Pacific Company, outlining a procedure with respect to the scaling of

APR 14 1938

rocks from the slopes adjacent to the Columbia River Highway, near Mosier, in Hood River County, which said letter is dated April 5, 1938, and outlines certain things to be done by the railroad company and certain things to be done by the state in connection with such work, and further provides that a premium of \$1,000 charged by the insurance company for writing insurance covering the operations shall be paid for, 50 per cent by the railroad company and 50 per cent by the state. The Commission by unanimous vote approved such arrangement subject to the condition that the expense of rerouting or detouring trains as may be necessary on account of such work shall be assumed by the Highway Commission "but to the extent only that the Commission may do so officially but not privately". The Commission thereupon authorized Chairman Cabell to sign the letter in behalf of the Commission.

The Commission had under consideration the matter of constructing a light oil mat surface on the unrolled sections of the Albany-Corvallis Secondary Highway, in Linn County. The Engineer advised that such oiling work is badly needed and that the work would cost about \$5,200. He recommended approval of the project as a minor betterment works project and that the cost thereof be charged against the emergency fund in view of the fact that no provision has been made in the budget this year for such work. The Commission by unanimous vote approved the project as recommended.

The Engineer reported that the United States Biological Bureau has secured the approval of a 7-mile section of the Frenchglen Secondary Highway, in Harney County, and more particularly designated as the Narrows-Coyote Flat Section, and that they propose to start work in the very near future, using a power shovel, several LeTourneaus, carryalls, rippers, and other necessary equipment. They want to do this work, he said, in conformance with state highway requirements and have asked the State Highway Department to do the necessary engineering work. He estimated that such engineering work would cost about \$100 per mile or a total of about \$732, and recommended the expenditure in view of the fact that the work is being done on a state highway at no cost to the state except for furnishing culvert pipe and some blasting powder. The Commission approved the recommendation by unanimous vote.

The Engineer reported that in conformance with authority previously given him by the Commission he awarded, on April 6, 1938, to R.I. Stuart & Sons, Medford, the contract for furnishing crushed rock in stock piles for the Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties, the bid of this contractor in the amount of \$22,550.00 being the low bid received by the Commission on March 24, 1938, for such work. The Commission by unanimous vote approved the award of this contract as reported.

Consideration was given by the Commission to the matter of lifting the reduced load limits heretofore in effect on the following highways:

SHERMAN HIGHWAY, from its junction with the Columbia River Highway to its junction with The Dalles-California Highway;

MT. HOOD HIGHWAY, from Cooper's Spur to its junction with the Columbia River Highway;

APR 14 1938

HOOD RIVER SECONDARY HIGHWAY from its junction with the Mt. Hood Highway northerly to Tucker's Bridge;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway to a point 25 miles easterly thereof.

The Engineer advised that these roads have become sufficiently dried out so that the reduced load limits are no longer required. He recommended lifting of the same. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the sixteenth day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on the following state highways:

SHERMAN HIGHWAY from its junction with the Columbia River Highway, in Sherman County, to its junction with The Dalles-California Highway, in Wasco County;

MT. HOOD HIGHWAY from Cooper's Spur to its junction with the Columbia River Highway, in Hood River County;

HOOD RIVER SECONDARY HIGHWAY from its junction with the Mt. Hood Highway northerly to Tucker's Bridge, in Hood River County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway near Klamath Falls, in Klamath County, to Lakeview, in Lake County;

and

WHEREAS, subsequent to the passage of said resolutions conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the said reduced load limits set out in said resolutions in so far as they pertain to the Sherman Highway, Mt. Hood Highway, the Hood River Secondary Highway, and the Klamath Falls-Lakeview Highway from its junction with The Dalles-California Highway near Klamath Falls to a point 25 miles easterly thereof, in Klamath County;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limits on the

SHERMAN HIGHWAY from its junction with the Columbia River Highway, in Sherman County, to its junction with The Dalles-California Highway, in Wasco County;

APR 14 1938

MT. HOOD HIGHWAY from Cooper's Spur to its junction with the Columbia River Highway, in Hood River County;

HOOD RIVER SECONDARY HIGHWAY from its junction with the Mt. Hood Highway northerly to Tucker's Bridge, in Hood River County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway to a point 25 miles easterly thereof, in Klamath County; but from said last-named point to Lakeview, in Lake County, the load limit as fixed in said former resolution shall remain until removed by order of the Commission;

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

A letter was presented from D. A. McKinnon, State Highway Engineer of Montana, requesting that N. M. Finkbinder, Materials Engineer for the Oregon State Highway Department, be authorized to accept an appointment as a member of the Committee on Fundamentals of Bituminous Construction, to prepare papers and assemble data for submission to a joint session of the Montana Bituminous Conference and the National Road Oil and Asphalt Congress of Tulsa, Oklahoma, which is to be held on October 17 to 20, 1938, at the Edgewater Gulf Hotel on the Gulf of Mexico between Gulf Port and Biloxi, Mississippi. The Engineer advised that acceptance of this appointment would carry with it authorization for Mr. Finkbinder to attend this meeting at state expense. Nevertheless, he recommended approval of the same. The Commission approved the recommendation by unanimous vote, subject to confirmation by Governor Martin.

The Commission also authorized the Parks Superintendent, S.H. Boardman, to go to Aberdeen, Washington, on April 20, 1938, at state expense, for the purpose of conferring with Mr. George E. Huntley of that place relative to the acquisition of property for a proposed addition to Short Sand Beach State Park, in Tillamook County.

The Commission had under consideration the advisability of purchasing an electric testing machine to test the eyesight of highway department employees who are required in the course of their day's work to operate motor equipment. The Engineer recommended the purchase of one of these machines as a safety measure at a cost of about \$50. He pointed out that there would be some expense connected with the making of tests, inasmuch as it would mean that someone from the department would have to travel over the state about

once each year to test the individual operators. He estimated the cost of making the tests at about \$500 annually. After some discussion the Commission concurred in the viewpoint of the Engineer in this matter and accordingly authorized the purchase of the machine, as requested. The Commission referred to the Engineer the matter of arranging for the tests.

The Commission had under consideration the matter of accepting a draft in the amount of \$1,001.39 from the Globe Indemnity Company as final settlement in the Moorman forgery case, and the signing of the form of release which the company has requested in connection therewith. The Attorney advised that the amount of the draft is correct but there is a question in his mind whether or not the Commission should sign the release form, in view of the fact that it assigns to the company the right to press claims for recovery against any person whom they may find to be legally liable, such as any person or bank having cashed one of the checks issued on account of time statements which Moorman forged. He further stated that inspection of the bond that was furnished by the company covering Mr. Moorman and others reveals that no provision was contained therein making it obligatory for the Commission to execute such a release or assignment as the company now requests. After discussion and in view of the facts as presented by the Attorney, the Commission decided not to sign the release in its present form and instructed the Attorney to so inform Mr. Harry L. Raffety, attorney for the Globe Indemnity Company.

The Commission considered and signed an agreement with Tillamook County and the Dougherty Slough Drainage District, Tillamook County, providing for payment by the state to the county of the sum of \$1000 as the state's full and complete share of the cost of constructing certain protective work along the Wilson River to prevent flood waters of this river from inundating farm lands and the Oregon Coast Highway.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 o'clock p. m.

APR 14 1938

Portland, Oregon, April 27, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in the Tyrolean Room of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with the prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Parks Superintendent S. H. Boardman was present and reported on the following matters:

Acquisition of wayside strips adjacent to The Dalles-California Highway between Redmond and Bend, in Deschutes County:- The Parks Superintendent advised that the Federal Government owns a number of 40-acre

APR 27 1938

tracts adjacent to the newly constructed highway between Redmond and Bend on which are growing fine stands of juniper trees. He requested authority to acquire these tracts from the Government, if possible, in order to preserve the juniper trees, which are a valuable attraction. The Commission granted the request by unanimous vote.

Addition to Camas Mountain State Park, in Douglas County:- The Parks Superintendent requested authority to petition the Federal Government for the acquisition of a 40-acre tract of government-owned land adjacent to this park, under the provisions of the Recreational Act of June 14, 1926. He explained that an attempt was made at one time to acquire this area for stock pile purposes, but the state's application was denied; however, the suggestion was made that it could be acquired as a park or recreational area. He estimated that it could be purchased outright from the Government for the sum of \$400, and recommended acquisition, either by purchase or lease. After due consideration the Commission approved the request subject to the condition that the property shall be leased from the Government with an option to purchase it outright at a later date if the Commission so desires.

Addition to Starvation Falls State Park adjacent to the Upper Columbia River Highway:- The Parks Superintendent advised that a Mrs. Clara Nelson, of Black Duck, Minnesota, owns a parcel of land in this vicinity, adjoining the present state park; that all but 9.43 acres of this land will be inundated by backwater from the Bonnevile Dam. He recommended the acquisition of this 9.43 acres by the state as an addition to the present park and gave as his thought that it could be acquired at the rate of \$46 an acre, which is at the same rate as that at which the Government acquired the rest of Mrs. Nelson's property. He pointed out that the acquisition of this small tract would give the present park a frontage on the Columbia River. After some discussion the Commission voted unanimously to purchase the tract in question at the price quoted by the Parks Superintendent.

Purchase of 110 acres of government-owned land at the Umpqua Lighthouse Reservation in Douglas County:- The Parks Superintendent advised that the Commission now has this tract under lease from the Government but it would be possible to purchase it outright at this time for the sum of \$450 if the Commission so desires. He explained that the appraised value of the land is twice the amount that the Government is asking for it, and recommended purchase of the same for park purposes. The Commission approved the recommendation by unanimous vote.

Relinquishment of a portion of Chandler State Park located adjacent to the Fremont Highway, near Lakeview, in Lake County:- The Parks Superintendent advised that a number of years ago Mr. S. B. Chandler of Lakeview presented this park to the state as a

APR 27 1938

gift, but since then the highway has been reconstructed, isolating a portion of the park so that it is no longer of value for state park purposes. He further stated that, in accordance with instructions previously given him by the Commission, he has contacted Mr. Chandler with respect to the state's deeding back to him this isolated portion, and Mr. Chandler has agreed to accept the transfer. The Commission accepted and approved the report and ordered that an appropriate deed be prepared, deeding back to Mr. Chandler the strip of land under discussion.

Acquisition of timber tract situate adjacent to the Pacific Highway West, about 6 miles south of Monmouth, in Polk County:- The Parks Superintendent reported that he has inspected this tract, which is located about one-half mile south of the Luckiamute River bridge; that it contains a nice stand of timber; but that it would not be of much advantage to the state from the state parks standpoint because it is planned to relocate the highway at a considerable distance away from the existing highway. In view of the circumstances he recommended that the Commission do not purchase the area. The Commission approved the recommendation by unanimous vote.

Acquisition of privately-owned area lying between the Oregon Coast Highway and the Pacific Ocean, at the north end of the Depoe Bay Bridge, in Lincoln County:- The Parks Superintendent advised that this property is owned by Mr. E. B. Winchell, Portland, who has given an option to a man by the name of Youngblood to purchase the same for the sum of \$3,500, and that Mr. Youngblood plans to construct a building on the property for commercial purposes. He gave as his thought that the state should own the tract, and suggested the taking over of this option, if possible, so as to preserve the present unrestricted view of the ocean from the highway. He advised that the local people are very much interested in this matter and have guaranteed to contribute the sum of \$500 toward the purchase of the tract, provided the Commission will contribute the balance, amounting to \$3,000.00. In this connection the Secretary presented a resolution signed by 62 residents and businessmen of Depoe Bay and vicinity, urging the Highway Commission to purchase the tract under discussion. The Commission indicated a favorable attitude but deferred action on the matter until the following day when a delegation from Depoe Bay will be present in regard thereto.

Request of the State Forestry Department for permission to construct a guard cabin unit on the Wilson River Highway right of way, in Tillamook County:- The Parks Superintendent advised that he has inspected this location as previously instructed by the Commission, and from the state parks standpoint he has no objections to offer against granting the request; although, in his estimation, if the request is granted, it should be limited to a certain period. After discussion the Commission voted unanimously to grant a 5-year revocable permit to the State Forestry Department to occupy a portion of the right of way at this point, which is located near a

place known as McNamers Camp, with the understanding that the facilities of the Forestry Department shall not encroach upon the highway nearer than 50 feet from the center of the traveled roadway.

The Commission had under consideration the adoption of a policy with respect to acquiring right of way for highway improvements before such right of way is actually required for construction purposes. In this connection the Attorney reported that, from an analysis of the right of way budget and right of way settlements which have been approved by the Commission, it is apparent that the amount budgeted for the acquisition of right of way this year will be exceeded by actual purchases. After discussion and in view of the Attorney's report, the Commission by unanimous vote decided not to acquire any more right of way unless it is actually needed in connection with the projects to be constructed at once, and ordered that such decision be considered as its policy to be followed hereafter in connection with right of way purchases.

The Engineer reported on the cost of right of way required for the construction of the Oregon Coast Highway through the city of Bandon, particularly between Highway Engineer's Stations 34+83.1 and 64+40.4, as ordered by the Commission at the previous meeting. He estimated that right of way 80 feet wide between such limits would cost about \$10,200. After discussion, and in view of the fact that there is a possibility that the highway through Bandon will be reconstructed next year, the Commission authorized and instructed the Attorney to proceed with the securing of options for the right of way needed for such project.

A letter was presented from E. A. Hollinshead, Portland, offering free right of way for the reconstruction of the Oregon Coast Highway through the town of Cannon Beach, in Clatsop County, and requesting a location survey of the route so as to permit him to proceed with some improvements that he has in mind. In this connection the Engineer reported results of a reconnaissance survey for a revision and improvement of the existing highway between Cannon Beach Junction and Cannon Beach, which report the Commission considered and ordered filed. In the discussion of this matter it was pointed out that the reconstruction of the highway at this point is not contemplated for the near future, it being too costly a project to finance with funds available; hence the location survey is not needed for the time being. The Secretary was instructed to convey such information to Mr. Hollinshead.

The Commission had under consideration the offer of Mr. A. H. Bressler to sell to the state a 6.04-acre tract adjoining the south city limits of Monmouth through which there is a possibility the Pacific Highway West will be routed at some time in the future. The Commission decided not to negotiate with Mr. Bressler for the purchase of this property in view of the fact that it is not ready to adopt a permanent route for the highway at this place nor to construct the same in the near future.

The Attorney reported on the cost to acquire right of way and to rearrange the facilities of the Peninsula Golf Club in connection with the proposed traffic separation project at the intersection of Denver and Union Avenues, Portland, in accordance with instructions given by the Commission at

APR 27 1938

the previous meeting. He estimated that such right of way and the rearrangement of the golf club facilities would cost about \$34,000, and that it would cost about \$40,000 or \$50,000 additional to acquire the service station facilities now located in the wye connection between these two streets. After discussion and in view of the expense involved, which is exclusive of the cost of construction, the Commission decided to defer the project until it is better able to finance the same. The Attorney was instructed to so inform the owners of the property that is involved. The Engineer was instructed to investigate and report the feasibility and cost of installing traffic lights at this intersection.

The Commission considered and declined the offer of Mr. Vester Trusty to sell to the state for right of way purposes a tract of land that he owns adjacent to the Oregon Coast Highway at Bay City, in Tillamook County, the revision of the highway at this location being not in the Commission's program for early construction.

The Commission considered a letter from Hon. Willard L. Marks, Albany, with respect to the purchase of right of way that will be needed in connection with the Albany grade separation project, on the Pacific Highway. The Attorney advised that the property in question lies beyond the limits of the section that is proposed for construction this year and the reason that Mr. Marks is bringing up the matter now is because there is a mortgage on the property and his client would like to avoid the expense of refinancing the mortgage, knowing that the Highway Commission will acquire the property a little later. The Commission decided not to negotiate for the acquisition of this property in view of its newly established policy with respect to such matters.

The Commission considered and accepted the offer of the City of Albany to pay the sum of \$1,386 for the north 75 feet of Block 17 in Hackleman's second addition to said city, which is in conformity with the previous understanding had with Mayor Ashton at the meeting of the Commission held on March 24, 1938.

The Commission had under consideration the matter of acquiring right of way for a proposed revision of the John Day Highway in the western part of the town of John Day. The Commission decided not to acquire this right of way in view of the fact that it is not proposed to reconstruct the highway at this point this year.

The Attorney reported receipt of an inquiry from Mr. R. M. Barnes, Reedsport, as to whether or not it would be possible for him to purchase or lease a small parcel of state-owned property situate between the Umpqua Highway and the Umpqua River at a point about 8 miles east of Reedsport and being more particularly located in Lot 6, Section 1, T. 22 S., R. 11 W., W. M. He said that Mr. Barnes has a residence on the opposite side of the river from the highway and the only means of access to his property is by boat. Further, that Mr. Barnes would like to acquire this small parcel of land as a site on which to maintain a garage for the storing of his automobile when he is at home, and would also like to acquire a strip for a roadway from the garage

to the highway. After considerable discussion, in which it was pointed out that there is suitable private property available nearby for Mr. Barnes's use, the Commission denied the request.

Reconsideration was given by the Commission to the matter of acquiring right of way for the Salem-Dayton Secondary Highway across land owned by Mrs. Charles K. Spaulding, Salem. The Attorney advised that Mrs. Spaulding is demanding \$3,500 for her property, which is on the basis of \$100 per acre for the land actually taken for right of way, and \$50 per acre as severance damages, and that she also wants the Commission to build her a roadway from her farm residence to the new highway. The Commission considered Mrs. Spaulding's demand exorbitant and instructed the Attorney to condemn the property in the event she will not settle for \$2,500 plus the building of a roadway from the new highway to her residence buildings.

The Attorney also reported the need to condemn certain parcels of land that are needed for right of way for the Lombard Street-Killingsworth Street Section of the Northeast Portland Secondary Highway. He requested authority to commence the condemnation proceedings to acquire such properties and the Spaulding property at once. The Commission granted the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Spaulding Ranch-Unionvale Section of the Salem-Dayton Highway
Lombard Street-Killingsworth Street Section of the Northeast
Portland Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Spaulding Ranch-Unionvale Section of the Salem-Dayton Highway
Lorah O. Spaulding
Lombard Street-Killingsworth Street Section of the Northeast
Portland Highway

APR 27 1938

Thomas W. Murphy and Lillian B. Murphy
William L. Gray and Mary B. Gray
Joseph Mulhens, Jr.
Elizabeth Mulhens Scroggins
J. L. Kelly

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

APR 27 1936

5. That this resolution be entered in full in the minutes and records of this Commission.

The Engineer reported that there are sufficient moneys budgeted in the secondary highway account to finance a 10-mile survey on the Kings Valley Secondary Highway and the Dallas-Kings Valley Secondary Highway, as was requested by a delegation from Kings Valley at the meeting on March 24, 1938. The Commission decided, in view of the fact that construction of this project is not programmed for this year, that it would be inadvisable to make a standard location survey because the funds required to finance the same could be used to much better advantage for other highway work. However, the Commission authorized the Engineer to make a reconnaissance survey of some two or three miles in length on such highways.

The Commission had under consideration the claim of Mr. Frank Ott for losses that he alleges he incurred by reason of the reconstruction of the Fremont Highway in front of his property near Paisley, Lake County. Mr. Ott alleges that before the highway was reconstructed he maintained an irrigation pipe siphon across the highway and successfully irrigated a number of acres of land, but when the highway was rebuilt the siphon was replaced in such a manner that it no longer functions and, as a result, he cannot irrigate his land and has lost two crops of hay therefrom, for which he is now seeking reimbursement. The Engineer advised that investigation reveals that Mr. Ott's allegations, in so far as the workability of the siphon is concerned, are correct and that the only way to remedy the situation is to open up the lower end of the siphon and let the water pass through the pipe by means of gravity. However, there would still be about 0.66 of an acre of land that could not be irrigated. He gave as his thought that the state is obligated to correct the situation and advised that Mr. Ott is demanding the sum of \$200 as loss for the damage of crops during the seasons of 1937 and 1938, and \$500 per acre as damages for the land that he cannot now irrigate, making a total of about \$530. After discussion the Commission decided to talk to Mr. Ott personally before rendering a decision. The Attorney was instructed to ask Mr. Ott, who resides in Portland, to be present at the Commission meeting on the following day for further discussion. (Mr. Ott came before the Commission on the following day. See additional minute entry.)

The Engineer rendered a supplemental report on the request of Mr. S. N. Abstem, Hood River, for the construction of turnouts on the Columbia River Highway to facilitate the loading and unloading of school children in school buses. He said that further investigation of this matter reveals that it would cost about \$100 to sufficiently widen the highway at Mile Posts 61.3 and 62.4 as suggested by Mr. Abstem. He recommended approval of the project in view of its low cost. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration the Engineer's report on the cost to improve Arlington Street in Gladstone as a state highway connection between 82nd Street Highway (Cascade Secondary Highway) and the East Portland-Oregon City Highway. The Engineer estimated that it would cost about

APR 27 1938

\$87,000 to build this street to proper highway standards, and an additional \$25,000 for right of way, such estimate being based on a 60-foot roadway between curbs. He pointed out that the street is only 36 feet wide between curbs at the present time but this could be increased to 46 feet without additional right of way expense and in that case construction could be reduced to \$72,000. The Commission decided not to undertake this project in view of the cost thereof and particularly in view of the fact that it would be necessary to designate the street as a state highway route, which the Commission does not wish to do because there are many other roads now in the state highway system in equally bad condition, where the money could be used to better advantage.

The Commission by unanimous vote approved Chairman Cabell's letter dated April 25, 1938, and directed to Mr. Franklin T. Griffith, President of the Portland General Electric Company, Portland, with respect to the paving of Sandy Boulevard, Portland, in which letter Mr. Cabell advises Mr. Griffith that the State Highway Commission will accept a contribution of \$50,000 from the company as its share in the cost to widen and pave the entire street from N. E. Davis Street to East 82nd Street in order that the project may be done properly. The letter was thereupon signed by Mr. Cabell and mailed.

The Engineer reported that about 45 tons of structural steel and cast iron have been salvaged from the bridge over the Little Nestucca River on the Oregon Coast Highway about 7 miles south of Hebo, which bridge is being replaced by a new structure. He requested authority to advertise this material for sale at the next meeting of the Commission. The Commission approved the request by unanimous vote.

The Attorney reported receipt from the Globe Indemnity Company of two alternate forms of release terminating the company's liability in connection with the Moorman forgery matter, such forms having been submitted as a substitute for the form that was considered and rejected by the Commission at the previous meeting. He read aloud each of the alternate releases and recommended acceptance of the short form. The Commission approved the Attorney's recommendation and thereupon signed the release.

The Commission had under discussion a resolution adopted by the County Court of Lane County, requesting the Commission's approval of the designation as market roads of certain county roads in Lane County, described as follows:

1. The road leading from the Territorial Road to Veneta, Southwesterly to Market Road #15, near Vaughn, known as the Bolton Hill Road - to be known as Market Road #53; 3.3 miles.
2. The road leading from Elmira, Northwesterly to the North end of Market Road #14; thence to the Siuslaw Highway, near Goldson, known as the Sheffler and McMaster Roads - to be known as Market Road #54; 11.5 miles.

3. The road from the East end of the steel bridge East of Creswell, Southerly to the Delight Valley Road, East of Saginaw, known as the Sears Road - to be known as Market Road #55; 5.6 miles.
4. The road beginning on the Territorial Road South of Crow, and thence Northeasterly to the Torkelson Road, known as Market Road #21 - to be considered part of Market Road #21; 4.4 miles.

The Attorney advised that, whereas the Commission may not be particularly interested in the designation of these market roads, the law requires the Commission to approve them as a perfunctory proposition. The Commission thereupon by unanimous vote approved the request upon recommendation of the Engineer.

The Attorney brought up for discussion the matter of payment of royalty for materials to be taken from the Columbia River for use in connection with highway work. He said that at one time an agreement existed between the states of Washington and Oregon, which provided that neither state would pay a royalty on such materials; but, since that agreement was effected, officials of the State of Washington have changed their attitude in regard thereto and now demand the payment of royalty. He pointed out that this would cost the State of Oregon a large sum of money because of the materials that it is proposed to take for construction of the new Columbia River Highway. He further advised that the Clerk of the State Land Board is of the opinion that the officials of the State of Washington can be induced to change their present attitude if they are contacted personally, and has offered the suggestion that a representative of the State Highway Department accompany him to Olympia, Washington, for such purpose. The Attorney stated his concurrence in the views of the Clerk of the State Land Board. It was the thought of the Commission that everything possible should be done to save the State of Oregon this extra expense and accordingly Construction Engineer H. G. Smith was authorized and instructed to contact the Washington officials in company with the Clerk of the State Land Board.

The Engineer requested authority to purchase a portable automatic lighting plant for installation at the Pistol River maintenance headquarters in Curry County. He estimated the cost of such plant at \$700. The Commission approved the request by unanimous vote.

The Engineer requested authority to make the following changes in the highway department radio network in order to increase the efficiency of the same: (1) increase seven 50-watt transmitters to 100-watt transmitters at an estimated total cost of \$210; (2) install radio-teleggraphy for station-to-station communication at the three major stations in La Grande, Klamath Falls, and Salem, estimated total cost \$1,500; (3) install remote control for receiving only at the La Grande, Klamath Falls, and Salem stations, estimated total cost \$750; (4) purchase of a 500-watt transmitter for installation at the Bend station, and the transfer of the present 50-watt station at Bend to Pendleton, stepping the same up to 100-watt power, estimated cost of 500-watt

APR 27 1938

transmitter \$300; (5) install remote control at the Bend station for both transmitting and receiving: estimated cost of new vertical antenna \$1,800, cost of remote control equipment estimated at \$250, and a building to house the equipment at \$250; (6) install telephone-plan service for remote control for the stations located at Salem, La Grande, Klamath Falls, and Bend, estimated total cost per month \$60; (7) increase the power of the transmitter at Portland to 500-watt telephone and telegraph in order to more efficiently cover the Columbia River Gorge; (8) transfer the transmitter now located in Portland to Medford, same to be operated by remote control from the Highway Department's scalehouse site: estimated total cost of this change \$7,900, which will be borne entirely by the State Police Department, for whom the change is being made; (9) purchase additional frequency-measuring equipment at Salem station, estimated cost \$1,000. He explained that the total expenditure called for amounts to \$8,760 by the State Highway Department, and \$7,900 by the State Police Department, and recommended the same so as to provide for greater efficiency of all of the radio stations, with better coverage throughout the state. After discussion, the Commission approved the Engineer's request by unanimous vote and authorized him to make the various changes and installations this summer. The Engineer was also authorized by the Commission to apply for permits as may be necessary from the Federal Radio Communications Commission.

The Commission had under consideration the request of Mr. J. T. Mahoney, Siletz, Oregon, for permission to maintain his power transmission pole line in its present location on the west side of the Siletz Secondary Highway through the town of Siletz rather than on the east side of this highway. The Engineer advised that Mr. Mahoney has a franchise from Lincoln County authorizing the maintenance of his pole line on the west side of the highway, but the pole line is now badly in need of repair and he has been requested to rebuild it on the east side of the highway in conformance with the policy of the Highway Commission to avoid the crossing of power wires over the highway as much as possible, and the west side of the highway now being occupied for the most part by telephone circuits. He said that Mr. Mahoney is opposed to moving his line because of the cost involved. He further stated that the power line is located in the town of Siletz and most of the service connections are on the west side of the highway, so it probably would be advantageous and less hazardous if the Commission permitted the pole line to remain in its present location, which would necessitate the crossing of telephone wires at two points. He recommended that Mr. Mahoney's request be approved provided he will reconstruct the present line so as to reduce present hazards. The Commission approved the request by unanimous vote.

The Commission considered the request of the National Surety Corporation for permission to use photostatic copies of the \$5,000 draft that it gave the Highway Commission in payment of the state's claim in the Moorman forgery case, and the Commission's letter of acceptance thereof terminating the liability of the corporation in this case. The Commission approved the request by unanimous vote upon recommendation of the Engineer and the Attorney.

The Commission had under consideration the matter of reconstructing the Dike Section of the Oregon Coast Highway just west of Coquille,

APR 27 1938

which section is inundated by waters of the Coquille River during flood periods. The Engineer estimated that it would cost about \$125,000 to reconstruct this section, compared to a cost of \$550,000 to construct the proposed revision bypassing the town of Coquille. He pointed out that the Commission's financial status will not permit the construction of the bypass route at this time and that something must be done to improve the Dike Section regardless of the construction of the bypass route, because this section will always have to be maintained as a state highway. He suggested a temporary transfer of \$125,000 of the funds previously allocated for the reconstruction of the Bunker Hill Section of the Oregon Coast Highway in Marshfield, in order that the reconstruction of the Dike Section can be done this year. After considerable discussion the Commission approved the Engineer's recommendation by unanimous vote.

The Engineer reported that The Dalles-California Highway between Bend and Klamath Falls and the Ochoco Highway between Prineville and a point six miles easterly thereof are now dried out sufficiently to permit the transportation of legal weight loads, and recommended the lifting of the reduced load limits heretofore in effect on these sections. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the sixteenth day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on the following state highways:

THE DALLES-CALIFORNIA HIGHWAY between Bend, in Deschutes County, and Klamath Falls, in Klamath County;

OCHOCO HIGHWAY between Redmond, in Deschutes County, and a point six miles east of Prineville, in Crook County;

and

WHEREAS, subsequent to the passage of said resolutions conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the said reduced load limits set out in said resolutions in so far as they pertain to The Dalles-California Highway and the Ochoco Highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limits on the

THE DALLES-CALIFORNIA HIGHWAY between Bend, in Deschutes County, and Klamath Falls, in Klamath County;

OCHOCO HIGHWAY from Redmond, in Deschutes County, to a point six miles east of Prineville, in Crook County;

APR 27 1938

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission had under consideration the matter of assuming responsibility for the maintenance of a sidewalk that the County Court of Lane County proposes to construct as a W.P.A. project on the Junction City-Eugene Secondary Highway at a place known as Santa Clara. The Engineer advised that the County Court considers that its responsibility terminates upon completion of the sidewalk and has refused to accept the permit that was issued by the Commission for such construction inasmuch as it contains provision for maintenance of the sidewalk by the county. He pointed out that the sidewalk to be constructed is of a gravel type and that the cost of maintenance of the same would be negligible. He recommended that the state assume the maintenance costs when completed. The Commission approved the recommendation by unanimous vote and so ordered.

The Engineer requested instructions whether or not to retain for a longer time the certified check in the amount of \$500 which was deposited by the Gilpin Construction Company and the General Construction Company, contractors for the Yaquina Bay Bridge construction, pending final settlement with the P.W.A. authorities in connection with this bridge project. He recalled that the check was held on account of irregularities in labor and in the cement count, and advised that the Federal Government has never intimated that either of these two matters had any bearing on the final adjustment of the grant funds. Furthermore, the Labor Board considered and rejected the labor claims and the P.W.A. authorities have never recognized officially the alleged cement irregularity. He recommended, in view thereof, that the \$500 check be returned to the contractors at this time. The Commission approved the recommendation by unanimous vote.

The Commission considered the matter of maintenance of Killingsworth Avenue in Portland easterly from its connection with Northeast Portland Secondary Highway to the junction with Columbia Boulevard, and Columbia Boulevard from this junction point to a connection with Sandy Boulevard (Columbia River Highway). The Engineer advised that, whereas the Commission has designated the Northeast Portland Secondary Highway No. 123, it has not been the practice of the Commission to maintain roads or streets on the route of such highways until the highway has been constructed. He further advised that the Roadmaster of Multnomah County alleges that the Commission is obligated to maintain Killingsworth Avenue and Columbia Boulevard between the points first mentioned, and is calling upon the state to do certain repair work on such streets at this time. The Commission deferred a decision in this matter pending advice from the Attorney as to whether or not the Commission is legally obligated to maintain such streets.

APR 27 1938

The Commission had under discussion the matter of lighting the proposed Interstate Avenue improvement project in Portland. In the discussion of this matter it was agreed by all that some system of lighting should be installed but the question arose as to whether sodium vapor or incandescent lights should be used and whether or not provision should be made for lighting the street between intersections as well as at the intersections. The Commission decided that the streets should be lighted uniformly between intersections so as to avoid the hazard that might obtain if automobilists are required to drive through a brightly lighted intersection and then to suddenly enter a darkened area. The question also arose as to whether or not the Bureau of Public Roads would approve an expenditure of federal funds for such lighting work and whether or not the City of Portland would agree to furnish the electricity and would maintain the lights if the state installed them. After considerable discussion the Commission approved the installation of sodium vapor lights but ordered that they be installed in such manner that they can be changed to the incandescent type of lights later on, if necessary, at minimum expense; provided, however, that the Bureau of Public Roads will contribute toward the cost of such installation and the City of Portland will furnish the electricity for the lights and will maintain them at city expense. The Engineer was instructed to contact the officials of the Bureau of Public Roads and the City of Portland in regard thereto. In view of the action taken on this matter, the Commission decided to cancel the authority previously granted for the installation of sodium vapor lights along the East Portland-Oregon City Highway between Ross Island Bridge and East 17th Street, Portland, in the event that the lighting of Interstate Avenue in the manner approved is carried through to completion.

The Commission also considered the proposal of the Portland Traction Company to construct a turnaround for its trolley buses on North Denver Avenue, Portland, at its intersection with Willis Street, so as to eliminate the necessity of driving the buses around one city block. The Engineer advised that the state highway is now routed on North Denver Avenue northerly from Lombard Street, but it is proposed to reroute it along Interstate Avenue north from Lombard Street to a connection with North Denver Avenue between Willis Street and Argyle Street, and that the plans call for leaving a small triangular area at Willis Street for the convenience of pedestrians. Further, that the Portland Traction Company proposes to use this small triangular area in connection with its turnaround. He pointed out that the use of the island by the company would render it valueless as a safety measure and would greatly increase the hazard to pedestrians because the intersection at this point is very wide. He recommended that the company's request for the use of this island be denied and that the company be required to route its buses around the city block rather than to reverse them at this intersection. After discussion, the Commission decided unanimously to proceed with the construction of the Interstate Avenue project in accordance with the original plans, retaining the island for safety purposes, and to discuss the matter of the bus turnaround with the Portland Traction Company officials later.

The Commission considered and approved a project proposal for additional W.P.A. work on the Wolf Creek Highway between highway engineer's station 668+00 and 1530+00 on the Nehalem River-Sunset Camp Section, involving

APR 27 1938

a total expenditure of \$615,076 for slide removal, roadbed topping, replacement of fills, removal of damaged trees, and a general right of way cleanup. The state's share of this expense was estimated at \$129,940 and the cost to be paid with W.P.A. funds at \$485,136.

The Commission also considered and approved a project proposal for a W.P.A. roadside beautification project on the Old Oregon Trail at the west end of the overcrossing in Pendleton. The estimated total cost of the project is \$7,853.20, of which the state's share is estimated at \$2,504.00 and the cost to be paid with W.P.A. funds at \$5,349.20. The approval of this project was conditioned upon the Commission's securing a satisfactory agreement with the City of Pendleton providing for the city to maintain the project after completion.

The Commission by unanimous vote authorized the State Highway Engineer to attend a meeting of the Design Committee of the American Association of State Highway Officials which is to be held in Chicago, Illinois, on May 26 and 27, 1938. The Engineer explained that the Federal Government would pay all expenses incident thereto.

The Commission also authorized Mr. Harold B. Say, Director of the Travel and Information Department, to travel throughout the State of California at state expense for the purpose of contacting newspaper officials of that state whose publications are used in advertising the State of Oregon, provided the expense thereof is approved by Governor Martin.

The Assistant Attorney requested authority for representatives of the Right of Way Department to contact, at state expense, officials of the Federal Land Bank in Spokane, Washington, relative to the matter of severance damages to be paid the owners of large wheat ranches in Umatilla County through whose property it is proposed to relocate the Adams-Athens Section of the Oregon-Washington Highway. The Commission granted the request by unanimous vote, subject to approval by Governor Martin.

The Commission considered and denied the request of Rose City Post No. 35, American Legion, for a contribution of \$2,000 of state highway funds to finance the sending of the American Legion band to Los Angeles, California, in September of this year.

The Engineer brought up for discussion the matter of borrowing funds from the Federal Government under the plan suggested by President Franklin D. Roosevelt, whereby it is proposed that funds be loaned to the states without interest, the same to be paid back to the Government at the rate of 2 per cent annually. He suggested that, if Congress approves the President's recommendation, the Highway Commission borrow \$15,000,000 under the provisions of the act, which would enable the construction of many worthy projects much sooner than can be accomplished under the present setup. The Attorney gave as his opinion that the Commission has legal authority to arrange for such a loan if it so desires. The matter was discussed at some length but a decision thereon was deferred for future consideration.

APR 27 1938

The Commission considered and approved Chairman Cabell's letter, dated April 28, 1938, and directed to the county courts of counties of the State of Oregon, with respect to the programming of federal aid secondary highway funds.

The Attorney discussed with the Commission matters pertaining to the acquisition of right of way for the Upper Columbia River Highway across lands owned by Mrs. Juanita Starr, and particularly the question whether or not it would be advisable to turn over to Mrs. Starr certain tidelands fronting on Lot 1, Sec. 34, T. 2 N., R. 6 E., W.M., and on Lot 1, Sec. 3, T. 1 N., R. 6 E., W.M., in order to effect a settlement for such right of way. It appeared to the Commission that the tidelands in this particular location are of no value from the state highway standpoint, as are the tidelands in other locations, in view of which the Commission indicated that it had no objections to the relinquishment of such tidelands in favor of Mrs. Starr. It was considered, however, that action to that end should be effected through the State Land Board, from which the tidelands were obtained by the State Highway Commission. Accordingly, the matter was left open for dealings between the State Land Board and Mrs. Starr, the idea being that if the State Land Board is willing that Mrs. Starr should own the tidelands, then the Commission will reconvey them to the State Land Board which in turn can convey them to Mrs. Starr.

The Commission adjourned at 11.45 o'clock p. m., to reconvene on the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, April 28, 1938

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Bids as follows for highway construction projects, sale of buildings, and for the furnishing of a Fidelity "Blanket" or "Schedule" Bond, covering certain highway department employees, were opened and read in conformance with previously published notice:

Chairman Cabell announced that the award of contracts and sale of buildings would be made by the Commission at 2:00 o'clock p. m. in the same room, but that the Commission must have further time to study the bids received for the furnishing of the bond.

The matter of oiling a 3-mile section of the Cape Arago Secondary Highway from Charleston, northerly, to a connection with the oiled section south of Empire, had the attention of the Commission. On account of lack of funds to finance a standard oiling improvement, the Commission decided to put a light oil treatment on this section, extending through the town of Charleston, which the Engineer estimated would cost about \$2,500. The Engineer was

APR 23 1938

instructed to charge this expense to the Emergency Fund account in view of the fact that no provision has been made in the 1938 budget for the same.

The Commission conferred with Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, in regard to constructing a seal coat on the section of the Salmon River Highway, in Lincoln County, that was reconstructed last year, under a Bureau of Public Roads contract. It appears that part of this work was done under adverse conditions, and, as a result, the surface of the road is ravelling quite badly, necessitating additional seal, but there is a question as to where the money is coming from to finance the work. Mr. Lynch explained that this improvement is a Government obligation, but conditions are such that it cannot be done under Government contract or by Government forces, so they are now asking the state to do it at Government expense. He estimated that the project would cost about \$25,000 and suggested a temporary transfer of such amount of Forest Highway Funds from the Earl McNutt contract for the construction of a section of the Upper Columbia River Highway, where it will not be needed until later in the season. In this connection Mr. Lynch recalled that the state has already contributed \$90,000 toward the McNutt contract, and agreed, if the Commission will approve the transfer of \$25,000 from this account now, to replace it with a like amount of Forest Highway Funds that accumulate by reason of savings in the contracting of other forest highway work. After discussion the Commission agreed unanimously to the proposition as presented by Mr. Lynch and thereupon signed an agreement with him and C. J. Buck, Regional Forester, covering the matter. The Engineer was authorized to advertise the project for bids to be received at the next meeting.

Messrs. Louis Simpson and George Vaughn, representing the Chamber of Commerce of the town of Empire, Coos County, came before the Commission in regard to the oiling of the Cape Arago Secondary Highway. Mr. Simpson urged the Commission to allocate funds for the oiling of this road from the end of the oiled section south of Empire to and through the town of Charleston. He said that they would be satisfied with an inexpensive, temporary oil treatment if the Commission does not have sufficient funds to finance a standard improvement. He also asked the Commission to proceed with the acquisition of right of way needed for the construction of the Cape Arago Secondary Highway to Cape Arago State Park, and offered free right of way 80 feet wide across his holdings, and to assist the Commission in securing right of way from the other land owners.

Mr. Vaughn asked for the widening of the oiled portion of the Cape Arago Highway through the town of Empire. He alleged that the present roadway is narrower within the city than it is outside the city and suggested that the shoulders adjacent to the present oiled roadway be also oiled. Chairman Cabell advised that it would not be possible for the Commission to finance a standard oiling project on the Cape Arago Secondary Highway this year but the Engineer has recommended a light oil treatment, which would allay the dust, and the Commission will endeavor to find the funds to finance such work. He gave as his thought that the construction of such temporary improvement would not jeopardize the chances of securing a permanent improvement later. Mr. Simpson approved the plan outlined by Chairman Cabell.

The Engineer advised that there is no rock adjacent to the oiled roadway through Empire and it would be a useless expenditure of funds to attempt to oil the same without first stabilizing with rock materials, which the Commission could not do properly now because funds are not available to finance the work. He indicated a willingness to investigate the matter the next time he is in that vicinity and to see what can be done about widening a certain curve in Empire.

County Commissioner Wm. Baer of Deschutes County came before the Commission in regard to Deschutes County's indebtedness to the state for road construction purposes. He said that the County Court has included in its 1938 budget an amount of \$3,000 to take care of this account, but before paying it would like assurance from the Commission that it will be spent for the improvement of the Tumalo Falls County Road. He was informed that the Commission has no legal authority to spend state funds for improvement of roads that are not on the state highway system. The Engineer suggested that the money be spent to improve a state highway near Bend, such as the secondary highway known as Century Drive. He recalled that there has accumulated to Deschutes County's credit in the state secondary highway account about \$5,000 which would be available for expenditure along with the county's \$3,000. Commissioner Baer and the members of the Highway Commission approved this suggestion and the Engineer was thereupon instructed to go into the matter further with the county court.

Mr. Jack Wagner, Chairman of the Grievance Committee of the Oregon Truck Owners Association, Portland, was present in regard to the use of privately-owned trucks on W.P.A. projects under the jurisdiction of the State Highway Commission. He was accompanied by Mr. M. Gumbert and Mr. A. F. Owen, also members of this committee. They alleged that the State Highway Commission is not living up to the intent of the law when it assigns state-owned trucks for use in connection with such W.P.A. projects, and they asked the Commission to change its policy in this regard and to hereafter employ privately-owned trucks that are on relief. They also alleged that the W.P.A. requirements with respect to equipment are not being adhered to, so far as the state trucks are concerned, and that there are many state trucks now employed on such projects that would be ruled off the job if they were privately owned, because of defects.

The State Highway Engineer refuted the statements of Mr. Wagner. He pointed out that the drivers of the state-owned trucks on such projects are men taken from the relief rolls; so, from that standpoint, no advantage would be gained by the employment of privately-owned trucks. He further stated that he is positive that the state-owned trucks are given as strict inspection as the privately-owned trucks because it was never intended that the state equipment should be given any advantage in that regard; but he will look into the matter and will insist that the W.P.A. authorities hereafter inspect them just as severely as the privately-owned trucks in the event that investigation reveals that they are not now being given such inspection. The Engineer advised that the money that the State Highway Commission is spending on these jobs is public money and must be spent in the most economical manner and to the best advantage for the people who provide it, and the Commission

APR 28 1938

has determined that the most economical way to provide truck service on such jobs is to furnish state-owned trucks. He pointed out that, at the rental rate paid by the W.P.A. for trucks, the state could pay for the trucks in about three months' time, considering that the trucks are worked three shifts, and then the state would still have the trucks on hand at the end of that period; whereas, if privately-owned trucks were employed, the State would still have to pay out the same amount of money in rentals but the state would not own the equipment and would in effect buy the same equipment over and over again.

Chairman Cabell concurred in the remarks of the Engineer. He summed up the situation by stating that all state-owned trucks hereafter must meet rigid inspection by the W.P.A. authorities, the same as privately-owned trucks if they are not being given such rigid inspection at the present time; that the discussion reveals that the same amount of relief employment is afforded by the use of state-owned trucks as is provided by the use of privately-owned trucks; also, that reports indicate that the state is receiving more value from the taxpayers' money by using state-owned trucks on W.P.A. projects than it would if it used privately-owned trucks. So, considering the matter from all angles, the Commission will continue on the present basis until such time as the engineers recommend a change, inasmuch as the Commission of necessity depends upon the engineers for advice on such matters.

Mr. Wagner disputed the Engineer's figures on the cost to operate and maintain the state-owned trucks and asked for detailed figures in regard thereto. The Engineer informed him that the Commission's records are open for public inspection at all times and that he would be glad to give Mr. Wagner all the detailed information that he desires if he will call at the office for the same.

Mr. Gumbert particularly spoke of the truck bearing the license number 30-335 which he is now operating in connection with W.P.A. work. He said that this truck in a number of respects does not meet the W.P.A. inspection requirements. The Engineer was instructed to check this truck immediately, and if it does not meet the requirements to take it off the job.

County Judge Nelson B. Higgs, of Harney County, was present in the interests of the Central Oregon Highway. He inquired as to the plans of the Commission to complete the oiling of this road between Bend and Burns, and was informed that the Commission hopes to be able to construct at least a light oil treatment on the entire length of the unoled section this year, and that it is the present plan of the Commission to construct the standard oiled surface next year. It was pointed out that this year's oiling work would provide a dustless wearing surface for the convenience of traffic. Judge Higgs was also informed that the Commission proposes to award a contract for the standard oil project some time this fall.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners, the Engineer, the Attorney, and the Secretary present.

The State Highway Engineer made the following announcement of awards of contracts and sale of buildings, such awards and sales having been previously approved by the Commission by unanimous vote:

APR 20 1938

"Bridge construction over South Fork of Coos River on Landrith County Road, in Coos County. This project is a county job and bids were taken for and on behalf of Coos County and therefore all of the proposals and bidders' bonds received in connection therewith will be turned over to the County Court. The low bidder on this project was Tom Lillebo, of Reedsport, with his bid of \$33,351.00 on Alternate "A" and \$23,115.00 on Alternate "B". The second low bid received was that of J.W. & J.R. Hillstrom, Marshfield, at \$35,028.00 on Alternate "A" and \$23,978.00 on Alternate "B". There were 2 higher bidders.

"Brothers Oasis, on the Central Oregon Highway, in Deschutes County. The low bid submitted for this project was that of A. M. Jannsen Drilling Co., Portland, at \$1,372.50. The next low bid was that of A. A. Durand, Walla Walla, Washington, at \$1,629.00. There were 6 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award to the low bidder when certain conditions have been satisfied.

"Lobert-Modoc Point Section of The Dalles-California Highway, in Klamath County. 5.03 miles grading and 2.58 miles talus rock topping. Coos Bay Dredging Co., Marshfield, submitted the low bid at \$41,420.80. Fisher Bros., Oregon City, submitted the next low bid at \$43,838.00. There were 9 higher bidders. The Commission has awarded this contract to the Coos Bay Dredging Co. at its low bid of \$41,420.80.

"Siuslaw Junction-Ross Station Section of the Pacific Highway, in Lane County. 6.37 miles paving. The Mountain States Construction Co. of Eugene submitted the low bid for this project at \$144,216.50. Jacobsen-Jensen Co., Portland, submitted the next low bid at \$145,757.00. There were 3 higher bidders. The Commission has awarded this contract to the low bidder, Mountain States Construction Co., at its bid of \$144,216.50.

"Pringle Creek-Taylor Creek Section of the Pacific Highway, in Marion County. 5.47 miles roadside improvement. The low bid received by the Commission for this job was that of the River Bend Sand & Gravel Co., Salem, at \$5,934.50. The next low bid was that of Leonard & Slate, Multnomah, at \$9,856.50. There was 1 higher bidder. The Commission has awarded this contract to River Bend Sand & Gravel Company at its low bid of \$5,934.50.

"Mills Bridge-Jordan Creek Section of the Wilson River Highway, in Tillamook County. 12.39 miles of oil mat surface treatment. J. C. Compton of McMinnville submitted the low bid for this project at \$26,954.50, using tar. The next low bid was that of Babler Bros., Portland, at \$27,693.00, also based on the use of tar. Neither of these bidders submitted a bid based on the use of road oil. There were 4 higher bids received. The Commission has awarded this contract to J. C. Compton at his low bid of \$26,954.50, using tar."

Building in Northeast Portland

"Building formerly owned by Chas. L. Schneller. Only 1 bid was received for the purchase of this building, being that of Dolan Wrecking Co., Portland, at \$21.50. The Commission has rejected this offer."

APR 20 1938

Building in West Portland Heights

"Building formerly owned by John T. Paulson. Only 1 bid was received for the purchase of this building, being that of F. A. Graddy Portland, at \$70.00. The Commission has rejected this offer."

Buildings in Albany

"Building No. 5178, formerly owned by Augusta Otto. The Commission received only 1 bid for the purchase of this building, being that of W. A. Jones, Albany, at \$61.50. The Commission has rejected this bid.

"Building No. 4967, formerly owned by John Schlehuber. The only bid received by the Commission for the purchase of this building was that of H. D. and Barbara J. Rohde, Albany, at \$61.00. The Commission considers this offer satisfactory and has sold the building to them at their offer of \$61.00.

"Building No. 4968, formerly owned by the World War Veterans' State Aid Commission. S. J. Brown of Albany submitted the only bid for this building at \$104.00. The Commission has rejected his bid.

"Building No. 4969, formerly owned by J. C. Allphin. The Commission received only 1 bid for the purchase of this building, being that of H. D. and Barbara J. Rohde, Albany, at \$76.00. The Commission has accepted this offer and has sold the building to them for \$76.00.

"Building No. 4970, formerly owned by Melvin C. Morgan. 2 bids were received by the Commission for the purchase of this building, the high one being that of H. D. and Barbara J. Rohde, Albany, at \$151.00. The Commission has accepted the offer and has sold the building to them for \$151.00.

"Building No. 4957, formerly owned by Barbara Kinney. No bids were received for the purchase of this building."

Buildings in Marshfield

"Building No. 5105, formerly owned by I. B. Tilson. The Commission received 5 bids for this building, the high one being that of J. H. Tewsley, Marshfield, at \$52.50. The Commission has accepted this offer and has sold the building to Mr. Tewsley for \$52.50.

"Building No. 5109, formerly owned by Manilo Camilo. The Commission received 2 bids for the purchase of this building, the high one being that of Earl J. Rice, North Bend, at \$17.00. The Commission has accepted Mr. Rice's offer and has sold the building to him at his offer of \$17.00."

In regard to the purchase of a fidelity bond, the Engineer made the following announcement:

APR 20 1938

"The Commission asked me to announce that it would give consideration later to the bids received this morning for the furnishing of a bond to cover highway department employees, and would announce its decision at a meeting of the Commission to be held in the Benson Hotel, Portland, on May 12, 1938."

The County Court of Wasco County, represented by County Judge G. G. Shults and County Commissioner Mace Fulton, was present in regard to the Commission's Federal Aid Secondary Highway Program in Wasco County. They gave as their understanding that the Commission proposes to improve the Chenoweth Creek County Road, and urged, if such is the case, that the improvement be confined to the section between The Dalles and the junction with a branch road leading back to the Columbia River Highway about 5 miles west of The Dalles, because this road carries very little travel beyond the said junction point. They also asked the Commission to provide in this program for the improvement of the county road known as the Fifteen Mile Creek Road, or the Kuykendall County Road, and presented a petition signed by 35 landowners in regard thereto. The Commission indicated a favorable attitude to this request but deferred action thereon pending further investigation by the Engineer. The Engineer was instructed to contact the County Court during the following week and report his findings at the next meeting of the Commission.

A delegation from Sheridan, headed by Mayor E. J. Bayliss, conferred with the Commission in regard to the reconstruction of a bridge on the county road in Sheridan. Other members of the group were Senator W. E. Burke; Harl Wood, President of the Chamber of Commerce; County Judge Wm. O. Powell; County Commissioner Thos. Bockes; and former County Commissioner W. S. Allan.

Mayor Bayliss said that the present structure was built in 1910 and is no longer suitable for, or capable of carrying present-day traffic; in fact, is a traffic hazard and needs replacement at once. He further stated that it is absolutely impossible for either the city of Sheridan or Yamhill County to finance a new structure, hence it is up to the state to assume the responsibility. He demanded a new bridge at once, same to be constructed as a state highway project and to be financed with Federal Aid Secondary Highway Funds. County Judge Powell advised that this bridge is on an important county artery of travel and should be replaced with a new, modern structure.

Chairman Cabell advised that the road on which this bridge is located is not a state highway, hence the Commission is without legal authority to expend state highway funds for its improvement. He further stated that the Commission has included in its Federal Aid Secondary Highway Program an amount for the improvement of the road outside of the city limits of Sheridan but is precluded from spending the federal money within the city limits because of the Federal Government restrictions; so, if a new bridge is to be constructed, either the county or the city will have to finance it. He explained that the Commission could not assume such responsibility without placing the road on the state highway system, which the Commission is not inclined to do because it now has all of the responsibility that it can handle. It is contrary to the established policy of the Commission, he added, to add any more roads to the highway system at the present time due to the fact that the Commission

APR 28 1938

does not have the funds to pay the cost of improving them. Furthermore, the desirability of the project under discussion is not questioned but it is simply a case of the Commission not being able to assume the additional financial responsibility. He suggested that the bridge under discussion might be financed as a P.W.A. project in the event Congress approves additional funds for such projects, which, according to information recently received, seems quite likely.

A delegation from Washington County, consisting of Loyal M. Graham, J. R. McCready, H. G. Bond, E. W. Coon, E. H. Johnson, Fred Gardner, all of Forest Grove; L. L. Crawford, Manning; County Judge Donald T. Templeton, and County Commissioner H. D. Kerkman, was present. Judge Templeton headed the group.

They inquired what action the Commission has taken on their previous request for the rerouting of the highway through Forest Grove so as to make a direct connection from 7th and Main Streets to the Gales Creek Road. They were informed that, according to the Engineer's report, the proposed route is practicable and will cost about \$11,000 for construction and \$9,000 for right of way, but the Commission has not yet inspected the location and therefore has not yet taken definite action in the matter. After discussion it was agreed that Chairman Cabell would look over this project in company with Judge Templeton at an early date.

Judge Templeton then inquired as to the prospects of early construction of two bridges at the eastern end of the Wilson River Highway. He said that there are about 650 men employed on the Wilson River road improvement and it would be a great help if these two bridges could be constructed soon. The Engineer estimated that such bridges would cost about \$40,000.

Chairman Cabell advised that the Commission has only a limited amount of money to spend in this vicinity and wants to concentrate on finishing the 17-mile section of the Wolf Creek Highway between Elsie and Sunset Camp before starting other projects, so the Commission is not in a position to say definitely today what it will do about the two bridges under discussion. He agreed to inspect the project in the near future.

Judge Templeton then inquired in regard to the Commission's railroad grade separation program and suggested as a desirable project the relocating of the Nehalem Secondary Highway between Banks and Manning. Mr. Crawford said that such relocation would eliminate nine railroad grade crossings, seven of which are in constant use by the railroad company.

Chairman Cabell advised that the railroad grade separation program for 1938 and 1939 has already been prepared. He granted that this project would be a good one for such program and agreed to give it serious consideration in the formulation of the next program for railroad grade separation funds.

A delegation from Dundee, in Yamhill County, headed by W. S. Allan, former County Commissioner of Yamhill County, and including Mayor Morris D.

Parks, A. A. Parrett, Emil Sander, Paul J. Groth, and A. H. Allan, came before the Commission and urged the paving of the Pacific Highway West full width between curbs, through the business district of their town. The Commission indicated a favorable attitude toward this request but deferred definite action thereon pending a report from the Engineer as to just how many blocks would have to be paved and what it would cost to do the work. The Engineer was instructed to report on this matter at the next meeting.

Mr. N. M. Marsh, of Marshfield, came before the Commission in regard to the penalty imposed upon him for transporting over the Oregon Coast highway loads of logs weighing in excess of the statutory load limits and the reduced load limits ordered by the Highway Commission for that particular section of the highway. He admitted the overloads; nevertheless asked the Commission to modify the penalty inasmuch as his trucks have been out of service for several weeks, and, in his estimation, he has already been penalized sufficiently for the offense.

He was informed that the Commission did not adopt its rulings for such offenses until it was forced to do so by reason of the fact that logging operators, generally, would not cooperate with the Commission and keep their loads within proper weight limits, so the Commission had to adopt a more drastic ruling and feels that it cannot make any exceptions thereto now without defeating its purpose. Mr. Marsh then asked the Commission to release on May 1st one of his trucks which, according to the penalty, is to be kept out of service until May 3rd. The Commission approved the request by unanimous vote, upon recommendation of the Engineer.

A delegation from Reedsport, representing the Chamber of Commerce, and consisting of Mayor Nelson Hogan, Wm. Lovelace, and a Mr. Burdick, was present and asked the Commission to pave "L" Street in their town, the route of the Umpqua Highway, full width for three blocks between 12th and 15th Streets. They also asked for construction on permanent alignment of a section of this highway easterly from 15th Street about 1/4 mile to a point where the new location will connect with the present highway, at Station 60+00. They urged the Commission to make provision for such construction in 1939, but in the meantime to oil the present road to allay the dust.

The Engineer advised that this is a desirable improvement and that a location survey for the same is now being made. Chairman Cabell advised that the project will be given fair consideration for next year's program.

Mr. Frank Ott came before the Commission at this time in regard to his claim for damages arising out of the reconstruction of his siphon across the Fremont Highway, near Paisley, in Lake County, which matter was discussed by the Commission previously during this session. Mr. Ott stated that he would be satisfied with the restoration of his irrigation system to the condition it was in before the highway construction. He said that he originally irrigated 25 acres of land but now is unable to irrigate any of it because of failure of the siphon to function; in fact, he lost his 1937 crop because of lack of water and has been unable to plant a crop for this season. He asked the payment of \$200 for the loss of the crop for both years, and an

APR 28 1938

additional amount for the land that cannot be irrigated when the irrigation system has been rebuilt.

The Attorney advised that his investigation of this matter reveals that the state is responsible for the crop losses and is obligated to pay Mr. Ott for the same; further, that the Commission is under obligation to restore Mr. Ott's irrigation facilities. The Engineer recommended opening up the lower end of the siphon for gravity flow of water and the digging of a ditch from this siphon across Mr. Ott's land to a connection with the existing ditch. He also recommended that the Commission pay for the land that cannot be irrigated when the facilities have been restored, being a fraction of one acre, and also pay Mr. Ott for the loss of the crops. Mr. Ott indicated a willingness to accept settlement on such basis, and the Commission approved the same by unanimous vote, subject to the condition that Mr. Ott does not demand an exorbitant amount for the land.

After considerable discussion Mr. Ott agreed to accept \$90 per acre for the land that was formerly under irrigation but which cannot now be irrigated because of the reconstruction of the highway, such rate being the difference between the value of irrigated land and the value of nonirrigable land in the vicinity. The matter was referred to the Engineer to work out the details.

The County Court of Sherman County, represented by County Judge George A. Potter and County Commissioner David Reid, was present in the interests of the Federal Aid Secondary Highway Program. They gave as their understanding that the Commission has budgeted the sum of \$10,000 of federal secondary moneys in its 1939 program for the improvement of the county road between Moro and Hay Canyon, in Sherman County. They stated a preference for the improvement of the Moro-Erskine county road, if it is not too late to make a change at this time. The Commission agreed to bear their request in mind, although it is now too late to make a change in the present program.

Mr. Alton J. Bassett, Secretary of the Capitol Reconstruction Commission, was present in regard to the proposed improvement of the north approach to the new State Capitol at Salem. The Engineer advised that the City of Salem has plans to install new sewers on Court Street prior to the repaving of this street, but the city has no funds to finance this construction and will have to hold a special election in the month of May to provide for the same, and will not be able to build the sewer in the event that the people will not approve; so there is a possibility that the Highway Department's work will have to wait until fall. He suggested, in view of the circumstances, that the Commission defer the taking of bids for the paving work until the latter part of June or the early part of July, when it will be known definitely whether or not the city can proceed with the sewer construction. The Commission approved the suggestion and so ordered.

Mr. Claude I. Scoffins and Mrs. Zelda Ploeger, Tigard, came before the Commission in regard to the proposed rerouting of the Pacific Highway West through their town. They inquired whether or not the Commission has as yet adopted a permanent route for this revision and were informed by Chairman

Cabell that the Commission has not yet decided this question because of the indefiniteness of right of way costs, but will do so as soon as possible. In this connection the Secretary presented a petition signed by numerous residents of the town of Tigard recommending the adoption of the southeasterly survey for the permanent routing of this highway.

Miss Ruth Beatty, Brownsville, was present in regard to the rerouting of the Halsey-Sweet Home Secondary Highway in Brownsville. She gave as her understanding that the plans for this improvement require the removal of her mother's house and the destruction of some trees. She asked that the plans be revised, if possible, so as to miss this property; and, in the event that cannot be done, that the house be moved at the earliest possible time.

The Engineer advised that if the improvement is constructed to permanent standards, Mrs. Beatty's property cannot be avoided, although that would be a desirable thing to do if possible. He further advised that the Commission proposes to take bids for this project on June 2 and that options for the right of way are now being secured. After discussion, the Commission ordered that negotiations with Mrs. Beatty for the acquisition of her property be given special attention. In order to expedite settlement, the Commission referred to Chairman Cabell the matter of approval of the consideration to be paid for Mrs. Beatty's property.

Mr. Elmer Bankus, Brookings, was present in regard to the reconstruction of the Oregon Coast Highway through the town of Brookings. He was informed that the Commission has no money with which to finance this project at the present time, so the only encouragement that the Commission can give at this time is to state that this project will be given preference in the next state highway program, if there are funds to finance it. Mr. Bankus advised that the people of Brookings are still willing to donate the right of way for the project if the Commission will pay the cost of removing the buildings therefrom. He was informed that the Commission prefers not to move buildings until the project is ready for construction.

Mr. Bankus then asked the Commission to adopt the permanent route for the highway and to stake out the right of way line so that people can develop and improve their properties in conformity therewith. He was informed by Chairman Cabell that it is contrary to the established policy of the Commission to adopt highway routes until the Commission is ready to proceed with construction.

Mrs. Pearl S. Koble, Ashland, came before the Commission in regard to her claim for damages resulting from a slide which she alleges occurred on her property by reason of the construction of the Pacific Highway on new alignment in the Siskiyou Mountains, south of Ashland. She exhibited numerous pictures and read several affidavits from local residents in support of her oral arguments on behalf of her claim. She also presented a claim on behalf of L. D. Dollarhide, a neighbor, who is demanding the sum of \$500 from the Commission as settlement for damages to his property resulting from the same cause. Among other things demanded by Mrs. Koble was the repair of her private roadway.

APR 28 1938

The Engineer advised that a very thorough investigation has been made of this matter and there is no question in his mind that the slide occurred from natural causes and that the highway construction work had nothing whatever to do with it. After a lengthy discussion, the Commission by unanimous vote denied Mrs. Koble's claim and advised her to consult an attorney and take the matter into court if she so desires, because it feels that the amount heretofore paid her as consideration for right of way across her property is sufficient. Mrs. Koble insinuated that the Commission has an ulterior motive in referring her to an attorney and stated a preference to file her own claim. She was informed by the Commission that due consideration will be given to any claim that she files. The Attorney was instructed to assist Mrs. Koble in the preparation of her claim on a cash settlement basis. (See minute entry on the following day for details of claim.)

The Commission adjourned at 5:45 o'clock p. m. to reconvene at 9:00 o'clock a. m. on the following day in the same room.

Portland, Oregon, April 29, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

**BAKER-HOMESTEAD HIGHWAY
BAKER-FLAGSTAFF HILL SECTION
GRADING, OILING, FURNISH CRUSHED GRAVEL IN STOCK PILE**

E. H. Itschner	\$38,762.00
Newport Construction Company and Kern & Kibbe	41,088.60
Roy L. Houck	45,164.00
Leonard & Slate	48,412.00

**NEHALEM SECONDARY HIGHWAY
BRIDGE OVER WALLUSKI RIVER**

Mountain States Construction Company	\$33,788.50
Makela Construction Company	39,273.00
J. F. Johnston	40,004.00
Gilpin Construction Company	41,712.50
Dolan Construction Company	44,458.00

**SALMON RIVER HIGHWAY
OTIS-BOYER SECTION - CRUSHED ROCK OR GRAVEL**

O. C. Yocom	\$12,900.00
River Bend Sand & Gravel Company	12,975.00
Saxton, Looney & Risley	13,720.00
Harold Blake	15,000.00

APR 29 1938

SANTIAM HIGHWAY
SHEEP RIDGE-TOLL CREEK SECTION - GRADING

Leonard & Slate	\$130,379.00
Diesel Oil Sales Company	137,010.00
Berke Bros., Inc.	137,639.00
J. A. Lyons	138,465.00
Fisher Bros.	139,960.00
Kern & Kibbe	142,381.00
McNutt Bros.	152,510.00
Roy L. Houck	154,671.00
Morrison-Knudsen Company	160,665.50
E. C. Hall	163,296.00
Joplin & Eldon	194,341.00

WOLF CREEK HIGHWAY
BRIDGES OVER WOLF CREEK

Snook Bros.	\$ 14,105.00
Mountain States Construction Company	15,832.50
J. F. Johnston	15,960.00
Shattuck & Neland	16,199.00
Frank Watt Construction Company	16,377.50
Warren Northwest, Inc.	16,740.00
R. F. Nichol	17,080.00
Averill & Corbin	17,550.00
Edlefsen-Weygandt Company	17,640.00

PACIFIC HIGHWAY WEST
McMINNVILLE SECTION - ROADSIDE IMPROVEMENT

River Bend Sand & Gravel Company	\$ 5,467.50
Leonard & Slate	6,184.00
O. C. Yocom	6,255.00
The United Contracting Company	7,939.30
J. C. Compton	8,489.00

SALEM-DAYTON SECONDARY HIGHWAY
SPAULDING RANCH SECTION - GRADING, SURFACING, OILING

	<u>Using Road Oil</u>	<u>Using Tar</u>
Mountain States Construction Company		\$ 28,944.30
Saxton, Looney & Risley		29,514.00
Leonard & Slate	\$ 32,222.40	31,897.00
Harold Blake		32,571.50
Oregon Contracting Company		33,629.50
E. C. Hall		35,207.00
Joplin & Eldon	36,251.00	36,000.00
Edwin C. Gerber	36,229.00	36,229.55

Chairman Cabell announced that the awards of contracts would be made at 2:00 o'clock p. m. in the same room.

APR 29 1930

The Attorney presented the claim of Mrs. Pearl S. Koble for the settlement for damages to her property, same having been prepared as a result of the conference with Mrs. Koble on the previous day. He said that Mrs. Koble alleges that she has 32 acres of land involved in the slide and that she values this land at \$150 per acre; further, that she alleges that the improvements on her property are worth \$52,000 but she will sell her entire holdings to the state for the sum of \$10,000. The Commission declined the offer by unanimous vote.

The Attorney also reported on the claim of Mr. L. D. Dollarhide in the sum of \$500, which was filed by Mrs. Koble. He stated that Mr. Dollarhide's claim arises from highway construction in the vicinity of the Robertson property. The Commission refused to pay this claim.

The Engineer inquired as to what he should do about fixing up Mrs. Koble's wood-hauling road. He said that embankment material from the highway slid across this road as a result of recent heavy rains and that, while practically no damage has been done, it might be proper to clean this off so that the road can be used. He estimated that it would cost \$75 or \$100 to do this. He was thereupon authorized by the Commission to remove this slide material from the roadway but to do nothing for which the state is not responsible.

The Commission had under consideration the matter of approving projects for a proposed P.W.A. construction program, having received information from C. C. Hockley, Regional Director, Public Works Administration, that there is evidence that the Federal Government intends to revive the P.W.A. setup. The Engineer submitted a list of eligible projects, being those that were approved by the Commission for construction in the previous P.W.A. program but were not undertaken because of a change in the P.W.A. rulings.

In the consideration of this matter the possibility of securing federal funds under a new federal program proposed by President Roosevelt, providing for loans to the states without interest, and repayment of the same at the rate of 2% annually, was discussed but no action was taken thereon. The Commission decided to confine its P.W.A. program to a few projects, and accordingly selected the following from the list presented by the Engineer:

Construction of the Fleming Ranch-Shindler Bridge Section of the Albany-Lyons Secondary Highway, in Linn County, consisting of 1.25 miles of grading and surfacing and the construction of a bridge;

Construction of a district maintenance office and storage building at Klamath Falls;

Construction of Umatilla Bridge Section of the Hermiston Secondary Highway, in Umatilla County, consisting of .95 mile grading and surfacing and the construction of a bridge.

The Engineer was authorized and instructed by the Commission to submit such projects to the P.W.A. authorities with the request that the

remaining projects be held pending until it is definitely known whether or not the other federal moneys referred to are obtainable.

The Engineer reported that the Coos Bay Port Commission has refused to approve substitution of a fill and tidegate for a bridge at Catching Inlet; hence it will not be possible to make such substitution in type of construction, as has been requested by the property owners in the Catching Inlet district. In view of this report, the Commission decided to proceed with plans for the construction of the bridge that was originally contemplated. The Engineer was instructed to inform the sponsors of the tidegate project that the Commission has no alternative but to construct a bridge at this location unless the Coos Bay Port Commission will withdraw its objection to the fill and tidegate construction.

The Commission had under consideration the approval of a sign which Foster & Kleiser propose to erect at the junction of the Salmon River Highway and the Oregon Coast Highway, in Lincoln County, directing travel through Newberg, Sheridan, McMinnville, and other towns between Portland and Otis. Inspection of a sample sign revealed that it did not meet with the legal requirements, and accordingly the installation of the same was disapproved by the Commission by unanimous vote. (This matter was discussed later in the session when a representative of Foster & Kleiser was present, at which time the matter was gone into more in detail, with the result that the Commission deferred definite action on the matter until the next meeting.)

The Engineer requested instructions in regard to the disposal of numerous chain-type signs which have been installed in various places along state highways apparently for the purpose of directing travel to the Longview-Rainier Bridge over the Columbia River. He said that the signs evidently were erected at the direction of the Longview-Rainier Bridge Company; that some of them are not objectionable; but that others attempt to direct traffic and therefore conflict with the Oregon law in regard to signs. He suggested that a letter be written to the company calling attention to the law in this regard and that the company be ordered to remove the signs that are in conflict with the law, and that it be requested also to remove those that apparently meet the legal requirements but are objectionable from the standpoint of preserving the aesthetic features of the highway. The Commission approved the Engineer's suggestion and instructed him to write such letter to the Longview-Rainier Bridge Company and to give them 10 days within which to remove the illegal signs. He was authorized to take steps as may be necessary to remove such illegal signs with state forces in the event that the company will not cooperate.

The Engineer was instructed also to see what can be done about removing the sign of the Marcus Whitman Hotel at Pendleton, which contains misleading information in regard to distances from Pendleton to Seattle.

In connection with this matter the Commission discussed the removal of signs from the Columbia River Highway through the Parkrose District just east of Portland, which has heretofore had the attention of the Commission. The Attorney advised that public officials who are charged with the maintenance of highways have certain responsibilities with respect to such highways

APR 29 1938

and that city officials have similar responsibilities with respect to city streets, but it is the Highway Commission's responsibility exclusively to maintain state highways outside the corporate limits of cities and towns. He further advised that the courts have construed that the law with respect to cities not only makes the city officials responsible for the surface of the street but it also makes them responsible for the area overhead, and, in his estimation, the same interpretation could be applied to the Highway Commission's jurisdiction over state highways; so, in view thereof, the Highway Commission could be held responsible for a sign which overhangs the highway. He further stated that, while the statutes prohibit the maintenance of advertising signs within the right of way of state highways outside of cities and villages, in his estimation the Highway Commission could adopt a resolution to prohibit signs from being erected on the highway or overhanging the highway, and that the Commission could enjoin the maintenance of such signs if it so desires. In the discussion of this matter the Commission indicated that it would not object to the maintenance of a sign which is attached closely to a building through a district where there is a well-defined sidewalk area off the traveled portion of the highway but would be absolutely opposed to signs which overhang the highway and to so-called curb signs.

In regard to the signs in the Parkrose District, the Commission decided to recommend to the delegation from Parkrose, which is to appear before the Commission later in the day, the incorporation of this district, which would automatically dispose of the issue and would relieve the Highway Commission from responsibility with respect to the signs in this particular vicinity.

A delegation representing the Oregon Roadside Council and headed by Mrs. Jessie M. Honeyman, Portland, conferred with the Commission in regard to financing an educational program which they propose to conduct with a view to carrying out the recommendations of the State Planning Board for an organized effort to remove signs from roadsides and to clean up such roadsides, such cleanup work to be conducted on private property adjacent to but outside the highway right of way and therefore outside the Highway Commission's jurisdiction. Others in the delegation were Mrs. Effie Smith, Mrs. A. E. Rockey, Mrs. Jack Murphy, all of Portland, and Mrs. E. C. Dalton of St. Helens.

Mrs. Honeyman read aloud and then presented to the Commission a petition requesting a contribution of \$3,600 of state highway funds to finance such educational work. They were informed by Chairman Cabell that the Commission regrets exceedingly that it does not have the legal authority to spend state funds in this cause. He further stated that the Highway Commission approves the plans of the Oregon Roadside Council in this regard and is in sympathy with the movement, but because of the legal barrier is prohibited from assisting in the financing of the work as a state body. Commissioners Aldrich and Tou Velle concurred in the remarks of Chairman Cabell. Each Commissioner thereupon made a personal contribution toward the fund which the Council is endeavoring to raise. The Roadside Council was authorized by the Commission to make general use of the statements made by Chairman Cabell in regard to this undertaking.

The Commission discussed briefly the offer of the City of Portland

to convey unto the state property known as the Vista House on the Upper Columbia River Highway, in Multnomah County. The matter was referred by the Commission to Chairman Cabell and the Engineer, with power to act.

The Commission also discussed briefly matters pertaining to the Cartwright Bill now before Congress which provides for federal highway funds for the fiscal years 1940 and 1941. In view of the urgency of this matter the Commission decided to wire the Oregon representatives in Congress urging their assistance in securing the passage of this bill at this session of Congress. The Attorney was instructed to prepare and send such telegram.

The matter of permitting the mooring of boathouses and floating docks that are used by fishermen in connection with fishing activities in the Columbia River near Corbett had the attention of the Commission. The Attorney recalled that the Commission some time ago authorized the continuance of fishing activities in the vicinity of Corbett where the state owns tidelands and has acquired adjoining uplands, and at the present time piling and dolphins which have been placed in the river are used as moorages for boathouses, floating docks, et cetera, which facilities will have to be moved out farther into the river when the highway is constructed. He said that this question is involved in some of the right of way dealings for the new highway and requested instructions as to just how far he should go in making commitments regarding expense of removing the present facilities and giving assurances as to what the Commission will permit in the future. He inquired particularly whether or not the Commission would permit any new docks or buildings to be constructed in such places, or new piling driven, and, if so, what will be the requirements of the Commission as to the granting of permits and the supervision and control over the construction of structures and the subsequent maintenance thereof.

The Engineer advised that at least one of these owners has requested definite information as to the policy of the Commission with respect to the dock at Corbett before she will agree to right of way negotiations. He further stated that at a previous meeting the Commission announced that it did not wish to deprive the fishermen in this vicinity of convenient access to the river and instructed the Engineer to select several sites along the river where fishermen would be permitted to maintain docks, and one of the sites selected is at Corbett. He suggested that the fishermen be allowed to re-drive their dolphins and maintain their harbor in the same relative position at Corbett as they now have until such time as the new highway is constructed, when they will have to establish their docks farther out in the river, and that the matter be covered by issuance of revocable permits.

After discussion the Commission approved the Engineer's suggestion by unanimous vote subject to the condition that permits should be limited to the restricted area at Corbett, and if requests are received for permits to maintain similar facilities at other locations, then they shall be brought to the attention of the State Highway Commission for approval.

The Commission had under consideration a letter from Mr. Earl B. Moore, City Attorney of John Day, Oregon, in regard to a controversy between

APR 29 1936

the city and Mr. Ira G. Boyce relative to the maintenance of a siphon across the John Day Highway in the eastern part of John Day. It appears that this siphon is maintained in an unsanitary condition and at times becomes a nuisance to surrounding households, and that the City Council has gone on record as opposed to the continuation of permission to maintain this siphon, but Mr. Boyce insists that his franchise or permit for the maintenance of the same in its present location be continued. It is Mr. Moore's contention that the State Highway Commission is concerned because the siphon is constructed across the highway right of way and he is requesting the Commission to take no action in regard to the matter until the City Council has completed its negotiations with Mr. Boyce. After discussion the Commission instructed the Engineer to suggest to the city officials that the city condemn the siphon as a nuisance. The Commission authorized the Engineer to fill up the siphon in the event the city's proceedings are successful.

A letter was presented from Sherman A. Brown, Sheridan, Oregon, requesting authority to maintain a small pumping plant within the limits of the highway right of way near the Goose Neck Creek Bridge on the Dallas-Coast Secondary Highway at Buell. The Commission denied the request by unanimous vote.

A letter was presented from Frank Z. Howard, County Engineer of Klamath County, on behalf of the Klamath County Court, relative to the allocation of Federal Aid Secondary Highway Funds in Klamath County. It appears that the Commission has budgeted an amount of \$12,000 of the 1938 funds for the Whitney Bridge Road, and \$24,000 of such funds for the Malin-Bonanza Road, but the County Court wants all of these funds expended for the improvement of the Malin-Poe Valley-Bonanza Road, and has stated its willingness to assume the responsibility of oiling the other road this year. The Engineer recommended adherence to the program as arranged, and if the work on the Whitney Bridge Road does not require all of the funds that have been set up for the same, that the amount remaining be expended for the further improvement of the Malin-Bonanza project. The Commission approved the recommendation unanimously.

A letter was presented from F. L. Owens, Cloverdale, Oregon, urging improvements to the Oregon Coast Highway in front of his premises so as to reduce the hazard that now exists when he drives his cattle back and forth across the highway. The Engineer advised that the highway passes between Mr. Owens's house and his barn and that Mr. Owens is a dairy rancher and has occasion to drive his cows across the highway several times a day, which is rather hazardous due to the fact that there are several curves in the highway at this point. He further stated that the existing highway is not in a permanent location and that it is proposed to reconstruct it at some future date as a major project, but the Commission has no funds to finance such work now. He suggested the installation of a 72-inch metal pipe across the highway for use as a cattle pass and estimated that such pipe could be installed for about \$1,200. He pointed out that this pipe could be removed to the new highway location when the highway is reconstructed, so the pipe expense would not be entirely lost.

In the discussion of this matter it was pointed out that Mr. Owens

donated the right of way for the new highway with the understanding that a cattle pass would be constructed under the same for his use. In view of the circumstances and the fact that the Commission is apparently obligated to do something for Mr. Owens to alleviate the danger caused by this condition, the Commission by unanimous vote authorized the Engineer to install a cattle pass of the cheapest possible type across the highway at this location, costing not more than \$1,500.

The Commission considered and denied a request from Major S. L. Damon, United States War Department, for permission to construct a bus-passenger waiting room on the right of way of the Lower Columbia River Highway at a point near Gasco Station, between Portland and Linnton, it being strictly contrary to the policy of the Commission to permit such encroachments.

The Commission considered a letter from Mr. F. E. Trontier, Medford, requesting the paving of a parking strip in front of his place of business in Medford. The Commission denied the request because of the precedent that would be established and for the further reason that available funds will not permit the Commission to embark on a program of this kind at the present time.

A letter was presented from Mr. Glen Meyers, Oregon City, inquiring whether or not, when the new highway is constructed along the waterfront in Oregon City, houseboats will be allowed to remain in the river between 7th and 14th Streets. It appears that Mr. Meyers owns a houseboat at this location and has made application to the city of Oregon City for water service, but the city refuses to extend such service to his boathouse until it is known definitely whether or not the boathouses will be allowed to remain in their present location when the highway is constructed. The Engineer pointed out that if these houseboats are allowed to remain in their present location, it would defeat the purpose for which the land between the highway and the river was acquired by the state, which purpose was to eliminate any possibility of encroachments upon the state's property by buildings or facilities of any kind, and he suggested that the mooring of houseboats at such location be not allowed. The Commission concurred in the viewpoint of the Engineer and ordered that Mr. Meyers be so informed. The matter was referred to the Attorney to prepare an appropriate letter to Mr. Meyers.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with Chairman Cabell and Commissioner Tou Velle present and participating. Commissioner Aldrich was excused from attending the remainder of the session because of other pressing matters. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Baker-Flagstaff Hill Section of the Baker-Homestead Highway, in Baker County. 5.68 miles grading and oiling; also furnish 2,000 cu.yds. crushed gravel in stock pile. The low bid received for this project was that of E. H. Itschner, Molalla, at \$38,762.00.

APR 29 1930

The next low bid was that of Newport Construction Company and Kern & Kibbe, Portland, at \$41,088.60. There were 2 higher bidders. The Commission has referred all bids received for this job to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Walluski River Bridge Section of the Nehalem Secondary Highway in Clatsop County. Remodel 130 lin. ft. steel swing span; construct 348 lin.ft. pile trestle approach; and 0.34 mile grading and surfacing. The Mountain States Construction Company, Eugene, submitted the low bid for this project, at \$38,788.50. Makela Construction Company, of Astoria, submitted the next low bid in the amount of \$39,273.00. There were 3 higher bidders. The Commission has awarded this contract to Mountain States Construction Company at its low bid of \$38,788.50.

"Otis-Boyer Section of the Salmon River Highway, in Lincoln and Tillamook Counties. Furnish 5,000 cu.yds. crushed rock or gravel in stock piles. O. C. Yocom, Portland, was the low bidder on this job, at \$12,900.00. River Bend Sand & Gravel Company of Salem was the next low bidder at \$12,975.00. There were 2 higher bidders. The Commission has referred all bids received to the Engineer, with power to award the contract to the low bidder when certain conditions have been satisfied.

"Sheep Ridge-Toll Creek Section of the Santiam Highway, in Linn County. 1.53 miles grading. Leonard & Slate, Multnomah, submitted the low bid therefor in the amount of \$130,379.00. Diesel Oil Sales Company, Seattle, Washington, submitted the next low bid in the amount of \$137,010.00. There were 9 higher bidders. The Commission has awarded this contract to Leonard & Slate, the low bidders, at their bid of \$130,379.00.

"Construction of two concrete bridges on the Wolf Creek Highway, in Washington and Columbia Counties. Snook Bros., Eugene, submitted the low bid in the amount of \$14,105.00. The next low bid was submitted by the Mountain States Construction Company, Eugene, at \$15,832.50. There were 7 higher bidders. The Commission has awarded this contract to Snook Bros. at their low bid of \$14,105.00.

"McMinnville Section of the Pacific Highway West, in Yamhill County. 2.04 miles roadside improvement. The low bid received for this project was that of the River Bend Sand & Gravel Company, Salem, at \$5,467.50. The next low bid was that of Leonard & Slate, Multnomah, in the amount of \$6,184.00. There were 3 higher bidders. The Commission awards this contract to the River Bend Sand & Gravel Company at its low bid of \$5,467.50.

"Spaulding Ranch Section of the Salem-Dayton Secondary Highway, in Yamhill County. 1.66 miles grading, surfacing and oiling. The

Mountain States Construction Company, Eugene, submitted the low bid of \$28,944.30, based on the use of tar. This company submitted no bid using road oil. The next low bid was that of Saxton, Looney & Risley, Oak Grove, in the amount of \$29,514.00, also based on the use of tar. This company did not submit a bid using road oil. There were 6 higher bidders. The Commission has referred the bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

Messrs. Fred Spoeri, John Abbett, and C. H. Hoss, representing residents of Glencullen district, near Hillsdale, Multnomah County, were present in regard to the improvement, as a state highway route, of the old Southern Pacific railroad grade between Hillsdale and a connection with Barbur Boulevard, Portland. Mr. Spoeri headed the group. He said that this section is about 3/4-mile long and that the railroad company has indicated a willingness to relinquish the same to the state for state highway purposes and they are now requesting that that be done as an aid to the development of the district contiguous thereto.

The Engineer advised that, in his estimation, the project has merit and that, if the Commission so desires, the work can be done as a county road project to be financed with Federal Aid Secondary Highway Funds. After discussion the Commission referred the matter to the Engineer for investigation and report.

A delegation from Depoe Bay, Lincoln County, came before the Commission in regard to the purchase, by the state, of the E. B. Winchell tract of land located at the north end of the Depoe Bay Bridge on the Oregon Coast Highway and between the highway and the Pacific Ocean, said tract of land containing a fraction of an acre. The group consisted of C. W. Crawford, Charles Turner, and Paul Baird, all of Depoe Bay, and Mr. Carl Johnson and Mr. W. B. Schively, attorney, of Portland. Mr. Schively was spokesman for the group.

He urged the Commission to acquire this tract so as to keep it from being commercialized and to prevent a building from being constructed thereon which would interfere with the view of the ocean from the highway. He said that a Mr. Harley O. Youngblood, Portland, is now negotiating with Mr. Winchell for the acquisition of the tract and plans to construct a building thereon in which to conduct a restaurant business, and, in their estimation, the state should intercede so as to prevent the property being used for such purpose. They gave as their understanding that the property is being purchased by Mr. Youngblood for the sum of \$3,500 and stated their willingness to contribute the sum of \$500 toward the cost of the property if the State Highway Commission can obtain it and will pay the remaining amount necessary to secure title to the same.

The Engineer stated that the area joins the state park at this location and in his estimation the state should own it if it can be acquired for a reasonable amount. He pointed out that the Commission has plans to

APR 29 1938

widen the bridge at this point and in connection therewith will need some of the area for right of way and in view thereof suggested that the Commission acquire at least enough for such purpose.

Mr. Schively presented a petition signed by 61 residents of Depoe Bay and vicinity urging the Commission to acquire this area.

Mr. Youngblood, who is purchasing the tract from Mr. Winchell, was also present. He said that he has had an option on the property since the summer of 1937 and has already prepared plans for the development of the same, in fact has already started to construct foundations for a building. He further stated that he intends to proceed with the development work and that the land is not for sale although he would be willing to let the state have the small portion that is needed for right of way.

Chairman Cabell asked Mr. Youngblood how much he would take for his interests in the whole tract. Mr. Youngblood reiterated that it is not for sale but if he had to sell it he would not consider less than \$10,000. He filed with the Commission a petition signed by 26 residents of Depoe Bay and vicinity urging the Commission not to purchase any more of the property than is actually needed for right of way purposes.

The Commission considered, after further discussion, that the price demanded by Mr. Youngblood is more than the state can pay for the property; also that it is now too late to get Mr. Youngblood to change his plans. The Engineer asked Mr. Youngblood to defer further construction activities until the State Parks Superintendent has had an opportunity to make some investigations relative to encroachments on the state's land. He agreed to do this but advised that he now has men working there and such investigation should be made without delay. Mr. Youngblood pointed out that some steps are needed leading down from the state's property to his land and gave as his thought that the state should construct such steps; also that he should have an entrance to his property through the stone wall at the edge of the parking area. The Engineer advised him to make no encroachment until the matter has been passed upon by the State Parks Superintendent who will be requested to pass upon the matter of steps at the same time and to render a report to the Commission.

The Engineer was instructed later by the Commission to secure an option from Mr. Youngblood for the acquisition of the land that is needed for right of way. He was authorized to offer him \$150 for such parcel and to condemn the right of way at once in the event the offer is refused.

Mr. Fred Williams, attorney, Salem, came before the Commission in regard to the Volz property that the Commission is endeavoring to purchase as an addition to Silver Creek Falls State Park, in Marion County. He said that he represents Mr. Roman Kintz, who is a tenant on this property; that Mr. Kintz took possession of the property about July, 1936, and immediately constructed on the premises a building for the conduct of a cafe business, and that he has invested therein the sum of \$1,962. Also, that Mr. Kintz's lease

will not expire until 1941, but he has an option to renew the lease at that time for another 5 years if he so desires. He further stated that Mr. Kintz is willing to sell his leasehold and the buildings to the state for the sum of \$3,443.00.

The Attorney advised that this property is now under condemnation but the lessees have not been made parties to the suit. The Engineer said that Mr. Kintz's buildings are of no value to the state whatsoever. He recommended that the leasehold be allowed to run out and that when it expires Mr. Kintz be allowed to remove his buildings if he wants them. The Commission deferred action on the matter pending consultation with the State Parks Superintendent.

A delegation from Parkrose, headed by Mr. Paul Sayre, attorney, Portland, came before the Commission in regard to the maintenance of business signs along the Columbia River Highway through the Parkrose district, just east of Portland. Others in the group were F. G. Clark, florist; C. M. Gilbert, proprietor of variety store; L. M. Schwary, grocer; W. L. Playfair, druggist; Robert Beadle, realtor; J. P. Cooper, proprietor of All States Auto Court; John W. Connany, realtor; George A. Zilka, service station operator; F. A. Stalcup, restaurant owner; Joe Estenson, proprietor of woodworking shop; and Henry Kempenich, Manager of Columbia Food Company.

Mr. Sayre urged the Commission to modify its recent order with respect to the removal of advertising signs through this district. He alleged that compliance with the order would create a hardship and cause irreparable damage. He pointed out that there are many business establishments along the highway through Parkrose, which is situated outside the city limits of Portland and is not an incorporated town. Furthermore, the district has no street-lighting system, and advertising signs are needed to provide such service as well as to advertise places of business. He urged the Commission to reconsider its previous action and to permit the signs to be maintained along this highway under a code of regulations similar to the regulations covering the maintenance of signs along the streets in Portland.

Mr. Clark admitted that some of the existing signs should be removed but stated that there are others which should be allowed to remain, subject to regulation by the State Highway Commission. He concurred in the statements of Mr. Sayre in this regard and advised that if the Commission will adopt appropriate regulations the majority of the businessmen in the Parkrose district will comply with them.

Chairman Cabell advised that when orders were issued for the removal of the signs in question, the Commission was under the impression that the law compelled the removal of the signs, but further study of the law indicates that the Commission may use its own discretion in the matter. However, notwithstanding the apparent ambiguity of the situation, it appears to the Commission that the public wants the signs removed and if the Commission proceeds with that in mind, all of the signs will have to be taken down except the official road signs. On the other hand, if the Commission permits exceptions, where is the line to be drawn, at the city limits or at some other point?

Mr. Sayre gave as his thought that the highway through Parkrose is in the same category as a city street in Portland and that the Commission would be strictly within its rights in controlling the signs as they are controlled in Portland. It was his thought that when a street is predominantly a business street, such as is the highway through Parkrose, businessmen should have the right to maintain the awnings and signs in front of their premises; but, where only a few businesses are concerned, the problem takes a different aspect and in that case the Commission could order the signs placed back of the right of way line.

The question of responsibility for damages incurred in case of an accident due to one of the signs was brought up by Chairman Cabell. He pointed out that the city of Portland has facilities to control the sign situation, but the State Highway Commission does not have such facilities and if an accident should occur the State Highway Commission might be held liable. He suggested that the people of Parkrose incorporate, which would relieve the Commission in situations of that kind. Mr. Sayre agreed that incorporation of the district would solve the problem satisfactorily but explained that the people of Parkrose do not want to incorporate because they would then be required to pay city taxes. After further discussion it was agreed by all that the matter should be given further study and that an attempt should be made to work out a solution prior to the next regular meeting of the Commission on June 2. The Commission instructed the Engineer to confer with representatives of the Parkrose district in the meantime in regard thereto.

The County Court of Linn County, represented by County Judge J. J. Barrett and County Commissioner H. A. Reninger, came before the Commission in regard to Linn County's indebtedness to the state for cooperative construction of the Santiam Highway. The following settlement of this claim was mutually agreed upon: (1) The state's claim against the county is in the amount of \$34,206.69, but the county court denies the debt; (2) Linn County Court agrees to pay the state the sum of \$20,000 in full settlement of the state's claim, and the State Highway Commission agrees to accept such sum as such full settlement; (3) The County Court agrees to pay the State Highway Commission a check or warrant in the amount of 40 per cent of the estimated contract price of the proposed Peoria-Harrisburg county road construction project plus 10 per cent for engineering and contingencies, but not to exceed the total sum of \$20,000, at such time as the Highway Commission advertises this project for bids, it being understood that the job will be contracted during the 1938 season; (4) When the Peoria-Harrisburg construction job is completed an adjustment of costs will be made to make certain that the county does not pay more than 40 per cent of the final costs thereof, including 10 per cent for engineering and contingencies, and not exceeding a total of \$20,000. In the event that the adjustment shows that the county is credited with the payment of less than \$20,000, then the County Court agrees to pay the difference as a contribution to the state's match money at such time as the state contracts the improvement of another county road project in Linn County to be financed with Federal Aid Secondary Highway Funds. The Attorney was instructed to prepare a form of agreement with the county on the basis of the settlement outlined above.

In this connection it was pointed out to the Linn County Court that the Peoria-Harrisburg project must terminate at the city limits of Harrisburg because of the federal requirements which prohibit the expenditure of Federal Secondary Highway Funds for construction of roads within the corporate limits of cities and towns; hence, if the court desires the improvement within the city limits of Harrisburg, the work will have to be financed with either county or city funds. The County court was also informed that when the contract for this improvement is prepared, the city's portion of the work will be omitted unless the city or county provides the funds to finance it.

A petition was presented from residents of Portland, requesting that Interstate Avenue be re-established as a stop street where it intersects North Portland Boulevard. The Commission considered that this is a matter that comes under the jurisdiction of the Portland City Council and ordered that the petitioners be so informed.

The Commission considered and ordered filed a communication from School District No. 64, Clackamas County, protesting the relocation of the 82nd Street Highway (Cascade Secondary Highway) west of the present highway through the town of Clackamas.

A letter was presented from Mr. A. R. Watsek, Portland, offering suggestions to prohibit the picking of flowers and shrubs along the roadsides of this state. The Engineer was instructed to inform Mr. Watsek that the Commission is now doing its utmost to preserve the natural beauty along the highway rights of way and will continue to do all that it can to preserve the roadside beauty, and to that end has ordered the erection of additional signs prohibiting the picking of flowers and shrubs.

The Commission had under consideration a letter from Mr. Ross Turner, Halfway, Oregon, urging improvements to the Halfway-Homestead Section of the Baker-Homestead Highway, in Baker County. The Engineer was instructed to inform Mr. Turner that the condition of the Halfway-Homestead Section has been investigated numerous times and that the Commission is of the opinion that it would be inadvisable to spend any considerable amount of money for the improvement of this road in view of the fact that there now exists a water-grade route from Robinette to Homestead which is open the year round and is adequate to serve the needs of this community.

A letter was presented from Mr. H. T. Wood, Monroe, Oregon, urging the oiling of the rock shoulders adjacent to the highway pavement through the town of Monroe so as to prevent rocks being thrown by automobiles through the windows of business establishments. The Commission instructed the Engineer to investigate the conditions referred to and render a report at the next meeting as to what it would cost to do this work.

The Commission had under discussion a letter from Pleasant View Community Club, Freewater, Oregon, requesting the placing of stop signs at road intersections along the Umapine Secondary Highway in Umatilla County, as an accident prevention measure. The Commission deferred action on this matter pending a report from the Engineer at the next meeting as to whether or not

there are other highways throughout the state which are in the same category and should be declared stop highways.

Letters were presented from the Manzanita Chamber of Commerce and the North Tillamook County Chamber of Commerce urging the completion of the Neahkahnie Mountain Section of the Oregon Coast Highway in Tillamook County during the 1938 season. The Engineer estimated that such work would cost about \$80,000 in addition to the project that has been authorized for construction this year. He advised that there are no funds available to finance this improvement this year unless savings accrue from the contracting of other work. The Commission decided, after discussion, to consider this project for this year's construction in the event that the savings mentioned by the Engineer materialize; however, made no definite commitment of such savings to the same. The Secretary was instructed to convey such information to the respective Chambers of Commerce.

The Commission discussed a letter from the Manzanita Chamber of Commerce urging that something be done to stop the dumping of refuse on the beach at Manzanita, and the removal of rocks from this beach; also urging the Commission to take action as may be necessary to prohibit motorcycle racing on the beach. The Commission instructed the Engineer to erect "no dumping" signs along this beach and additional signs prohibiting the removal of rocks over 5 inches in diameter from the beach area. He was also instructed to advise the Chamber of Commerce that the Commission does not have the authority to prevent the removal of sand or gravel from the beach nor to prohibit the use of the beach by motorcyclists.

The Commission considered and ordered filed a letter from Lacey V. Murrow, Director of Highways for the State of Washington, regarding the ultimate improvement in Oregon and Washington of the highway between Walla Walla, Washington, and Milton, Oregon, wherein Mr. Murrow advises that the State of Washington does not contemplate undertaking any improvement on the Washington section of this road during the present biennium, which ends March 31, 1939, and therefore can give no assurance that the project will be included in the construction program for such biennium. Mr. Murrow requested that he be informed in the event that the Oregon State Highway Commission allocates funds during 1939 and 1940 for the construction of the Oregon section of this highway so that he may make similar provision for the construction of the Washington section.

A letter was presented from Mr. Walter W. Thiede, Eagle Point, Oregon, requesting permission to conduct mining operations in the state-owned gravel bar located on the Rogue River, near Gold Hill, Jackson County. The Commission deferred a decision in this matter pending a recommendation from the State Board of Department of Geology and Mineral Industries.

A resolution from Buell Grange No. 637, Polk County, asking the Commission to remedy an unsightly and dangerous condition that exists at the state's gravel pit located near the west end of the Mill Creek Bridge on the Dallas-Coast Secondary Highway had the attention of the Commission. The Commission referred the matter to the Engineer for investigation and report.

A resolution was presented from Fort Klamath Grange No. 775, Klamath County, in which the Commission was requested to allocate funds for the oiling of the Klamath Lake Secondary Highway through the Wood River Valley and to cooperate with the U. S. Forest Service and Bureau of Public Roads in clearing right of way, and grading, at the earliest possible time, that portion of this highway that lies within the national forest. The Engineer estimated that to grade, surface, and oil a standard road through the Wood River Valley would cost about \$97,500, and that it would cost \$45,500 to resurface, open ditches, and construct an oil mat treatment on the existing road through this valley, which is 6.5 miles in length; further, that to construct the highway through the national forest, 21.7 miles in length, to proper standards, including grading, surfacing, oiling, and bridges, would cost approximately \$450,000. He said that it would be impracticable to resurface and oil the existing road through the forest because it is constructed to very poor standards. The Commission denied the request because of lack of funds to finance a proper improvement and instructed the Secretary to so inform the Grange.

A letter was presented from Mr. J. C. Dunn, Clerk, Nestucca Union High School, in Tillamook County, urging improvements to the Little Nestucca Secondary Highway in Tillamook County. The Commission denied the request because available funds are insufficient to finance the improvement.

A letter was presented from the Independence Chamber of Commerce, Independence, Oregon, requesting permission to erect two signs on the state highway right of way, one at the junction of the Salem-Dallas Highway with the Independence Secondary Highway, near Brunks Corner, and the other on the Pacific Highway West near Monmouth, which signs are to contain the following inscriptions, respectively: "World's Hop Center, Independence, 5 miles" and "Hop Center, Independence, 1 mile". The Commission denied the request, it being strictly contrary to the Commission's established policy in regard to such matters. The Engineer was instructed to convey such information to Mr. Weddle of the Independence Chamber of Commerce and to inform him further that the Highway Commission is opposed to the erection of all manner of signs upon or adjacent to highway rights of way because, in the opinion of the Commission, they mar the scenic beauty of the roadside; also, that if the Chamber proceeds with the erection of its proposed signs on private property adjacent to the highway, such signs must not contain information that is directional in any sense and must not bear any resemblance to the Highway Commission's official mileage and direction signs and must not be of a competitive nature.

A letter was presented from the National Pitch Products Company, Portland, complaining of unsatisfactory drainage conditions near their property along the Lower Columbia River Highway between Portland and Linnton. The Engineer advised that investigation has been made of this matter and conditions have been found to be substantially as alleged by the company. He estimated that it would cost about \$5,000 to properly take care of this matter and recommended the improvement as soon as funds are available to finance the work, and in any event that the project be included in next year's program. The Commission approved the recommendation by unanimous vote of the members present.

APR 29 1938

The Attorney discussed with the Commission the question of acquiring property owned by Swift & Company and at present occupied by a service station within the angle formed by the intersection of Union and Denver Avenues, Portland. He advised that the property is owned by Swift & Company but is under lease to the Standard Oil Company, and that the buildings located thereon and which encroach upon the right of way of Denver Avenue were constructed by the lessee, the Standard Oil Company. It appears that the existing lease will expire soon and the question arises whether or not to require the removal of the buildings in connection with the granting of an extension of the lease by Swift & Company, and whether or not additional land should be secured in this "wy" intersection in order to better safeguard traffic at this point. The suggestion was made that the company be asked to move its buildings a greater distance than is actually required to clear the right of way. After discussion, the Engineer was instructed to look into this matter in connection with his investigations with respect to the installation of safety signals or other protection at this intersection, and render a report thereon, when it will be decided whether or not to negotiate with Swift & Company.

The Engineer reported that in accordance with authority previously granted him by the Commission he has ordered a number of surveys since the Commission's last meeting. He presented a list of such surveys and asked the Commission to confirm his action. After due consideration, Commissioner Tou-Velle moved that the State Highway Engineer be authorized and instructed to make such surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such surveys, are as follows:

Plans - - - - -	105-2813 - Mist-Clatskanie Sect., Mist-Clatskanie Sec. Highway.	1st authorization - \$2,390.00
Plans - - - - -	6-2815 - Coquille River-Fat Elk Creek Sect., Oregon Coast Highway.	1st authorization - \$1,080.00
Right of Way - -	107-2805 - Prineville-Jefferson County Line Sect., Warm Springs Highway.	1st authorization - - \$35.00
Geophysical - -	8-2810 - Arizona Inn Slide Sect., Oregon Coast Highway.	1st authorization - - \$300.00
Right of Way - -	8-2805 - Gold Beach Sect., Oregon Coast Highway.	2nd authorization - \$1,050.00
	Total to date \$1,200.00	
Plans - - - - -	215-2820 - Neil Creek-Butte Falls Section, County Road, Jackson County.	1st authorization - \$200.00
Location - - -	17-2802 - Grants Pass-Green Creek Section, Pacific Highway.	2nd authorization - \$1,200.00
	Total to date \$3,200.00	

Test Pits - - - 9-2817 - Lapine-Crescent Sect., The Dalles-California Highway. 1st authorization - \$750.00

Materials - - - 20-2808 - Oak Hill-Veneta Section, Route "F", Lane County. 5th authorization - \$350.00
Total to date \$5,675.00

Plans - - - - 229-2805 - County Roads in Tillamook County. 1st authorization - \$1,400.00

Set Stakes - - - 8-2809 - Azalea Park Road, Azalea Park, Curry County. 2nd authorization - \$125.00
Total to date \$425.00

Geophysical - - 8-2810 - Arizona Inn Slide Sect., Oregon Coast Highway, Curry County. 2nd authorization - \$300.00
Total to date \$600.00

Prepare Plans - 14-2806 - Warren Creek Section, Columbia River Highway, Hood River County. 3rd authorization - \$800.00
Total to date \$1,100.00

Right of Way - - 21-2824 - Waldport-Benton County Line, Alsea Highway, Lincoln County. 1st authorization - \$50.00

Prepare Plans - 222-2813 - Peoria-Harrisburg Sect., County Road, Linn County. 1st authorization - \$150.00

Location - - - - 122-2808 - Brownsville-Crawfordsville Sect., Halsey-Sweet Home Secondary Hwy., Linn County. 3rd authorization - \$1,000.00
Total to date \$5,000.00

Reconn. Survey - 24-2818 - Illahe School-Albany Sect., Pacific Highway East, Marion County. 1st authorization - \$1,300.00

Prepare Plans - 229-2825 - Netarts, Wilson River Loop, Fairview, County Roads, Tillamook County. 1st authorization - \$1,400.00

Bridge Survey - 36-2820 - Newberg Viaduct, Pacific Highway West, Yamhill County. 1st authorization - \$500.00

The motion was approved by the unanimous vote of the Commissioners present.

The Engineer also reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

APR 29 1938

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under consideration the request of contractors Van Cleave & Van Cleave for an extension of time from January 31 to March 14, 1938, within which to complete State Highway Contract No. 2020 covering The

APR 29 1938

Dalles Roadside Improvement Project adjacent to the Columbia River Highway in Wasco County. The contractors gave no reason for failure to complete the job within the specified time limit. The Engineer advised that there was no particular reason why the contractors could not have finished this job within the specified time and accordingly recommended that the extension of time requested be granted but that the contractors be charged for the extra engineering expense that the state has incurred subsequent to the specified completion date. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 1997, 2012, and 2020, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1997, with Mountain States Construction Company, for construction of the Southern Pacific overcrossing on Coos River Secondary Highway at Bunker Hill, in Coos County. Completed March 10, 1938.

Contract No. 2012, with Mountain States Construction Company, for surfacing and furnishing crushed rock on the Siletz Secondary Highway, in Lincoln County. Completed April 17, 1938.

Contract No. 2020, with Van Cleave & Van Cleave, for The Dalles Roadside Improvement Project on the Columbia River Highway, in Wasco County. Completed March 14, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Easement agreement with the Union Pacific Railroad Company and Multnomah County covering construction and maintenance of a structure to carry the proposed Airport Road, Portland, over the main line tracks of the O.W.R.R. & N. Railroad, near Northeast 42nd Avenue, Portland;

APR 29 1938

Lease agreement with the Southern Pacific Company providing for a 4-month lease of a stockpile site owned by the company in Hillsboro, being right of way transaction No. 5929;

Agreement with the Weyerhaeuser Timber Company providing for extension of the term of a certain lease for stockpile site, containing .51 acre of land, in the E. $\frac{1}{2}$ of N.W. $\frac{1}{4}$ of Section 3, Township 40 S., Range 4 E., W. M., Jackson County, for a 10-year period, from December 19, 1938, to December 19, 1948;

Agreement with Julius Christensen providing for the elimination of a certain cattle pass located at Highway Engineer's Station 29+50 on the Campbell Bridge-Scholls Section of the Hillsboro-Woodburn Secondary Highway, in Washington County, being further described as Bridge No. 140-06.1;

Agreement with contractor J. F. Johnston providing for the painting of certain bridge structures constructed by Mr. Johnston on the Jordan Creek Section of the I.O.N. Highway, in Malheur County, under State Highway Contract No. 1985;

Quitclaim deed conveying unto Frank Gribbin .86 acre of land situate in Lot 5 of Section 33, Township 15 S., Range 47 E., W.M., Malheur County, being right of way transaction No. 5568;

Petition directed to the Secretary of the Interior, Washington, D. C., for the acquisition by the state, under the provisions of the Recreational Act of June 14, 1926, of a 40-acre tract of land described as the N E. $\frac{1}{4}$ of the S.W. $\frac{1}{4}$ of Section 9, Township 29 S., Range 8 W., W.M., Douglas County;

Agreement with contractor Homer G. Johnson relating to his contract with the State Highway Commission for the construction of the Enterprise-Joseph Section of the Wallowa Lake Highway, in Wallowa County, Contract No. 1797.

The Commission set Thursday, May 12, as the date for its next regular meeting for the consideration of special matters and the disposal of accumulated routine matters. The Commission also set Thursday and Friday, June 2 and 3, as the dates for its regular meeting in June for receiving bids for highway construction projects. The Secretary was instructed to make the usual arrangements for these meetings.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 o'clock p. m.

APR 29 1938

Portland, Oregon, May 12, 1938

The State Highway Commission met in regular session at 9:00 o'clock a. m. in Room 1201, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties and prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

5950-Sawyer, Mary E.	"	"	"	Not quoted	\$15.00
<u>Pacific Highway West</u>					
5077-Beer, Laura	R/W	Interstate Ave.-Denver Ave.		Not found	\$1050.00
5078-Toft, Ada B., Murphy, E. G.	"	"	"	\$1000.00	787.50
<u>Frenchglen Highway</u>					
5462-School Dist. #9	R/W	Narrows-Coyote Flat		Sch. Clerk killed	\$10-\$25
<u>Pendleton-John Day Highway</u>					
5999-McGirr, Albert	R/W	Fox-Forest Boundary		Not quoted	\$375.00

The Commission approved the appraised values of the several parcels as reported, and authorized condemnation in the event the properties cannot be acquired otherwise. The following resolution in regard thereto was adopted by the Commission by unanimous vote.

MAY 12 1938

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Lombard Street-Killingsworth Street Section of the Northeast Portland Highway
 Brownsville Section of the Halsey-Sweet Home Highway
 Interstate Avenue-Denver Avenue Section of the Pacific Highway West
 Narrows-Coyote Flat Section of the Frenchglen Highway
 Fox-Forest Boundary Section of the Pendleton-John Day Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Lombard Street-Killingsworth Street Section of the Northeast Portland Highway
 The Raleigh Chinn Company
 George H. Albright and George H. Graham
 Beatrice Decker
 Brownsville Section of the Halsey-Sweet Home Highway
 George W. McKinney
 Interstate Avenue-Denver Avenue Section of the Pacific Highway West
 Laura Beer
 Ada B. Toft
 Narrows-Coyote Flat Section of the Frenchglen Highway
 School District No. 9
 Fox-Forest Boundary Section of the Pendleton-John Day Highway
 Albert McGirr

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said

MAY 12 1938

state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same, and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The matter of enlarging the headquarters site at Burns had the attention of the Commission. The Engineer advised that additional space is needed, and recommended the purchase of a number of lots located directly across the street from the present headquarters, which, he believed, could be acquired from Harney County for approximately \$1000. The Commission

MAY 12 1938

authorized the Attorney to negotiate with the County Court for the acquisition of the same.

The Assistant Attorney reported that Beckman and Galey, attorneys at law, 307 Corbett Building, Portland, have made a request on behalf of their clients, Charles E. and Elizabeth Wood, for the consent of the State Highway Commission to the vacation of a public road abutting on Block E of Rosewood Acres near the Cook Overcrossing on the West Portland-Hubbard Highway. After consideration the Commission instructed that such consent would be given provided Charles E. and Elizabeth Wood execute to the State Highway Commission a complete waiver and release of access to the West Portland-Hubbard Highway abutting on the portion of roadway proposed to be vacated. The Secretary was thereupon authorized by the Commission to sign the waiver providing for the vacation of such roadway.

A letter was presented from Mr. N. Hogan, President of the Reedsport Garage, Reedsport, giving as his understanding that the Highway Commission proposes to widen the Umpqua Highway in Reedsport, which will take approximately 20 feet off the front of his garage building and will completely change the show room, parts room, and other things important to the business. He also said that it would be to their advantage to make these changes now, notwithstanding that the Highway Commission does not propose to reconstruct the highway until next year, and suggested an agreement with the Highway Commission at this time relative to the right of way. He further stated that it would not be necessary for the Commission to pay for the extra right of way until such time as the balance of the right of way for this proposed widening work is acquired. The Attorney and the Engineer recommended acceptance of Mr. Hogan's offer. The Commission, after discussion, approved the recommendation by unanimous vote.

The Commission considered a letter from James and Katherine Sansbury, Gleneden Beach, Oregon, urging the immediate construction of the proposed revision of the Oregon Coast Highway through the Gleneden Beach district, or a decision by the Commission to retain the highway in its present location, so that definite plans for the development of property in this location may proceed. The Commission ordered that Mr. Sansbury be informed that the Commission has definitely adopted the new route but cannot construct the same now on account of shortage of funds to finance the work.

The Attorney reported the results of the condemnation case for the acquisition of land on both sides of the Oregon Coast Highway at the north end of the Alsea Bay Bridge, said property being owned by Mr. Frank Hilton, Portland. It appears that through misrepresentation on the part of certain witnesses, the jury in the case set a value of \$9,100 for this property, which amount, in the Attorney's estimation, is considerably more than the property is worth. The Commission reluctantly authorized payment of such sum to Mr. Hilton.

The Attorney then reported that Mr. Hilton considers that he did not receive a fair amount from the jury, and accordingly is asking the Commission to relinquish to him that portion of the property that lies on the east side of the highway. The Commission denied the request by unanimous vote.

MAY 12 1936

The Attorney read a letter from Mr. Custer Ross, attorney, Salem, in behalf of Mrs. Charles K. Spaulding, in regard to the property that the Commission is acquiring from Mrs. Spaulding for right of way for a revision of the Salem-Dayton Secondary State Highway, in Polk County, wherein he states that Mrs. Spaulding demands the sum of \$3000 for the right of way, in addition to the construction of a roadway from the new highway to her farm residence. He recalled that the Commission previously authorized him to offer Mrs. Spaulding \$2500 for the property and to agree to build the side road to her residence, but he has since had the property appraised by three appraisers from the Salem Realty Board, who value the property at \$2650. After some discussion the Commission authorized settlement with Mrs. Spaulding for the sum of \$2750 in addition to the building of the road, The Attorney was instructed to condemn the property in the event that such offer is refused.

The State Parks Superintendent, Mr. S. H. Boardman, was present and requested authority to acquire an 80-acre addition to Silver Falls State Park, Marion County, being described as the E. $\frac{1}{2}$ of the S.W. $\frac{1}{4}$ of Sec. 14, T. 8 S., R. 1 E., W. M., and being owned by Gary Neal. It appearing to the Commission that the acquisition of this tract is necessary for the proper development and maintenance of the present park, the request was approved by unanimous vote.

The Engineer reported briefly on the following surveys:

Reconnaissance survey, Butte Creek Summit Section of the John Day Highway;

Reconnaissance survey, Horse Ridge Section of Central Oregon Highway;

Location Survey of McMinnville-Tillamook Highway between McMinnville and Valley Junction;

Location survey of Pacific Highway West between Whiteson and Dayton;

Location survey for St. Joe Undercrossing on Pacific Highway West, near McMinnville;

Preliminary location survey of Pacific Highway between Oakland and Roseburg.

After discussion, the Commission tentatively approved the reports subject to further study at a later date.

The Assistant Attorney reported the status of the right of way budget. He said that the Commission previously budgeted the sum of \$450,000 for the acquisition of right of way, et cetera, during 1938, and that it now appears that such amount will not be sufficient for the purpose if the Commission authorizes additional projects requiring right of way. The Commission took the matter under advisement.

The County Court of Morrow County, consisting of County Judge Bert Johnson and County Commissioners Roy Neill and George N. Peck; also County

MAY 12 1938

Engineer H. Tamblin, came before the Commission in regard to the Federal Aid Secondary Highway Construction Program in Morrow County. They advised that the program as promulgated by the Highway Commission for Morrow County does not meet with their approval inasmuch as it does not provide for the reconstruction of the Wasco-Heppner Secondary Highway for the full distance between Heppner and Rhea Creek, which is the section that they particularly asked the Commission to include in such program. They stated further that not only does the Commission's program provide for the construction of only about one-half of this section but it also provides that the work is to be done in 1939 rather than in 1938, which is contrary to their expectations and wishes because the road is badly in need of repair and the county does not have funds with which to finance the work. They advised that this road is the most important secondary highway in Morrow County; in fact, in their estimation, is even more important than the Oregon-Washington Highway east of Heppner. They gave as their thought that Morrow County is entitled to this improvement because of its importance and because it is the only road in the county, other than the Columbia River Highway, that is eligible for Federal Aid funds.

Chairman Cabell advised that the Commission spent a lot of time and study in the selection of projects for the Federal Aid Secondary Highway Program and did not decide definitely which projects to include therein until it had discussed the matter with the respective county courts; further, that the Commission did the best it could with the funds available; and, while some mistakes may have been made in its selections, it is now too late to make any changes because to do so would simply mean disrupting the entire program.

Commissioner Aldrich concurred in the remarks of Chairman Cabell and added that, while it does not seem possible to undertake this project this year, it is his suggestion that the Commission give the project priority in next year's construction program, provided Congress passes the appropriation bill authorizing the 1940-41 Federal Aid Funds. Chairman Cabell indicated his approval of the suggestion and advised that, while it is out of order to change the present program, the Commission will consider advancing the 1939 construction somewhat and the allocating of some of the 1940-41 Federal Aid moneys to this job if they materialize so as to insure completion of the entire project in 1939 if possible. He made it clear that the Commission is making no promises to that effect but is simply stating its willingness to give the matter consideration. He pointed out the possibilities of changes in the personnel of the Commission in the interim, and the reluctance of the Commission to commit its successors. This concluded the conference.

Mr. Gus E. Carlson, Transportation Consultant, Portland, appeared before the Commission in behalf of the Roseburg Chamber of Commerce, in regard to the canalization of the Umpqua River between Scottsburg and Roseburg. He advised that the United States War Department proposes to hold a special hearing in Roseburg on June 10 in regard to this matter for the purpose of securing testimony to determine whether or not the Umpqua River could be made navigable, either by open river channel work or by the construction of locks and dams, and the Roseburg Chamber of Commerce would appreciate it if the State Highway Commission would send a representative to this hearing to give information relative to the Highway Commission's concern and interest in this

MAY 12 1938

undertaking. He urged the Commission to support the Roseburg Chamber of Commerce in this matter in a program of general development of highways and waterways.

Chairman Cabell advised that he did not believe that the Commission is sufficiently concerned in the matter to have a representative at the hearing; furthermore, he did not believe that the Commission should become involved in arguments of this kind because of the precedent that would thereby be established. After further discussion, Mr. Carlson asked the Commission for a letter stating the Commission's position in the matter and also stating that the Commission has no objection to the canalization of this river. The question arose whether or not the writing of such letter would place the Highway Commission in an undesirable position. It was finally decided to leave the matter to the Engineer for further study, with authority to write such letter in the event that he considers it advisable and proper to do so.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission had under consideration the matter of the sale of \$750,000 short-term state highway bonds to provide for financing a normal highway construction program during the latter half of the year 1938, and to meet other current demands on the state highway fund. After full consideration of the said matter Commissioner Aldrich moved and Commissioner Tou Valle seconded the adoption of the following resolution, which motion having been put to vote by the Chairman received the unanimous vote of the Commission and was by the Chairman declared carried, to wit:

WHEREAS, there will mature on the first day of October, 1938, \$1,000,000 par value Oregon State Highway bonds of the State of Oregon, and the sum of \$422,948.38 in interest upon all of the outstanding Oregon State Highway bonds will be due on said date; and

WHEREAS, there has been made available by the Federal Government to the State of Oregon for highway construction during the year 1938 the sum of \$3,200,000, which said federal appropriation must, if obtained by the State of Oregon, be matched by \$2,000,000 of state money; and

WHEREAS, there will be due and payable to the several counties of the state on the fifteenth day of July, 1938, \$800,000 which said sum of money will be drawn out of the state highway fund; and

WHEREAS, current revenues are and will be inadequate to provide for normal highway construction and maintenance during the period from July 15, 1938, to March 1, 1939, and to at the same time provide sufficient funds to pay when due the said bonded indebtedness, both principal and interest, and provide likewise for

MAY 12 1938

funds with which to match federal appropriations for highway construction in Oregon; and

WHEREAS, the issuance and sale at this time of \$750,000 par value Oregon State Highway bonds for the purposes herein stated is and will be for the good of the state and will more efficiently and adequately promote highway construction by providing funds with which to meet the current expenses of the Highway Department, permit the payment to the counties of the said sum of \$800,000, and release and make available current funds with which to match funds made available by the Federal Government, and otherwise carry out the provisions of the laws of the State of Oregon with respect to state highway construction, and provide also funds with which to pay interest and principal upon bonded highway indebtedness when the same become due;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission of the State of Oregon, all members being present and affirmatively voting, as follows:

1. That there be issued and sold for the purpose of providing funds with which to pay interest and principal upon bonded indebtedness and to pay the several amounts due the several counties out of highway revenues, and for the purpose of more efficiently and adequately promoting highway construction, \$750,000 par value Oregon State Highway bonds to be dated July 1, 1938, and to mature March 1, 1939, but to be redeemable in numerical order at the pleasure of the State of Oregon upon payment of the par value of said bonds and accrued interest thereon on January 2, 1939, and/or at the option of the State of Oregon at any date subsequent thereto and prior to the first day of March, 1939, by giving thirty days' published notice of intended redemption as provided in Chapter 71, Oregon Laws, 1937; said bonds to be numbered consecutively, beginning with number 14591 and ending with number 14665; to be in denominations of \$10,000 each and to bear interest payable October 1, 1938, and March 1, 1939, or at the time of redemption if called for redemption before maturity, at a rate to be specified by the purchaser of said bonds; to be registered as to principal at the option of the holder in the office of the State Treasurer at Salem, Oregon, by appropriate endorsement thereon signifying the ownership thereof; to be payable both as to principal of and interest on said bonds to the purchaser thereof at said office of the State Treasurer; to be in printed form both as to the bonds and as to the interest coupons annexed thereto.

2. That said bonds hereby authorized and the interest coupons attached thereto shall be in substantially the following form, subject, however, to completion through execution of the bonds by the Governor of the State of Oregon, the Secretary of State of the State of Oregon, and the Treasurer of the State of Oregon by their signing the bonds in the spaces provided therein for their

MAY 12 1938

signatures and through the affixing to the said bonds by the Secretary of State of the seal of the State of Oregon, with the printed facsimile of the signatures of said officers on the coupons attached thereto, to wit:

No. _____

\$10,000

UNITED STATES OF AMERICA
OREGON STATE HIGHWAY
SERIES THREE
_____ Per Cent Bond

\$10,000

KNOW ALL MEN BY THESE PRESENTS: That the State of Oregon acknowledges itself to owe and for value received hereby promises to pay to bearer hereof the principal sum of

TEN THOUSAND DOLLARS

on the first day of March, 1939, together with interest on said sum from the date hereof until paid, at the rate of _____ per centum per annum payable October 1, 1938, and March 1, 1939, as evidenced by and upon the presentation and surrender of the interest coupons hereto attached as the said coupons become due; and both the principal hereof and the interest hereon are hereby made payable at the office of the Treasurer of the State of Oregon at Salem, Oregon, in any coin or currency which at the time of payment is legal tender for public and private debts within the United States. This bond if registered in the office of the State Treasurer will be payable both as to interest on and principal thereof to the owner thereof as shown by the record of registration thereof in said office, but if not registered, shall be payable to the holder thereof.

The State of Oregon hereby expressly reserves the right to redeem this bond on January 2, 1939, or at a date subsequent thereto, pursuant to notice of intended redemption given at least thirty days prior to the said redemption date by publication of said notice in one issue of each of the following newspapers: The Oregonian, Oregon Journal, and News-Telegram, each of which publications is a newspaper of general circulation printed and published within the City of Portland, County of Multnomah, State of Oregon, and one such notice in the Capital Journal and the Oregon Statesman, each of which publications is a newspaper of general circulation printed and published within the City of Salem, Marion County, State of Oregon; and upon the exercise of said option, interest hereon shall cease as of the redemption date specified in said notice.

This bond, together with the remaining bonds of this issue, aggregating \$750,000, is issued by the State of Oregon under and by virtue of, and in all respects in full and strict compliance with, the constitution and laws of the State of Oregon, and in

MAY 12 1938

particular Article XI, Section 7, of the said constitution, and Chapter VIII, Title XLIV, Oregon Code 1930, as amended by Section 44-809, Oregon Code 1935 Supplement, and Chapter 71, Oregon Laws, 1937.

The faith and credit of the State of Oregon hereby are irrevocably pledged for the punctual payment of the interest on and redemption of the principal of this bond as the same become due and payable as aforesaid.

IN TESTIMONY WHEREOF, the State of Oregon has caused this bond to be signed by the Governor, the Secretary of State, and the State Treasurer, and sealed with the seal of the State of Oregon, and on the coupons evidencing the interest to become due thereon or for each installment of such interest there shall be printed the facsimile of the signatures of said officers, all as of the _____ day of _____, 1938.

Governor

Secretary of State

State Treasurer

COUPON

No. _____

\$ _____

On the _____ day of _____, 193____, the State of Oregon will pay to the bearer at the office of the Treasurer of the State of Oregon the sum of

in any coin or currency which at the time of payment is legal tender for public and private debts within the United States of America, in payment of three months' interest then due upon Oregon State Highway Bond, Series 3, No. _____, dated _____; provided that, if said bond shall have been sooner called or redeemed, this coupon shall be void.

Governor

State Treasurer

Secretary of State

3. That the Secretary of the Commission cause the said bonds to be advertised for sale for a price not less than par value and accrued interest in one issue of each of the following newspapers: The Oregonian, Oregon Journal, and News-Telegram, each of

MAY 12 1938

which publications is a newspaper of general circulation printed and published within the City of Portland, County of Multnomah, State of Oregon, and one such notice in the Capital Journal and the Oregon Statesman, each of which publications is a newspaper of general circulation printed and published within the City of Salem, Marion County, State of Oregon, the said advertisement to provide that a certified check in the sum of \$10,000 shall be deposited as a good faith deposit with each bid for the entire issue of said bonds, and if less than the entire issue, the bid shall be for not less than \$100,000 of such issue and a certified check in a sum equal to two per cent of the bid shall be deposited as a good faith deposit with such bid.

4. That the Governor and the Secretary of State and the State Treasurer be and they hereby are authorized and requested to execute the said bonds by signing them under the seal of the State of Oregon, and upon the coupons evidencing the interest to become due thereon or for each installment of such interest there shall be printed the facsimile of the signatures of said officers, and the State Treasurer be and he hereby is authorized at the option of the purchaser to register said bonds as to principal only in his office and to make certificate to that effect upon the bonds, as provided in Section 44-804, Oregon Code 1930, and to deliver said bonds to the purchaser thereof after the date of sale and execution and sealing thereof upon payment of the principal thereof and the accrued interest thereon, if any.

The Commission also had under consideration the bids received on April 28, 1938, for the furnishing of a fidelity bond covering certain Highway Department employees. A tabulation of such bids revealed that the bid of the Ohio Casualty Insurance Company was the low one, Metzger-Parker Agency, agents, Portland, at \$372.30 annual premium, and \$1,116.90 premium on a 3-year basis. The next low bid was that submitted by the Glens Falls Indemnity Company (Jewett, Barton, Leavy & Kern, agents, Portland) at \$401.50 annual premium, and \$1,204.50 premium on a 3-year basis. There were 120 additional bids received, all of which were on the basis of an annual premium of \$584.00 and a premium of \$1,635.20 on a 3-year basis.

Inspection of the bids revealed that those of the Ohio Casualty Insurance Company and the Glens Falls Indemnity Company were submitted on the theory that Highway Department employees are not considered by the state's Attorney General as public officials. The remaining bids were submitted on the basis that such employees are considered public officials and accordingly carry a higher rate. In view of this condition, the Commission decided to defer the selection of the successful bidder pending receipt of a written opinion from the Attorney General as to the status of the Highway Department employees in this regard. The Attorney was instructed to secure such opinion for consideration by the Commission at its next regular meeting. The Secretary was instructed to return to the respective bidders the proposal checks submitted by them with their bids and to advise such bidders that the return

of the checks will not prejudice their bids in any way. Further, that the Commission has deferred the designation of the successful bidder until it obtains the opinion of the Attorney General, but contemplates taking final action on the matter at its June 2 meeting. Chairman Cabell publicly announced such decision of the Commission in this matter later in the session in the presence of representatives of several of the insurance companies who submitted bids for this business.

Consideration was given by the Commission to a request of the firm of Anderson and Umlett, Newport, for permission to transport three 60-foot timbers over the Oregon Coast Highway from Newport to Kernville, the overall length being 70 feet. It was explained that these timbers are needed in connection with dredging operations in the Siletz River and it is impossible to secure them from any source that would obviate the necessity of transporting them over the highway. The Engineer gave as his thought, in view of the circumstances, that the permit should be granted subject to the condition that the movement be properly flagged as a traffic safeguard, and he so recommended. The Commission approved the recommendation by unanimous vote, with the stipulation, however, that it is not to be considered as a precedent but simply as a special emergency dispensation.

The Engineer reported a satisfactory solution of the siphon matter in the town of John Day, concerning which a complaint was received by the Commission at a previous meeting. He said that Mr. Ira G. Boyce, principal owner of the ditch and siphon, has agreed to the extension of another pipe line a short distance from the existing one, which will eliminate the need for the siphon and will dispose of the matter much more satisfactorily from the state's standpoint than if the siphon were left in place with corrective measures. The Commission approved the report.

The Engineer reported the cost to construct bridle paths along certain highways in the vicinity of the Portland Hunt Club just west of Portland. He said that the Hunt Club wants bridle paths along Scholls Secondary Highway and the Beaverton-Aurora Secondary Highway, and that investigation reveals that such work would require considerable excavation and the acquisition of additional right of way and that the total cost of the work, exclusive of right of way costs, is estimated at approximately \$1000. He recommended that the request be denied because of the shortage of funds with which to finance the same, it being his thought that it would be poor psychology to do this work in view of the present financial stringency. The Commission approved the recommendation.

The status of right of way for the Central Oregon Highway, in Malheur County, had the attention of the Commission. According to a report from Division Engineer W. C. Williams, it appears that Malheur County failed to obtain certain right of way for this highway and that a Mr. A. R. Hollingshead, of Harper, has now acquired some of the properties over which the highway is constructed and has threatened to barricade the highway and to prohibit its use by the general public without the payment of a toll. The Engineer advised that he has already issued instructions to the Division Engineer to investigate the right of way situation in this vicinity with a view to bringing to the attention of the County Court the necessity to acquire the

parcels which, according to the records, are still in private ownership. The Commission approved the report and instructed the Attorney to notify the County Court of any right of way that is in this category and to ask the Court to start the necessary proceedings for the acquisition of the same, either by resolution or otherwise, so as to forestall any further trouble with Mr. Hollingshead or others.

The Commission had under discussion an opinion from the Attorney with reference to the Commission's responsibility for the maintenance of a portion of Killingsworth Street, Portland, extending easterly from its intersection with Northeast Portland Secondary Highway No. 123 to a junction with Columbia Boulevard, and the maintenance of Columbia Boulevard from such junction point to a connection with Sandy Boulevard (Columbia River Highway). It was the Attorney's opinion, based upon the record as heretofore made by the Commission, that the Commission is not responsible for the maintenance of these streets, it being his understanding that the Highway Commission has simply designated a route for this highway and is now contemplating the construction of a highway over such route but the streets mentioned have not been named as a part of this route. In view of this opinion, the Commission decided not to assume the maintenance of these streets and ordered that the Board of County Commissioners of Multnomah County and the City Commissioners of Portland be so informed.

The Engineer reported the cost to oil the shoulders adjacent to the pavement through the town of Monroe, Benton County, as instructed by the Commission at the previous meeting. He estimated that such work would cost about \$750, based upon the placement of 3000 cu.yds. of materials under the 0-9 specification. The Commission approved the project by unanimous vote and ordered that the cost be paid out of the emergency fund, in view of the fact that no provision has been made in the 1938 budget for the same.

The Engineer also reported on the cost to install a culvert pipe in the borrow pit along the entire length of the school grounds in Estacada and the backfilling of the same so as to provide a parking place for cars. He estimated that such work would cost about \$2500 and advised that no funds had been provided for the same in this year's budget. After discussion, the Commission decided to defer this project until its finances improve.

The Engineer reported on the matter of improving the old Southern Pacific railroad grade between Hillsdale and a connection with Barbur Boulevard, Portland, as heretofore requested by a delegation from Glencullen at the previous meeting. He advised that this route is 1.88 miles in length from Hillsdale to the intersection of Barbur Boulevard with Slavin Road, whereas the present highway between these points is only .88 mile in length. Further, that to construct a 2-lane concrete pavement with gravel base and crushed rock shoulders would cost about \$40,000. He gave as his thought that the traveling public would not use this road to any great extent if constructed, because it is about 1 mile longer than the present route. In view of the Engineer's report, the Commission decided unanimously not to build this road and instructed the Secretary to so inform the sponsors of the same.

MAY 12 1938

In the discussion of this matter it was brought out that a dangerous condition exists at the intersection of Slavin Road and Barbur Boulevard because of the heavy traffic on the latter and the steepness of the grade on Slavin Road. The Engineer gave as his thought that a traffic signal should be installed at this intersection and suggested that this would be a good place to try out one of the traffic-actuated magnetic types. The Commission approved the suggestion by unanimous vote and authorized installation of the signal. The Commission also authorized and instructed the Engineer to have further investigation made to determine what can be done to improve the grade of Slavin Road between Barbur Boulevard and Terwilliger Boulevard. A report on this matter is to be rendered as soon as it is convenient to have the investigation made.

The Commission considered and ordered filed a report from the State Parks Superintendent on the number of automobiles that visited the state parks along the Oregon Coast Highway between Yachats and Boiler Bay during the week ending Saturday, May 7, 1938. The report indicates that a total of 6,510 cars visited these parks during this period.

A letter was presented from R. J. Hash, Mayor of Canyonville, Oregon, requesting the oiling of the shoulders adjacent to the pavement along the Pacific Highway through Canyonville. The Engineer advised that the highway right of way through this town is 80 feet wide and that to oil the strips adjacent to the pavement would require the placement of approximately 8,500 square yards of 0.9 specification material and that the project would cost about \$2,125. He said that the dust condition in this town is very bad during the summer season and particularly so because this place offers the first opportunity for cars to pass after leaving the canyon just south of the town. He recommended that the request be denied for this year's construction because of lack of funds to finance it, but that it be given preference over others in the 1939 budget. The Commission approved the recommendation by unanimous vote.

The Engineer reported on investigations that have been made for the improvement of the alignment of the state highway from Lombard Street to the Willamette River Bridge, in St. Johns, Portland, as requested by the Commission at the previous meeting. He presented a map showing two alternate routes, one of which involves the widening of Jersey Street and Columbia Boulevard between Lombard Street and Burlington Street, with provision for the elimination of the bad turn at the intersection of Burlington and Jersey Streets; and the other, which extends Columbia Boulevard a distance of one block, from Jersey Street to Ivanhoe Street. The map also showed existing buildings. He pointed out that the Pacific Telephone and Telegraph Company's exchange building, a concrete structure, is located directly on the Columbia Boulevard extension to Ivanhoe Street; that the building is not now in use, in fact, is for sale and can probably be purchased for about \$25,000, notwithstanding that the telephone company has about \$45,000 invested in the same. He gave as his thought that the widening of Jersey Street, which is the main business street in this district, would cost more than the construction of the Columbia Boulevard extension to Ivanhoe Street and that in either case the cost of the right of way would run into quite a considerable figure. After discussion of this matter from various standpoints, the Commission indicated that it favored the

MAY 12 1938

Ivanhoe Street Route; however, deferred a definite decision until a later date in view of the fact that there are no funds available to finance the project.

The Commission had under consideration a report by Division Engineer F. D. Eason, with regard to pole line construction by the Nehalem Valley Electric Association on the Nehalem Secondary Highway. Mr. Eason recalled that the Highway Commission granted a permit to this association to construct its transmission pole line on portions of this secondary highway, and advised that the company has not complied with the requirements with respect to the placement of poles and that the poles have been so placed that the power wires overhang the traveled portion of the highway for long distances, thus creating a hazardous condition for the traveling public; furthermore, the company has placed poles on the state highway right of way beyond the limits of their permit, and has, in the course of construction, cut down and trimmed trees, leaving the debris on the highway right of way contrary to the provisions of the permit, which specifies that such debris shall be removed immediately after the pole line has been constructed.

Mr. Eason also advises that this association has been granted a permit to construct its pole line on a portion of the Wolf Creek Highway, and recommends that they be not allowed to proceed with the construction of such pole line until it has complied with the Commission's rules in connection with its pole line construction on the Nehalem Secondary Highway. After discussion, and it appearing to the Commission that the association has constructed its pole line with utter disregard of the Commission's rules and regulations, the Commission instructed the Attorney to write the association an emphatic letter demanding compliance with the provisions of the permit with respect to the Nehalem Secondary Highway construction and advising them that they will not be permitted to proceed with their pole line construction on the Wolf Creek Highway until the Nehalem Highway matter has been disposed of to the satisfaction of the Engineer and not then unless they will comply with the provisions of their permit for the construction of their pole line on the Wolf Creek Highway.

The Commission had under consideration a request from the City of Reedsport for the loan of the services of one of the engineers of the Highway Department to supervise a city W.P.A. project involving the regrading of certain city streets for the purpose of improving drainage conditions, all of which streets are exclusively within the jurisdiction and control of the city of Reedsport. The Attorney advised that the Commission does not have the authority to expend state highway funds for the construction, improvement, and maintenance of city streets which do not constitute a connection between two state highways or form a link in the state highway system, but the Commission does have authority to expend state highway funds for the purpose of improving city streets that are state highway routes or form connections between state highways. In view of the Attorney's opinion, the Commission voted unanimously to deny the request and instructed the Secretary to so inform the city officials.

The Engineer reported that the Pendleton-John Day Highway between

MAY 12 1938

Nye Junction and Ukiah, the Siletz Secondary Highway between Toledo and Kernville, and the Tampico-Lewisville Secondary Highway from its junction with the Pacific Highway West to the Benton-Polk County line, have dried out sufficiently so that it is no longer necessary to retain the reduced load limits that have been in effect on these roads for the past few months. He recommended the lifting of these reduced load limits at this time. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 22nd day of October, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

TAMPICO-LEWISVILLE SECONDARY HIGHWAY from its junction with the Pacific Highway West, north of Corvallis, to the Benton-Polk County Line, in Benton County; and

WHEREAS, on the 6th day of January, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

SILETZ SECONDARY HIGHWAY from the junction with the Oregon Coast Highway near Kernville to the junction with the Corvallis-Newport Highway near Toledo, in Lincoln County; and

WHEREAS, on the 16th day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

PENDLETON-JOHN DAY HIGHWAY between its junction with the Oregon-Washington Highway, at Nye, and Ukiah, in Umatilla County; and

WHEREAS, subsequent to the passage of said resolutions, conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions on the said state highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

TAMPICO-LEWISVILLE SECONDARY HIGHWAY from its junction with the Pacific Highway West, north of Corvallis, to the Benton-Polk County Line, in Benton County;

(Continued on next page)

MAY 12 1938

SILETZ SECONDARY HIGHWAY from the junction with the Oregon Coast Highway near Kernville to the junction with the Corvallis-Newport Highway near Toledo, in Lincoln County;

PENDLETON-JOHN DAY HIGHWAY between its junction with the Oregon-Washington Highway, at Nye, and Ukiah, in Umatilla County

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer also reported that the Klamath Falls-Lakeview Highway from a point 25 miles east of its junction with The Dalles-California Highway to Lakeview has dried out sufficiently so that the 50 per cent reduced load limit heretofore in effect is no longer required but the road is still in such condition that it will not hold up under legal weight loads. He recommended, therefore, the modification of the Commission's previous order with respect to this section and that loads weighing not to exceed 75 per cent of the legal weight limits be now allowed. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 16th day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway near Klamath Falls, in Klamath County, to Lakeview, in Lake County;

and

WHEREAS, on the 14th day of April, 1938, the Commission passed and adopted a resolution lifting the reduced load limit on that portion of the said highway from its junction with The Dalles-California Highway to a point 25 miles easterly thereof, in Klamath County; but continued said reduced order from said last-named point to Lakeview, in Lake County;

and

WHEREAS, it now appears that conditions have changed and

MAY 12 1938

the Commission now finds that it is no longer necessary to maintain or impose the said reduced load limit to the full extent fixed in said order and resolution with respect to the said highway from a point 25 miles east of the junction with The Dalles-California Highway to Lakeview, in Lake County; and further finds that such resolution and order should be modified with respect to said section of said highway by which modification a greater maximum combined weight of load and vehicle will be permitted;

NOW, THEREFORE, BE IT RESOLVED that the resolution and order made and entered into by the Commission on the 16th day of February, 1938, with respect to the following section of the Klamath Falls-Lakeview Highway, be and the same hereby is further modified to read as follows:

The maximum weight of combined load and vehicle which shall be permitted on the Klamath Falls-Lakeview Highway from a point 25 miles east of the junction with The Dalles-California Highway to Lakeview, in Lake County, shall be restricted to the following weights: the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed the product of four hundred fifty (450) multiplied by the sum in inches of the tire width of the wheels of such axle; but in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) per cent of the maximum limit set by law for any one axle.

BE IT FURTHER RESOLVED that this resolution shall be in full force and effect until changed, modified, or rescinded by the Commission; and be it further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission had under consideration the abandonment of portions of the Wallowa Lake Highway in Wallowa County which are no longer of value for state highway purposes, inasmuch as the highway has been reconstructed on new alignment. The Engineer exhibited maps showing the sections so affected and recommended that they be turned back to Wallowa County and the cities of Enterprise and Wallowa for disposal. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate certain portions of the Wallowa Lake Highway in Wallowa County; and

MAY 12 1938

WHEREAS, by reason of said relocation and the reconstruction of the said sections of said highway there were eliminated and made unnecessary as parts of the completed highway the certain sections which are more specifically defined and described hereinafter in this resolution;

WHEREAS, it is the judgment and opinion of the Commission that there should be reflected in the minutes and records of the Commission the purpose and plan of the Commission to abandon as parts of the Wallowa Lake Highway, and therefore as parts of the state highway system, the fragments or portions of the right of way of the old alignment hereinafter defined and heretofore included within the area of the right of way of the Wallowa Lake Highway as formerly located between the said termini and as heretofore improved and used;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas hereinafter described, which said fragments of land were formerly within the limits of the right of way of the Wallowa Lake Highway, but which are now without the limits of the right of way of said highway as said highway has been relocated be and said fragments of land are hereby abandoned as parts of the right of way of said highway. The portion of the right of way of said highway which by this resolution is abandoned and which is within the limits of the City of Wallowa is left to revert to the abutting property owners or to the City of Wallowa for such public use as the City may make of the same and the portion of said right of way lying just outside of the City of Wallowa which is abandoned by this resolution is left to revert to the County Court of Wallowa County for such public use as the County may make of the same, or to the abutting property owners. The portion of said right of way which has been abandoned within the City of Enterprise by this resolution is left to revert to the abutting property owners or the City of Enterprise for such public use as the said City may make of the same. The portion of the Rock Creek-Wallowa Section of said highway which is hereby abandoned is left to revert to the County Court of Wallowa County for such public use as the said County may make of the same or to the abutting property owners.

2. That the fragment of land or right of way hereby abandoned and eliminated from the state highway system which is shown on the blueprint marked "Exhibit 'A'", and is a portion of the Rock Creek-Wallowa Section and is to revert to the supervision and control of the County Court of Wallowa County or to the abutting property owners is described as follows, to wit:

MAY 12 1938

That certain section of the old right of way of the Rock Creek-Wallowa Section of the Wallowa Lake Highway lying on the southerly side of the right of way required for the reconstructed Wallowa Lake Highway, the beginning and ending points with reference to the engineer's stations of the original constructed highway being station 476+75 on the westerly end and station 494+95 on the easterly end.

3. The fragment of land or right of way hereby abandoned and eliminated from the state highway system which is shown on the blueprint marked "Exhibit 'B'", a part of which lies within the City of Wallowa, is to revert to the supervision and control of the officials of the City of Wallowa, and a part of which lies without the limits of the City of Wallowa and is to revert to the County Court of Wallowa County or the abutting property owners, is described as follows, to wit:

All that certain section of the old right of way of the Elgin-Wallowa Section of the Wallowa Lake Highway lying on easterly and westerly side of right of way required for the reconstructed Wallowa Lake Highway, the beginning and ending points with reference to the engineer's stations of the original constructed highway being station 672+00 on the westerly end and station 751+30 on the easterly end, said section being described as follows: Beginning at Station 672+00; thence southeasterly to Station 708+20 on the west city limits of Wallowa, thence southeasterly through the said City of Wallowa to the intersection of Storie Street and the north line of First Street.

4. The fragment of land or right of way hereby abandoned and eliminated from the state highway system which is shown on the blueprint marked "Exhibit 'C'" and which lies within the City of Enterprise and is to revert to the control and supervision of the city officials of the City of Enterprise is described as follows, to wit:

All that certain section of the old right of way of the Wallowa Lake Highway lying within the City of Enterprise, the beginning and ending points with reference to the streets of Enterprise are as follows: Beginning at the intersection of Grant Street and the eas' line of River Street; thence easterly along Grant Street to East 5th Street; thence southerly on East 5th Street to the present reconstructed Wallowa Lake Highway.

5. There is attached hereto a blueprint marked "Exhibit 'A'" on which is shown shaded in red the portion of the Rock Creek-Wallowa Section of the Wallowa Lake Highway which by this resolution is abandoned as a part of the said highway, and there is attached

MAY 12 1938

hereto a blueprint marked "Exhibit 'B'", on which is shown shaded in red the right of way within the City of Wallowa and the portion of the highway lying just outside of the City of Wallowa to the northwest which are abandoned as parts of the said state highway, and there is also attached hereto a blueprint marked "Exhibit 'C'", on which is shown shaded in red the right of way within the City of Enterprise which by this resolution is abandoned as a part of the state highway. The said exhibits for identification purposes bear the signatures of W. C. Williams, Division Engineer; H. G. Smith, Construction Engineer; and R. H. Baldock, State Highway Engineer, and bear date of April 1, 1938. *

6. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said abandoned sections, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said state highway.

7. That this resolution shall be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Wallowa County, together with a copy of each of said exhibits and copies of said resolution and exhibits shall be delivered to the Mayor of the City of Enterprise and to the Mayor of the City of Wallowa for such action as said County Court may desire to take and for such action as the city officials of the respective cities may desire to take, and should said abandoned portions of the highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Wallowa County, and/or the municipal authorities of the City of Enterprise, and/or the municipal authorities of the City of Wallowa, as the case may be, and the same shall be beyond any responsibility or supervision by the State Highway Commission.

A letter was presented from L. G. Apperson, City Engineer of Portland, relative to the maintenance of the following arterial streets in Portland which were county roads when the agreement between the city and the state was executed covering maintenance of highway routes through the city but which have since been taken over by the city as city streets: portions of Northwest St. Helens Road, Southwest Canyon Road, Southwest Capital Highway, Southwest Slavin Road, Southwest Macadam Avenue, North Denver Avenue, North Interstate Avenue, and Southeast 82nd Avenue. It was Mr. Apperson's

*Blueprints filed in Right of Way Abandonment and Retention File - No. 58

MAY 12 1938

suggestion that the city and the state enter into a supplemental agreement with respect to the maintenance of these streets so as to provide for the maintenance of the same by the state rather than by the city.

The Engineer advised that these streets should be maintained by the state and that it was contemplated that they would be so maintained when the original agreement was prepared and executed, and provision for state maintenance of the same was made in the original agreement; so, in his opinion, the supplemental agreement is unnecessary. The Engineer was instructed to convey such information to Mr. Apperson.

There was presented to the Commission a letter from Major S. L. Damon, Engineer of the United States War Department, advising that an application has been filed by Mr. Harley O. Youngblood, Portland, for permission to construct a dock with float landing in Depoe Bay, Lincoln County, more particularly on the ocean side of the Oregon Coast Highway at the north end of the Depoe Bay Bridge. Major Damon advises that objections to the construction of such dock should be presented to his office not later than Monday, May 16, 1938. The Engineer advised that Mr. Youngblood's plan contemplates the use of land commonly referred to as tidelands, or lands lying between the high- and low-water marks, which lands are owned by the State of Oregon. He gave as his thought that the use of this land for the purpose intended would detract from the appearance of the highway and for that reason should not be allowed. The Commission concurred in the viewpoint of the Engineer and instructed the Attorney to file a written protest with Major Damon. The Commission indicated that it would oppose the construction of a dock at this place to the full extent of its authority.

In this connection the Engineer advised that Mr. Youngblood is now constructing a building on a rock point which extends westerly from the highway on the north side of the Depoe Bay Bridge adjoining the state park at this location; that, in the performance of the work, Mr. Youngblood has destroyed a portion of the rock wall that was constructed by the state as a traffic barrier. Furthermore, he has deposited earth material on the state property and is otherwise using the state's property for personal purposes. The Commission instructed the Engineer to take steps as may be necessary to cause the cessation of the use of the state's property and to effect the repair of the damage already done.

The Commission considered and ordered filed a letter from Mrs. Pearl S. Koble, Ashland, relative to her claim for damages against the state resulting from the construction of the Pacific Highway (new route) across her property south of Ashland. The Commission considered that Mrs. Koble has been paid liberally for the land that has been taken from her for right of way purposes and accordingly denied her request for additional compensation.

The matter of permitting the Ochoco Lumber Company to construct its railroad at grade across the Ochoco Highway east of Prineville had the attention of the Commission. It appears that the proposed railroad is a private one and is a branch line extending from the O.W.R.R. & N. main-line track to the lumber company's mill. Further, that the crossing could have been avoided

MAY 12 1938

at one time if the company had seen fit to construct its mill in another location, which would have served its purpose equally as well as the present location. The Engineer recommended that the Commission oppose the construction of this grade crossing at the public hearing that will be conducted by the Public Utilities Commissioner in regard thereto and that the company be required, in lieu thereof, to construct at its sole cost and expense a grade separation structure for the operation of its trains over the highway. The Attorney endorsed the recommendation of the Engineer and suggested, if the Public Utilities Commissioner approves the grade crossing, that such Commissioner be requested to do so only as a temporary proposition, retaining the right to open the case later on. After discussion, the Commission by unanimous vote, approved the recommendation of the Engineer and the suggestion of the Attorney and ordered that, when the matter comes up for public hearing, testimony be given to the effect that the State Highway Commission is definitely opposed to all manner of railroad grade crossings.

The matter of authorizing the United States Department of Commerce, Bureau of Air Commerce, to maintain an airway beacon on state-owned property adjacent to the Columbia River Highway, in Multnomah County, and being more particularly described as Lot 3, Section 22, T. 2 N., R. 7 E., W. M., had the attention of the Commission. The Attorney explained that the Bureau of Air Commerce has maintained an air beacon on this property for some time; in fact, the beacon was erected before the Highway Commission acquired the property from Waldo A. Alcorn and that the Bureau wants to continue the beacon on this site because of its advantageous location, but prefers not to enter into a written agreement covering the matter. He further explained that the beacon is in a location that will not interfere at all with the use of the property for highway purposes and will not be objectionable from the esthetic standpoint. He recommended approval of the request. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration letters from the Eugene Chamber of Commerce and the Bend Chamber of Commerce urging snow removal operations on the McKenzie Highway so as to permit general public use of McKenzie Pass at the earliest possible time. The Engineer estimated that this work would cost approximately \$5000 if done now, and pointed out that this expense can be reduced considerably by waiting for Nature to melt the snow. He recommended that the request be denied for the time being and that the Commission concentrate on opening up the Santiam Highway easterly from its junction with the North Santiam Highway, which, he said, would cost only about \$500. He also suggested that the Commission arrange with the Federal Government and Marion County for the opening of the North Santiam Highway north from its junction with the South Santiam Highway so as to open the North Santiam Highway for general public use. In this connection, the Secretary presented a petition signed by 26 residents of Mill City and vicinity urging the opening of the North Santiam Highway for through travel into Central Oregon.

After discussion the Commission approved the Engineer's recommendation by unanimous vote and authorized him to proceed in conformance therewith. The Secretary was instructed to inform the petitioners of the action taken.

MAY 12 1938

A letter was presented from Earl B. Day, County Judge of Jackson County, protesting the allocation of Federal Aid Secondary Highway Funds as made to that county. The Engineer was instructed to prepare a suitable reply for Chairman Cabell's signature, advising Judge Day of the facts in regard to the allocation of the funds in question.

A letter was presented from Paul O. Landry, President of the Lake-of The Woods Association, Klamath Falls, urging an allocation of funds for additional improvements to the Westside Klamath Lake Secondary Highway. The Commission denied the request on account of lack of funds to finance the work.

The Commission considered and ordered filed a resolution adopted by the Hood River County Garden Club protesting the erection of billboards and signs along state highway rights of way.

A resolution was presented from the Portland Realty Board recommending that arrangements be made for the use of certain motion pictures of Oregon scenery taken by Miss Katherine Gunnell, Salem, in connection with the activities of the Highway Commission's Travel and Information Department. The Commission referred this matter to Mr. Harold Say, Director of the Travel and Information Department, and to the Advisory Committee on publicity matters.

A letter was presented from the Prairie City Chamber of Commerce urging additional improvements to the John Day Highway. The Engineer was instructed to advise the Chamber of Commerce that the Commission feels that it is now doing all that it possibly can for this highway with the funds available. He was also instructed to send them a list of the projects on this highway that are now included in the Commission's program for 1938 construction and those that are contemplated for 1939 construction, with amounts budgeted for each.

The Secretary presented letters from the Lane County Court, McKenzie River Grange No. 878, and from the Board of Directors of the Vida Public Schools, Vida, Oregon, urging the construction of guard fence along portions of the McKenzie Highway in the vicinity of Leaburg Dam to prevent automobiles being driven off the highway into the river at such location. The Engineer advised that he has already instructed the Maintenance Engineer to construct guard fence and sight posts at dangerous points, which should take care of the matter satisfactorily. The Commission approved the action taken by the Engineer.

The Commission considered and ordered filed a letter from C. C. Hockley, Regional Director for the Emergency Administration of Public Works, acknowledging receipt of the Commission's letter of May 4, 1938, relative to the status of its application for P.W.A. projects and advising that this information will be held in readiness for discussion at such time as action by Congress will permit the receiving of new applications for such class of projects.

The Commission considered and ordered filed a letter from the North

MAY 12 1938

Bend Chamber of Commerce expressing appreciation of assurances given that the Commission proposes to improve Sherman Avenue in North Bend and to do certain oiling work on the Cape Arago Secondary Highway in the vicinity of Charleston, Coos County.

The Commission considered and referred to the State Parks Superintendent for recommendation a letter from Mrs. J. R. Huffman, Pendleton, inquiring whether or not the Commission has any objection to her maintaining a store building and service station adjacent to the right of way of the Old Oregon Trail, near Emigrant Springs Park, in Umatilla County. The Commission indicated that it would not object to a commercial business being established adjacent to the right of way if it could not be seen from the traveled roadway.

Reconsideration was given by the Commission to the matter of advertising billboards which the Foster & Kleiser Company of Portland proposes to install adjacent to the Oregon Coast Highway at Otis, in Lincoln County, one of which billboards is to attract travel over the Salmon River Highway into Portland, and the other to encourage travel over the Oregon Coast Highway north of Otis. The Engineer presented revised models of the billboards, as prepared by the Foster & Kleiser Company. After considerable discussion, the Commission approved the designs, it appearing to the Commission that they do not conflict with the Commission's interpretation of the law with respect to such matters. The Commission instructed the Engineer to advise Foster & Kleiser Company of the action taken and to inform them further that, while the Commission has approved these two signs insofar as compliance with the law is concerned, it wishes to emphasize the fact that it does not approve the principle of erecting signs of this type along state highway rights of way.

The matter of encroachment of advertising signs of business establishments along the Columbia River Highway through the Parkrose District east of Portland also had the attention of the Commission and in this connection the Engineer submitted for the Commission's approval a set of general rules and regulations covering the matter of regulation of advertising signs on or adjacent to highways through unincorporated towns or villages. The Commission indicated approval of these regulations but deferred definite action thereon until the next meeting. The Engineer was instructed to send the individual Commissioners a copy of the rules for study in the meantime.

The Commission considered the request of Edlefsen-Weygandt Company for an extension of time from March 31 to July 15, 1938, within which to complete their contract with the Commission for the grading of the Siuslaw Junction-Awbrey Section of the Pacific Highway, in Lane County, State Highway Contract No. 2000. They alleged that they were unable to complete the project within the specified time limit because of high-water conditions during the winter season. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended, in view of the fact that the delay was beyond control of the contractor, that the extension now requested be granted without penalty, notwithstanding that the state has incurred some additional engineering expense in connection therewith. A letter was presented from W. H. Lynch,

MAY 12 1938

District Engineer, Bureau of Public Roads, concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer reported that contracts Nos. 2016 and 2024 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance:

Contract No. 2016, with H. L. Rice, for furnishing 6,200 cu.yds. crushed rock in stock piles for the Wasco County Line-Madras Section of The Dalles-California Highway, in Jefferson County. Completed April 25, 1938.

Contract No. 2024, with Babler Bros., for resurfacing the Poison Creek-Burns Section of the John Day-Burns Highway, in Harney County. Completed May 5, 1938.

THEREFORE, BE IT RESOLVED that the work covered by said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Babler Bros., contractors for the construction of an oil mat surface on the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Harney and Lake Counties, contract No. 1973, providing for the substitution of a light oil treatment over a portion of this contract;

Bargain and sale deed, conveying unto Alma McElwain 0.03 acre of land adjacent to the highway right of way in the S.E. $\frac{1}{4}$ of the N.E. $\frac{1}{4}$ of Section 13, T. 1 N., R. 1 E., W. M., Multnomah County, right of way transaction Nos. 5436 and 5484;

Bargain and sale deed conveying unto Ira Wade certain property lying in Government Lot 2 of Section 32, T. 10 S., R. 11 W., W. M., Lincoln County, and Lots 2, 3, 4, 5, and 6, of Block 145, Agate Beach No. 2, being right of way transactions Nos. 5018 and 3932;

Bargain and sale deed conveying unto the City of Albany, for

MAY 12 1938

the sum of \$1,386.00, 19,800 sq. ft. of land situate in Lots 1, 2, 3, and 4, of Block 17, Hackleman's Second Addition to Albany, being right of way transaction No. 4962-A.

The Commission had under consideration the setting of a date for its first regular meeting following that heretofore scheduled for June 2 and 3, 1938, and it was decided to hold such meeting in Portland on Wednesday, June 15. The Secretary was instructed to make the usual arrangements to hold such meeting in the Auditorium of the Public Service Building.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

[Signature]
State Highway Engineer
[Signature]
Secretary

Henry F. Cabell
Chairman
E. B. Aldrich
Commissioner
F. L. Tou Velle
Commissioner

Portland, Oregon, June 1, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in Room 204, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission had under discussion the matter of permitting the Umatilla Grain Growers Association to construct a dock and elevator on state highway department property at Cold Springs Landing, in order to facilitate the transportation of wheat on barges in the Columbia River. It appears that the association wants to construct its elevator on the state highway right of way at this point. It also appears that, while the highway leading to the river at this point is a primary state highway, it was originally constructed to very poor standards by county forces and has never been maintained as a state highway; and, in order to assist the association in its plans, the County Court of Umatilla County suggests that the Highway Commission turn this road over to the county for maintenance and designate as a state highway, in lieu thereof, the county road leading from the highway to the Collins Warehouse at Cold Springs, which road is oiled and in much better condition.

JUN 1 1938

In the discussion of this matter it was brought out that the Cold Springs Highway extending to the Cold Springs Landing is a primary state highway and cannot be removed from the state highway system except by legislative action, for which reason the hands of the State Highway Commission are tied as far as rendering any assistance is concerned. It was decided to convey this information to the delegation that is to appear before the Commission the following day in regard to the matter.

Dr. Warren D. Smith and Mr. Earl K. Nixon, of the University of Oregon, came before the Commission in regard to the publishing of a manuscript containing information concerning the geological and plant life features of the Oregon Coast Highway. Dr. Smith advised that this manuscript has been in the course of preparation several years and is now ready for publication, but the University of Oregon is not financially able to undertake the work, so they are asking the State Highway Commission to give it consideration, in view of the fact that it contains information that would be of interest to tourists and would be especially attractive to people who are interested in the coast country. The State Highway Commission's contribution to this cause, he said, would be in the nature of a loan with provision for reimbursement from receipts of the sale of the book.

Chairman Cabell questioned the Commission's authority to spend state highway funds for such purpose and advised that in any event the Commission could not assume this responsibility unless it received the approval of the Advisory Committee of the Travel and Information Department. Commissioner Aldrich concurred in the remarks of Chairman Cabell and added that he could not see how it could be considered in any way as a part of the state highway program. He explained, further, that the Commission's budget for publicity purposes has already been spent for this year and the program for next year has been arranged.

Mr. Nixon advised that the plan calls for the publishing of 1,500 copies of this book at a cost of about \$1,500, of which amount approximately \$400 would be paid by the State Board of Mineral Industries. After further discussion Chairman Cabell expressed regrets that the Commission cannot cooperate in this undertaking, but, in his estimation, it would be establishing an undesirable precedent and might bring criticism on the Commission. He added that the Commission would loan cuts and prints as may be necessary for use in connection with the publication of this book but that is as far as the Commission can go.

Mr. Harold B. Say, Manager of the Travel and Information Department, reported that the state committee in charge of the New York Fair exhibit wants the Highway Commission to reconsider its action in refusing to cooperate in maintaining an exhibit at this fair. He was instructed to inform this committee that the Commission has made its decision in this matter and does not care to reopen the case.

Mr. Ray Conway, Manager of the Oregon Motor Association, was present and advised that the Motor Association has gone on record as being opposed to making any contribution to the New York Fair exhibit.

Mr. Say also reported a request from the Swedish-American Tercentenary Association for a contribution of state highway funds with which to finance the advertising of the State of Oregon at the Association's convention which is to be held in Delaware on June 22, 1938. The Commission denied the request.

The Commission by unanimous vote approved the minutes of the meetings held on January 5, 6, and 7, and on February 15, 16, 17, 18, and 19, 1938.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

After careful consideration the Commission approved the prices offered by the Attorney for these properties and authorized him to condemn the several tracts on the basis of such prices if satisfactory settlements cannot be reached otherwise. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

JUN 1 1938

Drews Valley Section of the Klamath Falls-Lakeview Highway
 Interstate Avenue-Denver Avenue Section of the Pacific
 Highway West
 Houlton-Warren Section of the Columbia River Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Drews Valley Section of the Klamath Falls-Lakeview Highway
 D. O. Tracy and Elizabeth Tracy; Evelyn Steel and
 R. A. Steel; Chris Siems; Oren R. Smith; E. E. Waterman; George E. Tooser

Interstate Avenue-Denver Avenue Section of the Pacific
 Highway West

John Hatala and Anna Hatala; Bawa Singh; J. Campbell;
 Thomas G. Donaca; McGuire Construction Company; Emily
 A. Reckard; Caroline W. Woodward; Eva Roskoski and A.
 Roskoski

Houlton-Warren Section of the Columbia River Highway
 Ernest Tucker and Caroline Tucker

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State

JUN 1 1930

of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General, and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The matter of securing options for right of way needed for the proposed reconstruction of the Oregon-Washington Highway between Pendleton and Adams, in Umatilla County, had the attention of the Commission. The Commission decided to defer the taking of such options until the Attorney has consulted with the officials of the Federal Land Bank in Spokane in regard to the payment of damages for severance.

The Attorney brought up for discussion the matter of employing appraisers to appraise the Security and Investment Company property in Oregon City, a portion of which is needed for right of way for the East Portland-Oregon City Highway in this town. After considerable discussion the Commission authorized the Attorney to secure the services of the following men, who are recognized real property appraisers: J. B. Laber, Henry Reed, and N. C. Soule, all of Portland.

The Attorney reported that in connection with the acquisition of right of way for the Albany grade separation project it was agreed that the state should move certain houses from Block 20 and re-establish them with their appurtenances on Block 19, and in order to do this properly it will be necessary to extend the existing sewer from Block 18 across Jackson Street to the east side of Block 19. He advised that he has a letter from the City of Albany to the effect that this work will cost \$546.50, of which amount the city will pay \$99 for the installation of the sewer pipe across Jackson Street, which is a city responsibility; but the balance of the expense, \$447.50, is the obligation of the state on account of the agreement with the property owner. He further advised that the city has expressed a willingness to perform this work for the state if the Commission so desires and will reimburse the city for the expense involved. He recommended acceptance of the city's offer. The Commission approved the recommendation by unanimous vote.

The matter of salvaging the brick in an old brewery building at Albany, which was acquired by the Commission in connection with the purchase of right

of way for the Albany railroad grade separation project also had the attention of the Commission. The Attorney advised that the bricks are in good condition and would have a salvage value of about \$1,200. Furthermore, the bricks could be used to good advantage in the construction of a maintenance headquarters building in Albany if and when such building is needed. He suggested the salvaging of this brick as a W.P.A. project at an estimated total cost of \$2,000, of which amount the state's share would amount to \$500, the balance representing W.P.A. funds. After some discussion the Commission referred the matter to the Engineer for further investigation and report at the next meeting.

The Attorney presented an offer from the Silets Investment Company and W. F. Cary to sell to the state for right of way for the Oregon Coast Highway, certain lands situate at Gleneden Beach, Lincoln County. He said that the owners are demanding the sum of \$7,500 for this property, which is appraised at about \$3,000. The Commission rejected the offer by unanimous vote.

Reconsideration was given to the matter of evicting Mr. E. N. Boylen from the Sunset Inn State Park property on Emigrant Hill, Umatilla County. The Attorney advised that Mr. Boylen had an agreement some time ago with the Commission to occupy these premises, but the agreement has expired and Mr. Boylen still owes the state back rent in the amount of \$91.67. He further stated that Mr. Boylen is willing to vacate the premises and remove his buildings therefrom but wants to be allowed to remain there until November of this year. The Commission decided to let him occupy the premises until September 1, with the understanding that he will remove his buildings at that time and will pay the entire amount of the rental that is due. The Commission instructed the Attorney to convey such information to Mr. Boylen and to advise him further that he will not be permitted to remove the buildings from the premises until the full amount of the rental has been paid.

The Engineer brought up for discussion the matter of awarding the contract for the construction of the Airport Road Overcrossing Project on Northeast 42nd Avenue, Portland, bids for which are to be taken on the following day. He said that Multnomah County is acquiring the right of way for this project, but it appears now that the right of way negotiations will not be completed in time to award the contract on the same day. He suggested, notwithstanding this situation, that bids be received as advertised but that the award of the contract be held until the right of way situation has been clarified. The Commission approved the suggestion by unanimous vote and ordered that if a satisfactory bid is received the contract be held until the Commission's Attorney has approved title to the right of way, and a satisfactory clearance, in writing, relative to the right of way, has been received from the Board of County Commissioners. (A communication was received from the Board of County Commissioners of Multnomah County the following day, satisfactorily disposing of this right of way situation, and the contract for the project was awarded.)

In this connection the Commission adopted as its policy, to be followed hereafter, that no county road projects shall be advertised for bids

until all right of way matters in connection with same have been disposed of to the satisfaction of the Commission.

The Commission had under discussion a letter from the County Court of Marion County in regard to the right of way for the Salem-Independence road project between Roberts Station and Orville, bids for which are to be received by the Commission on the following day. It appears that the county's resolution proceedings to acquire the right of way included the section from a point one mile north of Orville to Orville, where the road encroaches upon the right of way of the Oregon Electric Railroad. It also appears that the railroad company has offered objections to this encroachment, and when this information came to the attention of the State Highway Department the project was shortened so as to eliminate the portion where the right of way is in controversy, but the county's right of way resolution could not be corrected in this regard and the County Court had to start new proceedings to cover the limits of the project only.

In its communication the County Court expressed a desire for the Commission to proceed with the taking of the bids and the awarding of the contract regardless of this fact so that the project will not be delayed. After some discussion the Commission decided to proceed with the taking of the bids as advertised, but to defer the awarding of the contract until the right of way situation has been satisfactorily settled.

The State Parks Superintendent, Mr. S. E. Boardman, was present and reported on the following:

Acquisition of thirteen 40-acre government-owned juniper tracts adjacent to The Dalles-California Highway between Bend and Redmond:- The Parks Superintendent advised that these tracts are worthy of preservation and that he believed they could be acquired from the Government at \$2.50 per acre, or a total of \$1,300, by an exchange of property owned by the State Land Board, which has indicated a willingness to make such exchange. He recommended acquisition of these tracts on such basis, the State Highway Engineer concurring therein. The Commission approved the recommendation by unanimous vote.

Acquisition of spring and reservoir site adjacent to the Umpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent advised that in the development of this park it is proposed to expend \$5,000 of C.C.C. funds in the construction of a water system, the water to be supplied from a spring located on private property adjacent to this park area. He further advised that the owner of this property refuses to give right of way for the pipe line from the spring to the park or to set a price for the same. He requested authority to offer the man \$100 for one acre of land that is involved, including the area on which the spring is located, reservoir site, and the right of way for the pipe line. In the discussion of this matter it was brought out that the state has already secured a water right for this spring and that it would be advantageous to acquire several acres rather than just enough land to include the spring and reservoir site. Accordingly, the Parks Superintendent was authorized and instructed to negotiate with the owner for the acquisition of the larger tract and report later the results thereof.

JUN 1 1938

Request of Mrs. J. R. Huffman to maintain a store building and gasoline pump adjacent to the Old Oregon Trail, near Emigrant Springs, in Umatilla County:- The Parks Superintendent recommended against the granting of Mrs. Huffman's request because to grant it would establish an undesirable precedent and would defeat the purpose for which the timber strip adjacent to the Old Oregon Trail was acquired. Furthermore, it would be contrary to the established policy of the Commission which will not now permit encroachments of this kind on state highway rights of way. After discussion the Commission approved the recommendation by unanimous vote; however, authorized the granting of a permit to Mrs. Huffman to construct a private roadway across the state land to her property.

Request of Frank B. Tichenor for authority to distribute publicity material advertising the State of Oregon at Battle Rock State Park, Port Orford, during the summer tourist season:- The Parks Superintendent advised that Mr. Tichenor desires to establish a tourist information bureau at this state park and in connection therewith to hand out literature which he proposes to prepare. Furthermore, that he is asking the Commission to authorize him to do this at state expense for a 4-month period, at the rate of \$50 per month. He said that he now maintains a caretaker at this park and can conceive of no benefits being derived from Mr. Tichenor's services, particularly in view of the fact that the Commission now maintains its own Travel and Information Department for the dissemination of such publicity material. He recommended against the granting of the request. The Commission approved the recommendation unanimously.

Maintenance of Chief Joseph monument at Wallowa Lake, in Wallowa County:- The Parks Superintendent advised that Superintendent O. L. Babcock, of the Umatilla Indian Reservation, proposes to improve the site of the Chief Joseph monument at Wallowa Lake, with C.C.C. forces, at a cost of approximately \$2,500, but he would like to have the state Highway Department maintain the premises after the monument has been completed because he has no funds available to finance such work. The Parks Superintendent advised that he has no caretakers in this vicinity who could maintain this monument site; furthermore in his estimation, such maintenance work is a responsibility of the Indian Service or of the people who sponsored the project. It was his further belief that the assumption of this obligation by the Commission would establish an undesirable precedent and he accordingly recommended denial of the request. The Commission approved the recommendation by unanimous vote.

Offer of S. C. Armitage to donate state park near Eugene:- The Parks Superintendent advised that this proposed park contains 33 acres of land situate adjacent to a county road, about 5 miles north of Eugene, and fronts on the McKenzie River. He said that the matter has had the attention of the Commission on several occasions in the past but a decision has been deferred; that Mr. Armitage is an old man and would like very much to have the state own this property and is particularly anxious that a definite decision be made as soon as possible. The Commission expressed a desire to view this property before making its decision and agreed to do so in the near future.

JUN 1 1932

Proposed Park adjacent to the Oregon Coast Highway north of Necanicum, Lincoln County:- The Parks Superintendent gave as his understanding that a delegation will come before the Commission during this meeting and urge the Commission to purchase this 115-acre tract for the sum of \$21,000. He said that the tract does not fit into the state park picture and recommended that the delegation be so informed. The Commission indicated concurrence in the Parks Superintendent's viewpoint but decided to view this property on Saturday morning, June 4, enroute to Medford, before making a definite decision in regard thereto.

The Commission adjourned at 11:00 o'clock p. m., to reconvene at 9:00 o'clock on the following morning in the Public Service Building Auditorium.

Portland, Oregon, June 2, 1938.

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were all three Commissioners, the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction projects, sale of bridge steel, sale of buildings, and sale of three vacant lots in Albany, were opened and read, in conformance with previously published notice:

Chairman Cabell announced that the awards in connection with the bids received would be made at 3:00 o'clock p. m. in the same room. He also announced that the Commission received bids for the construction of the Tone Bridge, over Trask River, in Tillamook County, on behalf of Tillamook County Court, to whom the bids will be referred for disposal. He cautioned bidders

JUN 2 1938

hereafter, when submitting bids for county road projects, to use the proposal bond forms prepared for county roads rather than the state forms.

The County Court of Klamath County, represented by County Commissioners Roy Taber and Wm. F. B. Chase, came before the Commission in regard to the allocation of Federal Aid Secondary Highway Funds in Klamath County. They gave as their understanding that the Commission proposes to spend \$61,000 of such funds in Klamath County and has allocated \$25,000 of the 1939 funds for grade widening, surfacing, and oiling a section of the Klamath Falls-Lakeview primary state highway, which is contrary to their wishes and expectations because they had it in mind that the money must be spent for county road construction and that the Commission would finance the improvement of the Klamath Falls-Lakeview Highway with other funds.
